Some ticket books assigned to police officers were not posted to the log of ticket books maintained by the Police Department, and the log prior to May 2012 could not be located. In addition, there were no procedures to ensure each ticket was entered into the department's case management system by officers and accounted for properly.

The former Court Administrator did not track tickets that required no court action, such as voided tickets and warnings. Additionally, the former Court Administrator did not use the municipal division's computer system to

account for the numerical sequence of tickets received from the Police Department and entered into the municipal division's computer system.

Recommendation

The City of New Melle Municipal Division work with the Police Department to ensure the numerical sequence and ultimate disposition of all tickets issued are accounted for properly.

Status

Implemented

The Police Department implemented a log to account for ticket books assigned to officers. The Court Administrator indicated she ensured all tickets were entered in the computer system monthly.

2.3 Municipal Division Procedures - Prosecuting Attorney approval

The Prosecuting Attorney did not sign all tickets processed by the municipal division as required by the Missouri Supreme Court Rules. The Prosecuting Attorney did not review and approve tickets paid through the violation bureau prior to court. In addition, the Prosecuting Attorney allowed the former Court Administrator to maintain the Prosecuting Attorney's signature stamp and stamp her signature on tickets submitted to the state's Department of Revenue for suspension of driving privileges for failure to appear in court.

Recommendation

The City of New Melle Municipal Division ensure the Prosecuting Attorney signs all traffic tickets, and discontinue the practice of using the Prosecuting Attorney's signature stamp.

Status

Implemented

The Court Administrator indicated she ensured the Prosecuting Attorney signed all traffic tickets, and she discontinued use of the Prosecuting Attorney's signature stamp.

2.4 Municipal Division Procedures - Ticket dispositions

The Municipal Judge did not approve all ticket dispositions. The Municipal Judge did not review and approve traffic tickets paid through the violation bureau, or the final docket report showing ticket dispositions recorded in the system.

Recommendation

The City of New Melle Municipal Division ensure the Municipal Judge signs all court dockets.

Status

Implemented

The Court Administrator indicated she ensured the Municipal Judge signed all court dockets.

2.5 Municipal Division Procedures - Organization of records

Some municipal division records requested during the audit, including six case files and several bond bank account statements, could not be located. In addition, it took several weeks for municipal division and city officials to locate some requested records.

Recommendation

The City of New Melle Municipal Division ensure records are appropriately retained, and organized efficiently so records can be readily located.

Status

In Progress

The Court Administrator indicated she organized most old court records; however, many of these records were maintained poorly and difficult to understand. She indicated she maintained current records in a logical, organized manner.

*Includes selected findings

THOMAS A. SCHWEICH
Missouri State Auditor

To the Board of Education
Ash Grove R-IV School District

We have conducted follow-up work on certain audit report findings contained in Report No. 2014-031, *Ash Grove R-IV School District*, issued in May 2014, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the district about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the district, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. As part of the AFTER work conducted, we met with district officials and personnel and reviewed supporting documentation they provided us. Documentation reviewed included School Board meeting minutes, policies, receipt and deposit records, payroll records, employment contracts, year-end financial reports, budgets, and various other district records. This report is a summary of the results of this follow-up work, which was substantially completed during October 2014.

Thomas A. Schweich
State Auditor

Ash Grove R-IV School District
Follow-Up Report on Prior Audit Findings
Status of Findings

1. Accounting Controls over Cash Receipts and Change Funds

The district needed to improve its handling of various types of student activity and program receipts primarily received in cash and change funds.

1.1 Segregation of duties

The district had not adequately segregated duties of receiving, recording, and depositing or transmitting monies at the three schools or the administrative office, and documented supervisory or independent reviews of the accounting records were not performed.

Recommendation

The School Board segregate accounting duties to the extent possible and ensure periodic supervisory or independent reviews are performed and documented.

Status

In Progress

The Secretary to the School Board receives and records all monies received at the administrative office and prepares the deposit for most monies received. A comparison of monies received to those deposited has not been performed. The Superintendent indicated he will compare manual receipt slips issued by the Secretary to the School Board to deposits beginning in November 2014 and will document this action on a regular basis by initialing these reports.

The junior high/high school secretary receives and records monies collected, prepares the deposit for meal collections, and transmits the monies to the Secretary to the School Board for deposit. A comparison of monies received to those deposited has not been performed; however, the Principal indicated he will begin comparing manual receipt slips issued by the junior high/high school secretary to meal collection reports and to deposits and will document this action on a regular basis by initialing these reports beginning in November 2014.

The Ash Grove and Bois D'Arc Elementary secretaries receive and record monies collected, prepare the deposit for meal collections, and the monies are transmitted to the Secretary of the School Board for deposit. A comparison of monies received to those deposited has not been performed; however, the Principals indicated they would start performing this comparison in November 2014.

1.2 Receipting, recording, depositing, and transmitting procedures

The School Board had not established written policies that address the types of records to be maintained and the accounting procedures to be followed by employees for the collection of district monies. We noted several concerns regarding receipting and recording procedures, and identified numerous instances where staff did not transmit or deposit receipts timely and intact.

The administrative office and schools did not have adequate procedures in place to properly record all monies received. Some district receipts are handled by several employees before deposit and there was not always adequate documentation to support the transmittal of monies from one district employee to another. District personnel issued generic rediform manual receipt slips for some monies received. Receipt slips did not always indicate the composition of receipts, and the district did not reconcile the method of payment on the receipt slips to the composition of receipts recorded in the accounting system or to the deposit or transmittal. Original copies of some voided receipt slips were not retained.

The Secretary to the School Board did not always deposit monies received timely and intact. Teachers and school secretaries did not always transmit monies collected to the administrative office timely. Teachers sometimes used student activity fees to pay expenses of events rather than the fees being transmitted to the school secretary for deposit. One teacher borrowed monies from district receipts located in the junior high/high school office. Cash received at the junior high/high school office for caps, gowns and other graduation items ordered by students was paid directly to a vendor without documentation of transmittal. The district did not require inventory records of concession items purchased, sold, and on hand to be maintained, and reconciled to concession monies collected.

Recommendation

The School Board establish written policies to address the types of records to be maintained and procedures to be followed for the collection of district monies and monitor controls and procedures in all district schools and the administrative office. In addition, the Board should ensure transmittals of monies between employees are documented, checks are issued for purchases, and amounts collected for concessions are periodically reconciled to changes in concession inventory.

Status

In Progress

The School Board has established written policies to address the types of records to be maintained and procedures to be followed for the collection, transmittal, and handling of district monies.

Prenumbered official receipt slips are issued by the Secretary to the School Board and the method of payment is documented. However, during our review of receipt slips issued from August 15 to August 25, 2014, receipt slips were not issued for $9,460 received by the district through the mail. The Secretary to the School Board indicated she would immediately start issuing receipt slips for all monies received, including those received through the mail.

During the period August 14 through August 25, 2014, the junior high/high school secretary issued prenumbered official receipt slips for all monies

received, documented the method of payment, and transmitted the monies received timely to the Secretary to the School Board for deposit. Junior high/high school teachers issued prenumbered official receipt slips for monies received for this time period; however, the receipt slips were not always complete. Some receipt slips issued did not include the date of receipt or person receiving the monies. In addition, some of the teachers did not follow the district's new policy to transmit all monies received to the building secretary and instead transmitted the monies to the Secretary to the School Board. The junior high/high school Principal indicated the handling of district monies and related district policies would be re-communicated to the teachers.

Prenumbered official receipt slips are issued by the Ash Grove and Bois D'Arc Elementary secretaries. However during our review of manual receipt slips issued from August 14 through August 25, 2014, the receipt slips were not always issued in date sequence. The secretaries indicated they record meal collections in the computerized meal system at the time of receipt, and when time allows they issue manual receipt slips. We noted the method of payment was recorded on manual receipt slips and in the computerized meal system; however, the secretaries did not generate a collection report from the computerized system or compare the composition of manual receipt slips to the deposit. The composition of receipts (cash and check), according to the meal system collection reports generated at our request for August 14 and 15, 2014, did not agree to the composition of monies transmitted to the Secretary to the School Board for either elementary school. In addition, meal collections for August 14 and 15, 2014, were not transmitted to the Secretary to the School Board until August 18, 2014 (Ash Grove Elementary), and August 21, 2014 (Bois D'Arc Elementary). Both elementary secretaries indicated they would immediately start transmitting monies more timely, generating a computerized meal collection report at the time of transmittal, and comparing composition of monies received to those transmitted, documenting any differences.

The Superintendent indicated the district will start monitoring concession inventory in January 2015, by taking an inventory at the beginning of the year and regular inventories throughout the school year. Concession monies collected will be reconciled to concession inventories and purchases.

1.3 Security of monies

Monies collected were not always maintained in a secure location, and the district had numerous cash collection points throughout the schools. Teachers stored student activity monies in unlocked desks and file cabinets in classrooms at the junior high/high school, and were also allowed to store monies in a closet in the school office, which was accessible to all employees of that school during the school day. These monies were not tracked or accounted for by the school's secretary. In addition, checks received were not always restrictively endorsed immediately upon receipt.

Recommendation

The School Board maintain monies collected in a secure location, restrictively endorse checks and money orders immediately upon receipt, and consider establishing centralized collections points.

Status

Implemented

The district implemented new policies requiring all monies collected by teachers to be submitted to the building secretaries daily. Each building secretary indicated monies held overnight are stored in a locked safe, and checks and money orders are endorsed upon receipt.

1.4 Meal collections

The district did not account for tokens and meal cards or perform a reconciliation of the tokens and meal cards to the related monies collected.

The junior high/high school secretary did not maintain a daily collection log to account for meals purchased by students, and the district had not established procedures to account for tokens and meal cards used by students to obtain meals. The junior high/high school secretary prepared a weekly meal report; however, it was not complete. The junior high/high school secretary transmitted lunch monies to the Secretary of the School Board for deposit, and no meal collection report was prepared to support the transmittal.

Elementary teachers did not use a consistent form of recording student meal collections, and the elementary secretaries did not maintain a complete and accurate daily collection log. The elementary secretaries prepared a monthly report of meals served and collection log for the administrative office; however, the collection log was not accurate.

Meal collections were not always transmitted to the administrative office timely. Due to the lack of records maintained by the junior high/high school and elementary offices, the district did not have an adequate system to track meal accounts receivables or payables. A reconciliation of meals served to meals purchased, charged, and any meal monies on hand was not performed. Discrepancies were noted between the amount of meal collections (based upon records of meals served) and the amount of meal collections deposited.

Recommendation

The School Board ensure adequate controls, procedures, and records are established to properly account for meal collections at each school.

Status

In Progress

The district implemented a new meal collection system in Spring 2014. However, the two elementary schools were not generating computerized collection reports for each transmittal made to the Secretary to the School

Board. The secretaries at each school indicated they would immediately start preparing these reports. The junior high/high school secretary was transmitting meal collections to the Secretary to the School Board timely; however, the two elementary school secretaries were not. An accounts receivable report is not being generated or reviewed by district personnel at any of the three schools. The Superintendent indicated the district would immediately start to transmit monies received at the elementary schools more timely. The Superintendent also indicated the school district would contact the computer programmer to obtain a report that displays accounts receivable, which will then be reviewed and documented for accuracy by building Principals at least monthly starting in November 2014. The Secretary to the School Board reconciles meals served to invoices from the food service vendor.

1.5 Change funds

Controls over district change funds needed improvement. The district did not have a list of approved change funds and the authorized balances, or a written policy regarding change funds. Some change funds were not maintained at a constant amount, some schools occasionally held monies out of district receipts to make change, and one teacher indicated he used personal monies to make a change fund for student activities collected in his classroom. Adequate documentation of change funds given to/returned by district personnel for sporting events or student activities was also not maintained. The district's accounting records did not include the balance of change funds held.

Recommendation

The School Board establish written procedures governing the accounting for change funds. Also, the School Board should maintain a list of each change fund and the authorized balance of each fund, and record the cash on hand in the accounting system. In addition, the School Board should ensure the change funds are periodically counted and reconciled to the authorized balance by an independent person.

Status

In Progress

The district has not established written procedures governing the accounting for change funds; however, the Superintendent indicated the district will establish written procedures governing these funds by January 2015. A list of 10 change funds totaling $2,130 is being maintained and recorded in the district's accounting system. The former Superintendent counted each of the change funds in August 2014, and reconciled the balances to the list and amounts recorded in the accounting system.

2.1 District Compensation - Employment contracts and stipends

The district did not have adequate procedures for approving employment contracts, and did not prepare employment contracts or separately approve salary schedules for tenured teachers. Contract amendments contained errors

and were not properly approved and signed, and district procedures for stipends were informal.

The School Board did not review or approve non-tenured or administrative employees' employment contracts. These employment contracts were prepared and signed by the Secretary to the School Board. The Secretary to the School Board applied the Board President's electronic signature to the contracts, but a subsequent review of the contracts was not performed by the Board President or the School Board. Additionally, in some instances, these employment contracts were only signed by the Secretary to the School Board and the employee. Salary schedules for tenured teachers (who did not have employment contracts) were not separately approved by the School Board. As a result, the School Board approved compensation of tenured teachers through adoption of the district's annual budget, and three Board members approved compensation of relatives in this manner. The district did not prepare extra duty contracts, defining job duties or additional responsibilities performed for stipends paid.

Recommendation

The School Board ensure employment contracts and amendments are reviewed for accuracy and are signed by either the Superintendent or a Board member and the employee. The School Board should reconsider its process of approving tenured teachers' salaries and establish adequate policies and procedures requiring extra duty contracts be prepared that specify the stipend amount and duties to be performed.

Status

Implemented

All 2014-2015 school year employment contracts and amendments reviewed were accurate, and signed by a Board member and the employee. The School Board approved tenured teachers compensation for the 2014-2015 school year separately from the budget, and no Board members approved the compensation of relatives. Extra duty contracts reviewed for the 2014-2015 school year specified the stipend amount to be paid and duties to be performed.

2.3 District Compensation - Step-ladder program

The district had not established adequate policies and procedures for the step-ladder program, which gave compensation to teachers who provided student services and assistance beyond the traditional teaching responsibilities. The School Board had not approved a step-ladder plan in accordance with Board policy prior to disbursing step-ladder payments. Clear and consistent criteria had not been established to evaluate how compensation under the step-ladder program was earned, and some step-ladder logs reviewed reported activities that did not meet the criteria established by the step-ladder committee. Principals did not always require participants to submit step-ladder logs for review in conjunction with the final review sheet, and step-ladder committee member discussions with

participants regarding variances between allowable step-ladder activities and step-ladder plans and related decisions were not documented. The step-ladder committee provided the district bookkeeper incorrect payment information, and as a result, the district over-compensated eight participants and paid compensation to five employees who were not participants in the program. The district was notified of the error by one of the over-compensated participants, and the district subsequently corrected the payments.

Recommendation

The School Board establish a clear and consistent step-ladder policy, require preparation of adequate supporting documentation to support decisions made and amounts paid, and ensure an adequate review is performed of all documentation.

Status

In Progress

The district substantially revised the step-ladder program, requirements, and forms for the 2014-2015 school year. Since the school year has not been completed, we were unable to review the district's supporting documentation and review procedures.

3. Payroll Procedures, Records, and Policies

Significant improvement was needed related to payroll procedures, records, and policies.

3.1 Payroll procedures

The district had not established adequate segregation of duties or supervision over the payroll functions, and various district personnel did not perform sufficient reviews of time records. Errors were noted with some time and leave records, and some employees were allowed to carry negative compensatory (overtime) leave balances. Some employees, including the Superintendent and Principals, did not prepare timesheets, timecards, and leave requests. Other district employees prepared timesheets, timecards, and leave requests; however, these documents were not always signed by the employees or their supervisor to document approval of time worked and leave used.

Recommendation

The School Board adequately segregate payroll duties or ensure a periodic, documented review of these functions is performed by someone independent of the payroll functions. The Board should discontinue the practice of allowing employees to use unearned leave.

Status

In Progress

The former Superintendent implemented procedures to review paystubs and the related payroll records for each pay period and to document that review. The August 14, 2014, payroll records we reviewed included documentation of his review. The current Superintendent, who started working for the

district on September 29, 2014, indicated he would continue reviewing payroll records using the developed procedures. The Secretary to the School Board indicated she compared the payroll leave records she prepared to the payroll leave records prepared by the district bookkeeper for the month of September 2014. These records agreed, but the comparison performed was not documented. The Secretary to the School Board indicated she would document her comparison in the future. During our review of payroll records for the period August and September 2014, we identified no errors and no employees had negative compensatory (overtime) leave balances. District officials indicated the Superintendent and Principals are now required to complete leave requests; however, formal written policies have not been established and no leave request forms were prepared for the time period reviewed. The Superintendent indicated formal written policies requiring the Superintendent and Principals to complete leave requests will be adopted. Timesheets, timecards, and leave requests reviewed were signed by the employees and their supervisor.

3.2 Post-retirement employees

The district bookkeeper did not properly track hours worked by employees retired under the Public School Retirement System and Public Education Employee Retirement System. As a result, payroll records did not reflect instances when a retired employee exceeded the 550 hour limit.

Per Section 169.560, RSMo, a teacher or school employee retired and currently receiving a retirement allowance may be employed in any capacity in a school district on either a part-time or temporary-substitute basis not to exceed a total of 550 hours in any one school year, and through such employment may earn up to 50 percent of the annual compensation payable under the employing district's salary schedule for the position or positions filled by the retiree, given such person's level of experience and education, without a discontinuance of the person's retirement allowance.

The district bookkeeper stopped recording her actual hours worked on the district's post-retirement log once she neared the 550 hour limit and did not report hours worked in excess of the 550 hour maximum in the 2012-2013 school year to the retirement systems. In addition, the district bookkeeper did not maintain a timesheet for June 2013; however, the district paid her normal monthly salary amount, and she performed the same duties in June 2013, as she had performed during the remainder of the school year. Instead of tracking and recording actual hours worked each day by post-retirement employees, the district recorded 2 hours worked for all bus drivers and 6 hours worked for all teachers per day on the post-retirement log. The district did not require at least 3 post-retirement employees to document hours worked, and as a result, could not monitor the 550 hour requirement.

Recommendation	The School Board ensure post-retirement employees timesheets reflect actual time worked and gross pay and actual hours worked are reported to the retirement systems to ensure applicable limits are not exceeded.
Status	**Implemented** Post-retirement employees timesheets reviewed for the period August 11 through September 12, 2014, reflected actual time worked and agreed to the post-retirement log maintained and reported to the retirement systems. None of the employees reviewed had worked hours in excess of the retirement systems limits.
3.3 Related employees	A list of related employees and Board members was not maintained, and the district had not established adequate policies and procedures related to the hiring, supervising, or tracking of related employees.
Recommendation	The School Board establish procedures to identify and monitor related employees, obtain related party information, verify information with each employee periodically, and ensure individuals are not working in conflicting employment capacities.
Status	**Implemented** A list of known related employees and Board members was prepared by the former Superintendent, and reviewed and approved by the School Board. School Board minutes indicated this information would be reviewed annually and become a permanent part of the budget.
4.3 Bond Refinancing, Procurement Procedures, and Construction Projects - Professional services	The district had not established policies for the selection of some vendors providing professional services. Additionally, the district did not solicit requests for proposals for several professional services, including speech therapy, occupational therapy, physical therapy, athletic training, and legal. The district had not competitively bid independent auditing services or solicited proposals from various banking institutions in accordance with board policy. The district also did not have a written agreement for the speech therapy, athletic training, and legal services.
Recommendation	The School Board periodically solicit proposals for professional and banking services, and enter into written agreements for professional services.
Status	**Partially Implemented** The district has not established policies for the selection of vendors providing professional services. District personnel indicated they did not solicit proposals for physical or speech therapy services because they believed there was only one provider in the area. District personnel solicited

proposals for occupational therapy and athletic training services; however, the selection process or reasons for selection of current vendors was not documented. The district competitively bid independent auditing services and solicited proposals from various banking institutions in accordance with Board policy.

The written agreements for physical, speech, and occupational therapy, and athletic training services were not signed by a member of the Board. The district entered into a written agreement with a law firm utilized for the period July 1, 2013, to June 30, 2014, which was signed by a member of the Board.

The district did not solicit proposals for additional legal services obtained in July 2014; however, the Board President indicated the firm's hiring was an emergency situation. The district was billed $461 for legal services provided from July 2 to July 9, 2014, prior to the School Board approving the firm's hiring on July 14, 2014, in closed session. However, the law firm advised the Board President that it would credit the district's account for this amount, and the Secretary to the School Board reduced the October 2014 billing by $461.

5.1 Disbursements - Segregation of duties and approval process

Accounting duties over disbursements were not adequately segregated, oversight by the Superintendent was not adequately documented, and the approval process for disbursements was not adequate.

Recommendation

The School Board adequately segregate accounting duties to the extent possible or ensure documented supervisory or independent reviews of the disbursement records are performed. In addition, the Board should ensure the list of bills provided for approval at monthly meetings is complete and the Superintendent adequately documents his review of invoices.

Status

Implemented

District personnel indicated the district is not able to adequately segregate accounting duties; however, review procedures have been established. The School Board now approves monthly a complete list of bills and compares payment information to invoices and checks written. Also monthly, the School Board President and Treasurer review the use of electronic signatures on checks, and 2 signatures (the School Board President and Treasurer) are now required for all bank accounts. Additionally, the former Superintendent implemented procedures to review disbursement records and document that review monthly. The current Superintendent indicated he would continue reviewing disbursement records using the developed procedures. We saw documentation of the review and approval process for July 2014 disbursements for all of these procedures.

5.2 Disbursements - Conflict of interest

During the 2012-2013 school year, the district purchased supplies totaling $10,610 from a local hardware business owned by Board President Renshaw without soliciting bids. The Board President abstained from the approval of these payments; however, his signature appeared on 10 of 13 checks issued to the business. In addition, Board President Renshaw did not file a personal financial disclosure as required by Board policy.

Recommendation

The School Board ensure Board members avoid participation in situations that could result in the appearance of or actual conflict of interest and complete required financial disclosure statements.

Status

In Progress

Board President Renshaw was not re-elected to the School Board in April 2014. The current Superintendent indicated the School Board will approve a policy prohibiting financial transactions between the district and elected officials involving more than $5,000 annually without public notice to solicit proposals and competitive bidding. The low bid will be accepted when there is a conflict of interest. In the future, all district Board members will file personal financial disclosure statements reporting each transaction in excess of $500 annually in accordance with Board policy.

5.3 Disbursements - Petty cash bank account

The administrative office used a petty cash bank account to pay 61 disbursements totaling $19,259 without School Board approval during the 2012-2013 school year, and the School Board was unaware of this bank account and had not established formal policies for its use. In addition, adequate supporting documentation was not obtained for several of these disbursements, and the individual disbursements from the account were not recorded in the accounting system. All 61 checks for the petty cash account disbursements were signed by only 1 person in violation of Board policy.

Recommendation

The School Board determine if a petty cash account is needed, establish formal petty cash policies including purchasing limits; ensure only small and emergency expenditures are made from the account, adequate supporting documentation is obtained and reviewed, and checks are signed in accordance with Board policy.

Status

Implemented

The district closed this bank account in September 2013.

6. Budget Monitoring and Accounting Records and Controls

Budget monitoring, accounting record preparation, and accounting controls needed improvement.

6.1 Budget monitoring

Information recorded in the district's accounting system was not complete and accurate, and the Board did not adequately monitor budget to actual receipts and disbursements.

Recommendation

The School Board establish procedures to properly monitor actual to budgeted activity in a timely manner.

Status

Implemented

During our review of the district's 2014-2015 school year budget and the related accounting records, we noted only minor differences, and budget to actual reports are provided to the Board monthly.

6.2 Adjustments

The Secretary to the School Board had the ability to post adjustments to the district's accounting system without obtaining independent approval.

Recommendation

The School Board require an independent review and approval of all adjustments.

Status

Implemented

The School Board is now provided a report of all adjustments to the accounting system in monthly meeting packets. We observed this information during our review of July and August 2014 meeting records. The School Board documented its review and approval of these reports.

6.3 Electronic signatures

Electronic signatures of the School Board President and Treasurer were not adequately safeguarded to prevent misuse and were not used in compliance with Board policy. The Secretary to the School Board frequently signed contracts using the Board President's electronic signature, which was not allowed by policy. In addition, the School Board President and Treasurer did not perform a subsequent review of the use of their electronic signatures.

Recommendation

The School Board review use of electronic signatures and the related Board policy. If needed, revise the policy to address use of electronic signatures.

Status

Implemented

All employment contracts reviewed for the upcoming 2014-2015 school year were personally signed by a Board member in compliance with Board policy. The School Board President and Treasurer review the use of electronic signatures on checks monthly We saw documentation of this review for checks issued in July and August 2014.

7.1 Attendance Reporting and Computer Controls - Attendance reporting

The district's attendance system did not adequately track some changes made to attendance records or limit the time frame during which changes could be made and there was no review by district officials to ensure changes made to current school year attendance records were appropriate. Inaccuracies in the attendance records were identified.

Recommendation

The School Board implement additional controls and procedures to ensure student attendance data is accurately recorded and reported, including restricting the time frame during which changes can be made. The School Board should also require an audit trail of changes made to attendance data be prepared and reviewed for accuracy.

Status

In Progress

The district has limited the time frame during which changes can be made to attendance records by teachers; however, changes to attendance can still be made at any time by each school's secretary. An audit trail of changes made to attendance data has also not been prepared or reviewed for accuracy.

The current Superintendent indicated beginning in November 2014, he will contact the programmer to limit the time frame in which secretaries may make changes to attendance records to a period of 2 weeks. An audit trail of changes made to attendance will be prepared and reviewed bi-annually by the Superintendent to reconcile any changes made to attendance reported to the Department of Elementary and Secondary Education.

7.2 Attendance Reporting and Computer Controls - Access restrictions

The district had not adequately restricted access to computer systems and data to only authorized users. Some district employees with no attendance related responsibilities had access to the attendance system. In addition, passwords to access the attendance tracking and accounting systems were not periodically changed, and some user identifications and passwords for other systems were shared by district employees.

Recommendation

The School Board ensure user access rights to the attendance system are limited, and require unique user identifications and passwords for each employee that are kept confidential, and passwords be periodically changed to prevent unauthorized access to district computer systems and data.

Status

Implemented

User access rights to the attendance system have been limited and unique user identifications and passwords are being kept confidential. The district has established a new written policy requiring employees to change passwords twice a year.

8.2 School Board Procedures and Minutes - Minutes	The School Board did not always comply with the Sunshine Law, and minutes were not always complete, accurate, or maintained. Open meeting minutes also did not record a roll call vote of the Board to enter into closed sessions.
Recommendation	The School Board ensure minutes provide a complete and accurate record of all important discussion and decisions made by the Board and record the Board's compliance with the Sunshine Law.
Status	**Implemented** Meeting minutes for open and closed sessions held from May through July, 2014, provided a complete and accurate record of all important discussion and decisions made by the Board, and the open meeting minutes recorded a roll call vote of the Board to enter into closed sessions.

9. Capital Assets and Fuel Usage	Controls and procedures over district property and fuel usage needed improvement.
9.1 Capital assets	District officials had not properly maintained a detailed record of the property owned by the district and had not performed inventories of district capital assets held outside of classrooms at each school. The capital asset listings did not include some equipment, and the listings maintained did not include all necessary information such as the value of assets, or date and method of disposal. In addition, the district had not tagged or otherwise identified all property items as belonging to the district.
Recommendation	The School Board ensure complete and detailed capital asset records are maintained, annual physical inventories are conducted and compared to capital asset records, and property control tags are affixed to all property.
Status	**Implemented** The district provided us a complete and detailed capital asset record last updated in September 2014. A new written policy established for the 2014-2015 school year requires annual inventories at the end of each school year and tagging property with a cost of more than $250 when purchased.
9.2 Vehicle and fuel use	Fuel and mileage logs were not maintained for the district's 3 vehicles and 8 pieces of equipment and a reconciliation of fuel purchased to usage was not performed.
Recommendation	The School Board ensure a documented periodic reconciliation of fuel purchased to fuel used is performed, and investigate any significant discrepancies. In addition, the Board should ensure mileage logs are maintained for all district vehicles and equipment.

Status

In Progress

Mileage logs are now maintained for the district's 3 vehicles, but not for the district's equipment. The Secretary to the School Board reviews the vehicle logs and fuel bills monthly and calculates fuel used and purchased per vehicle, but does not document her calculation of miles per gallon for each vehicle. The Secretary to the School Board indicated she would document this information in the future. The Superintendent indicated beginning in January 2015, the district will implement fuel logs for district equipment, and usage logs will be reconciled to fuel purchases by the Secretary to the School Board.

Miller County

November 2014

Report No. 2014-109

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Miller County

Financial Condition	As noted in our two prior audits, the financial condition of the Jail Fund and Special Road and Bridge Fund remains poor, and the financial condition of the Enhanced 911 (E911) Fund has deteriorated. In addition, the amount of General Revenue Fund and Capital Improvements Sales Tax Fund monies used to support these other funds has increased significantly over the past several years. As a result, the General Revenue Fund is also in poor financial condition and the Capital Improvement Sales Tax Fund may not have the monies needed to pay off outstanding debt.
Sales Tax Procedures	Some capital improvement sales tax revenue was spent on road and bridge related purposes that is not allowed under state law. In addition, the county could not provide documentation showing how capital improvement sales tax revenues transferred to the Jail Fund and E911 Fund were spent in accordance with state law. The county did not sufficiently reduce the property tax levy to offset 50 percent of sales tax monies received by $453,793 during 2013. The County Clerk's annual sales tax reduction calculations were incorrect and the 2013 tax levy reductions were improperly reported to the State Auditor's office.
Property Tax System and Controls and Procedures	The County Collector and his staff have unlimited access to all information in the property tax system, can make changes to individual tax records, and can delete or void receipt transactions after they are completed. In addition, County Collector personnel cannot generate a report of voided transactions. Neither the County Clerk and County Commission adequately review additions and abatements entered into the property tax system by the County Collector or adequately review the financial activities of the County Collector. As a result of the significant control weaknesses identified, there is little assurance property tax monies are accounted for properly.
County Collector Procedures	As of June 2014, the County Collector had not prepared annual settlements of property taxes for the years ended February 28, 2013, and 2014. The County Collector does not prepare monthly lists of liabilities for the main collection bank account, and consequently, liabilities are not compared to the reconciled bank balance. The County Collector maintains an inactive bank account of $1,092 that should be closed.
Sheriff Accounting Controls and Procedures	Despite similar concerns in our prior audits, the Sheriff has not established adequate controls and procedures and significant weaknesses continue to exist. The Sheriff has not adequately segregated accounting duties and does not perform adequate supervisory reviews. The Sheriff's office does not adequately bill, pursue collection of, or track amounts due from other counties for the boarding of prisoners, and is not billing some defendants. The Sheriff lacks proper controls and procedures for receipting and depositing monies to ensure all monies are accounted for properly. Bank reconciliations procedures were not adequate and monthly lists of liabilities are not prepared to compare to the reconciled bank balances. The Sheriff does not maintain adequate records over seized property, and personnel do not periodically back up the data in the computerized accounting system.

Prosecuting Attorney Controls and Procedures	The Prosecuting Attorney has not established adequate segregation of duties over accounting functions, or established proper controls or procedures for receipting, depositing, and transmitting monies to the County Treasurer. The Prosecuting Attorney does not routinely follow up on outstanding checks and maintains a trust bank account with an unidentified balance of $5,227 at December 31, 2013.
Public Administrator Salary	The County Commission has not set the Public Administrator's salary in accordance with state law, and as a result, is underpaying the Public Administrator $20,000 annually. Pursuant to Section 473.742, RSMo, the Public Administrator's salary is based upon the average number of open cases, which was 43, and should be $45,000.
Passport Fees	The Recorder of Deeds collected approximately $18,360 in passport processing fees, but there is no authority for the Recorder of Deeds to collect this fee. Moreover, state law mandates that any such fees shall be used only for the maintenance of the courthouse or to fund operations of the circuit court, but the county does not track how these monies are spent.
Capital Assets	As similarly noted in several of our prior audits, the County Clerk has not updated capital asset records since 2003, and these records lack sufficient detail. Some capital asset are not numbered, tagged, or otherwise identified as county property, and the county does not adequately identify capital asset purchases and dispositions throughout the year
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Poor**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 25

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Miller County

We have audited certain operations of Miller County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones & Associates, Certified Public Accountants, was engaged to audit the financial statements of Miller County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

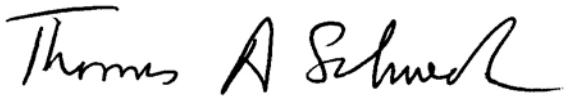
3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Miller County.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Susan J. Beeler, CPA, CIA
In-Charge Auditor:	Terri Erwin, MBA, CGAP
Audit Staff:	Brian Hammann, M.Acct., CPA
	Jennifer Anderson

1. Financial Condition

As noted in our two prior audits, the financial condition of the Jail Fund and Special Road and Bridge (SRB) Fund remains poor. In addition, the financial condition of the Enhanced 911 (E911) Fund has deteriorated. The amount of General Revenue (GR) Fund and restricted Capital Improvements Sales Tax (CIST) Fund monies used to support these other funds has increased significantly over the past several years. As a result, the GR Fund is also in poor financial condition and the CIST Fund may not have the monies needed to pay off outstanding debt. The following table reflects the ending cash balances of these funds over the last 4 years and the projected ending cash balance for 2014.

	Ending Cash Balance, Year Ended December 31,				
	2014 Budgeted (1)	2013 Actual (2)	2012 Actual (2)	2011 Actual (3)	2010 Actual (3)
Special Road and Bridge Fund					
Ending cash balance	$ 2,423	53,125	96,160	78,934	39,690
Ending cash balance without transfers	(237,577)	(282,911)	21,160	29,419	(98,488)
Enhanced 911 Fund					
Ending cash balance	16,515	(135,404)	(22,469)	(3,115)	(153,213)
Ending cash balance without transfers	(515,485)	(452,227)	(372,044)	(335,615)	(239,660)
Jail Fund					
Ending cash balance	44	(130,853)	(43,503)	(6,099)	700
Ending cash balance without transfers	(691,956)	(523,314)	(693,503)	(634,006)	(456,153)
General Revenue Fund					
Ending cash balance (4)	395,217	197,967	124,874	187,578	6,568
Ending cash balance without transfers	686,067	350,543	212,849	232,588	68,878
Capital Improvements Sales Tax Fund					
Ending cash balance	590,286	580,986	241,871	280,613	132,527
Ending cash balance without transfers	$ 1,772,286	1,345,517	1,241,871	1,313,203	688,960

(1) Amounts obtained from 2014 county budget documents.

(2) Amounts obtained from audited financial statements.

(3) Amounts obtained from 2012 county budget documents.

(4) The General Revenue Fund's budgeted ending cash balance for 2014 includes $453,793 in over collection of property taxes that must be offset in future years due to an error in the 2013 sales tax rollback calculation (see MAR finding number 2.2).

As shown, if the county had not transferred monies to the SRB, E911, and Jail Funds to cover deficits, these funds would have had even lower balances, and the GR and CIST Funds would be in better financial positions. In addition, these sales tax monies are restricted for capital improvement use only and cannot legally be used to cover deficits in other funds (see MAR finding number 2.1). We identified the following additional concerns related to these funds:

- The county erroneously reported property tax reductions in 2013, resulting in a $453,793 over collection in the GR Fund that must be offset against property tax collections in future years (see MAR finding number 2.2). In addition, considering the GR Fund is projected to end 2014 with a $395,000 cash balance and the 2014 projected GR property tax revenues were based on 2013 GR property tax collections, the GR Fund is now in poor financial condition and can no longer afford to transfer monies to the other funds.

- The county has a significant amount of debt that further erodes the county's financial condition. The largest of the debt is the principal and interest outstanding on the lease-purchase agreement for the justice center. The remaining principal outstanding at December 31, 2013, was $3,975,000. Interest remaining to be paid over the life of the lease totals $1,778,610. If the county continues to use the CIST Fund to cover the negative cash balances in other funds, it risks not having the funds necessary to pay this lease-purchase obligation (details of the lease-purchase agreement are included in the Organizational and Statistical Information section).

- The county used various lease-purchase agreements, notes, and lines of credit to purchase a new road grader, 6 new sheriff vehicles, and other new and used road and bridge equipment during the year ended December 31, 2013. The total amount of principal due as of December 31, 2013 (including capital assets purchases from prior years), was $836,813, with $426,705 due between 2014 and 2018 and the remaining $410,108 financed on a one-year note and line of credit that are renewable annually (see the Organizational and Statistical Information section). Rather than paying these debt instruments down or off, the county continues to finance additional purchases through these instruments. The County Commission should take steps to reduce the amount of county debt by either limiting the purchase of vehicles and equipment or buying used vehicles and equipment instead of purchasing new items, when possible.

It is essential that the County Commission address the financial condition of these funds in both the immediate and long-term future. Possible options include reducing spending where possible; evaluating controls and management practices to ensure efficient use of county resources; maximizing all sources of revenue; paying only allowable expenditures, including maintenance and utilization of county-owned buildings, from the capital improvement sales tax; and closely monitoring county budgets. In addition, based on the lack of controls in the County Collector's office (see MAR finding numbers 3 and 4), the County Commission should include a thorough, periodic review of the County Collector's operations as a part of its long-term plan to ensure the County Collector's office is properly accounting for all county monies received.

Recommendation

The County Commission perform long-term planning, closely monitor the county's financial condition, and take necessary steps to improve the financial condition of the Jail, Special Road and Bridge, Enhanced 911, and General Revenue Funds. In addition, the County Commission should take advantage of any opportunities to decrease disbursements and maximize revenues.

Auditee's Response

The County Commission provided the following written response:

The Sheriff oversees the operation of the jail so the County Commission will meet with him to discuss billing procedures which will help improve collections which will in turn help improve the condition financially in the jail.

The County Commission has had a plan to pay down the machinery notes. We will continue to use conservative decisions in this department.

We will continue to monitor the needs in our 911 system. We will search for more grants and utilize them when possible.

The County Commission works on the General Revenue budget annually and we try to balance disbursements and revenues to protect the jobs of our people.

2. Sales Tax Procedures

Various concerns related to county sales taxes were identified.

2.1 Capital Improvements Sales Tax

Some capital improvement sales tax revenue was spent on road and bridge related purposes that is not allowable under state law. In addition, the county could not provide documentation showing how capital improvement sales tax revenues transferred to the Jail Fund and E911 Fund were spent in accordance with state law.

Section 67.700, RSMo, allows counties to impose a sales tax for any capital improvement purpose designated by the county in a ballot submitted to voters, and requires the monies received from the sales tax to be deposited in a separate account and used solely for the designated capital improvement.

Miller County voters extended a 1/2-cent capital improvements sales tax levy in August 2010, for a period of 20 years. The county collected $1,444,306 from this sales tax during the year ended December 31, 2013. The ballot language specified the tax monies were to be used "for the purpose of funding capital improvements to county-owned buildings and paying costs of maintenance and utilization thereof."

The County Commission believes operating costs of the county courthouse and jail (including salaries of employees) are allowable utilization costs. However, while some costs of operating county buildings may be allowable uses of this revenue, salary and benefit expenses are not capital improvement related and thus are not allowable. In addition, the county is not tracking the transfers out of the CIST Fund to ensure these monies are spent only for allowable purposes. We noted various concerns with the transfers out of this fund.

Special Road and Bridge Fund

According to budget documents, the county transferred $130,000 from the CIST Fund to the SRB Fund during the 4 years ended December 31, 2013, and budgeted $90,000 in transfers for 2014, in violation of state law. The ballot language does not list improvements to roads and bridges as a purpose of the tax. Since Section 67.700, RSMo, requires the monies be used solely for the purpose designated in the ballot, road and bridge disbursements cannot be paid from these monies.

Jail Fund

The county did not track transfers to the Jail Fund to ensure they were spent in accordance with state law. According to budget documents, the county transferred $1,957,869 from the CIST Fund to the Jail Fund during the 4 years ended December 31, 2013, and budgeted $692,000 in transfers for 2014. During the 2 years ended December 31, 2013, approximately $909,000 was transferred to the Jail Fund from the CIST Fund. Our review of the Jail Fund disbursements made during these 2 years identified only 4 disbursement categories that included clearly allowable capital improvement costs (roof and building, general maintenance, repair/upkeep, and elevator maintenance totaling $121,799 for the 2 years). In addition, several disbursement categories (such as salaries and benefits, training, and uniforms) would not have included any capital improvement-related costs.

Enhanced 911 Fund

Similar to the Jail Fund, the county did not track transfers to the E911 Fund to ensure they were spent in accordance with state law. According to budget documents, the county transferred $1,043,362 from the CIST Fund to the E911 Fund during the 4 years ended December 31, 2013, and budgeted transfers of $400,000 for 2014. During the 2 years ended December 31, 2013, approximately $667,000 was transferred to the E911 Fund from the CIST Fund. Our review of the E911 Fund disbursements made during these 2 years identified only 2 disbursement categories that included clearly allowable capital improvement costs (lease/maintenance and repair/upkeep totaling $98,934 for the 2 years). In addition, several disbursement categories (such as salaries and benefits, mileage, fees/dues/training, and vehicles) would not have included any capital improvement-related costs.

Conclusion

Capital improvement sales tax revenue transferred to the SRB Fund was not spent for allowable purposes under state law. A significant amount of capital improvement sales tax revenue transferred to the Jail Fund and the

E911 Fund was also likely not spent for allowable purposes under state law. Some of the money transferred to those two funds may have been spent for allowable purposes; however, county officials did not track its use and could not provide documentation of how it was spent.

Section 67.700, RSMo, does not prohibit a county from having multiple capital improvement sales taxes. Therefore, the county could have a second capital improvement sales tax for road and bridge related costs. However, the combined capital improvement sales taxes under this law cannot exceed 1/2-cent. Since the county's current capital improvement sales tax rate is already at the 1/2-cent maximum, the county would have to reduce the current capital improvement sales tax rate in order to initiate a road and bridge capital improvement sales tax. Both actions would need to be approved by a public vote.

2.2 County sales tax

The county did not sufficiently reduce the property tax levy to offset 50 percent of sales tax monies received by $453,793 during 2013. The County Clerk's annual sales tax reduction calculations were incorrect and the 2013 tax levy reductions were improperly reported to the State Auditor's office. Increased property tax levy rollbacks will be required in future years to offset this liability.

Section 67.505, RSMo, requires the county to reduce property taxes for a percentage of sales taxes collected. Miller County voters enacted a 1/2-cent general sales tax with a provision to reduce property taxes by 50 percent of sales taxes collected. The county is required to estimate the annual property tax levy to meet the 50 percent reduction requirement and in the following year calculate any excess property taxes collected based upon actual sales taxes collected.

The County Clerk's sales tax reduction calculations incorrectly use the prior year assessed valuation and tax rate ceiling instead of current year amounts. For example, the 2013 calculation used the 2012 assessed valuation and tax rate ceiling instead of using the 2013 amounts. Additionally, the County Clerk does not consider prior year over or under collection of property taxes when calculating the current year property tax reduction. Further, for 2013 the County Clerk mistakenly certified the sales tax reduction of $.1840 as the tax rate levy instead of the calculated tax levy of $.0645. The combination of these errors resulted in a $453,793 over collection of property taxes for the year.

To ensure property tax levies are properly set, the County Commission and County Clerk should ensure property tax levies are adequately reduced by 50 percent of sales tax revenue and are accurately reported and certified as such.

Recommendations

The County Commission:

2.1 Discontinue using capital improvements sales tax monies to cover non-capital improvement related costs and reimburse the CIST Fund for transfers made to the SRB Fund for current and prior years. In addition, the County Commission should determine total allowable capital improvement costs paid out of the Jail and E911 funds from current and prior years and reimburse the CIST Fund for transferred amounts that exceeded allowable costs. The County Commission should implement procedures to ensure capital improvement sales tax monies are tracked and spent in accordance with state law. If a road and bridge capital improvement sales tax is deemed necessary, the County Commission should evaluate possible funding options.

2.2 And the County Clerk properly calculate and report property tax rate reductions, adequately reduce property tax levies for 50 percent of sales tax revenue, and develop a plan to correct for the prior year's over collection of property taxes.

Auditee's Response

The County Commission provided the following written response:

2.1 The County Commission will work at documenting capital improvement sales tax funds in a way that shows them being used for paying, maintaining, and utilizing county buildings. We will review the transfers to the SRB Fund and discuss options for repayment. We feel like the monies in the other funds were spent correctly and do not feel like there is a need to reimburse the CIST Fund.

The County Commission and County Clerk provided the following written response:

2.2 The County will work on correcting the amount of tax over collection over the next three years in conjunction with the County Clerk's office.

3. Property Tax System Controls and Procedures

Controls and procedures over the property tax system are not adequate and significant improvement is needed. As a result of the significant control weaknesses identified below and in MAR finding number 4, there is little assurance property tax monies are accounted for properly. During the year ended February 28, 2014, the County Collector processed receipts totaling approximately $20.1 million, of which approximately $19.9 million were entered into the property tax system. The remaining monies are for lodging tax revenues and are accounted for separately by the County Collector.

3.1 Tax system access

Access to the property tax system is not adequately restricted. The County Collector and his staff are the only personnel in the county with access to the property tax system. They have unlimited access to all information in the system, can make changes to individual tax records, and can delete or void receipt transactions after they are completed. In addition, County Collector personnel cannot generate a report of voided transactions and maintained no documentation to support such transactions, other than copies of checks to support transactions voided due to insufficient funds. Because the County Collector and his staff are responsible for collecting tax monies, good internal controls require they not have system access rights allowing them to alter or delete tax rates, assessed values, property tax billings, or property tax receipts. With unrestricted access, there is an increased risk of unsupported or unauthorized changes occurring in the property tax system after property taxes are approved for the year.

To prevent unauthorized changes to the property tax records, access should be limited based on user needs, and personnel from the County Clerk's office should be given access to make required changes after the property taxes are approved for the year. In addition, retaining documentation to support voided transactions helps ensure such transactions are appropriate and reduces the risk of errors, loss, theft, or misuse of funds.

3.2 Addition and abatement review

The County Clerk and County Commission do not review additions and abatements entered into the property tax system by the County Collector. According to system printouts prepared by the County Collector's office for the year ended February 28, 2014, additions totaled $95,367 and abatements totaled $83,779.

The County Assessor prepares court orders for additions and abatements and provides a copy to the County Commission, but the County Commission does not review these documents. The County Assessor also provides a listing to the County Collector's office for entry into the property tax system. As explained in section 3.1 above, a significant control weakness exists because the County Collector is responsible for collecting property taxes and also has system access to change tax records (including entering addition and abatement information). This control weakness is increased because neither the County Commission nor the County Clerk performs reconciliations of the approved additions and abatements to the actual changes made in the property tax system. As a result, additions and abatements, which constitute changes to the amount of taxes the County Collector is charged with collecting, are not properly segregated or monitored, and errors or irregularities could go undetected.

Sections 137.260 and 137.270, RSMo, assign responsibility to the County Clerk for making corrections to the tax books with the approval of the County Commission. If it is not feasible for the County Clerk to make corrections to the tax books, periodic reviews and timely approvals of the

additions and abatements, along with an independent reconciliation of approved additions and abatements to actual corrections made to the property tax system would help ensure changes are proper.

3.3 Review of property taxes

Neither the County Clerk nor the County Commission adequately reviews the financial activities of the County Collector. The County Clerk does not maintain an account book or other records summarizing property tax charges, transactions, and changes. Such records are needed to verify the accuracy of the County Collector's accounting records. As of June 2014, the County Collector had not filed annual settlements for the 2 years ended February 28, 2014 (see MAR finding number 4.1). The County Collector files a monthly collections report with the County Treasurer, but neither the County Clerk nor the County Commission perform procedures to verify the accuracy of the reports or other accounting records of the County Collector. As a result, there is an increased risk of loss, theft, or misuse of property tax monies going undetected.

Section 51.150.1(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable to the county treasury. An account book or other records that summarize all taxes charged to the County Collector, monthly collections, delinquent credits, abatements and additions, and protested amounts should be maintained by the County Clerk. Such records would help the County Clerk ensure taxes charged and credited to the County Collector are complete and accurate and could also be used by the County Clerk and County Commission to verify the County Collector annual settlements, when filed. Such procedures are intended to establish checks and balances related to the collection of property taxes.

A similar condition was noted in our prior report.

Recommendations

3.1 The County Commission and the County Clerk ensure property tax system access is restricted to only allow officials and personnel to access functions necessary for their duties. In addition, the County Collector should maintain documentation of all voided transactions and work with the computer programmer to develop a voided transaction report that can be periodically compared to the supporting documentation of voided transactions.

3.2 The County Commission and the County Clerk ensure procedures are adequately segregated and all property tax additions and abatements are properly and timely approved and monitored. In addition, the County Commission should change the responsibility for entering the additions and abatements from the County Collector to the County Clerk.

3.3 The County Clerk maintain an account book with the County Collector. In addition, the County Clerk and County Commission

should use the account book to review the accuracy and completeness of the County Collector's accounting records.

Auditee's Response

The County Collector provided the following written response:

3.1 We have supporting documentation when we reverse a transaction because the taxpayer gives us a bad check. The check is retained and information regarding the reversal is recorded including the transaction number on the computer system software. This is all kept in a file in the County Collector's desk. In addition, we will also keep documentation of all other voided transactions. We have been working with the computer company to produce a monthly report of voided transactions. We hope to have this completed by the end of this fiscal year. Regarding the input of abatements, add-ons, and court orders, the County Collector's office plans to turn over these duties to the County Assessor's office. After County Assessor staff input the changes they will provide a written copy of the change to the County Clerk and to the County Collector.

The County Commission provided the following responses:

3.1 The County Commission and County Clerk will work with the County Collector, County Assessor, and the computer programmer to comply with this recommendation.

3.2 The County Commission will work with the County Clerk, County Collector, and County Assessor's office to correct the way additions and abatements are processed.

3.3 Once the County Clerk prepares an account book, we will work with the County Clerk to review the County Collector's records.

The County Clerk provided the following responses:

3.1 The County Clerk and County Commission will work with the County Collector, County Assessor, and the computer programmer to comply with this recommendation.

3.2 The County Clerk and County Commission will work with the County Collector and County Assessor's office.

3.3 The County Clerk will implement an account book with the County Collector.

4. County Collector Procedures

The County Collector's accounting and reporting procedures are not sufficient and do not provide adequate assurance that all property tax receipts and disbursements are accounted for properly.

4.1 Annual settlements

As of June 2014, the County Collector had not prepared annual settlements of property taxes for the years ended February 28, 2013, and 2014. By not preparing timely annual settlements, the County Collector has not provided the County Commission or the taxpayers with a complete accounting of property tax transactions.

Section 139.160, RSMo, requires the County Collector to annually settle with the County Commission the accounts of all monies received from taxes and other sources. To help ensure the validity of tax book charges, collections, and credits, and for the County Clerk and County Commission to properly verify these amounts, it is imperative the County Collector file annual settlements timely.

4.2 Liabilities

The County Collector does not prepare monthly lists of liabilities for the main collection bank account, and consequently, liabilities are not compared to the reconciled bank balance. We identified liabilities for the County Collector's main account at February 28, 2014, totaling $3,415,987. The reconciled bank balance was $3,436,611, leaving an unidentified balance of $20,624. In addition, this account had an unidentified balance at December 31, 2013, of $45,153. The County Collector could not determine the reasons for these differences for either month or why the difference changed.

Monthly lists of liabilities should be prepared and reconciled to available cash balances to ensure records are in balance, errors are detected and corrected timely, and sufficient cash is available to pay all liabilities.

4.3 Inactive bank account

The County Collector maintains an inactive bank account that should be closed. The account holds monies for the homestead preservation tax credit, a property tax credit program for senior citizens and the disabled that has expired. The account had a balance of $1,092 as of December 31, 2013, and has had no activity since January 2011.

Maintaining an inactive account increases the risk of misuse of funds. To ensure funds are disposed of properly, the County Collector should attempt to identify and distribute the funds held in the account, dispose of any unclaimed or unidentified funds in accordance with state law, and close the account.

Similar conditions previously reported

Similar conditions to sections 4.1 and 4.2 were noted in our prior audit report.

Recommendations

The County Collector:

4.1 Prepare and file annual settlements as required by state law.

4.2 Prepare detailed monthly lists of liabilities, reconcile the list to the reconciled bank balance, and investigate any differences.

4.3 Investigate unidentified balances, dispose of unclaimed monies in accordance with state law, and close the inactive bank account.

Auditee's Response

The County Collector provided the following written responses:

4.1 I will endeavor to provide the annual settlements on a timely basis. If we continue to have balancing problems with the computer system, we will provide the annual settlement, and send an amended settlement after balancing issues are resolved.

4.2 I will try to perform these tasks to the best of my ability.

4.3 I will dispose the unused homestead account monies according to state law.

5. Sheriff Accounting Controls and Procedures

Despite similar concerns noted in our prior audits, the Sheriff has not established adequate controls and procedures and significant weaknesses continue to exist. With the exception of sections 5.6 and 5.7, we have reported similar findings related to the Sheriff's office in one or more of our prior reports. Deposits in the Sheriff's jail, bond, and concealed carry permits (CCW) bank accounts for the year ended December 31, 2013, totaled approximately $85,000, $176,000, and $33,000, respectively. However, due to the concerns noted below, we were unable to determine if all monies were accounted for, deposited, and disbursed properly.

5.1 Segregation of duties

The Sheriff has not adequately segregated accounting duties and does not perform adequate supervisory reviews. One clerk is responsible for receiving, recording, depositing, and disbursing monies, and reconciling the bond bank account. Another clerk is responsible for those same duties for the jail and CCW bank accounts.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, the Sheriff should implement a documented independent or supervisory review to ensure bank records are in agreement with accounting records.

5.2 Board of prisoners

The Sheriff's office does not adequately bill, pursue collection of, or track amounts due from other counties for the boarding of prisoners, and is not billing some defendants. According to the computerized system, prisoner

board incurred during the year ended December 31, 2013, totaled approximately $1.2 million.

Sheriff's office personnel prepare and send board bills to other counties, cities, etc. monthly. However, due to a misunderstanding in the Sheriff's office, accounts for defendants processed through the Miller County Circuit Court, which totaled approximately $838,000 during 2013, are sent to the Miller County Treasurer and are not billed to defendants by either the Sheriff's office or the County Treasurer's office. The court bills for some of this prisoner board (i.e., when a defendant is placed on probation), and transmits collections to the County Treasurer and submits a related report to the Sheriff's office. However, the Sheriff's office does not track which defendants are billed by the court, and payments received by the county (whether collected by the court or by the Sheriff's office) are not entered into the Sheriff's computerized system. As a result, the Sheriff's office does not know which defendants were billed and how much is actually outstanding on each account. Thus office personnel cannot effectively pursue collection of unpaid bills.

We also reviewed the Sheriff's records of outstanding board bills from 2009 through 2012 and determined outstanding board bills totaled approximately $3.1 million as of December 2013, including 2 local counties with approximately $742,000 outstanding. However, based on the procedural and record-keeping concerns, the accuracy of these amounts is uncertain.

All accounts should be properly billed, paid board bills should be entered into the system when received, and procedures such as independent reconciliations of board bill records to jail records and payments received should be established to ensure prisoner housing is properly billed, and payments received are proper. Unpaid board bills should be monitored and appropriate follow-up action should be taken to ensure payment is properly received. Failure to monitor unpaid amounts may result in a loss of revenue to the county, and considering the poor financial condition of the Jail Fund (see MAR finding number 1) any potential revenue sources for this fund should be actively pursued.

5.3 Receipts and deposits

The Sheriff has not established proper controls or procedures for receipting and depositing monies to ensure all monies are accounted for properly. We performed a cash count on February 20, 2014, and a detailed review of receipts and deposits for the period March 2013 through May 2013. For 28 of the 57 deposits (49 percent) made from March 2013 to May 2013, the deposited amounts did not agree to the corresponding receipt slips. Sheriff's office personnel could not fully explain the reasons for the discrepancies. Based on the work performed, we were unable to determine if all monies were accounted for and deposited properly.

Our cash count and receipt/deposit review identified various problems that contributed to the inability to reconcile receipt records to deposits. Some of these problems include:

- The cash count of the jail and CCW monies identified cash totaling $253; however, receipt slips totaled $330, resulting in an apparent shortage of $77 in cash deposited.

- Receipt slips are not issued for all monies received and the method of payment (cash, check, or money order) is not consistently indicated on the receipt slips or was indicated incorrectly.

- Receipts are not deposited intact. The clerks typically deposit all checks received, but cash receipts are often withheld from deposits for use as a change fund. The cash is not maintained at a set amount and the clerks do not maintain records of the amount of cash withheld from each deposit.

- The same payment is sometimes receipted into more than one receipt slip book, causing receipt slip amounts to exceed deposit totals for some deposits.

- Some payments were receipted after the monies had already been deposited. For example, two payments totaling $85 were receipted on April 8, 2013, but deposited on April 3, 2013, and four payments totaling $185 were receipted on April 12, 2013, but deposited on March 22, 2013.

To adequately account for collections and reduce the risk of loss, theft, or misuse of funds, receipt slips should indicate the method of payment and should be issued for all monies received. The composition of receipts should be reconciled to the composition of deposits. Further, monies should be receipted in the correct receipt slip books and all monies should be deposited timely and intact. If a change fund is needed, it should be set at a constant amount and a procedure established to reconcile to this amount every time a deposit is made.

5.4 Bank reconciliations

Sheriff's office personnel did not perform bank reconciliations for the jail account from January 2013 to October 2013, and the bank reconciliation procedures for the CCW and bond accounts were not adequate. Disbursements from the bank accounts were not recorded in the computerized system until after they cleared the bank; therefore, Sheriff's office personnel were not reconciling to an accurate book balance or accounting for any outstanding checks when performing reconciliation procedures.

Timely entry of accounting information and the preparation and review of monthly bank reconciliations is necessary to ensure accounting records are in balance and to identify errors timely.

5.5 Liabilities

Sheriff's office personnel do not prepare monthly lists of liabilities for the 3 bank accounts, and consequently, liabilities are not compared to the reconciled bank balances.

We requested the Sheriff's office prepare a list of liabilities for each of the accounts as of December 31, 2013, but the office was unable to provide this information to us. Based on a review of the Sheriff's records, we identified liabilities as of December 31, 2013, and determined the unidentified balance for each account as follows:

		CCW Account	Bond Account	Jail Account
Adjusted bank balance	$	2,464	8,884	21,448
Identified liabilities		(1,486)	(4,667)	(6,648)
Unidentified balance	$	978	4,217	14,800

Because disbursements were not entered into the accounting records until they cleared the bank (see section 5.4), a portion of the unidentified balances may be outstanding checks.

Monthly lists of liabilities should be prepared and reconciled to cash balances to ensure records are in balance, errors are detected and corrected timely, and sufficient funds are available for payment of all liabilities. Any differences should be promptly investigated and resolved, and any unidentified monies should be disposed of in accordance with state law.

5.6 Seized property

The Sheriff has not established adequate controls over seized property. The office does not maintain complete and accurate logs that include disposition of seized property, and periodic inventories of seized property are not conducted.

Sheriff's office personnel cannot generate reports from the office's computerized system to show the disposition of seized property. Sheriff's office personnel indicated it would be necessary to review individual case files to see if property seized in conjunction with a case had been disposed. Additionally, the Sheriff's office indicated a physical inventory had not been completed of seized property since 2000, and that inventory only covered a portion of the seized property on hand.

Considering the often sensitive nature of seized property, adequate internal controls are essential and would significantly reduce the risk of loss, theft, or misuse of the stored items. Complete and accurate inventory control

records should be maintained and periodic physical inventories should be performed and the results compared to the inventory records to ensure seized property and evidence are accounted for properly.

5.7 Accounting records backup

Sheriff's office personnel do not periodically back up the data in the computerized accounting system used to process receipts and disbursements and to prepare reports for all 3 bank accounts. In December 2013, the system crashed and personnel attempted to recreate the accounting records based on manual records. However, not all manual records had been retained, so office personnel made a $19,966 adjustment in the jail account to make the cash balance agree to the bank statement balance. Therefore, office personnel cannot be certain of the accuracy of the book balance for the jail account.

Again in June 2014, one of the office computers became infected with a virus resulting in the loss of all electronic accounting data. In both instances, if the data had been backed up regularly, the records could likely have been fully or partially recovered.

Preparation of backup data, preferably on a daily or at least weekly basis, periodic testing to ensure the backup process is adequate, and off-site storage would provide reasonable assurance data could be recovered if necessary.

Recommendations

The Sheriff:

5.1 Adequately segregate accounting duties to the extent possible or ensure supervisory reviews of accounting records are performed and documented.

5.2 Establish procedures to ensure all amounts owed for prisoner board are properly billed, and implement procedures to track and pursue collection of amounts owed, including entering all payments received into the system.

5.3 Ensure receipt slips, which indicate the method of payment, are issued for all monies received, the numerical sequence is accounted for properly, and the composition of receipts is reconciled to the composition of deposits. The Sheriff should also ensure monies are receipted in the correct receipt slip books, and all monies are deposited timely and intact. If a change fund is needed, it should be set at a constant amount and a procedure established to reconcile to this amount every time a deposit is made.

5.4 Ensure accounting information is entered into the computerized system timely, bank reconciliations are prepared monthly, and any differences are promptly investigated.

5.5 Prepare a monthly list of liabilities for each account and compare them to the reconciled bank balances. Any differences should be promptly investigated and resolved. Any unidentified monies should be disposed of in accordance with state law.

5.6 Maintain complete and accurate inventory records of all items in the evidence room, and perform periodic physical inventories and compare the results to the inventory records. The Sheriff should also perform a complete review of all items and take action to dispose of items no longer needed.

5.7 Regularly back up computer data and ensure it is stored in a secure off-site location and its recovery is tested on a regular, predefined basis.

Auditee's Response

The Sheriff provided the following responses:

5.1 We have implemented this recommendation. Each clerk reviews the other clerk's records for accuracy and completeness.

5.2 We are currently billing all prisoner board, except what goes through the Miller County Circuit Court. Currently we cannot adequately track money paid in court for jail bills. We are working with the court to get a better system. A suggested system is the jail being responsible for collecting all jail money.

5.3 We will implement this recommendation. Now only exact change is accepted with payment, so no change fund is needed. A new computer system was implemented to automatically assign receipt numbers to make the process easier.

5.4 Checks are now being entered when written and bank reconciliations are now performed monthly.

5.5 We have a new system and are working towards preparing a list of liabilities for each account. Any unidentified money will be disposed of properly.

5.6 An inventory of the property room is being worked on. A bar code scanner and printer have been ordered to help track inventory. Once the inventory is completed, we will work with the Prosecuting Attorney to determine what can be disposed of. We will also perform periodic inventories.

5.7 Accounts are now being backed up. A new computer company has been hired. We will talk to the company about using off-site storage.

6. Prosecuting Attorney Controls and Procedures

Controls and procedures in the Prosecuting Attorney's office need improvement. The Prosecuting Attorney's office collected bad check restitution and victim fees, bad check fees, and court-ordered restitution totaling approximately $64,000, $14,000, and $98,000, respectively, during the year ended December 31, 2013.

6.1 Segregation of duties

The Prosecuting Attorney has not established adequate segregation of duties over accounting functions. The Bad Check Clerk who is responsible for receiving, recording, depositing, and disbursing all monies, and reconciling the Prosecuting Attorney's bank account also has the ability to post adjustments to defendant accounts in the office's computer system without independent approval. In addition, a supervisory review of the accounting records is not performed. As a result, a significant control weakness exists and there is little assurance transactions are accounted for properly and accounting records are complete and accurate.

Proper segregation of duties is necessary to ensure all transactions are accounted for properly, adjustments are valid, and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, the Prosecuting Attorney should implement a documented independent or supervisory review of accounting records, which would include a review of adjustments made.

6.2 Receipting, depositing, and transmitting monies

The Prosecuting Attorney has not established proper controls or procedures for receipting, depositing, and transmitting monies to the County Treasurer. We noted the following concerns during our review:

- Office personnel do not record the method of payment on the manual one-write receipt ledger, and checks and money orders are not restrictively endorsed immediately upon receipt.

- The Bad Check Clerk does not reconcile the manual one-write receipt ledger with monies posted to the computerized accounting system, and does not account for the numerical sequence of manual and computer-generated receipt slips.

- The Bad Check Clerk does not always deposit bad check and court-ordered restitution receipts timely. For example, a review of the September 2013 bank statement showed the clerk made only 4 bank deposits, totaling $3,808, during the month, with 2 deposits occurring on the same day.

- The Bad Check Clerk does not always transmit bad check fee receipts to the County Treasurer intact or timely. For example, bad check fees receipted in July and August 2013 were not transmitted to the County Treasurer until September 2013. Also, some bad check fees receipted in September 2013 were transmitted to the County Treasurer before some

August 2013 receipts. Bad check fees transmitted to the County Treasurer during September totaled $2,365.

To reduce the risk of loss, theft, or misuse of monies received going undetected, procedures should be established to ensure all monies received are properly receipted and deposited or transmitted intact and timely.

6.3 Outstanding checks

The Prosecuting Attorney has not established procedures to routinely follow up on outstanding checks. As a result, at December 31, 2013, 75 checks payable to business and individuals for court-ordered restitution, totaling $7,002 had been outstanding for over a year with some checks dating back to 2004.

Procedures to routinely follow up on outstanding checks are necessary to prevent their accumulation and ensure monies are appropriately disbursed to the payee or as otherwise provided by state law.

6.4 Unidentified monies

The Prosecuting Attorney's trust account had a $5,227 unidentified balance on the monthly list of liabilities as of December 31, 2013. During the prior audit the account had an unidentified balance as $6,462, with unidentified amounts in the account dating back to 2007. The Prosecuting Attorney indicated his office personnel identified a portion of the amount reported during the last audit, but any further review would be both time and cost prohibitive. Therefore, he does not plan to try to identify the remaining unidentified balance.

Maintaining unidentified bank balances increases the risk of loss, theft, or misuse of such funds. Various statutory provisions address the disposal of unidentified monies.

Similar conditions previously reported

Similar conditions to sections 6.2 and 6.4 were noted our prior audit report.

Recommendations

The Prosecuting Attorney:

6.1 Adequately segregate accounting duties to the extent possible or ensure supervisory reviews of accounting records are performed and documented. Additionally, the Prosecuting Attorney should require a supervisory review and approval for all accounting adjustments.

6.2 Ensure the method of payment of receipts is recorded on the one-write receipt ledger, checks and money orders are restrictively endorsed immediately upon receipt, and the numerical sequence of all receipt slip numbers is accounted for. The Prosecuting Attorney should also ensure manual receipt records are reconciled to the computerized accounting system and deposits and transmittals are made intact and timely.

6.3 Establish procedures to routinely investigate outstanding checks. Old outstanding checks should be voided and reissued to payees that can be readily located. If the payee cannot be located, the amount should be disbursed in accordance with state law.

6.4 Dispose of unidentified monies in accordance with state law.

Auditee's Response

The Prosecuting Attorney provided the following written responses:

6.1 The Prosecutor's office continues to operate with limited staff, such that greater segregation of duties may not be possible. It is anticipated that additional staff may be made available in 2015 and future budget years, which may be able to provide enhanced funds handling and accounting safeguards. These issues along with other alternatives for handling and streamlining restitution and fees will be reviewed with the incoming Prosecutor in an effort of improve these procedures on an ongoing basis, including periodic supervisory review and approval of all adjustments and corrections.

6.2 A policy will be implemented to note the payment type on manual receipt slips and reconcile the manual receipt ledger to the computerized system. The other issues noted will also be reviewed as part of orientation to office systems with the incoming Prosecutor.

6.3 The current officeholder will review and cancel any stale outstanding checks and transfer those funds and payee information to the unclaimed property fund in accordance with law by the end of calendar year 2014, as part of an effort to reduce and eliminate any cash funds within the responsibility of the office prior to the incoming Prosecutor assuming office.

6.4 The current officeholder will transfer all remaining unidentified funds to the unclaimed property fund in accordance with state law by the end of calendar year 2014, so as to eliminate any such items from the responsibility of the Prosecutor's office prior to the incoming officeholder assuming office.

7. Public Administrator Salary

The County Commission has not set the Public Administrator's salary in accordance with state law, and as a result, is underpaying the Public Administrator $20,000 annually. When the new Public Administrator took office in January 2013, she elected to receive a salary, as allowed under Section 473.742, RSMo. According to this statute, when the salary option is elected, the Public Administrator's salary is based upon the average number of open letters (cases) assigned to the Public Administrator in the 2 years preceding the term.

The Public Administrator's salary was incorrectly based on an average of 36 open letters (cases), which resulted in a $25,000 salary, as specified by Section 473.742, RSMo. However, according to court records, there was actually an average of 43 open cases, which would have resulted in an annual salary of $45,000. This difference in the number of open cases was due to a miscommunication between the County Clerk and the Associate Circuit Court, Probate Division. The Associate Circuit Court, Probate Division provided the County Clerk with the number of open cases during the previous 2 years that were assigned to the former Public Administrator (average of 36), rather than the total open cases for the office, which included cases inherited by the former Public Administrator when she took office (increasing the average to 43 in total). Therefore, the Public Administrator's salary should have been based on the average of all open cases for the office (43) and should have been set at $45,000 according to state law, not $25,000. As of June 2014, she was still being paid based on this incorrect yearly amount.

Recommendation

The County Commission should set the Public Administrator's salary in accordance with state law, and consider whether the payment of back pay is appropriate.

Auditee's Response

The County Commission provided the following written response:

The Public Administrator salary will be paid in accordance with state law when proof is presented to the County Commission of caseload. We will have a meeting with the court this month to discuss the caseload and obtain proper documentation.

8. Passport Fees

There is no authority for the Recorder of Deeds to collect passport fees, and the county cannot demonstrate the fees collected were spent in accordance with state law.

During the year ended December 31, 2013, the Recorder of Deeds processed 136 passport applications and collected $18,360 in passport processing fees. The county retains $25 of each passport fee and retained $3,400 during that year, which was turned over to the County Treasurer as general revenue. Passport fees revenue is not separately tracked to ensure it is spent in accordance with state law.

Section 483.537, RSMo, states that the clerk of any state court who, by deputy or otherwise, takes or processes applications for passports or their renewal shall account for the fees charged for such service and for the expenditure of such fee in an annual report made to the presiding judge and the office of the state courts administrator. Such fees shall be used only for the maintenance of the courthouse or to fund operations of the circuit court.

Recommendation

The Recorder of Deeds discontinue collecting passport fees or ensure passport fees are reported and spent in accordance with state law.

Auditee's Response

The Recorder of Deeds provided the following response:

In May 2014 we started turning over passport fees to the Circuit Court. We are planning to stop taking passport applications sometime this fall.

9. Capital Assets

As similarly noted in several of our prior reports, procedures and records to account for county property are not adequate.

The County Clerk has not updated capital asset records since 2003 and capital asset records lack necessary information such as the purchase date, acquisition cost, serial number, and disposal information. Some capital assets are not numbered, tagged, or otherwise identified as county property. In addition, the county does not have adequate procedures in place to identify capital asset purchases and dispositions throughout the year. These problems increase the possibility of undetected theft and inadequate insurance coverage.

Adequate county property records and procedures are necessary to ensure effective internal controls, meet statutory requirements, and provide a basis for determining proper insurance coverage. Procedures to track property purchases and dispositions throughout the year, along with periodic physical inventories and comparisons of the results to overall county property records are necessary to evaluate the accuracy of the records, and deter and detect theft. Proper tagging of county property items is necessary to facilitate the record-keeping process. Section 49.093, RSMo, requires counties to account for personal property costing $1,000 or more, assigns responsibilities to the officer or applicable designee of each county department, and describes details to be provided in the inventory records.

Recommendation

The County Commission and the County Clerk work with other county officials to ensure complete and accurate inventory records are maintained, purchases and dispositions of assets are tracked, annual physical inventories are conducted, and assets are tagged as county property.

Auditee's Response

The County Commission and County Clerk provided the following written response:

The County Commission will work with the County Clerk's office to ensure county property is correctly listed and reported.

Miller County
Organization and Statistical Information

Miller County is a county-organized, third-class county. The county seat is Tuscumbia.

Miller County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 111 full-time employees and 14 part-time employees on December 31, 2013.

In addition, county operations include the Senate Bill 40 Board and the Senior Citizens Service Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Tom Wright, Presiding Commissioner	$	31,700
Darrell Bunch, Associate Commissioner		29,700
Brian Duncan, Associate Commissioner		29,700
Deb Wiles, Recorder of Deeds		45,000
Clayton E. Jenkins, County Clerk		45,000
Matthew Howard, Prosecuting Attorney		116,858
William Abbott, Sheriff		50,000
Phil Lawson, County Treasurer		45,000
Rick Callahan, County Coroner		16,000
Theresa Lupardus, Public Administrator		25,000
William Harvey, County Collector, year ended February 28,	45,113	
Joseph Cochran, County Assessor, year ended August 31,		45,000
Gerard J. Harms Sr., County Surveyor (1)		

(1) Compensation on a fee basis.

Financing Arrangements

The county entered into an amended lease-purchase agreement with Southwest Trust Company on November 1, 2010. The terms of the agreement call for the county to lease the justice center (which includes the courthouse and adjoining law enforcement center) to Southwest Trust Company, and then the company leases the justice center back to the county with lease payments equal to the amount due to retire the indebtedness. In

October 2010, Southwest Trust Company, on behalf of the county, issued refunding certificates of participation, Series 2010 in the amount of $4,295,000 for the purpose of refinancing the Series 2001 Certificates. Principal payments are due annually on October 1 and interest payments are due semi-annually on April 1 and October 1. The payments are made with the revenue generated from the county's 1/2-cent capital improvement sales tax that was extended by the voters on August 3, 2010, and is in effect through 2030, when the lease is scheduled to be paid off. The remaining principal outstanding at December 31, 2013, was $3,975,000. Interest remaining to be paid over the life of the lease totals $1,778,610.

The county has entered into 6 separate lease-purchase agreements for 3 motor graders, 2 pickup trucks, and 1 dump truck. Principal and interest payments for 5 of the agreements are made from the Special Road and Bridge Fund, and payments for 1 agreement are from the Sheriff's Discretionary Fund. Final payments for the leases are scheduled to occur from 2014 to 2018. The remaining principal outstanding at December 31, 2013, totaled $426,705. Interest remaining to be paid over the life of the agreements totaled $33,623.

The county has a line of credit with a 1-year maturity and renewable annually, which was used to purchase 5 Sheriff's department vehicles. The maximum principal indebtedness under the line of credit at December 31, 2013, was $142,700. Principal and interest payments are made from the General Revenue Fund and the Sheriff's Discretionary Fund. The principal balance due at December 31, 2013, is $113,177 with interest rate of 2.58 percent. Interest will be calculated at maturity.

The county has a line of credit with a 1-year maturity date for various road and bridge equipment. The maximum principal indebtedness under the line of credit at December 31, 2013, was $750,000 with a variable interest rate being charged. Principal and interest payments are made from the Special Road and Bridge Fund. The line of credit had a principal balance due at December 31, 2013, of $296,931. Interest will be calculated at maturity.

The county has established 6 neighborhood improvement districts and issued general obligation bonds as part of the financing for these projects. Although these are general obligations bonds of the county, special assessments have been levied on the property located in the districts to pay the principal and interest. Final payments for the bonds are scheduled to occur from 2014 to 2023. The remaining balance outstanding at December 31, 2013, totaled $386,412. Interest remaining to be paid over the life of the bonds totaled $53,298.

Thomas A. Schweich

Missouri State Auditor

Renaissance Academy for Math and Science of Missouri, Inc.

Charter School Closure

November 2014

Report No. 2014-110

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Renaissance Academy for Math and Sciences of Missouri, Inc. Charter School Closure

Background	The Renaissance Academy for Math and Science of Missouri, Inc. (Renaissance Academy) was a charter school operating in Kansas City until May 2012. Imagine Schools, Inc., a national charter school management company, managed Renaissance Academy between 2007 and 2010, and the University of Missouri-Columbia was the school's sponsor. The Board terminated the contract with Imagine Schools, Inc. in 2010 and then voted to close the school at the end of the 2011-2012 school year. The Board sued the former management company, the management company countersued, and both suits are still pending.
Budget and Remaining Funds	The Board did not prepare and adopt a formal budget for the years ended June 30, 2013, and 2014, so the Board could not effectively plan for the allocation of resources, the need to retain funds for post-closure activities, or whether funds should be returned to the Department of Elementary and Secondary Education (DESE) for use by the local school district. As of June 30, 2014, the school still had a cash balance of $2.5 million, although the remaining estimated disbursements total only $1.9 million. The DESE believes remaining funds should be returned to the state.
Payments to Law Firm	The Board paid its law firm over $194,000 to perform closure and administrative duties without soliciting proposals or determining if less expensive options were available, including a $46,930 "recovery bonus" for filing financial reports with the DESE; at least $29,300 for filing, faxing, and handling inquiries about student records; and at least $21,500 for handling issues related to capital asset inventory and distribution. The Board also paid this firm $101,000 for legal services between June 2012 and November 2013.
Disbursements	Some disbursements since the school closure were unreasonable and unnecessary for the school closure process. The Board spent $4,355 on a meeting and holiday party, including time spent by a law firm partner to plan the party and time spent by law firm staff to open internal emails inviting staff to the party. The Board spent over $3,000 for other Board meetings held at restaurants, including $2,070 paid to the law firm for organizing a meal and meeting. The Board spent $12,644 for 2 members of the Board and 3 representatives of the Board's law firm to attend the 2012 annual Missouri Charter Public School Association conference where they presented a training session on charter school closures. The Board compensated the law firm for preparing the presentation and for firm personnel's travel time and expenses. The Board did not timely pay some bills, resulting in late fees and finance charges, and Board members signed two checks where they were also the payee.

Service Proposals and Agreements	The Board did not solicit proposals for some services and did not ensure written signed agreements defining services and benefits received were in place for all services received. For example, the Board transition team accepted a proposal for $11,500 for inventory and storage of assets and documents, but the Board paid a total of $314,000 for the service with no written agreement and no documentation to support the additional amount paid.

In the areas audited, the overall performance of this entity was **Poor**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

To the Board of Directors
Renaissance Academy for Math and Science of Missouri, Inc.

The State Auditor conducted an audit of the Renaissance Academy for Math and Science of Missouri Inc. under authority granted in Section 29.205, RSMo. We have audited certain operations of the charter school in fulfillment of our duties. The charter school engaged Kerber, Eck & Braeckel LLP, Certified Public Accountants (CPAs), to audit the charter school's financial statements for the year ended June 30, 2012. To minimize duplication of effort, we reviewed the report of the CPA firm for the year ended June 30, 2012 audit. The June 30, 2013, audit has not been completed. The scope of our audit included, but was not necessarily limited to, the period from June 1, 2012, through July 31, 2013. The objectives of our audit were to:

1. Evaluate the charter school board's internal controls over significant management and financial functions.

2. Evaluate the charter school board's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions and those related to charter school closure.

4. Evaluate the planning and oversight of the charter school closure.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the charter school, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreements, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the charter school's management and was not subjected to the procedures applied in our audit of the charter school.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, (3) the need for improvement in management practices and procedures, and (4) deficiencies in the planning and oversight of the charter school closure. The accompanying Management Advisory Report presents our findings arising from our audit of the Renaissance Academy for Math and Science of Missouri, Inc.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Kelly Davis, M.Acct., CPA, CFE
In-Charge Auditor:	Richard Stuck
Audit Staff:	Amber M. Carlile

Renaissance Academy for Math and Science of Missouri, Inc.
Charter School Closure
Introduction

Background

The Renaissance Academy for Math and Science of Missouri, Inc. (Renaissance Academy) was a charter school operating in Kansas City until May 2012. In accordance with Section 160.400, RSMo, the Renaissance Academy formed as a not-for-profit corporation in 2007. Imagine Schools, Inc., a national charter school management company, managed Renaissance Academy between 2007 and 2010.

The Renaissance Academy Board of Directors (Board) voted in March 2011 to close the school at the end of the 2011-2012 school year. The last day of classes for the school was May 25, 2012. The Board previously terminated the contract with Imagine Schools, Inc. in 2010. After operating the charter school without a management company, the Board determined it would be in the best interest of the students and charter school to close operations and not pursue another charter contract. Officials from the charter school's sponsor, the University of Missouri - Columbia, indicated the sponsor would have withdrawn sponsorship if the Board had not voted to close.

The following table reflects actual cash receipts and disbursements for the 2 years ended June 30, 2014:

	Year Ended June 30,	
	2013	2014
Beginning cash balance	$ 6,760,650	2,840,313
Receipts	364,632	1,465
Disbursements (by type):		
Payroll	236,824	788
Education related expenses	256,414	12,283
Building services and supplies	94,176	0
Attorney	225,883	239,581
Settlement of lawsuit	298,750	0
Accounting services	47,980	38,696
Moving and storage	312,454	1,650
Board expenses	12,488	1,604
Department of Elementary and Secondary Education (DESE)	2,800,000	0
Total Disbursements	4,284,969	294,602
Ending cash balance	$ 2,840,313	2,547,176

Source: Renaissance Academy bank statements. Disbursements (by type) were determined by payee (i.e., vendor or employee).

The Board sued the former management company in June 2013, and the lawsuit, as well as the management company's countersuit for breach of contract, are pending. Final dissolution of the not-for-profit corporation is pending the litigation and completion of final closure activities including final storage of school records.

Sections 160.400 through 160.425, RSMo, provide requirements for the organization and administration of charter schools. At the time of the closure of the Renaissance Academy, the statutes did not provide guidance on the closure of charter schools. In 2012, the General Assembly passed Senate Bill No. 576, effective August 28, 2012, which includes significant revisions to laws pertaining to charter schools. Statutory provisions now require sponsors to develop procedures to be implemented if a charter school should close and also requires charter schools to include procedures in the charter agreement to be implemented if the school should close. These procedures are to address matters including transition and archival of student records; archival of business operation and transfer or repository of personnel records; submission of final financial reports; resolution of financial obligations; disposition of school assets; and a notification plan to inform parents or guardians, the local school district, the applicable retirement system, and the State Board of Education (State Board) within 30 days of closure.

In addition, the bill provides the charter shall be a legally binding performance contract that describes the obligations and responsibilities of the school and the sponsor. The bill also includes additional responsibilities for the sponsor to monitor the charter school and requires the State Board to evaluate sponsors to determine compliance with sponsorship standards every 3 years.

The effective date of the bill was subsequent to the closure date of the Renaissance Academy.

Renaissance Academy for Math and Science of Missouri, Inc.
Charter School Closure
Management Advisory Report - State Auditor's Findings

1. Budget and Remaining Funds

The Board did not prepare and adopt a formal budget for the years ended June 30, 2013, and June 30, 2014. As a result, the Board could not effectively plan for the allocation of resources, the need to retain funds for post-closure activities, or whether funds should be returned to the Department of Elementary and Secondary Education (DESE) for use by the local school district.

In May 2013, the Board disbursed $2.8 million of its remaining cash balance to the DESE. At June 30, 2013, the school had a remaining cash balance of $2,840,313. The Board notified the DESE the school would need to retain these remaining funds because the Board anticipated approximately $2.7 million in additional expenditures for ongoing litigation, storage of records, and insurance. The Board provided the DESE a listing and estimated amount for each category, but did not provide detailed documentation to support the basis of the estimates.

As of June 30, 2014, the cash balance remains at approximately $2.5 million. According to its legal counsel, the Board discussed at its March 2014 meeting the remaining funds needed for operating expenses and the Board's continued belief the remaining funds are still needed for the purposes previously determined. However, this information was not documented in the Board's March 2014 meeting minutes and the Board did not provide additional documentation to support this assertion. In addition, the remaining estimated disbursements total approximately $1.9 million. The following table presents the remaining projected cash balance after estimated operating expenses and other estimated disbursements as provided by the Board's legal counsel.

Cash Balance at June 30, 2014	$ 2,547,176
Projected disbursements:	
Operating expenses[1]	749,610
Pending litigation liability[2]	622,580
Potential tax liability[3]	300,000
Attorney fees	150,000
Document storage	23,400
Insurance	25,000
Total projected disbursements	$ 1,870,590
Projected remaining balance at dissolution	$ 676,586

[1] Operating expenses estimated as approximately 3 times the fiscal year 2014 disbursements of $249,870. The estimate is based on 3 years of disbursements because the Board's legal counsel stated the Board has 3 years to dissolve the corporation after the conclusion of the litigation.

[2] The Board's former management company countersued the Board for this amount.

[3] The Board's legal counsel estimates the Board may owe this amount for failure to properly file as a not-for-profit corporation with the Internal Revenue Service.

The DESE requested unobligated funds be returned in accordance with Section 160.405.1(17), RSMo, in March 2013. DESE officials indicated the department continues to believe remaining funds retained by the Board should be returned to the state. The Board's legal counsel stated they do not believe the Board is subject to the statute, despite already paying a portion of unobligated assets to the DESE, because the statute specifies the requirements are applicable to schools operating on August 27, 2012, and the school stopped operating on May 25, 2012. Irrespective of the disagreement over the statutory provisions, remaining charter school monies are public funds that should be used for the benefit of students within that district, and periodic evaluation of remaining obligations is necessary to determine if funds should continue to be retained or returned for use by the local school district.

Board policy 3110 states an annual budget will be adopted by June 30 each year according to statutory provisions and no funds may be spent that are not authorized by the annual budget. A complete budget should include separate receipt and disbursement estimations, and include the beginning available resources and a reasonable estimate of the ending available resources. A complete and well-planned budget, in addition to meeting policy requirements, can serve as a useful management tool for the Board by establishing specific financial expectations for school closure activities. In addition, because remaining funds are public funds, the Board should consider if funds should be returned for use by the local school district.

Recommendation

The Board of Directors develop an annual budget in accordance with Board policy. In addition, the Board should periodically evaluate remaining obligations, and consider if funds should continue to be retained or be returned for use by the local school district.

Auditee's Response

The Board of Directors provided the following written response:

The Board provided the State Auditor an informal budget for its fiscal year beginning July 1, 2013. However, the Board has three on-going vendors: the storage facility for the student/school records that are required to be maintained per the Secretary of State's office and applicable statutes; its accountant; and its legal counsel for the lawsuit against the school's former educational management company. Our budget is based on the projected expenses for the litigation and our ongoing monthly fees for storage and accounting services. The Board going forward will make sure it timely approves the budget pursuant to its policy.

Remaining Funds: The Board agrees with the State Auditor's determination that any unobligated funds should be used for the benefit of students within Kansas City School District as set out in the applicable statutes prior to

August 2012, and periodic evaluation of the remaining unobligated funds is appropriate.

2. Payments to Law Firm

The Board assigned its law firm many administrative duties related to the charter school closure in addition to legal services. The Board did not solicit proposals for these administrative duties or determine if less expensive options were available. The Board has employed the same law firm since August 2010. The Board paid the law firm over $194,000 for closure and administrative duties and $101,000 for legal services between June 2012 and November 2013. The majority of billings in the year ended June 30, 2014, relate to ongoing litigation.

Board members indicated they initially had 2 employees assist with some of the closure and administrative tasks. However, they were not satisfied with the employees' work and the law firm completed the work. After this change, the Board chose to utilize the law firm for the ongoing closure and administrative tasks. Board payments to the law firm for these tasks between June 2012 and November 2013 include:

- A $46,930 "recovery bonus" for filing required financial reports with the DESE to receive the remaining federal funding due to the district. The documents were not unique from other reports filed while the school was in operation and did not require additional legal advice. The Board President described the payment as a "recovery bonus." The amount is 15 percent of the $312,860 the Board received from the DESE.

- At least $29,300 for filing, faxing, and handling inquiries about student records. Student record duties related to transferring student files and transcripts to the student's new school.

- At least $21,500 for handling issues related to capital asset inventory and distribution.

- $8,756 for preparing the presentation, travel time, and expenses for the 2012 Missouri Charter Public School Association (MCPSA) conference as discussed in MAR finding number 3.

- $8,556 for reading or sending emails within the law firm related to items such as the presentation at the MCPSA conference, requesting confirmation of attendance at various Board related functions, and reading of carbon copy emails.

- $1,460 for planning the December 2012 Board meeting and holiday party as discussed in MAR finding number 3. Billings included charges

for opening email messages from one member of the firm to another inquiring if the staff member was attending the party.

- At least $250 for reading 14 electronically generated email messages noting someone was out of the office.

Board members have a fiduciary responsibility to ensure disbursements of public funds are appropriate and reasonable. To ensure disbursements are reasonable, the Board should solicit proposals for services and consider associated costs when delegating tasks to legal counsel.

Recommendation

The Board of Directors ensure planned and actual expenditures are scrutinized for appropriateness and reasonableness. The Board should evaluate the necessity of utilizing legal counsel to perform administrative duties related to the closing of the charter school.

Auditee's Response

The Board of Directors provided the following written response:

The Board initially hired two administrators from the school to serve in an administrative capacity post-closure of the school buildings. Both quit less than thirty days before the school's final date of June 30, 2012. For a period of time the law firm had no choice but to serve in an administrative capacity to timely respond to DESE inquiries and meet the due dates for filing various reports and providing finalized core data. The Board was very fortunate that one of the attorneys for the firm was experienced and trained on how to handle the reports and data. The Board sought and hired two additional persons in the fall of 2012 to take over the administrative work being done by the firm. One person was great at her task specific to getting student records prepared to be scanned electronically and for microfiche. She executed her job timely and properly. The other was to handle the ongoing issues of providing student records to students, responding to DESE, finalizing the school's inventory and disbursement process, preparing documents for the Board meetings, and any other administrative issues that might come to the fore. Unfortunately, she was not adept at the work and the law firm kept having to go behind her to clean up and correct the records being sent to DESE and others. The Board quickly recognized it was paying twice for the same job. The position the Board took was that work needed to be done right the first time and we seemed to get that from the law firm. The work has been done and done well by the law firm and the Board believes that the payments have been appropriate and reasonable given the circumstances.

The Board agrees that under normal circumstances a non-legal administrative person would be an appropriate choice. However, the situation the Board has found itself in is not the ordinary circumstance, in that, any administrative person hired after the school was closed would not

have had any institutional or historical knowledge regarding the year being audited. This would have resulted in legal counsel having to been consulted virtually throughout the process. A specific instance is the issue of records regarding the closure process. The Board's legal counsel informed the auditors of implementation of a transition team to develop and execute the approved closure process. This is an example of the type of critical information that might have been missed without legal counsel's involvement. The Transition Team included school staff/administrators, the sponsor, Board members, and legal counsel. All of the processes and considerations for the closure process were in the Transition Team's minutes rather than Board's minutes. Having legal counsel handling this process kept the Board from having to pay an administrative person and the firm for working on the auditors' requests. But most importantly, the Board felt secure that accurate and complete information was being provided to the auditors. Moreover, our legal counsel thought it was more important to protect the Board than collect fees. The Board does not believe, based on its past experience, that administrative personnel provide that type of loyalty to their employers.

The Board provided the following response to the specific issues noted in the report:

- *Recovery Bonus: The Board approved the recovery bonus for the $312,860 from DESE because the Board would not have recovered the funds without legal counsel's expertise and guidance.*

- *Records Requests: The records requests have to be responded to as obligation of the Board and personnel hired in the past failed to timely respond to students' requests resulting in complaints to DESE.*

- *Inventory Disbursement: The disbursement of Renaissance's assets was a tremendous undertaking that hired staff failed to diligently complete resulting in legal counsel having to do and complete.*

- *MCPSA: The Board, the sponsor and legal counsel was asked to present its closure process to the Missouri Charter Public School Association Annual Conference. The entire presentation was prepared by legal counsel with input by the Board and the Sponsor. Legal counsel did the presentation preparation with Board members and the Sponsor and prepared the hand outs for the meeting. Since Renaissance was the first voluntary closure it seemed appropriate to share our process with its good and not-so-good outcomes with the Missouri Charter community at large.*

- *Emails: The Board strongly believes that legal counsel should be compensated for the time it spends on its work and that emailing is such*

an important part of communicating with the Board and others on behalf of the Board.

- *Legal counsel has refunded $1,460 to the Board for all fees associated with holiday party planning.*

- *Legal counsel has refunded $250 to the Board for electronically generated email messages noting someone being out of the office.*

It should be noted that legal counsel donated all of its time to the Board for all the time the firm spent in gathering documentation and responding to inquiries of the State Auditor's office. We calculate the time donated by the firm to this process to be in excess of $10,000.

Auditor's Comment

The staffing issues cited by the Board occurred early in the closure process, leaving the Board with the option to hire and train qualified staff to complete the various closure and administrative tasks as opposed to using legal counsel.

Regarding the recovery bonus, while legal counsel may have recognized the need to file the financial report with the DESE, there were likely other options for completing the report that would have minimized the associated fees. As stated in the audit, the document was not unique from other reports and did not require legal advice, and such reports would normally be prepared by administrative school staff.

During our initial audit entrance conference with the Board and its legal counsel we discussed minimizing additional costs to the Board that would result from audit requests made to the Board's legal counsel. We recommend addressing concerns directly with Board members, if possible, and explained we would take steps to minimize audit requests and related costs. The Board chose to use its legal counsel as the primary audit contact. Regarding the transition team and minutes, it is unclear why Board members serving as members on the team could not inform our auditors of the team implementation and activities.

Amounts refunded by legal counsel for time spent on holiday party planning and certain email messages demonstrate the nature of items billed and reimbursed by the Board that served no significant purpose toward school closure.

The donated costs cited further illustrate the substantial costs associated with using legal counsel as the primary administrator for Board business.

3. Disbursements

Some disbursements since the charter school closure in May 2012 were unreasonable and unnecessary for the school closure process.

3.1 Board disbursements

The Board made several purchases that were unreasonable and/or unnecessary. The law firm representing the Board receives all invoices, adds the appropriate accounting system coding, and prepares a warrant list. The firm sends warrant lists to the Board President for her review and approval. Once approved, the invoices are sent to the Board's accounting firm that prepares the checks. The accounting firm then sends the checks back to the law firm for the authorized Board members to sign.

Holiday party

The Board held the December 2012 meeting and holiday party at a local Kansas City restaurant. The Board purchased gifts for Board members and employees of the Board's law firm. The Board also paid for alcoholic beverages during the meeting and party.

The Board's law firm planned and participated in the party. Law firm billings related to the party included time spent by a firm partner to plan the party and time spent by firm staff to open internal emails inviting staff to the party as discussed in MAR finding number 2. Total charges for the Board meeting and holiday party were:

Item	Cost
Meal and alcohol	$ 2,095
Attorney fees for planning	1,460
Gifts	785
Parking	15
Total	$ 4,355

The Board President indicated the expenses incurred for the party and gifts were justified and deserved due to work done by staff and the law firm on behalf of the charter school. After we and the DESE brought these questionable disbursements to the Board's attention, the law firm paid $792 to the Missouri State Treasurer's office in March 2014 as a reimbursement for a portion of Board gifts and alcoholic beverage purchases.

Meals

The Board spent more than $3,000 for other Board meetings held at restaurants. In March 2013, the law firm again was in charge of organizing the meal and meeting at a cost of $2,070. The Board also spent $671 for the meal including $57 for alcoholic beverages. In addition, the Board spent $216 for 3 other meals.

MCPSA conference

Two members of the Board and 3 representatives from the Board's law firm attended the annual MCPSA Conference in St. Louis in October 2012 where they served as presenters for a training session on charter school closures. To attend and present at the conference the Board had to pay registration fees for all attendees including the presenters. The Board compensated the law firm for preparing the presentation, firm personnel time to travel to and

from the conference, and travel expenses. The Board members indicated the school agreed to send representatives to the conference because they were asked to discuss the closure; however, that decision is questionable if the school had to cover the attendance costs. Disbursements associated with the conference include:

Item	Cost
Attorney fees	$ 8,756
Hotel	1,448
Rental car and parking	771
Conference fees	625
Airfare to St. Louis	588
Meals	456
Total	$ 12,644

The Missouri Constitution prohibits the use of public money or property to benefit any private individual, associations, or corporations except as provided in the constitution. Public funds should be spent only on items necessary and beneficial to the charter school. Citizens have placed a fiduciary trust in their public officials to spend charter school monies in a prudent and necessary manner.

3.2 Untimely payments

The Board did not ensure some bills were paid timely resulting in late fees and finance charges. The Board paid 13 bills totaling $10,930 late and incurred at least $286 in late fees and finance charges since July 1, 2012. The Board also received late notices from at least 4 other vendors, but incurred no additional fees or charges. To prevent unnecessary fees and finance charges, procedures should be in place to ensure bills are paid timely.

3.3 Signing checks

Board members signed 2 checks where they were also the payee. The Board President signed a check reimbursing herself for meal expenses. The Board President was the only signor on the check. Another Board member signed a check reimbursing himself for taxi and parking fees. The Board President also signed this check.

The current procedure of allowing Board members to sign checks where they are also the payee jeopardizes the system of independent checks and balances needed for good internal control. Dual signatures would help provide assurance checks are written only for appropriate disbursements.

Recommendations

The Board of Directors:

3.1 Ensure all disbursements are necessary and prudent uses of public funds.

3.2 Ensure all invoices are paid timely.

3.3 Require dual signatures on all checks and ensure the signor is not the payee.

Auditee's Response

The Board of Directors provided the following written responses:

3.1 The Board has refunded to the state with the filing of its responses an additional $2,110 for expenses associated with meals, and a copy of the cashier's check is attached to our response. With the Board's prior payment of $792 and the law firm's refund to the Board for their legal fees, proof of which has been provided to the State Auditor's office, all expenses have been reimbursed. The Board addresses its response related to the MCPSA conference in the previous finding responses.

3.2 The Board strictly enforced its policy that no bills will be paid without its review and approval. Unfortunately, some bills consistently arrived after the Board's meeting for a given month resulting in a few late payments. However, now that there are only a handful of vendors this problem has resolved itself.

3.3 The Board has always required two signatures on every check to ensure that another Board member has viewed any disbursements, but has now instituted the requirement that a Board member cannot sign a reimbursement check to him/herself—it has to be two Board members not receiving reimbursement to execute the reimbursement check.

4. Service Proposals and Agreements

The Board did not solicit proposals for some services. In addition, the Board did not ensure written signed agreements defining services and benefits received were in place for all services received. The following is a list of services without a request for proposal and/or a written agreement between June 2012 and November 2013:

- The Board transition team accepted a proposal for $11,500 for inventory and storage of assets and documents. However, the Board paid a total of approximately $314,000 for the service and there is no documentation for the significant additional amount paid to the vendor and there was no written agreement with the vendor.

- The Board paid its legal counsel over $300,000 and did not solicit proposals for the services. The school had a signed agreement with the law firm from 2010. However this agreement did not include provisions for the various administrative and commissioned services discussed in MAR finding numbers 2 and 3.

In addition, the rates charged by the firm varied from those listed in the agreement. The agreement states the hourly rate will be $190, $170, and $90 for partners, associates, and paralegals respectively. The firm charged $200, $165, and $100 for partners, associates, and administrative staff/paralegals respectively.

- The Board did not enter into a written agreement with the vendor used to microfiche records. Additionally, the Board solicited proposals for microfiching services but did not retain documentation of the proposals received. The only documentation available was the Board's acceptance of the winning proposal. The Board paid the vendor approximately $18,000.

- The Board did not solicit proposals for accounting services or a forensic audit. The Board established a written agreement with the firm performing accounting services but did not enter into an agreement for the forensic audit. The Board paid the accounting firm and forensic auditor approximately $21,000 and $8,700, respectively.

Periodically soliciting proposals for professional services is a good business practice, helps provide a range of possible choices, and allows the Board to make better informed decisions to ensure necessary services are obtained from the best qualified provider, taking expertise, experience, and/or cost into consideration. Clear and detailed written signed agreements are also necessary to ensure all parties are aware of their duties and responsibilities, provide a means to monitor compliance with agreement terms, prevent misunderstandings, and ensure school monies are used appropriately and effectively.

Recommendation

The Board of Directors solicit proposals for all professional services and enter into written agreements defining services provided and benefits received.

Auditee's Response

The Board of Directors provided the following written response:

The Board received a written bid from Fry-Wagner regarding the removal and storage of all the inventory of the school. The Board was renting the buildings where the school was housed and the landlord was unwilling to allow the Board to stay in the facility beyond June 30, 2012. Accordingly, the Board had to move everything out of the buildings and store it until the disbursements to other public schools in its district could be completed. Fry-Wagner was chosen because it was the only moving company that bar-coded each item; provided digital access to the administration/Board to view the item; and would scan all items out during the disbursement process so that a proper accounting could be provided to DESE regarding how the

assets were disbursed. No other company in the area could facilitate keeping up with items as they were disbursed.

The Board has sought out bids for legal services for the fiscal year beginning July 1, 2014.

The Board received bids for microfiche of the student records and accepted the best bid based on the winning bidder's experience and price.

The forensic accountants were vetted by legal counsel at the request of the Board and legal counsel's recommendation was ultimately accepted by the Board.

If the Board needs any additional vendors or services it will solicit proposals/bids and will enter into a written agreement as a best practice.

Renaissance Academy for Math and Science of Missouri, Inc.
Charter School Closure
Organization and Statistical Information

The Renaissance Academy for Math and Science of Missouri, Inc. (Renaissance Academy) was a charter school organized and governed under Sections 160.400 through 160.420, RSMo. Charter schools are independent public schools, organized as not-for-profit corporations by statute, that are free from rules and regulations that apply to traditional public school districts unless specifically identified in charter school law. In exchange for flexibility, charter school sponsors are to hold the charter schools accountable for results.

A person, group, or organization seeking to establish a charter school must submit a proposed charter agreement to an eligible sponsor. If a charter is approved by a sponsor, the sponsor submits the charter application to the State Board of Education for approval, along with a statement of finding that the application meets the requirements of Sections 160.400 through 160.420, RSMo, and Section 167.439, RSMo. Charter school sponsors receive 1.5 percent of the charter school's state and local funding to defray the costs of sponsorship if the sponsor remains in good standing. The State Board of Education is responsible for ensuring the sponsor meets its obligations under the charter school law. The University of Missouri - Columbia was the sponsor for the Renaissance Academy prior to closure.

In accordance with Section 160.415.4, RSMo, a charter school that has declared itself as a local education authority receives funding from the Department of Elementary and Secondary Education (DESE) based on attendance in the same manner as other school districts. Section 160.410.1 (1), RSMo, states a charter school shall enroll students residing in the district within which it operates. As a result, only students eligible to attend the Kansas City School District could attend the Renaissance Academy. The DESE reduces the local school district's funding allocation based on the charter school attendance and disburses this funding to the charter school. Charter schools also receive federal funding through the DESE.

The Renaissance Academy was located in Kansas City, Missouri. The Renaissance Academy began operating as a school in the fall of 2007 and stopped offering classes at the end of May 2012. Imagine Schools, Inc., a national charter school management company, managed Renaissance Academy between 2007 and 2010. The charter school consisted of two campuses and instructed grades Kindergarten through 12. Enrollment was approximately 1,100 for the 2011-2012 charter school year.

School Board

The five member Board acts as the policy-making body for the charter school's operations. Board members serve without compensation. Members of the Board at July 31, 2013, were:

Tomika Booker, President
Ricardo Houston, Member
Wanda Frazier, Member
Sharon Britton, Member
Vacant, Member[1]

[1]Board member Anita Haney resigned effective September 20, 2012, and no replacement has been appointed.

Charter School Closure

November 2014

Report No. 2014-111

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Urban Community Leadership Academy Charter School Closure

Background

The Urban Community Leadership Academy (UCLA) was a charter school operating in Kansas City, Missouri until June 2012. The UCLA formed as a not-for-profit corporation on February 1999. The University of Central Missouri, the charter school sponsor, notified the UCLA Board of Directors in November 2011 of its intent to allow the sponsorship agreement to expire, and the Board voted in April 2012 to close the school. Final dissolution is pending the Board's completion of final closure activities. The report identifies important concerns but does not provide recommendations since the school has ceased operations.

Closure Planning and Oversight

The Board failed to adequately plan for the closure of the charter school. The Board did not adhere to a plan, develop a budget to administer the school closure activities, or provide adequate oversight of closure activities. Although the Board was aware of the impending closure in November 2011, it did not adopt an overall plan or budget to administer post-closure activities, including the disposition of assets, payment of final disbursements, and handling of personnel and student records. Instead, in May 2012, the Board contracted with a school employee to serve as Business Manager and handle the majority of post-closure activities. The Board did not regularly meet after the school closed to monitor the work of the Business Manager, and the Business Manager did not prepare monthly statements for the Board to account for expenditures. According to the Business Manager, the Board President was the only Board member involved in overseeing school-related decisions. The Board had a fiduciary responsibility to oversee the operations of the school and its closure, and the failure of the entire Board to participate breaches this fiduciary responsibility.

Record Retention

The school was unable to provide many records requested. The Business Manager indicated records are stored in multiple locations, including storage facilities, her home, and her office. We ultimately issued a subpoena and deposed the Business Manager in January 2014. Even under subpoena, the Business Manager was unable to produce invoices or receipts to support 120 of 706 (17 percent) check disbursements and credit card purchases, totaling $117,980, made between June 2012 and November 2013. Also, the Business Manager could not provide credit card statements for August 2012 and December 2013, did not produce requested bank statements until 8 months after she stated under oath that she would produce them, and could not produce Board meeting minutes and written agreements. The school's independent auditor issued a qualified opinion on the financial statements for the fiscal year ending June 30, 2012, because school officials could not provide adequate documentation.

Disbursements	A Board member made 9 cash withdrawals to purchase cashier's checks, totaling $55,490 and incurring a $7 fee per transaction, but there was no supporting documentation for these withdrawals. The Board did not authorize the transactions and later removed the Board member's access to the bank account. The Board did not competitively bid several purchases or solicit proposals for professional services, including $30,646 in management services, $29,450 in legal services, and $24,916 in accounting services. The Board was not able to provide current, signed, written agreements for all services and used the Business Manager's other employer for inventory moving. The Board paid the Business Manager more than allowed by the unsigned written agreement and without timesheets to support the hours worked and claimed for payment, and the Board did not provide adequate oversight of the work performed. The Business Manager is the only signor on one bank account and signed 11 payroll checks to herself totaling $8,438. The Board hired a management services firm in May 2012 and paid the firm $33,261 to assist with school post-closure activities, but there is little documentation to show the firm provided the agreed upon services. The Board paid at least $1,060 in late fees and $130 in finance charges since July 1, 2012, and spent $2,050 related to the late filing of the Board President's personal financial disclosure statements with the Missouri Ethics Commission. The Board did not prepare and file required 1099-MISC forms with the Internal Revenue Service.
Capital Assets	The Board did not solicit proposals for real estate services when selling the school building and did not obtain an independent appraisal of the building prior to sale. Capital assets were more susceptible to loss, theft, or misuse because the school did not adequately track or document the disposition of capital assets after closure. Prior to closure, the school did not perform physical inventories, so complete capital asset records were not available to account for these assets, and school officials did not document what items purchased with federal funding the Missouri Department of Elementary and Secondary Education removed.

In the areas audited, the overall performance of this entity was **Poor**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

To the Board of Directors
Urban Community Leadership Academy

The State Auditor conducted an audit of the Urban Community Leadership Academy under authority granted in Section 29.205, RSMo. We have audited certain operations of the charter school in fulfillment of our duties. The charter school engaged Daniel Jones & Associates, Certified Public Accountants (CPAs), to audit the charter school's financial statements for the year ended June 30, 2012. To minimize duplication of effort, we reviewed the CPA firm audit report. The scope of our audit included, but was not necessarily limited to, the period from June 1, 2012, through July 31, 2013. The objectives of our audit were to:

1. Evaluate the charter school's internal controls over significant management and financial functions.

2. Evaluate the charter school's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions and those related to charter school closure.

4. Evaluate the planning and oversight of the charter school closure.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the charter school and Board, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreements, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the charter school's personnel and was not subjected to the procedures applied in our audit of the charter school.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, (3) the need for improvement in management practices and procedures, and (4) deficiencies in the planning and oversight of the charter school closure. The accompanying Management Advisory Report presents our findings arising from our audit of the Urban Community Leadership Academy.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Kelly Davis, M.Acct., CPA, CFE
In-Charge Auditor:	Richard Stuck
Audit Staff:	Erica Schroer, MBA
	Amber M. Carlile

Urban Community Leadership Academy
Charter School Closure
Introduction

Background

The Urban Community Leadership Academy (UCLA) was a charter school operating in Kansas City until June 2012. In accordance with Section 160.400, RSMo, the UCLA formed as a not-for-profit (NFP) corporation on February 1999. The University of Central Missouri (UCM), the charter school sponsor, indicated the UCLA Board of Directors (Board) was notified in writing in November 2011 of the UCM's intent to allow the sponsorship agreement to expire. The Board voted in April 2012 to close the school. The last day of classes for the school was June 1, 2012. The UCM publicly cited several reasons for revoking the sponsorship including low enrollment, failure to meet attendance goals, poor student retention, failure to meet academic goals, and continued concerns with governance and fiscal and operational practices. Governance concerns included continuous board member turnover and related party transactions. Fiscal and operational practices concerns related to the school not maintaining adequate financial records or operating budgets and submitting untimely financial information to the sponsor.

The school's cash balance at June 30, 2012, was $695,494. The school received approximately an additional $375,400 during fiscal year 2013 in state reimbursements for the previous school year, refunds, and interest. The school disbursed approximately $1 million during fiscal year 2013 for salary and benefit payments (teachers and administrators were paid through September 2012), accounting services, storage and moving costs, utilities, and miscellaneous expenses related to the school and closure. At June 30, 2013, the school had a cash balance of $46,934. At June 30, 2014, the balance had been reduced to $10,190. The school sold the former school building in December 2012 for $675,000. However, after paying commissions and fees and applying the remainder of proceeds against the outstanding loan balance, the school still owed $12,240 on the building.

Sections 160.400 through 160.425, RSMo, provide requirements for the organization and administration of charter schools. At the time of the closure of the UCLA, the statutes did not provide guidance on the closure of charter schools. In 2012, the General Assembly passed Senate Bill No. 576, effective August 28, 2012, which includes significant revisions to laws pertaining to charter schools. Statutory provisions now require sponsors to develop procedures to be implemented if a charter school should close and also require charter schools to include procedures in the charter agreement to be implemented if the school should close. These procedures are to address matters including transition and archival of student records; archival of business operation and transfer or repository of personnel records; submission of final financial reports; resolution of financial obligations; disposition of school assets; and a notification plan to inform parents or guardians, the local school district, the applicable retirement system, and the State Board of Education (State Board) within 30 days of closure.

In addition, the bill provides the charter shall be a legally binding performance contract that describes the obligations and responsibilities of the school and the sponsor. The bill also includes additional responsibilities for the sponsor to monitor the charter school and requires the State Board to evaluate sponsors to determine compliance with sponsorship standards every 3 years.

The effective date of the bill was subsequent to the closure date of the UCLA.

Board Dissolution

The Board filed a plan of dissolution with the Secretary of State's office on October 16, 2013, to end the corporation and dissolve the Board. Final dissolution is pending the Board's completion of final closure activities including making final payments and obtaining a financial audit. The findings presented in the remainder of this report identify important concerns identified and relevant corrective actions. However, because the Board is currently in the process of dissolution, recommendations are not provided.

Urban Community Leadership Academy
Charter School Closure
Management Advisory Report - State Auditor's Findings

1. Closure Planning and Oversight

The Board failed to adequately plan for the closure of the charter school. The Board did not adhere to a plan or develop a budget to administer the school closure activities or provide adequate oversight of closure activities. As a result, the Board allowed deviations from normal procedures and controls were circumvented.

Although aware of the impending charter school closure in November 2011, the Board did not adopt an overall plan or a budget to administer post-closure activities including the disposition of assets, payment of final disbursements, and handling of personnel and student records. Instead, in May 2012, the Board contracted with a school employee to serve as Business Manager and handle the majority of post-closure financial, asset disposition, and personnel-related activities, while the UCM agreed to handle the transition and archival of student records. According to the Board minutes, a committee presented a report to the Board in August 2012, of matters needing consideration during the closure process including filing a formal dissolution plan with the Secretary of State, progress reports, and a review of obligations. The committee estimated the closure would be completed by March 2013. The Board could not provide a copy of this report and the Business Manager was not aware of the report, which she could have used as a guide during the closure process. UCM officials also indicated they distributed closure guidelines, provided by the National Association of Charter School authorities, to the transition team.

The Board did not regularly meet after the school closed to monitor the work of the Business Manager. Also the Business Manager did not prepare a monthly statement for the Board to account for expenditures. According to the Business Manager, Board members, other than the Board President, resigned or did not regularly participate in Board activities. As a result, the Board President was responsible for overseeing all decisions related to the school. Per the Board's legal counsel, the Board only met to approve items outside of the normal course of business. Items considered in the normal course of business include selecting vendors to provide services such as moving and storage, approving expenditures, and signing checks. There were no Board minutes after August 16, 2012. Subsequent to that date, the only documentation of a Board decision is the signed resolution to dissolve the NFP corporation, dated October 16, 2013.

The Board created a plan for the dissolution of the NFP corporation in October 2013 as part of the resolution to dissolve; however, this plan related only to the necessary actions for the legal dissolution of a corporation and was not implemented until 16 months after the school closed. Because the plan was not completed prior to school closure or soon after closure and did not address the ongoing actions needed during closure, it could not serve as a guide for the closure process.

A formal closure plan including steps for the dissolution of assets, handling of student and personnel records, and ongoing administrative duties would have helped the Board more efficiently finalize the school's closure. The Board has a fiduciary responsibility to oversee the operations of the school and its closure. The failure of the entire Board to participate breaches this fiduciary responsibility and resulted in insufficient oversight of closure activities. Section 610.020, RSMo, requires the preparation and retention of meeting minutes to document business conducted and to provide an official record of Board actions and decisions.

Board policy 501 states the Board accepts responsibility for adopting a sound budget. Board policy 501A (3112) states no funds may be spent that are not authorized by the annual budget. It further states the Business Manager will prepare a monthly statement to account for each month's expenditures and the total spent to date for the fiscal year. A complete and well-planned budget and closure plan, in addition to meeting policy requirements, could have served as a useful management tool by establishing specific expectations for school closure activities.

2. Record Retention

The school was unable to provide many records requested. The Business Manager indicated records are stored in multiple locations including storage facilities, her home, and her office, and she could not easily locate many of the records we requested. The Business Manager was responsible for retaining documentation and providing copies to the Board's accounting firm. Documentation provided to the accounting firm was generally available; however, the Business Manager did not provide some invoices and/or receipts to the accounting firm and these documents could not be produced for our review. We initially requested invoices, bank statements, contracts, and minutes in August 2013, and continued to request the items until we were told some items were not available. Due to the need to obtain these records and continued delays in receiving them, we issued a subpoena demanding the requested records be produced. We also deposed the Business Manager in January 2014 to answer under oath whether documents could be provided.

The Business Manager was not able to provide many financial documents even after the subpoena was issued, including detailed invoices or receipts to support 120 of 706 (17 percent) check disbursements and credit card purchases made between June 2012 and November 2013. Unsupported transactions totaled $117,980 of the $950,305 total expenditures. The Business Manager could not provide credit card statements for August 2012 and December 2013. In addition, the Business Manager did not produce requested bank statements until August 2014, 8 months after she stated in the deposition she would provide them.

The Business Manager also could not produce Board meeting minutes and written agreements as discussed in MAR finding numbers 1 and 3. The

independent auditor for the fiscal year ending June 30, 2012, issued a qualified opinion on the financial statements because school officials could not provide adequate documentation. Proper record retention is necessary to ensure the propriety of all financial transactions.

3. Disbursements

Significant weaknesses existed in the controls and procedures over disbursements. In addition, Board procedures for selecting and entering into written agreements for goods and services were not sufficient

3.1 Cash withdrawals

A Board member made 9 cash withdrawals totaling $55,490 in December 2012 and February 2013. The Board member made the withdrawals to purchase cashier's checks to pay vendors and also incurred a $7 fee per check. There was no supporting documentation for these individual withdrawals and the Board did not authorize the transactions.

Description	Date	Amount
Moving and storage services[1]	12/20/12	$ 10,650
Moving and storage services[1]	12/20/12	11,500
Moving and storage services[1]	12/20/12	11,500
Reimbursement for dumpster	12/22/12	325
Reimbursement for dumpster	12/26/12	350
Title services	12/26/12	12,240
Reimbursement for dumpster	12/26/12	325
Moving and storage services[1]	2/4/13	4,500
Moving services	2/5/13	4,100
Total		$ 55,490

[1]The Board paid the vendor $38,150 total for moving and storage services.

The Board President, Business Manager, and the Board's legal counsel indicated the Board member made the 7 December 2012 withdrawals, without the approval of the rest of the Board, because the sale of the school building required items to be moved quickly and the mover required cashier's checks. The Board member indicated he turned the invoice and bid documentation over to the Business Manager. The Business Manager indicated she did not have this information and was unable to provide us with documentation to support the transactions. The same Board member made 2 other withdrawals in February 2013 to pay for the moving of capital assets from one storage location to another less expensive location. After these transactions, the Board removed the Board member's access to the bank account.

Board policy 504 states no payment shall be made without invoices. To ensure disbursement are valid and proper, disbursements should be approved by the Board, adequate supporting documentation should be

obtained and retained for all goods and services purchased, and the Board should limit access to school bank accounts.

3.2 Request for proposals/bid

The Board did not competitively bid several purchases or solicit proposals for professional services. Examples of services obtained during the year ended June 30, 2013, and selected without a competitive process are as follows.

Service	Cost
Management services	$ 30,636
Legal services	29,450
Accounting services	24,916
Information technology services	7,800
Storage unit rental	5,819
Inventory moving	2,344

The Board could only provide an expired agreement and an unsigned memorandum of understanding for management services. The Board was not able to furnish signed agreements for information technology services, accounting services, or the storage unit rental. In addition the Board selected the two moving and storage vendors discussed in section 3.1 without a competitive process and could not provide signed agreements. Also, the Board used the Business Manager's other employer for inventory moving.

Competitive bidding and soliciting proposals for professional services are good business practices; helps ensure the school receives a fair value by contracting with the lowest and best bidder; provides a range of possible choices; and allows the Board to make better-informed decisions to ensure necessary services are obtained from the best qualified provider, taking expertise, experience, and/or cost into consideration. Written agreements are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. In addition, personal interests by employees in the business matters of the school could create the actual or the appearance of conflicts of interest and should be avoided.

3.3 Business Manager

The Board paid the Business Manager more than allowed by written agreement and without timesheets to support the hours worked and claimed for payment. In addition, the Board did not provide adequate oversight of the work performed by the Business Manager. The Board paid the Business Manager approximately $49,000 between June 2012 and May 2014.

The Board employed the Business Manager to work as a part-time employee to work no more than 20 hours a week. The Business Manager indicated her job duties included performing various post-closure financial, asset, and personnel-related activities, including processing invoices and overseeing the disposition of assets. The Business Manager stated she signed an

agreement, but neither the Business Manager nor other representatives for the school could provide a signed copy. The Business Manager could only provide a copy of an unsigned agreement that contained an overview of the job duties and compensation of the position.

In the agreement the Board agreed to pay the Business Manager $23 per hour for up to 20 hours per week. The Business Manager requested and the Board paid the Business Manager approximately $36,500 for the fiscal year ending June 30, 2013. This amount significantly exceeds the agreed upon maximum amount of $23 per hour for 20 hours for 52 weeks, or $23,920. The Business Manager does not prepare timesheets and indicated she estimates her time, so there is no way to determine how many hours she actually worked or how she calculated her salary. The Business Manager also maintains another full-time position with a private company.

The Board's accounting firm prepared the Business Manager's payroll checks based on reported total number of hours rather than the agreement maximum, even when the reported hours exceeded the maximum allowed. In April 2013, the Business Manager began preparing her own payroll checks. The Board President approves the Business Manager's payroll each month. However, the Board President did not question the amounts presented by the Business Manager or verify for compliance with the agreement.

The Business Manager is the only signor on the bank account opened in December 2012 and invoices are not always submitted for Board approval. Procedures in place prior to opening this account required the Board President to approve invoices and be a second signer on checks. Also, as noted in MAR finding number 1, the Business Manager did not prepare monthly expenditure reports for the Board as required by policy.

To substantiate payroll disbursements, timesheets should be prepared and signed by employees and approved by the Board. Prior to approval, the Board should review payroll records to ensure they are in accordance with existing agreements. Signed written agreements should be retained to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. In addition, to reduce the risk of loss, theft, or misuse of funds, the Board should ensure supervisory reviews of the Business Manager's work are performed.

3.4 Management services

The Board hired a management services firm in May 2012 to assist with the school post-closure activities; however, there is little documentation to show the firm provided the agreed upon services. The Business Manager indicated the management services firm helped with some tasks but the firm did not provide detailed invoices to show tasks performed. The Board used an accounting firm and the Business Manager to perform the same or similar

services. As noted in section 3.2, the Board did not solicit proposals for the management services and the Board could only provide an expired agreement with the management services firm and an unsigned memorandum of understanding. The Board paid the firm at least $33,261 through August 2013. We noted the following concerns with services performed:

- Accounts payable processing - The memorandum of understanding states the firm is responsible for accounts payable services including picking up mail, coding disbursements, and submitting information to the Business Manager for approval. However, the Business Manager and the accounting firm processed and coded many of the disbursements. The Business Manager indicated she continued to use the accounting firm to code disbursements rather than the management services firm because the accounting firm was familiar with the coding and she did not want errors. Of the disbursements processed by the management services firm, 10 purchase orders totaling $13,552 were for the firm's services with no other approvals documented on these purchase orders.

- Bank deposits - The firm was responsible for bank deposits; however, records indicate since July 2012 the firm only made 12 bank deposits at physical bank locations. All other deposits were either direct deposits from the state or transfers initiated by the Business Manager.

- Payroll - The firm was responsible for the distribution of payroll checks after the school closed. However, this responsibility ended after 3 months in September 2012 with final payments made to teachers. The accounting firm distributed the Business Manager's payroll checks or the Business Manager wrote the payroll checks herself.

- Student records - Firm representatives stated their responsibilities included handling student records. However, the UCM took responsibility for converting student records into electronic records, and turned the original records over to the Kansas City School District on August 1, 2013. Also, UCM officials assisted students and families with transcript requests. UCM officials indicated student records duties cost the sponsor more than $13,600.

- Capital assets - The memorandum of understanding states the firm is responsible for inventorying assets, coordinating moves to storage facilities, and facilitating the donation of assets. The Business Manager indicated the management firm helped with inventorying assets; however, the Business Manager was also responsible for the inventorying, moving, and donation of assets. We noted concerns with the management of capital assets in MAR finding number 4.2.

Closely monitoring agreements for performance and compliance with agreement terms is important to ensure Board expectations are met and school assets are used wisely.

3.5 Signing checks

We reviewed payroll checks written between April and September 2013 and noted the Business Manager signed 11 payroll checks to herself totaling $8,438. As discussed in section 3.3, the Business Manager is the only signor on this bank account opened in December 2012 and is responsible for processing all invoices and signing all checks from this bank account.

Board policy 506 (3430) requires all checks to be signed by the Board President and Treasurer. The current procedures of allowing the Business Manager to sign her own checks and be the only signor on the account jeopardizes the system of independent checks and balances needed for good internal control. Dual signatures, as policy requires, would help provide assurance checks are written only for appropriate disbursements.

3.6 Late payment and filings

The Board did not ensure bills were paid or financial disclosure statements were filed timely resulting in various late fees and finance charges. The Board incurred these fees and charges even though it had agreements with an accounting firm, management firm, and Business Manager to oversee disbursements. We noted the following issues related to untimely payments and filings:

- The Board has paid at least $1,060 in late fees and $130 in finance charges since July 1, 2012. The Business Manager stated some bills were paid by phone in order to avoid having utilities shut off.

- The Board spent $2,050 related to the late filing of the Board President's personal financial disclosure statements with the Missouri Ethics Commission (MEC). These expenses included payments to the MEC of $300 for late filing of the 2013 disclosure and $210 for late filing of the 2012 disclosure, and a $1,540 reimbursement to the Board President for payments he made to the MEC for late filing of his 2010 disclosure. However, the actual late filing fee for the 2010 financial disclosure was $1,450 and no documentation could be provided indicating the Board President reimbursed the school for the $90 overpayment. In addition, it is questionable whether the payment of late fees was a reasonable and necessary disbursement of school monies. A MEC official told us employers typically do not pay employee late filing fees.

To prevent unnecessary fees and finance charges, procedures should be in place to ensure bills are paid and disclosure statements are filed timely.

3.7 1099-MISC form

The Board did not prepare and file 1099-MISC forms with the Internal Revenue Service, as required. In 2012 and 2013, the Board paid approximately $33,650 and $4,500, respectively, to a sole proprietorship for

moving and storage services, but did not file a 1099-MISC form for either year.

Sections 6041 to 6050 of the Internal Revenue Code require non-wage payments of at least $600 in one year for professional services or for services performed as a trade or business by non-employees (other than corporations) be reported to the federal government on a 1099-MISC form.

4. Capital Assets

Property procedures and records were not adequate.

4.1 Sale of the building

The Board did not solicit proposals for real estate services when selling the school building. The Board paid a firm a $40,500 real estate commission (6 percent of the sale price) for these services. In addition, the Board did not obtain an independent appraisal of the building prior to sale. The Board sold the building to another charter school for $675,000. At the time of the sale, $645,480 was still owed on the property and additional costs of $41,760 were incurred for real estate and title fees. As a result, the Board still owed $12,240 on the property after the sale was finalized.

Soliciting proposals for real estate services helps provide a range of possible choices, and allows the Board to make better-informed decisions to ensure necessary services are obtained from the best qualified provider, taking expertise, experience, and/or cost into consideration. Without an independent appraisal of property the Board had less assurance the sales price was reasonable and represents the fair value of the property.

4.2 Asset disposition

Procedures and records to account for school property after closure were not adequate. There was no written authorization from the Board for the disposition of capital assets or documentation to track the disposition of capital assets. As a result, capital assets were more susceptible to loss, theft, or misuse.

Records of disposed property consist only of a spreadsheet listing the total dollar value ($33,265) of donated capital assets, and do not include enough information to identify specific property items. For example, the listing shows a donation of 8 computers valued at $1,600 to one entity, but there is no information to identify the specific computers. Prior to closure, the school did not perform physical inventories, so complete capital asset records were not available to account for the school's assets and ensure their proper disposition was recorded.

The Missouri Department of Elementary and Secondary Education (DESE) removed items purchased with federal Title I funding; however, school officials did not document what items DESE personnel removed so inventory records could be updated. DESE officials stated they provided a listing of items removed to school officials, but school officials indicated

they did not retain this information. Federal grant guidelines require tracking and recording of disposition of this property. Data required includes: description; serial number; description of funding source; acquisition date; cost; percentage of federal participation; location, use, and condition of asset; and ultimate disposition including date of disposal and sales price.

Adequate capital asset procedures and records are necessary to ensure accountability for all items purchased and owned. Disposition of capital assets is necessary when closing a charter school, and proper documentation of the capital assets should be maintained to ensure capital assets are not lost or disposed of improperly. Capital assets purchased with federal Title I funding should be tracked and disposed of as required by federal guidelines.

Urban Community Leadership Academy
Charter School Closure
Organization and Statistical Information

The Urban Community Leadership Academy (UCLA) was a charter school organized and governed under Sections 160.400 through Section 160.420, RSMo. Charter schools are independent public schools, organized as not-for-profit corporations by statute, that are free from rules and regulations that apply to traditional public school districts unless specifically identified in charter school law. In exchange for flexibility, charter school sponsors are to hold the schools accountable for results.

A person, group, or organization seeking to establish a charter school must submit a proposed charter agreement to an eligible sponsor. If a charter is approved by a sponsor, the sponsor submits the charter application to the State Board of Education for approval, along with a statement of finding that the application meets the requirements of Sections 160.400 through 160.420, RSMo, and Section 167.439, RSMo. Charter school sponsors receive 1.5 percent of the charter school's state and local funding to defray the costs of sponsorship if the sponsor remains in good standing. The State Board of Education is responsible for ensuring the sponsor meets its obligations under the charter school law. The University of Central Missouri was the sponsor for the UCLA prior to closure.

In accordance with Section 160.415.4, RSMo, a charter school that has declared itself as a local educational agency receives funding from the Department of Elementary and Secondary Education (DESE) based on attendance in the same manner as other school districts. Section 160.410.1 (1), RSMo, states a charter school shall enroll students residing in the district within which it operates. As a result, only students eligible to attend the Kansas City School District could attend the UCLA. The DESE reduces the local school district's funding allocation based on the charter school attendance and disburses this funding to the charter school. Charter schools also receive federal funding through the DESE.

The UCLA was located in Kansas City, Missouri. The UCLA began operating as a school in August 1999 and stopped offering classes in June 2012. The charter school instructed grades 5 through 9. Enrollment was 229 students for the 2011-2012 school year.

School Board and Business Manager

The five-member Board acted as the policy-making body for the charter school's operations. Board members served without compensation. The Board hired a Business Manager to handle post-closure duties. Members of the Board and the Business Manager at July 31, 2013, were:

Stacey Brown, President
Don Proctor, Vice-President
Julie Gray, Secretary
Marvin Lyman, Member
Kendra Kemp-Trammel, Member

Shanita Isaac, Business Manager

4. Ticket Controls and Procedures 7
6. Accrued Costs 8

*Includes selected findings

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Forty-Second Judicial Circuit
and
Municipal Judge
and
Honorable Mayor
and
Members of the Board of Aldermen
Bourbon, Missouri

We have conducted follow-up work on certain audit report findings contained in Report No. 2014-033, *Forty-Second Judicial Circuit, City of Bourbon Municipal Division*, issued in May 2014, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the municipal division about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the municipal division, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. The city entered into an agreement with a Certified Public Accountant (CPA) in April 2014 to make improvements in the municipal division and temporarily serve as the Court Clerk. We conducted our work when the CPA was serving as the Court Clerk. In the future, the city is considering giving municipal division record-keeping responsibilities to the City Clerk or City Collector or closing the municipal division and having the Crawford County Associate Circuit Division handle the city's cases. As part of the AFTER work conducted, we spoke with the City Clerk and the CPA regarding the status of the recommendations and requested various records and supporting documentation. We also spoke with the

Mayor, the City Prosecuting Attorney, the Municipal Judge, the Police Chief, and several Board members regarding the status of the recommendations and the future of the municipal division. This report is a summary of the results of this follow-up work, which was substantially completed in September and October 2014.

Thomas A. Schweich
State Auditor

1. Accounting Controls and Procedures

We identified significant weaknesses in the accounting controls and procedures of the municipal division. Due to these weaknesses, there was no assurance all monies received were appropriately recorded, deposited, and distributed.

1.1 Segregation of duties

The municipal division did not adequately segregate the duties of receiving and depositing monies from recording transactions. The Court Clerk was primarily responsible for all duties related to collecting monies; posting fines, court costs, and bad check restitution received into the Justice Information System (JIS), the Missouri Courts automated case management system; preparing deposits; and disbursing fines and court costs. The Municipal Judge did not document his review; however, he stated he reviewed at least one deposit during each month. Also, city officials independent of the cash custody and record-keeping functions did not provide any supervision or review of the work performed by the Court Clerk.

Recommendation

The City of Bourbon Municipal Division segregate accounting duties to the extent possible. If it is not possible to segregate duties, documented periodic reviews of municipal division records should be performed by a person independent of accounting functions.

Status

Implemented

The city entered into an agreement with a CPA in April 2014 to make improvements in the municipal division. This CPA serves as the Court Clerk and receipts court monies, records receipts in the JIS, and prepares deposits. The City Clerk reviews the deposits and takes them to the bank. Deposit reports and month-end reports are made available for the City Clerk to review. The City Clerk indicated she receives the daily cashier report the Court Clerk generates from the JIS and compares the totals to the deposit.

1.2 Manual receipt slips and unaccounted for monies

Municipal division receipts totaling at least $337 were received, but not recorded in the JIS; and therefore, could not be traced to a deposit in the municipal court bank account. One manual receipt slip issued on November 29, 2012, for $279.50 (check) for a traffic ticket payment and another manual receipt slip issued on July 24, 2012, for $57.45 (cash) for bad check restitution had not been recorded in the JIS as of July 2013 and therefore, could not be traced to a deposit in the municipal court bank account. In addition, manual receipt slips issued by the Court Clerk were not recorded timely in the JIS and in the order received, and therefore, were not deposited timely and intact. The Court Clerk did not perform reconciliations of manual receipt slips issued to manual receipt slips recorded in the JIS.

Recommendation

The City of Bourbon Municipal Division ensure manual receipt slips are recorded in the JIS timely and intact and the corresponding monies received

are deposited timely. Additionally, the municipal division should follow up on the unaccounted for monies and attempt to recover these funds.

Status

Implemented

The Court Clerk indicated JIS receipts are issued during court and provided to individuals when the payment is made. Manual receipt slips are issued only when the JIS is not operational. Manual receipt slips issued are recorded in the JIS as soon as it is available, and the JIS receipt number is written on the manual receipt slip kept in the receipt slip book. Manual receipt slips issued are reconciled to manual receipt slips recorded in the JIS. We reviewed the manual receipt slips issued in August 2014 and noted they were recorded in the JIS within a few days of the date issued. Our review of the September 2014 bank statement indicated deposits are generally made once or twice a week. As noted in the response to our May 2014 report, the City of Bourbon Municipal Division did follow up on the unaccounted for monies. The division determined the $57.45 bad check receipt was deposited and disbursed from the restitution account. We reviewed the bank statements for the restitution account and noted the $57.45 was apparently deposited and disbursed on December 3, 2012 (more than 4 months after the manual receipt slip was issued). The disposition of the $279.50 check was not determined by the municipal division.

1.3 Receipting and Depositing

The Court Clerk did not reconcile the composition (cash, check, and money order) of receipts recorded in the JIS to the composition of deposits. Additionally, checks and money orders received by the municipal division were not restrictively endorsed until the deposit was prepared.

Recommendation

The City of Bourbon Municipal Division reconcile the composition of recorded receipts to the composition of deposits and endorse checks immediately upon receipt.

Status

Implemented

The Court Clerk indicated the composition of receipts recorded in the JIS is reconciled to the composition of deposits each time a deposit is made. We reviewed the deposits prepared for September 8 and September 16, 2014, and noted the composition of receipts recorded in JIS agreed to the composition indicated on the deposit slips. The Court Clerk indicated checks and money orders are restrictively endorsed when she receives them.

2. Bank Reconciliations and Liabilities

The municipal division's procedures regarding monthly bank reconciliations and liabilities needed improvement.

2.1 Bank reconciliations

We noted the following concerns during our review of the municipal division's bank reconciliations:

- The Court Clerk did not reconcile the bank account timely.
- Reconciling items identified on the bank reconciliations were not followed up on timely and are carried forward from month to month. Therefore, appropriate adjustments were not made to the financial records timely.
- The Court Clerk did not print a listing of outstanding checks when preparing the monthly bank reconciliations. In addition, she had not followed up on outstanding checks since she became Court Clerk in September 2011.

Recommendation

The City of Bourbon Municipal Division perform timely monthly bank reconciliations, resolve reconciling items timely and make appropriate adjustments to the accounting records, and establish procedures to identify and routinely follow up on outstanding checks.

Status

In Progress

As of October 22, 2014, the Court Clerk has completed all monthly bank reconciliations through September 2014 and generated outstanding check listings to support the bank reconciliations. We reviewed the September 2014 bank reconciliation. The outstanding check listing as of September 30, 2014, included 14 checks totaling $800 that were more than one year old. Some reconciling items appeared to have been resolved; however, others had been carried forward for a few months and adjusting entries had not been made.

2.2 Liabilities

The Court Clerk did not prepare a list of liabilities for comparison to the reconciled bank account balance. At our request, the Court Clerk prepared a list of liabilities at April 30, 2013, and the list totaling $11,516 was less than the reconciled bank balance of $12,528 by $1,012.

Because monthly lists of liabilities were not prepared, liabilities were not adequately reviewed to ensure bonds or other monies were disbursed timely. The JIS liabilities report generated on May 15, 2013, included 12 bonds totaling $2,850 dated in 2011 and 14 bonds totaling $4,160 dated in 2012.

Recommendation

The City of Bourbon Municipal Division prepare monthly lists of liabilities and reconcile to the bank balance, promptly investigate and resolve differences, and establish procedures to review the status of liabilities to determine the appropriate disposition of funds held.

Status

In Progress

The Court Clerk printed an open items listing on September 30, 2014. However, the total of this listing did not agree to the September 30, 2014,

bank reconciliation. The Court Clerk plans to perform additional work to determine the reasons for the difference. The Court Clerk disbursed the majority of the bonds held from 2011 and 2012.

3. Monitoring of Excess Revenues

The city's excess traffic violation revenue calculations incorrectly included restricted revenues and did not give consideration to specific traffic ticket violations or location of the violation to identify what tickets and related revenue should be included in the calculations. As a result, the city's calculations did not accurately assess whether excess revenues were due to the state.

The city performed excess revenues calculations for the 2 years ended June 30, 2013, and determined the percentage of fines and court costs for traffic violations as compared to annual general operating revenues to be less than the statutory threshold requiring payment to the Missouri Department of Revenue (DOR). However, our review of those calculations determined the city likely owes between $34,718 and $59,155 to the DOR for the 2 years ended June 30, 2013.

Recommendation

The City of Bourbon Board of Aldermen ensure only general operating revenues are included in the annual excess revenue calculations. In addition, the Board of Aldermen should work with the municipal division to track collections from fines and court costs for traffic violations, recalculate excess revenues for fiscal years 2012 and 2013, and make appropriate payments to the DOR for any additional excess revenues.

Status

In Progress

The city has attempted to recalculate excess revenues for 2012 and 2013. The city has also calculated excess revenues for 2014. Due to the time and expense involved, the city has not reviewed each ticket issued to determine if it was for a traffic or non-traffic offense and to determine if it was issued on a highway or city street. To determine the non-traffic tickets issued, the CPA consulted the Office of State Courts Administrator for instructions for generating a listing of tickets and the related offenses. However, this report indicated the total amount paid on these tickets and did not agree to the amount of fines and court costs remitted to the city. The CPA also sampled tickets to determine the percentage of tickets issued on the highway versus city streets. The city contacted the DOR and plans to repay excess revenues.

4. Ticket Controls and Procedures

Municipal division procedures regarding the accountability and disposition of tickets need improvement.

4.1 Ticket accountability

Neither the Police Department nor the municipal division adequately accounted for the numerical sequence and ultimate disposition of traffic tickets issued.

Recommendation

The City of Bourbon Municipal Division work with the Police Department to ensure the numerical sequence and ultimate disposition of all tickets issued are accounted for properly.

Status

In Progress

The Police Department currently has each officer sign for each citation book issued on a form created by the department called a Uniform Citation Record. This form is given to the court. Tickets issued to individuals are entered into the JIS and a filings report is generated. We reviewed the filings report for the period July 1, 2014, through September 28, 2014, and noted two gaps in the ticket sequence. It was determined that these tickets had been issued prior to July 1, 2014, and therefore, should not be on this listing. The Police Chief agreed to keep a record of voided tickets and the City Prosecuting Attorney agreed to keep a record of tickets not prosecuted. These listings will be provided to the Court Clerk, so she will have a record of all ticket numbers.

4.2 Ticket disposition

The City Prosecuting Attorney did not sign tickets submitted to the municipal division.

Recommendation

The City Prosecuting Attorney sign all tickets.

Status

Implemented

The City Prosecuting Attorney currently reviews and signs all tickets issued. We reviewed the tickets presented to the City Prosecuting Attorney during the September 25, 2014, court date and noted they were signed.

6. Accrued Costs

The Court Clerk did not consistently follow up on accrued costs (receivables) owed to the municipal division, including fines and court costs, incarceration costs, and court-ordered restitution.

Recommendation

The City of Bourbon Municipal Division establish procedures to routinely review the accrued costs list and ensure proper follow up on amounts due, and provide information to and work with the Municipal Judge regarding amounts deemed uncollectible.

Status

Implemented

The Court Clerk reviewed the accrued costs listing generated from the JIS. Defendents that had been set up on payment plans but had not been paying timely were assigned court dates in September 2014 for payment review. The City Prosecuting Attorney and the Municipal Judge were consulted on numerous cases more than a year old where payments of small amounts were outstanding. It was agreed that it was not cost-effective to continue to attempt collection on these cases. Most of these amounts were written off

per judicial order and proper documentation was placed in each corresponding file. We reviewed ten cases in September 2014 and determined that these files had been reviewed by the court and action had been taken to recall warrants, waive fines and court costs, or attempt to collect fines and court costs. The Court Clerk indicated she currently reviews the accrued costs listing once a month.

Missouri State Auditor

Howell County

November 2014

Report No. 2014-113

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Howell County

County Collector Controls and Procedures	The County Collector did not include city tax collections totaling $777,849 and the related charges and credits in the annual settlement for the year ended February 28, 2014. The County Collector's office does not deposit receipts intact or timely, and does not reconcile the composition of receipts to the composition of deposits. The County Collector does not retain copies of manual receipt slips issued for partial payments received and does not maintain a ledger or the amounts collected, due, and deposited. Monies received for partial payments are held in the vault until the final payment.
Property Tax System Controls and Procedures	The County Collector and his employees have access rights in the property tax system that allow changes to be made to individual tax records throughout the tax year. Because the County Collector is responsible for collecting tax monies, good internal controls require the County Collector and his employees not have access rights allowing alteration or deletion of assessed valuation and property tax information. The County Clerk does not reconcile abatement court orders to the actual changes made in the system, and the County Collector has not established adequate password controls to reduce the risk of unauthorized access to computers and data.
Sheriff Controls and Procedures	The inmate account clerk does not timely deposit receipts into the inmate account, and the Sheriff has used some commissary profits for jail expenses instead of turning over all commissary profits to the county treasury as required. In addition, the Sheriff's office has collected and retained $2,237 between July 2009 and December 31, 2013, in medical visit fees, but the inmate's medical costs are paid from the Law Enforcement Sales Tax Fund, and the medical fee is intended to partially reimburse the county for these costs. The Sheriff's office personnel do not prepare monthly lists of liabilities to reconcile to the cash balances for the inmate account and the seized monies account. At our request, lists of liabilities were prepared, and we identified a $21 shortage in the inmate account and a $1,100 shortage in the seized monies account. Sheriff's office personnel determined the $1,100 shortage occurred due to a duplicate disbursement that they are in the process of recouping.
Public Administrator Controls and Procedures	The former Public Administrator did not always file annual settlements timely in compliance with state law, and the current Public Administrator did not always timely file inventories of assets. In addition, the former Public Administrator did not always obtain court approval for some fees and did not consistently assess fees from the accounts of some wards. The current Public Administrator did not always issue receipt slips for monies received, deposit receipts timely, and indicate the method of payment or date received on receipt slips issued.

Fuel	The road and bridge department does not reconcile logs of fuel dispensed from bulk fuel tanks to fuel purchased or review logs for reasonableness. We reviewed the logs and purchase invoices for one bulk fuel tank for 2013 and identified 3,987 gallons of fuel unaccounted for.
Senate Bill 40 Board Cash Reserves	The Senate Bill 40 Board has accumulated a cash balance of $552,000, which is more than 3 times the total operating disbursements for 2013, and has no specific plans for its use.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 17

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Howell County

We have audited certain operations of Howell County in fulfillment of our duties under Section 29.230, RSMo. In addition, Deidiker Accounting & Consulting, LLC, Certified Public Accountants, was engaged to audit the financial statements of Howell County for the year ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Howell County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Deborah Whitis, MBA, CPA, CIA, CFE
In-Charge Auditor:	John Lieser, CPA
Audit Staff:	Waleed Atout
	Sara Lewis, CPA

1. County Collector Controls and Procedures

Controls and procedures in the County Collector's office need improvement. The County Collector's office processed collections totaling approximately $19.6 million during the year ended February 28, 2014.

1.1 Annual settlement

The County Collector did not include city tax collections totaling $777,849 and the related charges and credits in the annual settlement for the year ended February 28, 2014. By not including all information on the annual settlement, the County Collector hinders the ability of the County Clerk and County Commission to effectively review the annual settlement.

To help ensure the validity of tax book charges, collections, and credits, and for the County Commission and County Clerk to properly verify these amounts, it is important the County Collector file complete annual settlements.

1.2 Receipts and deposits

The County Collector's office does not deposit receipts intact or timely, and does not reconcile the composition of receipts to the composition of deposits. As a result, there is less assurance the office accounted for all receipts properly.

- The County Collector does not deposit receipts intact and does not maintain the change fund at a constant amount. The Deputy County Collector prepares the deposit and typically includes an even amount of cash in the deposit and withholds the balance of cash receipts for the change fund. Although the beginning and ending change fund balance is documented each day, the balance fluctuates daily as the cash deposited does not correspond with the day's cash receipts. During the month of November 2013, the daily change fund balance fluctuated between $508 and $787.

- The County Collector does not deposit monies received for partial payments intact or timely (see section 1.3).

- The Deputy County Collector does not reconcile the composition of receipts to the composition of deposits. Tax statements are marked with the method of payment (cash, check, money order, or credit card) and the method of payment is entered in the computer system. During the end-of-day procedures, a journal tape is produced from the computer system that totals collections by the method of payment. However, the composition of receipts per the journal tape is not reconciled to the composition of deposits.

To adequately account for collections and reduce the risk of loss, theft, or misuse of funds, all monies should be deposited intact and the composition of receipts should be reconciled to the composition of deposits. If a change

fund is needed, it should be set at a constant amount and a procedure established to reconcile to this amount every time a deposit is made.

1.3 Partial payments

The County Collector does not retain copies of manual receipt slips issued for partial payments received and does not maintain a ledger of the amounts collected, due, and deposited. Manual receipt slips issued for partial payments received are only retained until the final payment is received and then discarded. These monies are deposited when a taxpayer's final payment is received and the full amount owed is recorded in the property tax system. If a check or money order is used to make a partial payment, the check or money order will be deposited with the day's receipts with a corresponding amount of cash withheld from that deposit. Office personnel indicated partial payments are held in the vault until the final payment.

Without accurate and detailed records for all partial payments collected and balances due, there is little assurance partial payments are properly handled and recorded. Manual receipt slips issued for partial payments should be retained and reconciled to detailed records of all amounts collected and balances due. In addition, all monies should be deposited timely and reconciled to amounts held in the bank account.

Similar conditions previously reported

Similar conditions to sections 1.1 and 1.2 were noted in our prior audit report.

Recommendations

The County Collector:

1.1 Include city taxes when preparing annual settlements.

1.2 Deposit all receipts intact, reconcile the composition of receipts to the composition of deposits, and maintain the change fund at a constant amount.

1.3 Implement procedures to ensure partial payments are adequately recorded and deposited timely, and retain all receipt slips written.

Auditee's Response

The County Collector provided the following written responses:

1.1 Resolved - city collections will be a part of the annual settlement from this point on.

1.2 The County Collector will take the matter under advisement and work to change the daily "check out" procedure to eliminate fluctuation in cash receipts. Note - historically the current method of handling receipts has been in place for many years and through various elected County Collectors and there have been no misappropriation of any tax dollars. The County Collector is

upgrading to a new system which will eliminate the current method of reconciling receipts and deposits.

1.3 The County Collector will no longer accept partial payments.

2. Property Tax System Controls and Procedures

Controls and procedures over the property tax system need improvement. As a result of the significant control weaknesses identified, there is less assurance all property tax monies have been accounted for properly.

2.1 Computer access

The county has not adequately restricted property tax system access. The County Collector and his employees have access rights in the property tax system that allows changes to be made to individual tax records throughout the tax year. Because the County Collector is responsible for collecting tax monies, good internal controls require the County Collector and his employees not have access rights allowing alteration or deletion of assessed valuation and property tax information.

To prevent unauthorized changes to the property tax records, access should be limited based on user needs. Failure to properly restrict access can result in the deletion or alteration of data files.

2.2 Abatements

The County Clerk does not reconcile abatement court orders to the actual changes made in the system. The County Assessor prepares court orders for abatements that are reviewed by the County Commission and posted by the County Collector and his employees in the property tax system. Because these abatements represent changes to amounts the County Collector has been charged with collecting and the County Collector and his employees are making these changes in the property tax system, it is important that the County Clerk compare the changes made to the approved court orders. Abatements totaled approximately $230,000 during the year ended February 28, 2014.

Sections 137.260 and 137.270, RSMo, assign responsibility to the County Clerk for making corrections to the tax books with the approval of the County Commission. In addition, if changes to the amount of taxes the County Collector is charged with collecting are not properly monitored, errors or irregularities could go undetected.

2.3 Password controls

The County Collector has not established adequate password controls to reduce the risk of unauthorized access to computers and data. The County Collector has 10 computers in his office and each computer has a separate password that is known by all employees. In addition, passwords are not required to be changed on a periodic basis.

Passwords are required to authenticate access to computers. The security of a computer password is dependent upon keeping passwords confidential. However, since passwords are shared among employees and not periodically changed, there is less assurance passwords are effectively limiting access to computers and data files to only those individuals who need access to perform their job responsibilities. Passwords should be unique and confidential and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

Similar conditions previously reported

Similar conditions to sections 2.2 and 2.3 were noted in our prior audit report.

Recommendations

2.1 The County Commission ensure property tax system access is limited to only what is needed for the users to perform their job duties and responsibilities.

2.2 The County Commission and the County Clerk ensure approved abatements are reconciled to actual changes made to the property tax system.

2.3 The County Collector require unique passwords for each employee that are confidential and periodically changed to prevent unauthorized access to the computers and data.

Auditee's Response

The County Commission provided the following written response:

2.1 The tax system in place has worked well for many years. We have not experienced any problems in the past. Offices involved have worked cooperatively to ensure timely response and convenience to the taxpayers. We will work with the affected officeholders in this process in an attempt to address the recommendation.

The County Commission and County Clerk provided the following written response:

2.2 This recommendation will be implemented.

The County Collector provided the following response:

2.3 We will no longer share passwords and will develop a process to change passwords periodically.

3. Sheriff Controls and Procedures

Controls and procedures in the Sheriff's office over the inmate account and seized monies account need improvement. Deposits into the inmate account totaled approximately $35,000 and deposits into the seized monies account totaled approximately $9,000 during the year ended December 31, 2013.

3.1 Depositing procedures

The inmate account clerk does not make deposits timely for the inmate account. Cash received for inmates from visitors is collected in the lobby kiosk while monies in the possession of inmates when they are booked are put in the drop safe. We reviewed receipts related to 4 of the 9 deposits made during the months of April and December 2013. Inmate monies, totaling $1,499, collected from November 20, 2013, through December 9, 2013, were not deposited until December 10, 2013. Of this amount, the office received receipts totaling $1,208 on or prior to December 3, 2013, and held them for 7 to 20 days before deposit.

Failure to implement adequate depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected. Proper depositing procedures are necessary to ensure all receipts are handled and accounted for properly.

3.2 Commissary profits and medical fees

The Sheriff's office has not turned over all commissary profits to the county treasury and has used some commissary profits for jail expenses. Our review of the commissary records indicates the Sheriff's office remitted $6,000 of commissary profits to the county treasury and paid $2,013 from commissary profits to vendors for jail expenses related to mold inspections and uniforms during 2013. These expenses were not approved by the County Commission and were not handled through the normal county procurement and budget process. In addition, the Sheriff's office has retained commissary profits totaling $1,853 in the commissary bank account as of December 31, 2013.

In addition, the Sheriff's office has not turned over any medical visit fees to the county treasury. The Sheriff's office charges inmates $10 for each medical visit. Records indicate the Sheriff's office has collected and retained medical fees totaling $2,237 from July 2009 through December 31, 2013. The county contracts for health care services for inmates and pays for those services from the county's Law Enforcement Sales Tax Fund. The charges to inmates represent a partial reimbursement for the county's costs.

Section 221.102, RSMo (effective August 28, 2013), requires each county jail to keep revenues from its canteen or commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (profits) into the county Inmate Prisoner Detainee Security Fund. In addition, there is no statutory authority allowing the Sheriff to hold county monies outside the

county treasury. Section 50.370, RSMo, requires county officials in third and fourth class counties who receive any fees or other remuneration for official services to pay such monies to the County Treasurer.

3.3 Liabilities

Sheriff's office personnel do not prepare monthly lists of liabilities to reconcile to the cash balances for the inmate account and the seized monies account. At our request, a list of liabilities for the inmate account was prepared and identified liabilities totaled $7,363, at December 31, 2013. The reconciled bank balance was $7,342, for a shortage of $21. In addition, at our request, a list of liabilities for the seized monies account was prepared and identified liabilities totaled $16,917, at December 31, 2013. The reconciled bank balance was $15,817, for a shortage of $1,100. Sheriff's office personnel researched this shortage and determined it resulted from a duplicate disbursement in November 2011. Office personnel are in the process of recouping the overpayment.

Monthly lists of liabilities should be prepared and reconciled to cash balances to ensure records are in balance, errors are detected and corrected on a timely basis, and sufficient cash is available for the payment of all liabilities. Prompt follow up on discrepancies is necessary to resolve errors and ensure monies are properly disbursed.

Similar conditions previously reported

Similar conditions were noted in our prior audit report.

Recommendations

The Sheriff:

3.1 Ensure inmate account receipts are deposited timely.

3.2 Ensure existing and future commissary profits not necessary to meet cash flow needs or current operating expenses are turned over to the County Treasurer for deposit into the Inmate Prisoner Detainee Security Fund. Expenditures related to jail operations should be processed through the county's disbursement process. In addition, ensure all medical visit fees received are turned over to the County Treasurer.

3.3 Prepare a monthly list of liabilities for both accounts and compare to the reconciled bank balances. Any differences should be promptly investigated and resolved. The Sheriff should continue efforts to recoup the $1,100 overpayment.

Auditee's Response

The Sheriff provided the following responses:

3.1 Deposits are now being made weekly.

3.2 We are currently turning all profits and medical visit fees over to the County Treasurer and will run all expenditures through the county disbursement process.

3.3 Account liabilities are now tracked on the computer and compared with manual bank statements and reconciled. We have developed spreadsheets for both accounts to identify and reconcile liabilities, which is being done monthly. It will not be a problem to recoup the $1,100 overpayment.

4. Public Administrator Controls and Procedures

Controls and procedures in the Public Administrator's office need improvement. The Public Administrator is the court-appointed personal representative for wards or decedent estates of the Associate Circuit Court, Probate Division, and is responsible for the financial activity of approximately 120 individuals (wards).

The former Public Administrator left office when her term expired on December 31, 2012, and the current Public Administrator took office in January 2013. The former Public Administrator prepared final settlements and turned over cases to the newly elected Public Administrator throughout 2013. Recommendations are directed to the current Public Administrator since he is in a position to work with the Associate Circuit Court, Probate Division and implement changes.

4.1 Annual settlements and inventories of assets

Procedures for filing annual settlements and inventories of assets are not adequate.

- The former Public Administrator did not always file annual settlements timely in compliance with state law. The former Public Administrator filed final settlements on 6 cases during April through July 2013 that covered periods of activity for up to 19 months. In addition, these settlements should have been filed prior to the expiration of her term on December 31, 2012.

- The current Public Administrator did not always file inventories of assets timely. An inventory of assets for one ward was due in September 2013, and was not filed with the court until December 2013.

Section 473.540 and 475.270, RSMo, require the Public Administrator to file an annual settlement with the court for each ward or estate. Timely filing of settlements and inventories of assets are necessary for the court to properly oversee the administration of cases and reduce the possibility that loss, theft, or misuse of funds will go undetected. In addition, state law (see section 4.2) requires a public administrator receiving a salary to make necessary filings prior to leaving his or her term of office.

A similar condition was noted in our prior audit report.

4.2 Fees

The former Public Administrator did not always obtain court approval for some fees and did not consistently assess fees from the accounts of some wards. Section 473.742, RSMo, provides all fees collected by a Public Administrator who elects to be salaried are to be deposited into the county treasury. For final settlements filed during 2013 by the former Public Administrator, the fees were prorated based on months of service applicable to the settlements. The county received fees related to services performed in 2012 and the former Public Administrator received fees related to services performed in 2013 since she was no longer a salaried employee.

- The former Public Administrator did not always petition the Associate Circuit Court, Probate Division for approval of fees paid to the former Public Administrator, the county, and attorneys during 2013. Our review of 4 wards' accounts identified 12 payments for fees totaling $4,017 were not approved by the court. Attorney fees were charges for assistance in preparing the settlements. After our inquiries, the court determined a portion of the fees paid from one ward's account were excessive. The court disallowed and ordered refunds to the ward's account of $615 and $550 for fees paid to the county and attorney, respectively.

- The former Public Administrator did not consistently assess fees, and neither the current nor former Public Administrator maintained a fee schedule or documented criteria used when determining the appropriate fee to charge. For 4 cases reviewed, the former Public Administrator paid fees to the county in 2013 ranging from $21 per month to $91 per month based on the number of months covered by the applicable settlement. There was no supporting documentation to show how the fees were determined for each of these wards.

To ensure fees are properly assessed against the accounts of wards, the Public Administrator should work with the Associate Circuit Judge to establish a fee schedule. Without documenting criteria used when determining the appropriate fee to charge, and without adequate supporting documentation, there is less assurance fees charged to each ward are fair, reasonable, and properly assessed. In addition, Section 473.767, RSMo, indicates "In counties where the public administrator is paid a salary, the public administrator shall deliver property and make necessary filings as required in this section prior to leaving his or her term of office." Thus, the former Public Administrator should have completed all annual settlements, etc. before the end of her term and not retained any fees personally for those annual settlements filed after the end of her term.

4.3 Receipting and depositing

The current Public Administrator did not always issue receipt slips for monies received after he started issuing receipt slips on August 22, 2013, and does not always deposit receipts timely. In addition, the current Public

Administrator did not always indicate the method of payment or date received on receipt slips issued.

For one of 6 cases we reviewed, the current Public Administrator did not issue receipt slips for 3 receipts after August 22, 2013, totaling approximately $3,890 and deposited between November 25, 2013, and January 28, 2014.

Our review of receipt slips issued between August 22, 2013, and March 6, 2014, identified 5 pension checks totaling $125 payable to one ward for the months of April through August 2013, were not deposited until August 22, 2013. The current Public Administrator indicated these checks were found during the process of moving offices. Monies received for a receipt slip issued for $3,593 on September 10, 2013, were not deposited until September 26, 2013. In addition, the current Public Administrator did not record the method of payment on 15 receipt slips and did not record the receipt date on 12 receipt slips issued during this period.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected. Proper receipting and depositing procedures are necessary to ensure all receipts are handled and accounted for properly.

Recommendations

The Public Administrator:

4.1 Ensure annual settlements and inventories of assets are filed timely.

4.2 Obtain court approval prior to disbursing fees. Additionally, the Public Administrator should work with the Associate Circuit Judge to establish a formal policy outlining the fee amount to assess wards. Also, the Associate Circuit Judge should reconsider fees paid to the former Public Administrator after her term of office ended.

4.3 Issue receipt slips for all monies received and ensure the method of payment and date of receipt is recorded on receipts slips. In addition, the Public Administrator should ensure receipts are deposited timely.

Auditee's Response

The Public Administrator provided the following written responses:

4.1 The Probate Court sends notice to the Public Administrator approximately 30 days before an annual settlement and report are due; this date is set by the court's computer software and the original filing date for each case. Upon receipt of this notice an account summary is prepared and the bank statements are provided to the office of the attorney on that case for review. If at that time,

(due to the volume of statements being prepared or other issues with work flow), there is insufficient time to prepare an annual settlement the attorney's office is now required to submit a request for an extension of time to file the annual settlement with the Probate Court. This process helps to ensure that these filings are addressed in a timely manner.

4.2 The Public Administrator has reviewed the issue of fees with a number of other members of MAPA (Missouri Association of Public Administrators) and concluded that policy on this matter varies greatly from one county to the next. The Public Administrator has worked with the Associate Circuit Judge to establish a formal policy outlining the fee amount to assess the wards in a fair and equitable manner. This process has led to increased consistency in the fees charged to each estate, and provides transparency in this matter.

4.3 The Public Administrator has refined the procedure for tracking the receipt of all monies. Most monies are received by direct deposit from the payor in the individual account of each ward respectively. Any funds received in the office are immediately receipted including method of payment, date and amount, a deposit slip is completed, then they are photocopied. The deposit is placed in a zipper deposit bag and placed in a locked cabinet until deposited at the appropriate bank near the end of business that day. The bank deposit receipts are then attached to the photocopy, entered into the computer, and placed in filing to be filed in the ward's file for future reference.

The Associate Circuit Judge provided the following written response:

4.2 The court, being bound by established rules of procedure and applicable substantive law, will reconsider its prior order approving fees paid to the former Public Administrator for services she rendered after her term of office expired if the County Commission files a motion requesting reconsideration.

5. Fuel

The road and bridge department does not reconcile logs of fuel dispensed from bulk fuel tanks to fuel purchased or review logs for reasonableness. The road and bridge department maintains 60 vehicles and equipment items. According to county records, road and bridge department fuel purchases totaled approximately $246,000 for the year ended December 31, 2013. The road and bridge department purchases bulk diesel and unleaded fuel from local vendors for 11 bulk fuel tanks at 11 locations throughout the county.

We reviewed the logs and purchase invoices for one bulk fuel tank for the year ended December 31, 2013, and noted the calculated fuel usage

(beginning gallons plus gallons purchased less ending gallons) of 16,503 gallons exceeded the logged fuel usage of 12,516 gallons, resulting in 3,987 gallons of fuel unaccounted for.

Procedures for maintaining and reviewing fuel usage logs and reconciling the information to fuel purchased and related records are necessary to ensure vehicles and equipment are properly utilized, prevent paying vendors for improper amounts, and decrease the risk of loss, theft, or misuse of fuel occurring without detection.

Recommendation

The County Commission work with the road and bridge department to ensure fuel use is reconciled to fuel purchases, and any significant discrepancies should be promptly investigated, and fuel logs are reviewed for reasonableness.

Auditee's Response

The County Commission provided the following written response:

A review of the road and bridge department fuel tanks has revealed that some fuel readings were incorrect and attributable to faulty measuring equipment. Steps have been taken to replace this equipment. Fuel logs will continue to be maintained and will be reconciled periodically.

6. Senate Bill 40 Board Cash Reserves

The Senate Bill 40 Board (Board) has accumulated a significant cash reserve without any specific plans for its use. The cash balance of the General Fund at December 31, 2013, totaled approximately $552,000, and is more than 3 times the total operating disbursements of approximately $157,000 for the year ended December 31, 2013. A Board official indicated the Board intends to use these monies to offset operating shortfalls in the Targeted Case Management (TCM) Fund in the event of reductions in funding for that operation. However, at December 31, 2013, the cash balance of the TCM Fund totaled approximately $292,000, or approximately the operating disbursements of the fund for the year.

Accumulating an excessive cash balance with no specific long-term plans for the use of the monies puts an unnecessary burden on taxpayers. The Board should determine its future needs, and consider reducing future tax levies if a specific use for the cash reserves is not determined.

Recommendation

The Senate Bill 40 Board should evaluate funding needs and consider reducing the property tax levy. If plans have been made for expending the accumulated cash balance, such plans should be set forth publicly in the budget document.

Auditee's Response

The Senate Bill 40 Board provided the following written response:

During the period of 1994 through 2008, the Board voluntarily rolled back the tax levy by an average of 43.58 percent. The voluntary reduction in 2008 lowered the tax rate ceiling beginning in 2009, and the Board has not opted to take action to raise the tax rate back to the rate effective in 2008. The Board agrees the revenue balance is significant even while reducing the tax levy.

Ozark Sheltered Industries (OSI) employs between 85 and 90 individuals with developmental disabilities. The Board provides funding for transportation costs and has agreed to fund most of an expansion project of a loading dock to enhance the loading and unloading of large vehicles, which will enable the OSI to use mechanical equipment in lieu of manual labor. Other future capital improvement projects have been discussed, but have not received final approval as of this date. Future projects will be documented in the budget.

The Board also provides TCM services for county residents with developmental disabilities. Workshop and TCM funds are kept separate.

The Board is fortunate to have funds available to ensure the stability of services for individuals with special needs and their families. For many of these individuals, a disruption of services would be catastrophic. Unfortunately, unpredictable events can and do take place. For example:

- *A major employer in the area has just recently announced it will be closing its doors and relocating to Mexico. This closure causes the loss of approximately 400 jobs. It will negatively impact the OSI since approximately 80 percent of its sales are derived from this company. Additional costs will be incurred while transitioning to new product lines, and if necessary, employee wages will be subsidized during transition.*

- *The recent down-sizing of the Missouri Department of Mental Health has left uncertainty in the department's future services.*

The Board anticipates that the voluntary reduction in the tax levy will continue and it will monitor fund balances while ensuring that financial stability remains intact.

Auditor's Comments

The Board has assessed its maximum tax rate levy since 2010. Property tax rate forms submitted to the State Auditor's office for 2010 through 2013 show no reductions from the Board's tax rate ceiling and the tax rate to be levied. The Board voluntarily reduced its tax rate levy in 2008, which

resulted in a reduced tax rate ceiling beginning in 2009 and also voluntarily reduced its tax rate levy in 2009.

Howell County
Organization and Statistical Information

Howell County is a county-organized, third-class county. The county seat is West Plains.

Howell County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 99 full-time employees and 22 part-time employees on December 31, 2013.

In addition, county operations include the Senate Bill 40 Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Mark B. Collins, Presiding Commissioner	$	35,057
Bill Lovelace, Associate Commissioner		32,845
Billy Sexton, Associate Commissioner		32,845
Sharon Trowbridge, Recorder of Deeds		49,765
Dennis K. Von Allmen, County Clerk		49,765
Michael P. Hutchings, Prosecuting Attorney		60,824
James M. (Mike) Shannon, Sheriff		55,295
Ernestine Doss, County Treasurer		49,765
James T. Tim Cherry, County Coroner		17,694
John Pruett, Public Administrator		49,765
Larry Spence, County Collector (1), year ended February 28,	82,022	
Daniel Franks, County Assessor, year ended August 31,		49,488
Ralph Riggs, County Surveyor (2)		

(1) Includes $32,132 of commissions earned for collecting city property taxes.
(2) Compensation on a fee basis.

Financing Arrangements

The county entered into a lease-purchase agreement with the Public Building Corporation of Howell County (corporation) on December 1, 2004, calling for the corporation to obtain a loan of $760,000 for the purpose of acquiring an administrative building and for the corporation to lease the facility back to the county for payments totaling the principal and interest

due on the outstanding loan. The lease-purchase agreement was amended and refinanced on September 6, 2012, and the loan is scheduled to be paid off in September 2017. The remaining principal outstanding at December 31, 2013, was $522,462. Interest remaining to be paid over the life of the agreement totals $63,958.

The county entered into several lease-purchase agreements for road and bridge equipment. Principal and interest payments are made from the Special Road and Bridge Fund. The final payment on the lease-purchase agreements is scheduled for October 2018. The remaining principal amount at December 31, 2013, was $315,758. Interest remaining to be paid over the life of the agreements totals $22,957.

THOMAS A. SCHWEICH
Missouri State Auditor

To the Board of Education
Hickman Mills C-1 School District

We have conducted follow-up work on certain audit report findings contained in Report No. 2014-012, *Hickman Mills C-1 School District*, issued in March 2014, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the district about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the district, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. As part of the AFTER work conducted, we reviewed documentation provided by the district and held discussions with district personnel. Documentation included copies of contracts, bid evaluations, purchasing policies and procedures, Board minutes, and inventory reports. This report is a summary of the results of this follow-up work, which was substantially completed during August and September 2014.

Thomas A. Schweich
State Auditor

Hickman Mills C-1 School District
Follow-Up Report on Prior Audit Findings
Status of Findings

1. Financial Condition

The financial condition of the district improved over the last 3 years, but was still below the minimum level recommended by the district's independent auditor. An already low unrestricted cash balance, along with falling revenues, required reductions in district expenditures to improve the district's reserve balance. These reductions in expenditures were primarily accomplished through reductions in the numbers of teachers and teachers' aides.

Recommendation

The School Board closely monitor and take appropriate action to ensure the long-term stability of the district's financial condition.

Status

Implemented

The district has done a further analysis of all personnel positions and has reduced the number of full-time employees for both certified and non-certified staff. This action, along with closely monitoring disbursements, has led to a significant increase in the district unrestricted cash balance. At June 30, 2014, the district reported an unrestricted fund balance of approximately $16 million. The district cash balance as a percentage of expenditures has risen from 13.45 percent as of June 30, 2012, to 27.98 percent as of June 30, 2014.

2.1 Superintendent Search Process - Superintendent search

The district's former Superintendent, Dr. Marjorie Williams, retired in June 2012 and the process followed by the Board to select a new superintendent was not conducted in a public manner, did not adhere to established Board policies or state laws, and was likely more costly than necessary.

Some Board actions taken during school year 2012-2013 regarding this transition and the review of the former Superintendent's leave balance, were not conducted in public or with the full knowledge of all Board members. The district did not solicit proposals for superintendent search services. In addition, the fee arrangement with the selected search firm was significantly higher than it would have been had the Missouri School Board Association been used to conduct the superintendent search.

Recommendation

The School Board ensure Board policy is followed in procuring professional services and Board decisions and votes on contracts are appropriately publicly disclosed.

Status

Implemented

District officials indicated they are closely monitoring the procurement of professional services to ensure applicable policies are followed and requiring requests for proposals when necessary.

3.1 Superintendent's Leave Usage and Payout - Audit of former Superintendent Dr. Marjorie Williams' leave balance

Proposals were not taken to select a firm to conduct a human resource audit of the former Superintendent's leave balances. In addition, upon completion of the audit, the final report was not issued publicly and was not provided to the full Board. Former Board President Anderson received the audit and did not provide it to the other members of the Board.

Recommendation

The School Board ensure all district documents are made available to the full Board and release the final audit of the former Superintendent's leave balance as required by state law.

Status

Partially Implemented

The audit of the former Superintendent's leave balances has been made available to administrative staff and Board members, but has not been formally presented to the full Board or made public.

3.3 Superintendent's Leave Usage and Payout - Leave monitoring

The Board did not monitor the former Superintendent's absences, approve leave requests, or monitor vacation and sick leave used by the former Superintendent. The contracts between the former Superintendent and the district allowed her to accumulate a significant amount of leave days. District records showed the former Superintendent used only 3 days of vacation leave during her last 7 years of employment. Several Board members indicated they believed this number of days was inaccurate based on their knowledge of her absences.

Recommendation

The School Board develop procedures to ensure leave usage and balances of the Superintendent are monitored.

Status

Implemented

The Superintendent now submits leave request forms to the Board President for approval. The Superintendent's leave balances are tracked through the district payroll and leave no longer accumulates from year to year. Any unused leave is paid out at year end. We reviewed a leave request by the Superintendent for March 3, 2014, which was approved by the Board President.

4. Board Oversight and Contract Payments

Board members did not provide adequate oversight to ensure established controls were in place and followed. Deviations from normal procedures were allowed and controls were circumvented by certain Board members.

4.1 Board decisions

We identified instances where decisions were made on behalf of the Board by less than a majority of the members, which overrode Board policy. Some decisions involved the timing of contract arrangements.

Recommendation

The School Board ensure decisions are not made by less than a majority of Board members and ensure all contracts are signed and in writing in accordance with state law.

Status

Implemented

District officials indicated all Board decisions are made with the complete knowledge of all Board members and after the approval of the majority of the Board. The Superintendent indicated all contracts are signed and in writing.

4.2 Contracts and payments

Controls requiring district personnel to compare documentation supporting disbursements to a written contract were overridden by the former Board President, resulting in an overpayment to one vendor. Written contracts were not obtained with some vendors or were not provided to district personnel in some instances.

Recommendation

The School Board ensure written contracts exist for all services and are provided to district administrative officials.

Status

Implemented

We reviewed contracts for the guaranteed energy savings and interior finishing related to renovations at the Ervin Early Childhood Center, approved by the Board in March and June 2014, respectively. Proposals were solicited for both services. Both contracts were signed and provided to administrative personnel. District officials indicated all contracts are now presented to the full Board for approval and are provided to the Director of Business and Finance once signed by applicable parties.

5.1 Sunshine Law - Closed meetings

The Board held 28 closed meetings from July 2011 through December 2012, but did not always follow various requirements in Chapter 610, RSMo (the Sunshine Law).

- The Board did not provide evidence that notice was provided to the public of the time, date, place, and specific reason for the closed meeting regarding any of the 28 closed meetings as required by state law.

- The Board discussed some topics in closed meetings that were not allowable under the Sunshine Law.

- The Board voted on and approved several contracts in closed session and did not subsequently disclose those votes in an open meeting. In several instances, the approved contracts were not treated as public

records and were handled by the former Board President as closed records.

- The district did not notify former Interim Superintendent Dr. Everlyn Williams she was being reassigned in October 2012 before notifying the public of this decision.

Recommendation

The School Board ensure notice and the specific reasons for a closed meeting is given to the public, items discussed in closed meetings are allowable topics under state law, all votes to approve contracts are announced publicly, and the guidelines for notifying personnel of decisions made in closed session are followed.

Status

Implemented

The district adopted a policy regarding the handling of closed meetings, records, and votes in January 2014. We reviewed 7 closed meeting minutes from March 2014 through June 2014 and identified no compliance concerns with Sunshine Law requirements.

5.3 Sunshine Law - Custodian of records and sunshine law requests

The district did not have a formal policy regarding access to district records, or established guidelines for the district to make records available to the public. The district did not have a formal policy establishing a custodian of records, a log of public requests for records, or a fee schedule for document retrieval and research. In addition, the district did not maintain the minutes of Board and committee meetings in an orderly manner. Minutes of meetings were not always readily available upon request.

Recommendation

The School Board establish written policies and procedures regarding public access to district records, maintain a public request log, and maintain minutes of all meetings in an orderly manner so they are readily available when requested.

Status

Implemented

The district has adopted a written policy for release of public information. The Board Secretary is the custodian of records for the district and is maintaining a log of record requests. Minutes of open and closed session meetings from March 2014 to June 2014 were readily available for our review.

6. Capital Assets

District personnel did not have adequate procedures to ensure property records were complete and accurate, or provide a basis for determining proper insurance coverage and accountability.

6.1 Records and procedures

The district's capital asset listing was inaccurate, was not always updated timely when purchases were made, and did not include some important information. In addition, an annual physical inventory of district assets had not been performed since at least 2006. District staff had not been following various policies and procedures covering inventorying, disposing and tracking of assets.

Recommendation

The School Board ensure complete and detailed capital asset records are maintained, assets are properly tagged for identification, and annual physical inventories are performed and compared to detailed records. In addition, follow established policies and procedure when capital asset items are disposed of or moved to a different location.

Status

Implemented

The district hired an outside vendor to perform an inventory of capital assets in June 2014 and has purchased an inventory control software program that district staff began using in September 2014. The district has implemented inventory control procedures, which along with the new software program, will ensure adequate inventory controls are maintained. These control procedures include documentation and approval requirements for the movement or disposal of property and property tagging procedures.

6.2 iPads

Officials did not enforce district policy regarding the ordering of electronic equipment resulting in the purchase of electronic equipment including iPads and iPad accessories without the involvement of the information technology (IT) department. Inventory test work indicated many of the iPads had not been tagged as district property and some of the accessories purchased had not been used and remained in the original packaging.

Recommendation

The School Board enforce district policy over how electronic devices and accessories in the district are purchased and ensure all those devices have a district tag attached. In addition, the administration should evaluate needs when determining who will be issued electronic devices, including iPads.

Status

In Progress

District administration implemented a new district directive requiring all electronics to be purchased by the IT department. The directive requires these purchases to be shipped to the IT department before they are dispensed within the district. The Superintendent indicated his Executive Leadership Team is in the process of analyzing all uses of electronics within the district.

7. Procurement Cards

Controls over district procurement (P) cards needed improvement. The district had 44 P cards in use during school year 2011-2012.

7.1 Approval

Approval of purchase orders detailing P card purchases was not done in accordance with administrative procedure.

Recommendation

The School Board ensure policies and procedures are followed in regards to proper review of P card statements and supporting documentation.

Status

Implemented

District officials decreased the number of P cards issued to employees and administrators from 44 to 4, and indicated the Purchasing Officer now approves all P card statements along with supporting documentation before forwarding them to the Director of Business and Finance for approval for payment. We noted supervisory review of all P card statements for September 2013 and each item purchased was supported by an approved purchase order and had adequate supporting documentation attached.

7.2 Purchases

We identified numerous purchases that either were not allowed under district administrative procedures or appeared unreasonable including recurring charges, gifts, birthday celebration purchases, appreciation dinners, iPad purchases, and unnecessary parking costs.

Recommendation

The School Board ensure prohibited purchases are not made on P cards and all purchases made on P cards are reasonable and prudent uses of public funds.

Status

Implemented

District officials decreased the number of P Cards issued to employees and administrators from 44 to 4, which they believe will help ensure better oversight of card purchases. We examined September 2013 P card purchases and all items were reasonable and a prudent use of district funds. Invoices were present for all purchases reviewed.

7.3 Incentives

The district had not developed policies regarding the use of student incentives and did not maintain documentation to support the distribution of student incentives purchased by teachers and school administrators. Student incentives included electronic equipment such as digital cameras, karaoke machines, Kindle tablets, laptop computers, and printers. Students received these incentives for academic and athletic achievements, but the district maintained no records identifying the students, the achievements met, the date of distribution, or evidence of receipt by the student.

Recommendation

The School Board develop a district-wide policy regarding the awarding of student incentives and ensure adequate documentation is maintained for the distribution of student incentives.

Status	**Partially Implemented** The Superintendent presented a new incentive program for perfect attendance to the Board in March 2014 and developed written procedures for distributing the incentive, but a district-wide policy regarding the awarding of student incentives has not been developed.
8. Staff and Board Meals	The district did not separately account for meals and food purchases for the Board prior to meetings, employee meetings, training sessions, retirement receptions, employee recognition events, or lunches at local restaurants. As a result, total actual disbursements for food and meals could not be determined, and the district's ability to monitor such purchases was hampered. In addition, food purchases were often made without documenting the purpose or those in attendance, and the district did not have comprehensive policies regarding district-provided food and meals.
Recommendation	The School Board develop comprehensive policies regarding district-provided food purchases. These policies should establish specific guidelines regarding proper and allowable disbursements in this area along with documentation requirements for these expenditures.
Status	**Partially Implemented** A comprehensive policy regarding district-provided food purchases has not been developed, although the Superintendent indicated he planned to discuss creating such a policy with the Board in the future. However, the Board has changed procedures regarding meal advances and now reimbursements are requested for meal costs while traveling. The Superintendent also indicated meals are only provided at Board meetings when considered necessary due to the time of the meeting.
11.1 Travel - Board travel	Travel costs for the Board more than doubled during the 2011-2012 school year from the previous year, primarily due to the increased attendance by Board members at the 2012 National School Board Association (NSBA) conference. We had concerns regarding the NSBA conference trips in both 2013 and 2012. The district sent a large number of Board members and staff to these conferences with some attendance being unneeded and others attending not participating in much of the training provided based on records obtained.
Recommendation	The School Board re-evaluate the amount of Board travel incurred and ensure Board members attending future trainings provide evidence of participation.

Status	**Partially Implemented** Board travel costs decreased from $36,000 in the 2011-2012 school year to $18,000 in the 2013-2014 school year. The Board sent only 3 members and the Superintendent to the NSBA conference in 2014 as compared to a group of 5 (4 Board members and the Superintendent) in 2013 and a group of 9 (all 7 Board members, the Superintendent, and Board Secretary) in 2012. Evidence of participation was not submitted by the Board members and Superintendent for the 2013-2014 NSBA conference, although they submitted a listing of the courses signed up to attend to the Board Secretary.
12.1 Purchases and Contracts - Bids and proposals	District personnel made several purchases of goods or services without utilizing a bid or request for proposal process in violation of district policy. The district bidding policy states competitive bids shall be sought in the purchase of supplies, goods, or services exceeding $5,000.
Recommendation	The School Board ensure district policy is followed by soliciting bids or requests for proposals for all services over $5,000. Documentation of bids received and the bid process should be retained. If sole source procurement is necessary, the district should retain documentation of the circumstances.
Status	**Implemented** The district has revised its policy for bids and requests for proposals. The policy now states no contract will be entered into or bill paid without the proper documentation and without an affirmative vote from a majority of the Board. It also requires purchases in excess of $25,000 have prior Board approval. We reviewed the Board minutes from March 2014 to June 2014 and noted numerous instances where the Board voted to approve bids and/or proposals submitted.
14. Backup Data	Some backup data was not stored at a secure off-site location. While backup of all district data was performed daily, only the backup of financial data was stored at a secure off-site location. Backup of other data, such as student attendance records, student grades, and teacher attendance was stored in the same building as the original data.
Recommendation	The School Board work with district officials to ensure backup data is stored in a secure off-site location and tested on a regular, predefined basis.
Status	**In Progress** District officials provided us with documentation that all backup data was stored off-site as of August 2014. They indicated recovery of the data has not been tested, but recovery testing will be done periodically.

15. Mileage and Fuel Logs

The district had not established effective monitoring procedures regarding fuel and vehicle use. Fuel purchases were charged at a local gas station per a district contract. Usage and fuel logs were not maintained for some district vehicles. Building and grounds and security personnel indicated mileage was recorded in a log weekly, but these logs did not indicate when fuel purchases occurred and no comparison of miles driven to fuel used was made to ensure fuel purchases and vehicle usage were reasonable. No fuel or usage logs were maintained for vehicles in the other departments. In October 2012, the district began using credit cards assigned to each vehicle for fuel purchases.

Recommendation

The School Board require logs for all vehicles. These logs should be reviewed and reconciled to fuel purchases and any significant discrepancies investigated.

Status

Implemented

The district now participates in a fleet card program to manage fuel usage, which requires entry of a vehicle's mileage before it can be fueled. Monthly reports of fuel purchases, as well as mileage for each vehicle, are received and reviewed by the business office, along with fuel purchase tickets. We reviewed March 2014 fuel invoices and compared them to the purchase logs. This work identified no problems.

THOMAS A. SCHWEICH
Missouri State Auditor

November 26, 2014

Missouri Veterans Commission
and
Larry D. Kay, Director
Jefferson City, Missouri

This letter reports the results of our review of seven complaints received by my office from elected federal officials related to the handling of pension and disability claims by Veterans Service Officers (VSO) employed by the Missouri Veterans Commission (MVC). The objectives of our review were to determine whether the VSOs properly handled the claims, including whether decisions were properly documented and veterans (or their guardians) were properly informed of the status of their claims.

Methodology

Our methodology included reviewing policies and procedures, case files and other pertinent documents; and interviewing various personnel of the MVC, as well as certain external parties.

Background

Under Title 38 of the Code of Federal Regulations (CFR), certain veterans and their spouses are eligible for pension and other benefits. Claims are processed by the federal Department of Veterans Affairs (VA). Under Section 42.007.5.2, RSMo, the MVC is required to aid and assist all Missouri veterans, their dependents, and legal representatives in preparing, presenting and prosecuting claims for compensation, education, pensions, insurance benefits, hospitalization, rehabilitation, and all other matters in which a veteran may have a claim against the United States or any state arising out of or connected with service in the military forces of the United States. The MVC is one of many entities that assist veterans in completing and filing benefit claim forms with the VA. According to the MVC, 44 VSOs are employed to assist veterans with their claims. In light of the statutory directive to aid veterans, any failure to communicate or engage in dialogue with veterans could be counterproductive to its mission of assisting veterans. The MVC estimates its VSOs file approximately 15,000 claims per year, and approximately 6,000 Missouri claims are currently backlogged at the VA. The average claim takes 156 days to process by the VA. The VA communicates its claim determinations directly to the veteran. If a claim is denied by the VA, the MVC receives a copy of the documentation the VA sends to the veteran. For veterans residing in a state veterans home, part or all of the pension benefits received by the veteran may be used to offset the cost of care the MVC provides to the veteran.

The MVC maintains physical case files for each claim filed by VSOs. The MVC has instituted a quality control function that requires a claims specialist to check the accuracy of approximately 20 percent of claims filed, including 100 percent of claims filed by first-year VSOs. In addition, VSOs at each veterans home conduct peer reviews of other VSO case files. The MVC is also in the process of implementing an electronic claims submission system.

Complaints, MVC Response, and SAO Conclusion

Complaint 1 - the VSO did not file a Notice of Disagreement after the VA denied the original claim.

MVC position - The original claim was filed in June 2010 and denied by the VA in October 2010. The VSO did not file a Notice of Disagreement because the claim was re-opened. When a claim is denied, there are three options; file a Notice of Disagreement, re-open the claim by submitting new and material evidence, or accept the VA ruling. By re-opening the claim, the veteran has more time to submit new evidence that could aid in getting a claim approved. The VSO indicated a Notice of Disagreement would not be appropriate in this situation because, at the time, the veteran had new evidence to submit to the VA. The VA would have made its decision using the same information it used to deny the claim. Also, by submitting additional information to re-open the claim, the veteran is aware a Notice of Disagreement need not be filed. The re-opened claim was filed in June 2013 and the VA denied the claim again in February 2014. The VA denied another claim in July 2014 that resulted in the MVC filing another Notice of Disagreement in September 2014, which is still pending.

In September 2014, the SAO was provided additional documentation maintained by the veteran. According to the veteran's notes, he was under the impression a Notice of Disagreement was filed after the VA denied the original claim in October 2010. The veteran made multiple phone and email inquiries over the course of 3 years as to the status of the appeal and offered to provide the MVC additional medical records, including audiograms from the 1970's. There is no documentation in the MVC's files that indicate why these medical records were not submitted with the original claim. In addition, in an email dated February 11, 2013, the VSO stated he would inquire on the status of the veteran's appeal, even though an appeal had not been filed.

SAO conclusion: Based on the information provided by the MVC, the VSO's decision to re-open the case instead of filing a Notice of Disagreement appears adequately supported. The VSO documented this decision in the case file, but the VSO did not provide written notification of this decision to the veteran. In addition, the case file contained no documentation related to the veteran's email correspondence or conversations the VSO had with the veteran from the time the original claim was denied until the claim was re-opened in June 2013. Providing written notification of MVC decisions to veterans could help prevent misunderstandings regarding the status of claims.

Complaint 2 - the VSO failed to file a pension claim and only provided excuses for over 2 years regarding why the claim was not filed.

MVC position - The VSO did not originally file a claim when the veteran was admitted to a MVC home in December 2009 because the veteran's assets were significant. The veteran's guardian was orally notified of this decision. While there is no set maximum asset limit, the VSO thought the assets would prevent the approval of a claim and recommended the veteran consider filing the claim a year later. VA personnel exercise discretion during the claim review process. According to 38 CFR 3.275, the veteran's income, along with factors such as asset liquidity, the veteran's life expectancy, number of dependents meeting the definition of a member of the family, and potential rate of asset depletion should all be considered when evaluating a claim. The guardian subsequently refused to disclose financial information during each of the next 2 years. In addition, the guardian gifted himself monies from the veteran's

individual retirement and other bank accounts, but refused to pay for physical therapy services for the veteran. The MVC contacted the Elder Abuse and Neglect Hotline in September 2012 to discuss concerns of possible fiduciary abuse by the guardian and the guardian's unwillingness to use the veteran's resources to pay for prescribed physical therapy services.

SAO conclusion: Based on information provided by the MVC, the VSO's decision not to file a pension claim appears adequately supported and the VSO documented this decision in the case file. However, the MVC did not provide written notification of this decision to the guardian. Providing written notification of MVC decisions to guardians could help prevent misunderstandings regarding the status of claims.

Complaint 3 - the VSO provided excuses to a family member of the veteran for over a year as to why the VA had not processed the claim, when in fact, the VSO had failed to file the claim.
MVC position - The veteran was admitted to a MVC home in December 2010. The VSO did not file a pension claim because the VSO could not obtain complete and accurate information due to the veteran being declared legally incapacitated in June 2011 with no one holding Power of Attorney. A family member of the veteran tried to present a Durable Power of Attorney to the MVC in September 2011; however, the MVC could not recognize it because it was drafted after the veteran had been declared incapacitated. Conversations with the veteran's family regarding the MVC not accepting the Durable Power of Attorney are documented in the veteran's medical records. The family member was appointed legal guardian in March 2012 and presented a claim form to congressional staff who helped file the claim.

SAO conclusion: Based on information provided by the MVC, the VSO's decision not to file a pension claim appears adequately supported and the VSO documented this decision in the case file. Although it is documented in the veteran's medical records that a social worker met with the family, the MVC did not provide written notification of why the MVC could not accept the family member's Power of Attorney. Providing written notification of MVC decisions to family members could help prevent misunderstandings regarding MVC actions taken.

Complaint 4 - the VSO failed to file an appeal for a veteran and failed to file a claim on behalf of the veteran's parent.

MVC position - The MVC filed a claim in April 2009 and the claim was denied in July 2009 by the VA. The MVC reopened the claim in October 2009 and new information was submitted. The VA then determined the veteran was 40 percent disabled effective May 2009. The veteran subsequently filed appeals with the VA for other medical conditions and the VA determined the veteran to be 100% disabled effective April 2010.

The MVC VSO office located in St. Charles assisted with filing an April 2009 claim with the VA for a parent (the widow of another veteran) whose claim was unrelated to the claim discussed in the preceding paragraph. Soon after, the parent was admitted to the St. James Veterans Home. When family members asked about the status of the claim, the St. James VSO stated he had no record of a claim being filed, apparently unaware of the previous claim assisted by the St. Charles VSO office. In December 2009, the veteran contacted the MVC to inquire about the status of the parent's claim. The MVC contacted the VA Pension Maintenance Center in December 2009 regarding the status of the claim. In February 2010 the VA Pension Maintenance Center replied that in January 2010 the VA determined the parent was no longer eligible to file a claim since she had passed away and pensions are not passed down to the heirs of the deceased.

SAO conclusion: Based on information provided by the MVC, decisions made by the VSO appear adequately supported and were documented in case files. However, the MVC did not inform the veteran in writing stating when the veteran's claim was filed with the VA. Providing written notification to

veterans that includes the date the claim was filed could help prevent misunderstandings regarding the status of claims. In addition, the VSO at the St. James home was apparently unaware that a claim had already been filed by the St. Charles VSO office. According to MVC officials, the MVC will soon be implementing a new electronic claims system that should eliminate any confusion regarding the filing status of claims.

Complaint 5 - the VSO failed to file a claim for 18 years of retroactive benefits on behalf of a veteran's widow.

MVC position - A family member of the widow wanted to file a retroactive claim at the 2011 pay rate. The VSO did not file the claim because 38 CFR 3.402 states surviving spouses are to receive benefits effective the date of receipt of the claim if the claim is filed more than one year after the veteran's death. It is not uncommon for the VSO, as in this case, to refer veterans and/or legal representatives to their elected officials because the situation would require a change in current law to comply with the veteran's wishes.

SAO conclusion: Based on information provided by the MVC, the VSO's decision not to file the requested retroactive benefit claim appears appropriate. However, the VSO did not maintain supporting documentation of this decision in a case file or provide written notification to the veteran. The MVC's current policy does not require case files to be maintained if the veteran does not reside in a MVC home and claims are not submitted to the VA. Providing written notifications that includes reasons why the VSO did not file a claim and the contact information of elected officials, could help prevent misunderstandings.

Complaint 6 - the VSO failed to file a disability claim until the MVC Director of the Veterans Services Program was contacted. Since the claim was not filed timely, the veteran passed away in 2012 without ever receiving disability benefits.

MVC position - The MVC filed a claim in November 2010 for various medical conditions, including a condition dating back to 1944. The veteran then spoke with the Director of the Veterans Services Program in January 2011. In November 2011, the VA approved disability for one condition, denied another, and stated an error was made in 1944 regarding a medical condition, resulting in the VA denying a portion of the claim. The MVC then filed a Notice of Disagreement in December 2011 for all three medical conditions. In May 2012 the VA increased the approved medical condition from 60 percent disabled to 70 percent disabled.

SAO conclusion: Based on information provided by the MVC, personnel handled this case properly and properly documented decisions in the case file. The MVC had already filed a claim with the VA at the time the veteran contacted the Director of the Veterans Service Program. However, the VSO did not provide written notification informing the veteran of the filing date of the claim. Providing written notification to veterans that includes the date the claim was filed could help prevent misunderstandings regarding the status of claims.

Complaint 7 - the VSO handling of a disability claim is questionable.

MVC position - The VSO filed a claim for 5 medical conditions with the VA in November 2010. The VA approved 2 conditions and denied 3 conditions in August 2011. The VSO filed a Notice of Disagreement and the VA denied the conditions again in March 2013. The MVC, on behalf of the veteran, requested and was granted a hearing with an Administrative Law Judge from the Board of Veterans Appeals. The veteran is currently waiting for the hearing to be scheduled. According to MVC officials, the veteran

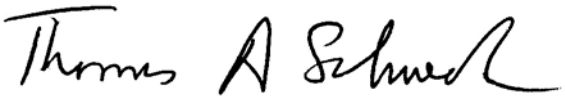
believes the Veterans Benefits Administration has overlooked evidence in denying his claim. The MVC attends all administrative hearings and assists with explaining all documentation in the case file.

SAO conclusion: Based on information provided by the MVC, the VSO handled this case appropriately and documented the decisions in the case file. However, the VSO did not provide written notification to the veteran that stated the date the claim was filed. Providing written notifications to veterans that includes the date the claim was filed could help prevent misunderstandings regarding the status of claims.

Overall SAO Conclusions: VSOs decisions regarding the cases reviewed appeared adequately supported and the VSOs documented these decisions in 6 of the 7 case files. However, MVC policies do not require VSOs provide written notification of these decisions to veterans and/or guardians. In addition, for one complaint reviewed, the MVC did not maintain a case file. This is due to the MVC's current policy of not maintaining a case file unless a claim is filed with the VA or the veteran resides in a MVC home. While there are no legal requirements that the MVC has to provide written notification or maintain case files, the lack of notification to the veteran in writing may deprive the veteran of benefits that he or she is entitled. In addition, written notifications coupled with complete case file documentation would help avoid misunderstandings and aid the MVC in the event the handling of claims are questioned. With the MVC implementing a new electronic submission system, the MVC should consider automatically generating written notifications to notify veterans or their guardians of the actions taken by the MVC on their behalf. The MVC should also consider requiring case files be maintained for all veterans requesting assistance.

My office plans to conduct a full and comprehensive audit of the MVC beginning in 2015 and my staff will assess the status of these suggestions during that audit.

Sincerely,



Thomas A. Schweich
State Auditor

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge and Court en Banc
and
Circuit Clerk of the
Fifth Judicial Circuit
Buchanan County, Missouri

We have conducted follow-up work on certain audit report findings contained in Report No. 2014-041, *Fifth Judicial Circuit, Buchanan County*, issued in June 2014, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the court about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the court, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. As part of the AFTER work conducted, we reviewed the written status of selected findings and recommendations and supporting documentation submitted by court officials, and held meetings with court officials. Documentation provided by the court included manual receipt slips, bank statements, Judicial Information System (JIS) reports, case files, ticket logs, and various other financial and court records. This report is a summary of the results of this follow-up work, which was substantially completed during October 2014.

Thomas A. Schweich
State Auditor

Fifth Judicial Circuit, Buchanan County
Follow-Up Report on Audit Findings
Status of Findings

1.1 Accounting Controls and Procedures - Segregation of duties and supervisory review

The Circuit Clerk had not adequately segregated accounting duties or limited user access rights in the JIS, and adequate supervisory reviews of accounting records were not performed. There were instances where the Circuit Clerk and other court employees could have been responsible for transactions from initial receipt to disbursement without involvement from other court employees.

Recommendation

The Circuit Clerk segregate accounting duties, limit user access rights in the JIS to only those necessary for the user to perform job duties, and implement appropriate reviews and monitoring procedures.

Status

In Progress

The Circuit Clerk indicated a supervisor who does not receive payments is preparing the daily deposits and preparing the monthly bank reconciliations. She said she attempted to restrict JIS user assess rights for some employees, but she restored the original access rights when it was determined the employees lost access to other JIS functions necessary for their jobs. She indicated changes would have to be made within the JIS, or with job duties, in order to restrict user access in the future.

1.2 Accounting Controls and Procedures - Receipt processing procedures

The Circuit Clerk had not ensured monies and related filings received were processed timely. The court had not issued receipt slips or recorded 845 checks and money orders, totaling $53,582, in the JIS for monies on hand during a cash count conducted during July 15 through July 17, 2013. Some of these checks or money orders had been on hand for more than 3 weeks, and many of these checks or money orders were attached to unprocessed garnishment and new court filing applications. Of the checks and money orders made payable to the Circuit Clerk, we identified 12 checks had not been restrictively endorsed at the time of our cash count. A significant portion of these unprocessed receipts and related paperwork related to service fees for garnishment applications and new court filings. The court was not entering these checks or money orders into the JIS as non-monetary receipts, as recommended in the Office of State Courts Administrator (OSCA) Court Clerk procedure handbook.

Recommendation

The Circuit Clerk record and process all receipts and related paperwork timely and restrictively endorse all receipts immediately upon receipt. In addition, comply with OSCA guidance to record garnishments in the JIS timely.

Status

Implemented

The Circuit Clerk indicated receipts and related paperwork are now being processed timely. The Circuit Clerk implemented procedures requiring restrictive endorsements on all checks and money orders immediately upon

receipt. In addition, any checks or money orders received by the court for garnishment applications now must be made payable to the Circuit Clerk's office, recorded in the JIS on the day received, and deposited that day. A check is then written to the applicable Sheriff for the garnishment service fee.

1.3 Accounting Controls and Procedures - Mail log

The Circuit Clerk had not established procedures to record mail receipts immediately upon receipt. Court employees did not record monies received in the mail on a mail log.

Recommendation

The Circuit Clerk require preparation of an initial record of monies received by mail and reconcile it to the JIS.

Status

Not Implemented

The Circuit Clerk indicated this recommendation has not been implemented. She indicated the office lacks the resources for court personnel to prepare an initial record of monies received by mail.

1.4 Accounting Controls and Procedures - Non-monetary, voided, and adjusting transactions

Neither the Circuit Clerk nor supervisors reviewed non-monetary, voided, and adjusting transactions in the JIS, and the court did not maintain adequate supporting documentation for these types of transactions. The Circuit Clerk and the 30 court employees had the ability to enter non-monetary transactions, and adjust costs in the JIS.

Recommendation

The Circuit Clerk ensure adequate documentation is maintained to support all non-monetary, voided and adjusting transactions, and ensure an independent review and approval of these transactions is performed and documented.

Status

Implemented

The Circuit Clerk and court personnel indicated clerks must now include documentation supporting voided transactions with daily cashier session reports. The Accounting Supervisor is responsible for reviewing these voided transactions on a regular basis, as well as any non-monetary or adjusting transactions posted to the system.

1.5 Accounting Controls and Procedures - Garnishment disbursements

The Circuit Clerk had not disbursed garnishments timely. The court's procedure was to disburse the garnishment receipts after the garnishment period (ranging from 30 to 180 days) ends, rather than within the 10-day holding period as established by Supreme Court rule.

Recommendation

The Circuit Clerk establish procedures to ensure garnishment payments are disbursed timely and in accordance with the Supreme Court rule.

Status

Implemented

The Circuit Clerk indicated procedures have been established to ensure garnishment payments are disbursed timely and in accordance with the Supreme Court rule. Garnishment payments are now typically made within one day of receipt. The open items detail report provided for our review for October 14, 2014, showed no undistributed garnishment payments.

1.6 Accounting Controls and Procedures - Outstanding checks

The Circuit Clerk had not developed adequate procedures to follow up on outstanding checks. As of July 31, 2013, JIS records indicated 117 checks, totaling $23,180, had been outstanding for over a year. Sixty-eight of those checks had been outstanding for more than 2 years.

Recommendation

The Circuit Clerk develop procedures to routinely follow up on outstanding checks and reissue them if necessary or dispose of these monies in accordance with state law.

Status

In Progress

The Circuit Clerk indicated the court has been extremely busy with the implementation of e-filing in the JIS and she is working to establish procedures to follow up on outstanding checks and should have this process in place within 6 months.

1.8 Accounting Controls and Procedures - Safeguarding assets

The court did not properly safeguard or limit access to case files, the Circuit Clerk's signature stamp, blank checks, and unprocessed receipts. Case files were maintained in boxes located on the floor in a hallway and were easily accessible to the public. Blank checks and the signature stamp were both maintained in areas accessible to multiple employees, some of which did not need these items to perform their job duties. In addition, employees who used the signature stamp did not initial to indicate use nor was there any review of the documents stamped.

Recommendation

The Circuit Clerk ensure court records, property, and monies are properly secured and safeguarded and controls are established over the signature stamp.

Status

Implemented

The Circuit Clerk indicated the case files have been moved to a secure area, and the Circuit Clerk's signature stamp, blank checks, and unprocessed receipts are now properly secured and safeguarded.

7.1 Senate Bill 40 Board - Segregation of duties 10

*Includes selected findings

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Morgan County

We have conducted follow-up work on certain audit report findings contained in Report No. 2014-030, *Morgan County*, issued in April 2014, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the county about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the county, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. As part of the AFTER work conducted, we reviewed supporting documentation provided by county officials and met with county personnel. Documentation included County Commission meeting minutes, bank statements, receipt and deposit records, and various other financial records. After our initial follow-up meeting in September 2014, the Sheriff's office determined approximately $18,000 in seized cash was missing from the evidence cash safe. Further investigation by the Sheriff's office in October 2014, revealed approximately $18,000 in bond receipts missing from the office and some disbursements of receipts had not been remitted to the County Treasurer. The clerk primarily responsible for bonds was terminated on October 15, 2014, and has since been charged with theft related to the missing bond monies. The investigation remains ongoing. This report is a summary of the results of this follow-up work, which was substantially completed during September and October 2014.

Thomas A. Schweich
State Auditor

1. County Sales Tax

The county incorrectly certified a property tax rate with a voluntary reduction instead of a sales tax reduction for the 3 years ended December 31, 2008, thereby reducing its property tax rate ceiling beginning in 2009. In addition, the county calculated a sales tax reduction, but did not report or reduce the property tax levy for the sales tax reduction for the 3 years ended December 31, 2011. The county failed to calculate a sales tax reduction for the year ended December 31, 2012.

In calculating the property tax rate ceiling for 2009 through 2012, the State Auditor's office followed Section 137.073.5(4), RSMo (amended in 2008), which provides a voluntary reduction taken in a non-reassessment year (even year) results in a reduced tax rate ceiling during the subsequent reassessment year (odd year). As a result, the tax rate ceiling for the county's General Revenue Fund was lowered for 2009 through 2012 due to the voluntary reduction in 2008.

The county was apparently unaware of the reduced tax rate ceiling and used incorrect tax rate ceilings when preparing its sales tax reduction calculations for 2009 through 2011. Rather than using the certified tax rate ceilings, the county incorrectly used the tax rate ceilings that would have been in effect if there had been no voluntary reduction in 2008.

The county's calculations showed an under collection of property taxes each year when there was actually an over collection. The county certified tax rates equal to the lowered tax rate ceiling for each year and reported no sales tax reductions since the county believed its calculated sales tax reduction was already incorporated into the lower tax rates.

Recommendation

The County Commission and County Clerk properly calculate and report property tax rate reductions (sales tax or voluntary), evaluate if amended forms should be submitted to the State Auditor's office, and develop a plan to incorporate corrected property tax reductions from prior years into the current tax rate. During the tax rate setting process, the County Commission and County Clerk should ensure tax rate information reported back to the county in the State Auditor's office certification letter is consistent with expectations and, if not, promptly follow up on any discrepancies.

Status

Implemented

The County Commission and County Clerk reinstated the General Revenue Fund's property tax rate ceiling and submitted amended forms to the State Auditor's office in July 2014, as allowed by Section 137.073, RSMo. Based on the reinstated tax rate ceiling and the amended forms, the County Clerk recalculated the sales tax reductions for prior years (through 2013) and determined the county had under collected General Revenue Fund property taxes by approximately $600,000 in total since 2009. The County

Commission has developed a plan to collect this $600,000 over the next 2 years by reducing the sales tax reduction amounts each year when setting the General Revenue Fund property tax levy. In addition, the County Commission and County Clerk stated they reviewed the 2014 certification letter from the State Auditor's office to ensure it was consistent with their expectations.

2. Sheriff Controls and Procedures

Significant weaknesses continued to exist in the Sheriff's controls and procedures despite similar findings related to the Sheriff's office in our prior reports. Due to the concerns noted below, we were unable to determine if all monies were accounted for, deposited, and disbursed properly.

2.1 Segregation of duties

The Sheriff had not established adequate segregation of accounting duties and did not perform supervisory reviews. One clerk was responsible for receiving, recording, depositing, and disbursing monies, and reconciling the fee bank account. Another clerk was responsible for those same duties for the inmate bank account.

Recommendation

The Sheriff adequately segregate accounting duties to the extent possible or ensure supervisory reviews of accounting records are performed and documented.

Status

In Progress

The Sheriff explained to us his process for reviewing monthly bank statements and images of canceled checks for reasonableness. This review is currently not documented. In addition, he plans to start reviewing receipt documentation and bank reconciliations, and will document all reviews. However, based on the recent discovery of missing monies, the office is currently revising its review procedures.

2.2 Numerical sequence and reconciliation of receipt records

The Sheriff's fee account clerk did not account for the numerical sequence of receipt slips and did not reconcile receipt records to deposits. As a result, it was difficult to determine which receipts were included in each deposit to ensure all receipts were actually deposited.

For cash bonds received, a receipt slip was issued by the booking department and placed with the cash in the drop safe for the fee account clerk to pick up. The fee account clerk did not issue receipt slips for cash bonds obtained from the drop safe even though she issued receipt slips for all other types of receipts.

When preparing deposit summaries, the fee account clerk did not always include the corresponding receipt slip numbers or identify which cash bonds were included in the deposits. A comparison of December 2012 bond deposits to booking department bond receipt slips, determined receipt slips totaled $6,052, while deposits totaled $6,622. The fee account clerk was

unable to determine the reason for the difference. Because no records were kept showing which bonds were included in which deposit, we also could not determine the reason for the difference.

Recommendation

The Sheriff account for the numerical sequence of receipt slips and reconcile receipt slips issued with deposits to ensure all receipts have been deposited.

Status

Implemented

The Sheriff's office is now accounting for the numerical sequence of the receipt slips issued for the account. We reviewed deposits made in September 2014 and noted deposit summary reports listing the individual receipt slips making up each deposit, were reconciled with deposits to ensure all receipts were included in the deposits.

2.3 Deposits

Sheriff's office personnel did not deposit monies intact or timely.

Fee account

The fee account clerk did not deposit monies intact for the fee account. We noted several checks received by the Sheriff's office were not deposited timely, and should have been included in earlier deposits.

Inmate account

The inmate account clerk did not deposit timely for the inmate account. We reviewed December 2012 receipts for the inmate account and found deposits from the lobby kiosk, booking department kiosk, and drop safe that were not made timely.

Recommendation

The Sheriff ensure deposits are made timely and include all monies on hand at the time a deposit is prepared.

Status

In Progress

We reviewed May, June, and July 2014 bank statements and determined the fee account clerk was making deposits at least once a week. Regarding depositing intact, we also reviewed the deposits summary reports for the fee account for September 2014 and noted all receipts on hand were included in each deposit for the account. The inmate account clerk is still making deposits of kiosk and drop safe monies once a month. However, she is setting up procedures to start making kiosk and drop safe deposits every 2 weeks.

2.4 Inmate refunds

The Sheriff's inmate account clerk did not maintain a running balance of the cash fund. The Sheriff's office maintained a cash fund to refund monies to U.S. Immigration and Customs Enforcement (ICE) inmates prior to deportation or transfer to another facility. Cash was withdrawn from the inmate account to replenish the cash fund. Released inmates signed for any cash received and the inmate account clerk posted this amount on the

computer system. This cash was not reflected in the list of liabilities for the inmate account because the Sheriff's office did not keep records of the balance of the cash fund.

Recommendation

The Sheriff maintain a running balance of the cash fund. In addition, on a periodic basis, cash on hand should be counted and reconciled to the related records by an independent person.

Status

In Progress

The inmate account clerk is working with the computer system vendor to determine the necessary reports that must be generated to show ICE cash activity. Once this has been resolved, she intends to start maintaining a running balance of the cash fund and count the fund periodically with an independent person present to ensure the cash on hand agrees to her records.

2.5 Seized cash

Controls and records for seized cash were not sufficient and periodic inventories were not conducted. Sheriff's office personnel could not generate a report of total cash currently on hand from the seized property system. Therefore, a ledger of seized cash was maintained. The seized cash was kept in a safe that only the Sheriff and a clerk could access. We performed a cash count of the seized cash on March 27, 2013, and determined the ledger did not include 4 evidence bags totaling approximately $4,900.

Recommendation

The Sheriff ensure a periodic physical inventory is conducted and reconciled to the various records of seized cash.

Status

In Progress

The deputy in charge of the evidence room inventoried the seized cash on hand in August 2014 by counting the amounts on the labels of the sealed evidence bags, and created a spreadsheet to track the seized cash. This spreadsheet has recently been provided to the Prosecuting Attorney to review and determine if action can be taken on any of the seized cash. The Sheriff's office plans to conduct a quarterly physical inventory of seized cash and reconcile the inventory results to the seized cash spreadsheet. However, in September 2014, the court ordered the seized cash related to one of the cases be disbursed. Based on this court order, all evidence bags associated with the case were opened and counted. One bag was missing approximately $18,000. The investigation into this missing cash remains ongoing.

2.6 Liabilities

Sheriff's office personnel did not prepare monthly lists of liabilities for either the inmate account or the fee account, and consequently, liabilities were not compared to the reconciled bank balances.

Recommendation

The Sheriff prepare a monthly list of liabilities for both accounts and compare to the reconciled bank balances. Any differences should be promptly investigated and resolved. Any unidentified monies should be disposed of in accordance with state law.

Status

Not Implemented

Both office clerks stated they are in the process of setting up procedures to allow them to identify liabilities and plan to prepare monthly listings of liabilities, including bonds, to compare to the reconciled bank balances. However, as of October 2014, lists of liabilities have not been prepared. If listings of liabilities had been prepared monthly for the fee account, the shortage of bond monies discovered by the Sheriff's office in October 2014 may have been identified sooner.

2.7 Disbursements

The Sheriff's office lacked adequate procedures to ensure monies received were properly disbursed from the fee account to the County Treasurer and/or other parties. As a result, some monies were not disbursed timely.

Recommendation

The Sheriff establish procedures to ensure all monies are disbursed to the County Treasurer and other parties on a timely basis.

Status

In Progress

We reviewed September 2014 disbursement records and determined the August 2014 fees were disbursed timely to the County Treasurer in early September. We reviewed September 2014 receipt records and determined September bond receipts were disbursed timely to the appropriate courts throughout the month. However, the Sheriff's office determined some disbursements to the County Treasurer had not been made in prior months.

2.8 Commissary and phone card profits

The Sheriff's office had not turned over any 2012 commissary profits or any phone card profits to the county treasury. The Sheriff's office was holding approximately $61,000 in profits as of December 31, 2012, in the inmate account. The inmate account clerk indicated profits from the phone cards sold to inmates were not turned over to the county treasury because they were used to pay for cable TV and indigent packages for the inmates.

Recommendation

The Sheriff ensure existing and future commissary profits (including phone card profits) not necessary to meet cash flow needs or current operating expenses are turned over to the County Treasurer to be deposited into the Inmate Prisoner Detainee Security Fund.

Status

In Progress

As of October 2014, the Sheriff's office has turned over $63,914 in commissary profits to the County Treasurer for deposit into the Inmate Prisoner Detainee Security Fund. The inmate account clerk is currently establishing procedures to turn over commissary profits to the County Treasurer monthly.

3. Property Tax System Controls and Procedures

Controls and procedures over the property tax system needed improvement.

3.1 Computer access

Access to the property tax system was not adequately restricted. The County Collector had access in the property tax system to make address changes, enter tax rates, post abatements, and outlaw taxes. Because the County Collector was responsible for collecting tax monies, good internal controls required the County Collector not have access rights allowing her to alter or delete tax rates or abate taxes.

Recommendation

The County Commission ensure property tax system access rights are limited to only what is needed for the users to perform their job duties and responsibilities.

Status

Implemented

As of October 2014, the County Collector no longer has access to remove taxes due or change tax rates in the system. These duties are now performed by the County Assessor and County Clerk, respectively.

3.2 Tax books

The County Clerk did not prepare or verify the accuracy of the delinquent tax books prepared by the County Collector.

Recommendation

The County Clerk prepare the delinquent tax books, or at a minimum, verify the accuracy of the delinquent tax books prior to charging the County Collector with the property tax amounts to be collected. Procedures performed should be adequately documented.

Status

Implemented

The County Clerk has implemented additional procedures to verify the accuracy of the delinquent tax books. We reviewed the County Clerk's account book and noted she compared the delinquent tax book totals to her account book in March 2014 and documented her review.

3.3 Review of activity

Neither the County Clerk nor the County Commission adequately reviewed the financial activities of the County Collector. The County Clerk did not maintain an account book or other records summarizing property tax

charges, transactions, and changes, and no procedures were performed by the County Clerk or the County Commission to verify the accuracy and completeness of the County Collector's annual settlements.

Recommendation

The County Clerk maintain an account book with the County Collector. In addition, the County Clerk and the County Commission should use the account book to review the accuracy and completeness of the County Collector's annual settlements.

Status

Implemented

The County Clerk now maintains an account book with the County Collector. We reviewed the account book for the year ended February 28, 2014, and noted the County Clerk performed and documented a comparison of her account book to the County Collector's annual settlement.

3.4 Changes and reconciliations

The County Commission and County Clerk were not adequately reviewing property tax system changes and activity. The County Assessor prepared and posted additions and abatements to the property tax system. The County Collector also had the ability to post abatements to the property tax system and to outlaw taxes in the property tax system. The County Collector submitted supporting documentation to the County Commission for abatements she initiated and provided the County Commission with total amounts for her outlawed taxes; however, there was no procedure in place to ensure all outlawed taxes and abatements initiated by the County Collector were submitted for review. At the end of each month, the County Collector printed the Assessor-initiated property tax additions and abatements report from the property tax system and provided the report to the County Clerk. However, neither the County Commission nor the County Clerk reviewed and approved these reports, and no comparison to the County Assessor's supporting documentation was performed.

Recommendation

The County Commission and the County Clerk develop procedures to ensure all property tax additions and abatements (including outlawed) are properly approved and monitored.

Status

Implemented

The County Commission now reviews property tax additions and abatements on a monthly basis. We reviewed the County Commission meeting minutes for the July 8, 2014, meeting and noted the minutes included a copy of the June property tax additions and abatement reports generated from the property tax system, and the County Commission documented its approval of these reports.

5.1 Prosecuting Attorney Controls and Procedures - Adjustments

Neither the Prosecuting Attorney nor the office manager reviewed adjustments to defendant accounts receivable balances made by the legal assistant. In addition, adequate documentation was not always maintained to support the reasons for the adjustments. As a result, there was little assurance the 51 adjustments totaling $50,652 made during the year ended December 31, 2012, were properly authorized.

Recommendation

The Prosecuting Attorney perform a documented independent review and approval for all accounting adjustments and ensure adequate documentation is maintained to support all adjustments.

Status

Implemented

We reviewed the 2014 adjustments and noted the Prosecuting Attorney performed a documented review of each adjustment and the related supporting documentation.

7.1 Senate Bill 40 Board - Segregation of duties

Accounting duties related to the Targeted Case Management (TCM) bank account were not adequately segregated. The Executive Director was responsible for all duties including receipting, recording, and disbursing monies for this account. The majority of disbursements were made through a debit card. Furthermore, the Executive Director did not prepare monthly bank reconciliations for the account. There was no documented review of any account records by the Board. The Executive Director indicated he took his file of receipt slips for debit card purchases to Board meetings so they would be available if a Board member requested them; however, the records had not actually been given to the Board to review.

Recommendation

The Senate Bill 40 Board ensure independent or supervisory reviews of accounting records are performed and documented and monthly bank reconciliations are prepared and submitted to the Board for review for the TCM account. In addition, the Board should adopt procedures to ensure supporting documentation is submitted and reviewed for all debit card usage.

Status

In Progress

An additional employee has been hired to handle some of the accounting functions and the Board Treasurer is now performing a review of bank reconciliations and accounting records for both accounts at the quarterly meetings. However, the Board Treasurer had not been consistently documenting her reviews. Starting at the next quarterly meeting in October, the Executive Director stated the Board will have procedures in place to ensure documentation of reviews is obtained. In addition, the Senate Bill 40 Board no longer uses the debit card.

State Auditor's Letter 2

Status of Findings

1. Improper Purchases, Missing Receipts, and Unauthorized/Unapproved Purchases....3
2. Procurement Controls and Procedures....3
3. County Clerk Receipts....6

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
County Clerk of Webster County

We have conducted follow-up work on the audit report findings contained in Report No. 2014-045, *Webster County Procurement Procedures and County Clerk*, issued in June 2014, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the county about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the county, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. As part of the AFTER work conducted, we met with the County Commission and County Clerk and reviewed supporting documentation provided to us. Documentation reviewed included county policies and procedures, credit card statements, invoices, receipt and transmittal records, month-end reports, and various other county records. This report is a summary of the results of this follow-up work, which was substantially completed during October and November 2014.

Thomas A. Schweich
State Auditor

1. Improper Purchases, Missing Receipts, and Unauthorized/ Unapproved Purchases

The former Administrative Assistant to the County Clerk made improper purchases for personal items totaling $17,676 with county credit cards, county charge accounts, and county checks. This employee also did not transmit $201 of some monies received in the County Clerk's office to the County Treasurer. Various items totaling $774 purchased without authorization or approval were found in the County Clerk's office after termination of the Administrative Assistant. Significant weaknesses in internal controls and record-keeping procedures resulted in these misappropriations occurring and going undetected for a significant period of time.

Billy Breitenstein, the County Clerk's Administrative Assistant, was terminated for reasons unrelated to misuse of county credit cards, and personnel in the County Clerk's office determined the Administrative Assistant had fraudulently acquired a county credit card. At the request of the County Commission and County Clerk, the Prosecuting Attorney contacted the Missouri State Highway Patrol (MSHP) to investigate. The County Commission and County Clerk later notified the State Auditor's office (SAO) and provided documentation showing some improper purchases. Audit work by the SAO identified additional improper purchases and missing monies. Billy Breitenstein was charged with felony stealing and fraudulent use of a credit device on June 9, 2014. The MSHP investigation discovered some improperly purchased items located in the Administrative Assistant's residence.

Recommendation

The County Commission and County Clerk work with law enforcement authorities regarding any criminal prosecution and take necessary action to recover the misappropriated monies.

Status

Implemented

Prosecution of the case has been referred to the state Attorney General's office. The next court proceeding is scheduled for December 1, 2014.

2. Procurement Controls and Procedures

Significant weaknesses existed in the procurement controls and procedures of the county.

2.1 Segregation of duties and oversight

The County Commission and County Clerk did not adequately segregate county procurement duties or provide adequate oversight of procurement functions and records. The County Commission and County Clerk did not perform adequate reviews of vendor jackets, credit card statements, invoices, and other supporting documentation.

Recommendation

The County Commission and County Clerk adequately segregate the procurement function to the extent possible or ensure supervisory reviews of accounting records are performed and documented.

Status

Partially Implemented

The County Clerk updated the county's disbursement policy in an effort to segregate accounting duties. The policy now indicates the accounts payable clerk has no authority to make purchases or incur charges on behalf of Webster County.

The County Commission continues to only document its review of disbursements on the vendor jacket. However, the County Clerk indicated the accounts payable clerk documents her comparison of amounts on the credit card statement to invoices by applying a highlighter mark, and he places a checkmark by the amount on the credit card statement. The use of the highlighter and checkmark does not document when or by whom the records were reviewed and approved.

2.2 Credit cards

Controls and procedures over credit cards needed improvement. The County Commission and the County Clerk did not perform adequate reviews of vendor jackets, credit card statements, invoices, and other supporting documentation, and personal purchases made by the Administrative Assistant through use of county credit cards totaling $16,077 went undetected.

The Administrative Assistant did not always submit credit card statements to the County Commission and County Clerk for their review, created some credit card statements, altered some transactions on credit card statements, and marked some transactions "void" on credit card statements to conceal personal purchases made. The Administrative Assistant duplicated and re-submitted previously paid credit card invoices/supporting documentation to the County Commission, and the county had no supporting documentation for personal purchases made by the Administrative Assistant totaling $15,124. The Administrative Assistant made personal purchases and the billing and/or shipping address on the invoices was his personal address. The Administrative Assistant made personal purchases on county holidays or weekends.

The County Commission and County Clerk did not have adequate physical controls or written policies to ensure appropriate usage of credit cards. The county paid late fees and finance charges. The Administrative Assistant made personal purchases from the county credit card assigned to him, made personal purchases from a credit card he opened without approval of the County Commission and County Clerk, and made personal purchases from 4 of 5 other county credit cards stored in the County Clerk's vault. The County Commission and County Clerk allowed county officials and

employees to make personal purchases on county credit cards, and adequate reviews of these purchases and the related reimbursements were not performed.

Recommendation

The County Commission and County Clerk adopt formal policies and procedures for credit card usage that include criteria for identifying employees that should be assigned a card and limits use to official purposes only, restrict access to shared credit cards, require adequate documentation be maintained and reconciled to billing statements, and require purchases be approved by someone other than the card user. In addition, the County Commission and County Clerk should implement procedures to ensure bills are paid timely to avoid late fees and finance charges.

Status

Partially Implemented

The County Clerk and County Commission have not changed the existing credit card policy or limited use of county credit cards to official purposes only. Credit card purchases continue to be made on holidays and weekends, and some supporting documentation was not maintained. The 5 shared credit cards are still kept in the County Clerk's vault, and access to those cards is not adequately restricted; however, the County Clerk indicated the accounts payable clerk no longer has charging privileges.

We reviewed credit card statements and the related invoices for July and August 2014, and did not identify any alterations or voided information on the statements, duplicate invoices or payments, personal purchases made, invoices including personal billing and/or shipping addresses, or late fees and finance charges assessed. In addition, someone other than the card user approved all credit card purchases we reviewed.

2.3 Charge account and checks

The County Commission and the County Clerk did not perform adequate reviews of Staples charge account statements, county checks, invoices, and other supporting documentation. As a result, the Administrative Assistant made personal purchases totaling $1,457 using the Staples charge account. There was no indication the County Commission or County Clerk reviewed or approved the vendor jackets or invoices for $1,139 of these purchases. The Administrative Assistant used Staples reward program coupons earned from county purchases for $843 of the $1,457 in purchases made.

In addition, the county issued 2 checks totaling $142 to vendors for personal purchases of the Administrative Assistant. Our review of payments to Staples identified an overpayment of $1,000. The vendor jacket generated by the Administrative Assistant reported $1,114 due to Staples, while the related invoice only showed $114 due. Staples applied the overpayment to subsequent purchases; however, $360 is still due to the county.

Various items that had not been authorized/approved for purchase, totaling $774, were purchased by the Administrative Assistant through use of the county's Staples charge account. These items were found in the County Clerk's office after termination of the Administrative Assistant.

Recommendation

The County Commission and County Clerk require adequate documentation be maintained and reconciled to monthly charge account statements, and require purchases be approved by someone other than the purchaser.

Status

Partially Implemented

We reviewed July and August 2014 charge account purchases and determined there was adequate documentation maintained, and no personal purchases were identified. Items purchased using the county's Staples charge account without proper authorization or approval (as identified in our June 2014 audit report) are being held in a secure area in the County Clerk's office for possible use in the prosecution of the former Administrative Assistant.

However, the County Clerk and County Commission still only document their approval of these charge account disbursements on the vendor jacket. No reconciliation of charge account invoices to the vendor jacket is documented by the County Commission or County Clerk. There was no evidence that the County Clerk or County Commission had requested or reviewed a complete list of Staples reward program coupons earned and used during July and August 2014. At our request, the County Clerk obtained a list of Staples reward program coupons earned and used, and we were able to account for all activity. The County Clerk indicated the county received monthly statements from Staples for these 2 months; however, they were thrown away. In addition, the County Clerk indicated the county does not receive monthly statements from some vendors with which the county has charge accounts. As a result, the county cannot document it reconciled charge invoices to the monthly statements.

3. County Clerk Receipts

Significant weaknesses existed in receipting and transmittal controls and record-keeping procedures in the County Clerk's office.

3.1 Segregation of duties

The County Clerk did not adequately segregate accounting duties or provide adequate oversight of receipts, transmittals, and related records. The County Clerk's Administrative Assistant received monies, recorded transactions, maintained accounting records, transmitted monies to the County Treasurer, and prepared month-end reports. The County Clerk or other office personnel did not perform a comparison of records prepared by the Administrative Assistant to the monies transmitted to the County Treasurer.

Recommendation

The County Clerk adequately segregate receipting and transmittal duties to the extent possible or ensure supervisory reviews of accounting records are performed and documented.

Status

Not Implemented

The County Clerk has not adequately segregated accounting duties. All personnel in the County Clerk's office receipted monies during July and August 2014. One clerk in July and another clerk in August, who receipted monies in both months, prepared the month-end reports and transmitted monies to the County Treasurer. The County Clerk did not document his review of the receipt slips, the month-end reports, or the transmittal receipts.

3.2 Receipting and transmitting

Controls and procedures over receipting and transmitting monies were not sufficient. As a result, there was no assurance all monies received were transmitted, and, some monies received were not transmitted to the County Treasurer.

The Administrative Assistant and other office personnel did not issue receipt slips for some monies received, and the method of payment was not always recorded on receipt slips. The Administrative Assistant and other office personnel did not always issue receipt slips in numerical sequence. Multiple receipt books were used concurrently. Original copies of some voided and blank receipt slips were not retained, and some receipt slips were skipped and not properly defaced to prevent later use. The Administrative Assistant did not record some monies received on the month-end transmittal report, did not transmit those monies to the County Treasurer, and those monies ($161) were missing.

Recommendation

The County Clerk issue receipt slips for all monies received, with the method of payment documented, reconcile the composition of receipt slips to the composition of transmittals, and transmit receipts intact to the County Treasurer. The County Clerk should also ensure receipt slips are issued in numerical sequence, all copies of voided and blank receipt slips are retained, and the numerical sequence of receipt slips is accounted for properly.

Status

In Progress

Office personnel in the County Clerk's office issued receipt slips in numerical sequence for all monies received during July and August 2014. All copies of voided receipt slips were retained, and no blank receipt slips were identified during the time period reviewed. However, the method of payment was not always documented on the receipt slips issued, and as a result, the composition of receipt slips could not be reconciled to the composition of transmittals. Most receipts were transmitted intact to the County Treasurer in July and August 2014; however, a cash refund for a check overpayment was identified in August 2014. The County Clerk

indicated in the future, he would ensure the composition of receipt slips is agreed to the composition of transmittals and cash refunds will be signed for by the recipient.

3.3 ATV permits and liquor licenses

The County Clerk or Administrative Assistant did not properly account for the numerical sequence of all-terrain vehicle (ATV) permits and liquor licenses issued, and there was no procedure to reconcile ATV permits and liquor licenses issued to fees collected and amounts transmitted. ATV permits and records indicated 4 ATV permits were issued by the Administrative Assistant (including one to himself); however, receipt slips were not issued for these monies nor were the monies transmitted to the County Treasurer. In addition, during our review of the ATV permit log maintained by the Administrative Assistant, we could not account for 12 of 70 ATV permit numbers used during the period July 1, 2012, to July 26, 2013. As a result, additional monies related to ATV permits could be missing. In addition, 3 liquor license numbers were used twice.

Recommendation

The County Clerk account for the numerical sequence of permits and licenses, ensure the permit log is complete and accurate, and reconcile permits and licenses issued to fees recorded and transmitted.

Status

In Progress

During our review of liquor licenses issued during the period May through August 2014, we were able to account for the numerical sequence of liquor licenses. Since most ATV permits are renewed at the beginning of each calendar year, we were unable to adequately review the handling of ATV permits. However, initial permit numbers are being reused and, as a result, the numerical sequence of ATV permits cannot be accounted for properly. Also, we reviewed the ATV permit log for May through August 2014 activity and noted it was not complete and accurate. For example, ATV permit number 10127 was assigned to 2 different individuals and the permit log only accounted for 1 of the individuals. The County Clerk indicated he is considering a new process for handling ATV permits and liquor licenses that will help him reconcile permits and licenses issued to fees recorded and transmitted.

Thomas A. Schweich

Missouri State Auditor

Clinton County

November 2014

Report No. 2014-119

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Clinton County

Financial Condition	As noted in our prior audit, the financial condition of the General Revenue Fund remains poor. The ending cash balance is expected to decline from approximately $6,000 at December 31, 2013, to $385 at December 31, 2014. In order to make payroll obligations, the county transferred $10,000 from the Tax Maintenance Fund to the General Revenue Fund in October 2013, and made an early turnover of tax collections of $35,000 to the General Revenue Fund in November 2013.
Prosecuting Attorney's Controls and Procedures	Payments made by mail are not receipted or recorded immediately, receipts are not deposited timely, and checks are not restrictively endorsed immediately upon receipt.
Sheriff's Commissary Profits	The Sheriff maintains profits from commissary sales outside the county treasury and uses these monies to purchase items for the benefit of prisoners and the Sheriff's office. As of December 31, 2013, there was approximately $3,500 of profits remaining in the commissary account that should be distributed to the Inmate Prisoner Detainee Security Fund.
Computer Controls	The County Assessor, Prosecuting Attorney, Ex Officio Recorder of Deeds, and County Treasurer have not established adequate password controls to reduce the risk of unauthorized access to computers and data.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

1. Financial Condition 4
2. Prosecuting Attorney's Controls and Procedures 5
3. Sheriff's Commissary Profits 5
4. Computer Controls 6

Organization and Statistical Information 8

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Clinton County

We have audited certain operations of Clinton County in fulfillment of our duties under Section 29.230, RSMo. In addition, Nichols, Stopp, and VanHoy, LLC, Certified Public Accountants, was engaged to audit the financial statements of Clinton County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Clinton County.

An additional audit of the Clinton County Collector and Property Tax System, fulfilling our obligations under Section 52.150, RSMo, is still in process, and any additional findings and recommendations will be included in the subsequent report.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Lori Melton, M.Acct., CPA
In-Charge Auditor:	Kenneth Erfurth
Audit Staff:	Amanda Messick
	Ruben Lara
	Keisha Williams
	Steven J. Barton

1. Financial Condition

As noted in our prior audit report, the financial condition of the General Revenue Fund remains poor. The ending cash balance for the General Revenue Fund has decreased since the prior audit, and is not sufficient to handle any emergencies or unexpected decreases in receipts or increases in disbursements. According to the approved county budgets, the ending cash balance of the General Revenue Fund was approximately $6,000 at December 31, 2012, and December 31, 2013, and is projected to be $385 at December 31, 2014.

In order to meet payroll obligations of the General Revenue Fund, county officials transferred $10,000 from the Tax Maintenance Fund to the General Revenue Fund in October 2013, and in November 2013 the County Collector made an early turnover of tax collections of $35,000 to the General Revenue Fund. County Commissioners indicated General Revenue funding has been an ongoing concern and an early turnover from the County Collector has been required every November for several years to meet payroll obligations.

County Commissioners indicated they are aware of the financial condition concern and they are continually trying to reduce disbursements. They indicated the areas monitored closest are maintaining the jail facilities and housing inmates in other county facilities. Of the $2.4 million in General Revenue Fund disbursements in 2013, $503,026 or 21 percent of total disbursements were for prisoner housing.

It is essential the County Commission address the county's financial condition both in the immediate and long-term future. Reducing spending where possible, evaluating controls and management practices to ensure efficient use of county resources, and maximizing all sources of revenue are necessary to improve the county's financial condition.

Recommendation

The County Commission closely monitor the county's financial condition and take the necessary steps to improve the financial condition of the General Revenue Fund.

Auditee's Response

The County Commission provided the following response:

We understand the finding as presented. We will take the recommendation under consideration and will continue to monitor budgets to the best of our abilities. We feel the 43rd Judicial Circuit policies not allowing independent bonding on state charges and not holding a drug court increases the number of prisoners held. As a result, these issues have a negative impact on our ability to monitor and control the budget.

2. Prosecuting Attorney's Controls and Procedures

Weaknesses exist in accounting controls and procedures in the Prosecuting Attorney's office. The Prosecuting Attorney's office processed monies for bad check and restitution receipts totaling approximately $47,000 for the year ended December 31, 2013.

Receipting, recording, and depositing procedures are not adequate. Payments made by mail are not receipted or recorded immediately. During our cash count performed on April 15, 2014, we noted nine checks, totaling $1,444, had not been receipted. These receipts, the oldest of which was dated March 25, 2014, were not recorded on receipt records until April 29, 2014, and deposited on April 30, 2014. In addition, checks are not restrictively endorsed immediately upon receipt.

To reduce the risk of loss, theft, or misuse of monies received, procedures should be established to ensure all monies received are properly receipted, promptly recorded, deposited timely, and restrictively endorsed immediately upon receipt.

Recommendation

The Prosecuting Attorney ensure all monies are receipted and promptly recorded when received, receipts are deposited timely, and checks are restrictively endorsed immediately upon receipt.

Auditee's Response

The Prosecuting Attorney provided the following written response:

The Prosecuting Attorney's office agrees that a change in receipting, depositing, and endorsing procedures is appropriate, and office policy changes have already been made. Deposits are now made semi-monthly, and checks are to be receipted and recorded promptly upon receipt. The Prosecuting Attorney's office has been significantly defunded in recent years, resulting in a too-heavy workload for current staff. While adjustments have currently been made to adopt the audit findings as best as practicable, further improvements are difficult until office funding for staff is restored. Although the audit discovered weaknesses in existing practices, all monies received by the Prosecuting Attorney's office have been accounted for.

3. Sheriff's Commissary Profits

The Sheriff maintains profits from commissary sales outside the county treasury and uses these monies to purchase items for the benefit of prisoners and the Sheriff's office. During the year ended December 31, 2013, the commissary earned a profit of $1,810 and the Sheriff purchased prisoner supplies such as soap, sheets, towels, and other items for the prison using $1,451 of this money. The County Commission did not approve these purchases and they did not go through the normal county procurement and budget process. As of December 31, 2013, there was approximately $3,500 of profits remaining in the commissary account that should be distributed to the Inmate Prisoner Detainee Security Fund.

Section 221.102, RSMo (effective August 28, 2013), requires each county jail to keep revenues from its canteen or commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (profits) into the county Inmate Prisoner Detainee Security Fund.

Recommendation

The Sheriff ensure existing and future commissary profits not necessary to meet cash flow needs or current operating expenses are turned over to the County Treasurer for deposit to the Inmate Prisoner Detainee Security Fund.

Auditee's Response

The Sheriff provided the following response:

I have partially implemented the recommendation and continue to take steps to completely comply. We will turn over the fund to the County Treasurer in November 2014.

4. Computer Controls

Controls over county computers are not sufficient to prevent unauthorized access by requiring periodic password changes. As a result, county records are not adequately protected and are susceptible to unauthorized access.

The County Assessor, Prosecuting Attorney, Ex Officio Recorder of Deeds, and County Treasurer have not established adequate password controls to reduce the risk of unauthorized access to computers and data. Employees are not required to change passwords on a periodic basis and share passwords.

Passwords are required to authenticate access to computers. The security of a computer password is dependent upon keeping passwords confidential. However, since passwords do not have to be periodically changed and are shared, there is less assurance passwords are effectively limiting access to computers and data files to only those individuals who need access to perform their job responsibilities. Passwords should be unique and confidential and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

Recommendation

The County Assessor, Prosecuting Attorney, Ex Officio Recorder of Deeds, and County Treasurer require unique passwords for each employee that are kept confidential and periodically changed, to prevent unauthorized access to the county's computers and data.

Auditee's Response

The County Assessor provided the following response:

I agree with the finding and will implement the auditor's recommendation by January 1, 2015.

The Prosecuting Attorney provided the following response:

I agree with the recommendation and this is something that we do need to implement and will implement the recommendation by November 15, 2014.

The Ex Officio Recorder of Deeds provided the following response:

I agree with the finding and will implement the auditor's recommendation by November 15, 2014.

The County Treasurer provided the following response:

I agree with the finding and will implement the auditor's recommendation by November 15, 2014.

Clinton County
Organization and Statistical Information

Clinton County is a county-organized, third-class county. The county seat is Plattsburg.

Clinton County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 60 full-time employees and 21 part-time employees on December 31, 2013.

In addition, county operations include the Senate Bill 40 Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Wade Wilken Jr., Presiding Commissioner	$	30,566
Charles Dawson, Associate Commissioner		28,486
Larry King, Associate Commissioner		28,486
Molly Livingston, Circuit Clerk and Ex Officio Recorder of Deeds (1)		55,131
Mary Blanton, County Clerk (2)		50,163
Bill Burris, Prosecuting Attorney (3)		26,520
Eric Tate, Prosecuting Attorney (3)		4,420
Joe Gagnon, Prosecuting Attorney (3)		22,100
K. Porter Hensen, Sheriff		47,840
Leann Gump, County Treasurer		43,160
Kathleen M. Little, County Coroner		15,438
Nancy D. Wingate, Public Administrator		52,011
Sharon Cockrum, County Collector (4), year ended February 28,	71,930	
Jerry Howard, County Assessor, year ended August 31,		45,410

(1) Compensation is paid by the state.
(2) Includes $7,003 of commissions earned for preparing city property tax books.
(3) Bill Burris resigned in June 2013. Eric Tate served as Interim Prosecuting Attorney during July 2013. Joe Gagnon was appointed by the Governor in August 2013.
(4) Includes $28,770 of commissions earned for collecting city property taxes.

Financing Arrangements

The county has entered into 4 lease-purchase agreements for vehicles and road and bridge equipment. Principal and interest payments are made from the Special Road and Bridge Fund. The final payment for the lease-purchases is scheduled to occur in 2016. The remaining principal balance at December 31, 2013, was $313,288. Interest remaining to be paid over the life of the agreements totals $15,249.

Thomas A. Schweich

Missouri State Auditor

Iron County

December 2014

Report No. 2014-120

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Iron County

Sheriff Controls and Procedures	The Sheriff has not adequately segregated accounting duties and an adequate supervisory review of the accounting records is not performed. The Sheriff's office does not prepare bank reconciliations and does not identify or reconcile liabilities with cash balances for any of the 3 office bank accounts. We reviewed the accounts and found $1,423 in unidentified monies in the civil bank account, $112 in unidentified monies in the bond account, and $660 in unidentified monies in the commissary bank account. The Administrative Assistant did not issue a receipt slip for approximately $1.2 million received from a Sheriff's sale in December 2013, and did not issue receipt slips for another $4,430 received in 2013. The Administrative Assistant and Jail Administrator do not properly account for receipt slips, and Sheriff's office personnel do not consistently note the method of payment on receipt slips and do not restrictively endorse checks until deposits are prepared. Commissary receipt slips do not accurately record receipts for the commissary account, and the Jail Administrator does not deposit commissary receipts timely or intact. The Sheriff does not track profit and loss from the sales of commissary items, including telephone cards, does not maintain adequate inventory records, and does not maintain documentation to support deductions from inmate account balances. The Sheriff maintains profits from calendar sales and vending machine commissions in a bank account outside the county treasury, and the Sheriff and the County Treasurer do not have proper controls and procedures in place to track, and ensure timely collection of amounts billed to cities for boarding of prisoners.
Prosecuting Attorney Controls and Procedures	The Prosecuting Attorney has not adequately segregated accounting duties and an adequate supervisory review of the accounting records is not performed. The Prosecuting Attorney's office does not maintain a complete record of receipts and does not reconcile receipts to fees transmitted. We could not trace 10 receipt slips, totaling $310, to a fee report, and there were $1,988 in payments on the fee reports to the County Treasurer that were not on the computer system reports. The Prosecuting Attorney's office does not have adequate procedures to account for and monitor the disposition of all bad checks submitted to the office for collection.
Property Tax System Controls and Procedures	The County Collector has access rights in the property tax system that allows changes to be made to individual tax records throughout the tax year and the County Clerk does not reconcile addition and abatement court orders for personal property to the actual changes made in the property tax system. The County Clerk does not prepare or verify the accuracy of the delinquent tax books prepared by the County Collector and the County Clerk did not prepare the land and personal, railroad and utility, and back tax aggregate abstracts timely for the 2013 tax year.

Public Administrator Controls and Procedures	As noted in our prior audit report, the Public Administrator does not always timely file annual settlements or status reports and did not assess or collect fees from the accounts of some wards and estates. We determined 19 of the 29 cases (66 percent) with annual settlements or status reports due during 2013 did not have a settlement or report filed. In addition, the Associate Circuit Court, Probate Division does not timely notify the Public Administrator prior to filing deadlines or follow up on settlements and reports not filed.
Senate Bill 40 Board	The Board had accumulated $678,000 as of December 31, 2013, and does not have specific plans for its use. The Board has not segregated accounting duties and does not provide adequate oversight of the accounting records. The Board Treasurer is responsible for all accounting duties, and the Board President routinely signs checks in advance (2 signatures required).
Tax Maintenance Fund	The County Collector paid $200 in bonuses to her employees from the Tax Maintenance Fund, which appears to violate the Missouri Constitution. She also paid the Deputy County Collector $95 per month to reimburse her for insurance premium costs and $100 for cleaning the office but these payments were not reported on the employee's W-2 forms. The County Collector issued herself 4 checks for travel advances totaling $950 and also reimbursed herself for meals at local restaurants during the year ended February 28, 2014, but did not properly account for supporting documentation and funds remaining from travel advances. The County Collector did not mark invoices paid or allow them to be matched to actual payments from the Tax Maintenance Fund and some disbursements made were not necessary expenses to carry out the duties of the office.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 21

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Iron County

We have audited certain operations of Iron County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones & Associates, Certified Public Accountants, was engaged to audit the financial statements of Iron County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal control, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Iron County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Deborah Whitis, MBA, CPA, CIA, CFE
In-Charge Auditor:	Lori Bryant
Audit Staff:	Meghan Dowell
	Shannon Spicer

1. Sheriff Controls and Procedures

Significant weaknesses exist in controls and procedures in the Sheriff's office. The Sheriff's office collected monies for civil fees, concealed carry permits, bonds, jail phone commissions, and other miscellaneous receipts totaling approximately $93,000 for the year ended December 31, 2013, plus a Sheriff's sale for $1.2 million. The Sheriff's office opened a commissary bank account in October 2013 and started operating the commissary and handling inmate monies in the account in January 2014.

1.1 Segregation of duties

The Sheriff has not adequately segregated accounting duties and an adequate supervisory review of the accounting records is not performed. The Administrative Assistant is responsible for receiving, recording, depositing, and disbursing monies, and reviewing the civil and bond bank account statements. The Jail Administrator is responsible for those same duties for the commissary monies. The Sheriff indicated he spot checks the monthly report for the civil account but this review is not documented. Neither the Sheriff nor other office personnel perform a documented review of accounting records.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of accounting and bank records are essential.

A similar condition was noted in our prior audit report.

1.2 Bank reconciliations and liabilities

The Sheriff's office does not prepare bank reconciliations and does not identify or reconcile liabilities with cash balances for any of the 3 office bank accounts. At December 31, 2013, the bank balances were $1,203,796, $595, and $36 in the civil, bond, and commissary bank accounts, respectively.

Bank reconciliations

The Administrative Assistant did not prepare formal bank reconciliations during the year ended December 31, 2013. The Administrative Assistant indicated she reviews the bank statements of the civil and bond accounts to ensure financial activity agrees with accounting records, but this review is not documented. In addition, the Jail Administrator has not prepared monthly bank reconciliations for the new commissary account opened in October 2013.

Liabilities

The Administrative Assistant does not prepare monthly lists of liabilities for either the civil or bond bank accounts; therefore, liabilities are not reconciled to the account balances. We reviewed the civil bank account and other records as of December 31, 2013, and identified $1,202,373 in liabilities while the cash balance was $1,203,796, leaving $1,423 in unidentified monies. The bond account cash balance of $112 as of December 31, 2013, was all unidentified. In addition, the Jail Administrator

does not prepare a monthly list of liabilities for reconciliation to the commissary account cash balance. The reconciled cash balance should agree to the total of the individual inmate balances plus commissary profits. We reviewed the commissary bank account and other records as of January 31, 2014, and identified $668 in liabilities while the cash balance was $1,328, leaving $660 in unidentified monies.

Monthly bank reconciliations are necessary to ensure accounting records are in balance and to identify errors timely. In addition, liabilities should be identified monthly and reconciled to cash balances to ensure sufficient cash is available for the payment of all amounts due and all monies in the bank account can be identified. Prompt follow up on discrepancies is necessary to resolve errors and ensure monies are properly disbursed. Various statutory provisions provide for the disposition of unidentified monies.

1.3 Receipting and depositing

Receipting and depositing procedures need improvement.

- The Administrative Assistant did not issue a receipt slip for approximately $1.2 million received from a Sheriff's sale in December 2013. The money was deposited on December 16, 2013, and disbursed in January 2014. In addition, the Administrative Assistant maintains a separate manual receipt slip book for miscellaneous monies received and transmitted to the County Treasurer for deposit into the Sheriff's Special Fund. However, transmittal records indicate receipt slips were not issued for a donation, vending machine commissions, profits from calendar sales, and inmate phone commissions totaling $4,430 in 2013.

- The Administrative Assistant and Jail Administrator do not properly account for receipts slips. Jailers issue receipt slips from separate receipt slip books for monies received at the front desk for bonds, civil fees, inmate monies and for sales of telephone cards. Jailers place the monies in an envelope and record amounts and details on the outside of the envelope. The envelopes are turned over to the Administrative Assistant. Receipt slips are not always issued in sequence, issued from the appropriate receipt slip book, or voided properly. In addition, more than one receipt slip book was in use at the same time for each type of receipt. Neither the Administrative Assistant nor the Jail Administrator compare the manual receipt slips issued by the jailers to the amounts received in the envelopes or account for the numerical sequence of receipt slips issued.

- Sheriff's office personnel do not consistently note the method of payment on receipt slips and checks are not restrictively endorsed until deposits are prepared.

- Commissary receipt slips do not accurately record receipts for the commissary account. Prior to January 2014, inmates were allowed to retain money when jailed and receipt slips were only issued for sales of telephone cards. Beginning in January 2014, inmate monies are deposited into the new commissary bank account and receipt slips are issued for sales of commissary items except purchases by deputies. In addition, the Jail Administrator issues some receipt slips to record transfers of monies between inmate accounts but does not specifically identify these transactions as transfers on the receipt slips, making it difficult to distinguish the transfers from actual monies received.

- The Jail Administrator is not depositing commissary receipts timely or intact. Only 1 deposit was made each month during February and March 2014. Some commissary items were purchased with cash withheld from deposits. The Jail Administrator said he used this method for some purchases because stores would not accept checks from the new account with low check numbers. We reviewed February 2014 commissary receipt slips and identified a receipt slip for $478 issued to an inmate but not listed as part of the individual inmate balances in the commissary account or deposited. The Jail Administrator indicated a jailer made a cash refund to the inmate upon his release on the day the office received the monies and did not document the return.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected. Proper receipting and depositing procedures are necessary to ensure all receipts are handled and accounted for properly.

1.4 Commissary and telephone cards

Improvement is needed in the Sheriff's handling of the commissary and telephone cards.

Tracking of commissary activity

The Sheriff has not established a system for tracking the profit and loss from the sales of commissary items including telephone cards. The Sheriff does not maintain adequate records of items purchased for the commissary or the monies received from the sale of the items. Also, batches of prepaid telephone cards are periodically purchased from a telephone card vendor for $7 per card and held by the Sheriff's office until sold to inmates for $10 per card. The Jail Administrator indicated the vendor provided the Sheriff's office with a number of telephone cards at no cost with the county's first order; however, she could not recall how many. The profits earned on sales are retained in the commissary bank account.

To adequately account for commissary activity, complete and accurate records should be maintained in a manner to allow for the tracking of profit and loss on all commissary sales. Section 221.102, RSMo (effective August 28, 2013), requires each county jail to keep revenues from its

canteen or commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (profits) into the county Inmate Prisoner Detainee Security Fund.

Inventory of commissary items

The Sheriff's office does not have adequate records or procedures over commissary inventory including telephone cards. Perpetual inventory records of commissary items are not maintained and periodic physical inventory counts are not performed.

A detailed inventory ledger is necessary to adequately account for commissary inventory. To ensure commissary items are properly recorded and handled, purchases and sales should be compared to actual inventory on hand. Loss, theft, or misuse of commissary inventory may go undetected without adequate inventory records.

Inmate disbursements

The Sheriff's office does not maintain documentation to support deductions from inmate account balances. Inmates complete a commissary purchase order form, but these forms are thrown away after the inmate receives the ordered items.

Retention of records is necessary to ensure the validity of transactions, provide an audit trail, and account for all monies.

1.5 Account held outside treasury

The Sheriff maintains profits from calendar sales and vending machine commissions in a bank account outside the county treasury. The Sheriff opened a new bank account in October 2013 after the Sheriff's Special Fund held by the County Treasurer was closed. The account was opened with $500 in profits from calendar sales and $50 in vending machine commissions (previously deposited in the Sheriff's Special Fund held by the County Treasurer) along with $500 of the Sheriff's personal funds. The Sheriff indicated this was a personal account and he uses it to pay for items that county funds cannot be used to pay for, such as donations, flowers, and cards. The Sheriff also indicated the profits from calendar sales were to be used for the maintaining and enhancing the office's drug programs for the children in the community. The Sheriff made disbursements totaling $232 for greeting cards, flowers, candy, donations, and Christmas decorations from the account during 2013.

There is no statutory authority allowing the Sheriff to maintain accounts outside the county treasury. Section 50.370, RSMo, requires county officials in third and fourth class counties who receive any fees or other remuneration for official services to pay such monies to the County Treasurer. In addition, Attorney General's Opinion No. 45, 1992 to Henderson, states sheriffs of a third class county are not authorized to

maintain a bank account for law enforcement purposes separate from the county treasury.

1.6 Board of prisoners

The Sheriff and the County Treasurer do not have proper controls and procedures in place to track, and ensure timely collection of amounts billed to cities for boarding of prisoners. The Administrative Assistant indicated she began sending out board bills to cities in April 2013 and gives a copy of the bills to the County Treasurer. These bills instruct cities to forward payment to the County Treasurer. However, the County Treasurer does not report amounts received from cities to the Sheriff and has instructed the cities to send separate payment letters to the Sheriff's office. The Administrative Assistant indicated she does not record the information from the payment letters in her files because she has no proof the County Treasurer received the payments. Records indicate the amount due from cities at December 31, 2013, was $7,978; however, the accuracy of this amount is uncertain due to the current collection process.

Procedures such as independent reconciliations of board bill records to jail records and payments received should be established to ensure prisoner housing is properly and timely billed, and payments received are proper. Unpaid board bills should be monitored and appropriate follow-up action should be taken to ensure payment is properly received. Failure to monitor unpaid amounts due may result in a loss of revenue to the county.

Recommendations

The Sheriff:

1.1 Adequately segregate accounting duties to the extent possible or ensure supervisory reviews of accounting records are performed and documented.

1.2 Perform monthly bank reconciliations and prepare a monthly list of liabilities for all accounts and compare the list of liabilities to the reconciled bank balances. Any differences should be promptly investigated and resolved. Any unidentified monies should be disposed of in accordance with state law.

1.3 Issue receipt slips for all monies received. The Administrative Assistant and the Jail Administrator should compare receipt slips issued by jailers to amounts turned over and account for the numerical sequence of receipt slips. The Sheriff should ensure the method of payment is recorded on receipt slips, the composition of receipts is reconciled to the composition of deposits, and checks are restrictively endorsed immediately upon receipt. Additionally, the Sheriff should ensure all monies returned or transferred to inmates is adequately documented to ensure receipts are deposited intact and timely.

1.4 Develop records and procedures to adequately track commissary activity. Ensure existing and future commissary profits (including telephone card profits) not necessary to meet cash flow needs or current operating expenses are turned over to the County Treasurer for deposit into the Inmate Prisoner Detainee Security Fund. Inventory records of commissary items and telephone cards should be maintained and reconciled to purchases, sales, and a physical inventory count. Documentation to support deductions from inmate balances should be retained.

1.5 Transfer $550 to the County Treasurer. All future receipts for calendar sale profits and vending machine commission should be turned over to the County Treasurer.

1.6 Work with the County Treasurer to develop procedures to track, monitor, and pursue collection of costs for boarding prisoners.

Auditee's Response

The Sheriff provided the following responses:

1.1 Since segregating duties is not feasible, the Sheriff has made arrangements with the County Treasurer for the County Treasurer to perform documented reviews of accounting records on a periodic basis.

1.2 The Sheriff has initiated procedures to prepare monthly bank reconciliations and listings of liabilities and is planning to establish more detailed records.

1.3 Receipt slips are now being issued for all monies. The Jail Administrator is now the only one issuing receipt slips for inmate monies. The Sheriff will ensure the Administrative Assistant is comparing receipt slips issued by jailers to amounts turned over and accounting for the numerical sequence of receipt slips. The Sheriff will ensure the method of payment is recorded on receipt slips, the composition of receipts is reconciled to the composition of deposits, and checks are restrictively endorsed immediately upon receipt. Deposits are now being made intact and timely and checks are being issued to return or transfer monies to inmates.

1.4 Records have been established to track commissary activity including receipts, disbursements, inventory, and profits. Profits are now being turned over to County Treasurer to be deposited into the Inmate Prisoner Detainee Security Fund. Commissary order cards are being filled out by inmates and retained.

1.5 The Sheriff plans to transfer the $550 to the County Treasurer as soon as the Sheriff's Special Fund is re-activated along with any future receipts for calendar sale profits and vending machine commissions.

1.6 The Sheriff agrees to do this.

2. Prosecuting Attorney Controls and Procedures

Controls and procedures need improvement. The Prosecuting Attorney's office processed bad check restitution and fees, and court-ordered restitution totaling $32,000 for the year ended December 31, 2013.

2.1 Segregation of duties

The Prosecuting Attorney has not adequately segregated accounting duties and an adequate supervisory review of the accounting records is not performed. One legal assistant is responsible for receiving, recording, and transmitting bad check and court-ordered restitution. The Prosecuting Attorney indicated he reviews the monthly report of bad check fees turned over to the County Treasurer, but he does not compare them to any accounting record and does not document his review. Neither the Prosecuting Attorney nor other office personnel perform a documented review of accounting records.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of accounting records are essential.

2.2 Receipting and transmitting

The Prosecuting Attorney's office does not maintain a complete record of receipts and does not reconcile receipts to fees transmitted. The Bad Check Clerk (clerk) does not post payments for cases initiated prior to the office's installation of the current computer system and does not maintain a log or list of such receipts. Instead, the clerk gives the payor a copy of the money order to serve as a receipt slip. The clerk does not generate any receipt reports from the computer system for more recent cases and does not account for the numerical sequence of receipt slips issued by the computer system. The clerk prepares the monthly report of fees transmitted to the County Treasurer using the money orders received for fee payments. In addition, the clerk stores the receipts until transmittal in an unlocked desk drawer accessible to the public.

After the clerk contacted the technical support staff for the office's computer system, she was able to generate receipt reports for receipt slips issued by the system during 2013. We were unable to trace 19 receipt slips totaling $580 received per the computer system reports to the monthly fee reports given to the County Treasurer. However, the fee report for October 2013

had been adjusted by the County Treasurer for 9 money orders totaling $270 that the County Treasurer received but were not included on the fee report prepared by the clerk. Nine of the 19 receipt slips generated by the system that we could not trace were dated in October and totaled $270, so it seems likely these items are related to the adjustment made by the County Treasurer and the clerk likely failed to list all money orders on the fee report. The remaining 10 receipt slips for $310 from the system report could not be traced to receipt by the County Treasurer.

In addition, there were $1,988 in payments on the fee reports to the County Treasurer that were not on the computer system reports because they were likely receipts related to older cases not processed in the computer system. As noted above, the clerk does not maintain a log of receipts related to older cases.

Failure to implement adequate receipting and transmitting procedures increases the risk that loss, theft, or misuse of monies received will go undetected. Proper receipting and transmitting procedures are necessary to ensure all receipts are handled and accounted for properly.

2.3 Tracking procedures

The Prosecuting Attorney's office does not have adequate procedures to account for and monitor the disposition of all bad checks submitted to the office for collection. Bad check complaint forms submitted by merchants when bad checks are turned over to the Prosecuting Attorney for collection are not assigned a sequential tracking number. Information from the complaint form is entered into the computer system and the complaint form is filed with other complaint forms processed. Without a tracking procedure, there is no assurance all bad check complaint forms are entered into the computer system. To ensure bad check complaints are handled and accounted for properly, office staff should assign a sequential number to each bad check complaint form or bad check received and track the collection and disposition of each bad check.

Recommendations

The Prosecuting Attorney:

2.1 Adequately segregate accounting duties to the extent possible or ensure supervisory reviews of accounting records are performed and documented.

2.2 Require issuance of receipt slips for all monies received, account for the numerical sequence of receipt slips, and reconciliation of receipt slips to computer system receipt reports to ensure all monies received are accounted for properly. In addition, the Prosecuting Attorney should store monies in a secure location and require the reconciliation of fees transmitted to the County Treasurer to

computer system receipt reports to ensure all fees are properly transmitted.

2.3 Develop procedures and records to adequately track the receipt and disposition of all bad check complaints.

Auditee's Response

The Prosecuting Attorney provided the following written responses:

2.1 A numeric log has now been established for intake of all bad check complaints. Such log requires the signature of the complaining party if the complaint is delivered in person, and the signature of this office's legal assistant who does not process bad check cases if the complaint is received by mail. The legal assistant who does not process bad check cases will be tasked with opening all mail from businesses to ensure that there is adequate segregation between intake and process of bad check complaints.

The Prosecuting Attorney is now comparing his review of bad check fees delivered to the County Treasurer against a report printed from the Karpel software system utilized by the office and initialing each check fee submitted on the report to document his review.

2.2 A numeric log for receipt of bad check fee payments has now been established, so that not only are there the photocopies of money orders maintained in the records (as was previously done), there is also a sequential number associated with each payment made. In addition, the Prosecutor's office has purchased some new desks that incorporate locked cabinets, to provide added protection of the money orders until they are transferred to the County Treasurer.

The payments that were not documented in the Karpel software system reflected ongoing payments from older cases that were established for restitution purposes before we began using this software (and often before the current Prosecutor took office). We have still kept paper records of money orders received of payments on these cases, there was simply not, until now, a way to adequately cross-reference monthly receipts against which older cases had received payments. This should now be accomplished through the numeric log for bad check fee payments, and would soon have become a moot issue anyway as older cases were closed and all new cases are entered into the software system.

2.3 The numeric sequence logs described above, both for bad check complaints and for bad check fee payments made, should address this issue. The Prosecuting Attorney will regularly compare the bad check complaint log against the Karpel software report to

determine if there are any outstanding cases that require actions not yet taken.

3. Property Tax System Controls and Procedures

Controls and procedures over the property tax system need improvement. As a result of the significant control weaknesses identified, there is less assurance property tax monies have been accounted for properly. For the year ended February 28, 2014, property taxes and other monies collected by the County Collector totaled approximately $9.6 million.

3.1 Computer access

The county has not adequately restricted property tax system access. The County Collector has access rights in the property tax system that allows changes to be made to individual tax records throughout the tax year. Because the County Collector is responsible for collecting tax monies, good internal controls require the County Collector not have access rights allowing alteration or deletion of tax rate, assessed valuation, and property tax billing information.

To prevent unauthorized changes to the property tax records, access should be limited based on user needs. Unrestricted access can result in the deletion or alteration of data files and programs.

3.2 Personal property additions and abatements

The County Clerk does not reconcile addition and abatement court orders for personal property to the actual changes made in the property tax system. The personal property clerk in the County Assessor's office makes changes in the property tax system and prepares a monthly court order for all personal property additions and abatements which is given to the County Clerk. However, the court order does not include any amounts and the accompanying printout of the individual amounts is generated by the County Collector. Because these additions and abatements represent changes to amounts the County Collector was charged with collecting and the County Collector has access rights in the property tax system, it is important that the County Clerk compare changes approved by the County Commission for personal property to changes made in the property tax system.

Sections 137.260 and 137.270, RSMo, assign responsibility to the County Clerk for making changes to the tax books with the approval of the County Commission. An independent review of approved additions and abatements to changes made to the property tax system would help ensure changes to the property tax system records are proper.

A similar condition was noted in our prior audit report.

3.3 Tax books

The County Clerk does not prepare or verify the accuracy of the delinquent tax books prepared by the County Collector. A review of the tax books should include recalculating tax book totals and charges. Failure to prepare

and review the tax books may result in errors, irregularities, or misuse going undetected.

Section 140.030, RSMo, requires the County Collector to prepare delinquent tax listings. Section 140.040, RSMo, requires the County Commission to examine and correct the listings, and Section 140.050, RSMo, requires the County Clerk to make the listings into delinquent tax books and charge the County Collector with the amount of delinquent taxes to be collected. If it is not feasible for the County Clerk to prepare delinquent tax books, at a minimum, the County Clerk should verify the accuracy of the delinquent tax book and document approval of the tax book amounts to be charged to the County Collector.

3.4 Aggregate abstracts

The County Clerk did not prepare the land and personal, railroad and utility, and back tax aggregate abstracts timely for the 2013 tax year. The land and personal and railroad and utility aggregate abstracts were not prepared until May 7, 2014, although the information needed to prepare these aggregate abstracts was available at the beginning of November 2013. The back tax aggregate abstracts were not prepared until May 7, 2014, although the information needed to prepare the back tax aggregate abstract was available at the beginning of March. Section 137.295, RSMo, provides for the County Clerk to prepare these reports and forward them to the Department of Revenue (DOR) and State Tax Commission (STC) upon completion of current and delinquent tax books.

Recommendations

3.1 The County Commission ensure property tax system access is limited to only what is needed for the users to perform their job duties and responsibilities.

3.2 The County Clerk and the County Commission ensure a comparison of approved additions and abatements to changes made in the computer system is performed.

3.3 The County Clerk prepare the delinquent tax books, or at a minimum, verify the accuracy of the delinquent tax books prior to charging the County Collector with the property tax amounts to be collected. Procedures performed should be adequately documented.

3.4 The County Clerk prepare and file accurate tax aggregate abstracts timely with the DOR and STC.

Auditee's Response

The County Clerk and County Commission provided the following written response:

3.1 The County Commission and the County Clerk will discuss restricting access with the County Collector.

3.2 As noted, a similar condition was listed in our prior audit. During that exit meeting, it was recommended and agreed upon that we could compare random court orders with actual changes made to the system. I thought I had been following the recommendation. It was determined that I was actually comparing reports generated from the County Collector instead of the County Assessor. I am now getting a report from the County Assessor that hopefully can be compared with the County Collector. To the best of my ability and as time allows, I will try to work out a new way to compare totals at the end of each month.

3.3 It is not feasible for the County Clerk to prepare the delinquent tax books. With the County Collector's help, I will try to come up with a way to keep a running total for the delinquent tax book on a monthly basis.

3.4 There is no due date stated on these reports and I had followed the timeline of previous County Clerks. I agree that it makes more sense and a much easier task to complete the reports on the timeline as noted in the audit. I will prepare and file reports in a timely manner.

4. Public Administrator Controls and Procedures

The Public Administrator does not file annual settlements or status reports timely and does not always assess and collect fees. During the year ended December 31, 2013, the Public Administrator served as the court appointed personal representative for 42 individuals (wards) and decedent estates of the Associate Circuit Court, Probate Division.

4.1 Annual settlements and annual status reports

The Public Administrator does not always timely file annual settlements or status reports in compliance with state law. In addition, the Associate Circuit Court, Probate Division does not timely notify the Public Administrator prior to the deadline for the annual settlement or status report or follow up on annual settlements or status reports not filed by the required date.

We reviewed the cases with an annual settlement or status report due during the year ended December 31, 2013, and determined 19 of the 29 cases (66 percent) did not have a settlement or report filed. The Public Administrator indicated she does not prepare annual settlements or status reports until she has been notified by the Associate Circuit Court, Probate Division. The Probate Clerk indicated she is behind in sending out notifications and she does not have time to follow up on late filings because of her other duties. A status report for one case had not been filed since 2007. The Probate Clerk said this case was not in her computer system so she had never sent out any notices to the Public Administrator.

Sections 473.540, 475.082, and 475.270, RSMo, require the Public Administrator to file an annual settlement and/or a status report with the court for each ward or estate. In addition, while Sections 473.557 and 475.280, RSMo, require the clerk of the court to notify the conservator or guardian (Public Administrator) of the deadline for the annual settlement, these sections do not excuse the Public Administrator from making the settlement at the time required by law. Timely settlements are necessary for the court to properly oversee the administration of cases and reduce the possibility that errors or misuse of funds will go undetected.

4.2 Fees

The Public Administrator did not assess and collect fees from the accounts of some wards and estates. Section 473.742, RSMo, provides all fees collected by a Public Administrator who elects to be salaried are to be deposited into the county treasury. In 2013, the Public Administrator turned over $3,030 in fees to the county.

The Public Administrator petitions the courts to approve fees when status reports are filed. For annual settlements, the Public Administrator indicated the attorney who prepares the settlement is responsible for preparing the petition for fees. In addition, we noted no fees had been petitioned for an annual settlement filed in 2013 covering the period from September 2011 to March 2013 or for the prior annual settlement filed for this case. Records indicate the ward's bank account had sufficient funds to assess fees.

To ensure fees are properly assessed against the accounts of the wards and estates and remitted to the county treasury, the Public Administrator should work with the Associate Circuit Judge to establish a policy for fees to be assessed.

Similar conditions previously reported

Similar conditions were noted in our prior audit report.

Recommendations

The Public Administrator:

4.1 Ensure annual settlements and status reports are filed timely. In addition, the Associate Circuit Court, Probate Division should timely notify the Public Administrator of annual settlement and status report deadlines and follow up on those settlements and reports not filed by the required date.

4.2 Work with the Associate Circuit Judge to ensure fees are appropriately assessed and paid to the county.

Auditee's Response

The Public Administrator provided the following responses:

4.1 The Public Administrator agrees the reports should be filed timely. Status reports cannot be filed until receipt of the notification form

from the court with a court date. She has met with the Associate Circuit Judge and Circuit Clerk to develop procedures to ensure notification forms are sent out timely so they can be completed and filed back with the court timely.

4.2 The Public Administrator also discussed with the Associate Circuit Judge procedures to ensure fees are assessed and collected. She has been in contact with the attorney who prepared the annual settlement to urge him to get the petition for fees filed.

5. Senate Bill 40 Board

The Senate Bill 40 Board (Board) has accumulated a significant cash reserve and does not have documentation of how these funds will be spent to benefit the developmentally disabled. Additionally, the Board has not segregated accounting duties and does not adequately review accounting records. The Board received property taxes totaling approximately $170,000 during the year ended December 31, 2013.

5.1 Cash reserves

The Board has accumulated a significant cash reserve and does not have specific plans for its use. The cash balance was $678,000 at December 31, 2013. Based on past years' spending patterns, this amount represents more than 5 years of the Board's funding needs.

Accumulating an excessive cash balance with no specific long-term plans for its use puts an unnecessary burden on taxpayers. The Board should determine its future needs, and consider reducing future tax levies if a specific use for the cash reserves is not determined.

5.2 Segregation of duties

The Board has not segregated accounting duties and does not provide adequate oversight of the accounting records. The Board Treasurer is responsible for all accounting duties including receipting, recording, and disbursing monies. While 2 signatures are required on checks, the Board President routinely signs blank checks. Signing checks in advance effectively eliminates the additional control provided by requiring 2 signatures. In addition, the Board Treasurer does not prepare monthly bank reconciliations, and other Board members do not review bank statements or invoices to ensure the accuracy of the Board Treasurer's financial reports (list of transactions and bank account balances).

Proper segregation of duties is necessary to ensure all transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, periodic independent or supervisory reviews of accounting records should be performed and documented by the Board. In addition, timely preparation of monthly bank reconciliations is necessary to ensure bank accounts are in agreement with accounting records and to detect and correct errors. Checks should not be signed in advance.

Recommendations

The Senate Bill 40 Board:

5.1 Evaluate funding needs and consider reducing the property tax levy. If plans have been made for expending the accumulated fund balance, such plans should be set forth publicly in the budget document.

5.2 Ensure independent or supervisory reviews of accounting records are performed and documented. In addition, Board members should discontinue the practice of signing checks in advance and adopt procedures to ensure monthly bank reconciliations are prepared and submitted to the Board for review and supporting documentation is also submitted and reviewed for all disbursements prior to the signing of checks.

Auditee's Response

The Senate Bill 40 Board provided the following responses:

5.1 The Board has spent some of the excess revenues in 2014 and plans for future projects will be included in the budget.

5.2 The Board has started performing reviews of accounting records, including supporting documentation for disbursements. Board members will discontinue signing checks in advance. The Board will ensure bank reconciliations are performed and provided to the Board for review.

6. Tax Maintenance Fund

Improvement is needed with the management and use of Tax Maintenance Fund monies.

The County Collector is required to collect a penalty of 7 percent of the total charged on delinquent taxes, and two-sevenths of this penalty is required to be paid into the county's Tax Maintenance Fund to be used for additional administration and operation costs related to the office of the County Collector. During the year ended February 28, 2014, the County Collector authorized disbursements totaling $11,245 from the Tax Maintenance Fund.

6.1 Bonuses

In December 2013, the County Collector paid $200 to employees of her office from the Tax Maintenance Fund. One employee received $100 and 2 other employees received $50. No documentation was retained to support any additional hours worked or duties performed by these employees.

These bonuses appear to represent additional compensation for services previously rendered and, as such are in violation of Article III, Section 39, the Missouri Constitution, and contrary to Attorney General's Opinion No. 72, 1955 to Pray, which states, " . . . a government agency deriving its power and authority from the constitution and laws of the state would be

prohibited from granting extra compensation in the form of bonuses to public officers after the service has been rendered."

6.2 Additional compensation

The County Collector made monthly payments of $95 totaling $1,140 during the year ended February 28, 2014, to the Deputy County Collector as reimbursement for employee insurance premiums withheld from her paychecks. The County Collector also paid the Deputy County Collector $100 for cleaning the County Collector's office. Because these payments and the bonuses (see section 6.1) were not processed through the county payroll system, they were not reported on the employee W-2 form, and payroll deductions were not withheld. The Internal Revenue Code indicates individuals treated as employees should have all compensation reported on W-2 forms.

6.3 Travel advances and meals

The County Collector did not properly account for supporting documentation and funds remaining from travel advances paid to her. The County Collector issued herself 4 checks for travel advances totaling $950 and also reimbursed herself for meals at local restaurants in the county during the year ended February 28, 2014.

Without supporting documentation to account for travel advances, there is less assurance travel expenses are appropriate and necessary. In addition, reimbursements for meals at local restaurants do not appear to be necessary expenses to carry out the duties of the County Collector's office.

6.4 Record keeping

The County Collector did not mark invoices paid or allow them to be matched to actual payments from the Tax Maintenance Fund. In addition, the County Collector indicated some of the invoices in her disbursements file may be personal and had not been paid with monies from the Tax Maintenance Fund. Some disbursements were not necessary expenses to carry out the duties of the County Collector's office such as donations to Relay for Life and Project Graduation totaling $150 and numerous candy purchases. All disbursements should be supported by a vendor invoice to ensure the obligation was actually incurred and the disbursement represents an appropriate use of public funds.

Conclusion

Section 52.315, RSMo, indicates the Tax Maintenance Fund is to be used for administration and operation costs of the office of the County Collector. It is unclear how some of the above items benefited the operation or administration of the office of the County Collector. Adequate documentation is needed to demonstrate the propriety of disbursements and compliance with state law.

Recommendations

The County Collector:

6.1 Discontinue paying bonuses.

6.2 Ensure all compensation is processed through the county's payroll system and is subject to payroll withholdings and reported on employee W-2 forms.

6.3 Maintain adequate documentation of travel expenses and refund any portion of travel advances not used for and documented as a travel expense. The County Collector should discontinue reimbursing herself for costs of meals at local restaurants.

6.4 Maintain adequate supporting documentation for all disbursements from the Tax Maintenance Fund and ensure disbursements are necessary to carry out office duties.

Auditee's Response

The County Collector provided the following responses:

6.1 The County Collector will discontinue paying bonuses.

6.2 The County Collector will work with County Commission to have compensation reported on employee W-2 forms.

6.3 The County Collector will maintain adequate documentation of travel expenses and will refund any excess monies. The cost of meals at local restaurants were for early departures for extended trips for training. In the future, this explanation will be documented on the receipts.

6.4 The County Collector will either improve her record keeping or will turn the fund over to the County Treasurer and will provide adequate documentation for all disbursements. In addition, explanations will be given to adequately support the necessity of all disbursements.

Iron County
Organization and Statistical Information

Iron County is a county-organized, third-class county. The county seat is Ironton.

Iron County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 41 full-time employees and 6 part-time employees on December 31, 2013.

In addition, county operations include the Senate Bill 40 Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Donald Barzowski, Presiding Commissioner	$	28,400
Mark Yates, Associate Commissioner		26,400
Dwayne Warncke, Associate Commissioner		26,400
Karen K. Reagan, Recorder of Deeds		40,000
Virginia Queen, County Clerk		40,000
Brian Parker, Prosecuting Attorney		47,000
Roger D. Medley, Sheriff		44,000
Denise Bates, County Treasurer		40,000
Anthony N. Cole, County Coroner		12,000
Sandra Trask, Public Administrator		40,000
Linda Kemp, County Collector, year ended February 28,	40,250	
David L. Huff, County Assessor, year ended August 31,		40,000

Financing Arrangements

The county entered into several lease-purchase agreements for road and bridge equipment. Principal and interest payments are made from the Special Road and Bridge Fund. The final payment on the lease-purchase agreements is scheduled for January 2019. The remaining principal amount at December 31, 2013, was $338,559. Interest remaining to be paid over the life of the agreements totals $20,121.

The county entered into a lease-purchase agreement for accounting software. Principal and interest payments are made from the General Revenue Fund. The lease-purchase agreement is scheduled to be paid off in February 2016. The remaining principal amount at December 31, 2013, was $29,722. Interest remaining to be paid over the life of the agreement totals $2,413.

Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Thirty-Seventh Judicial Circuit, City of West Plains Municipal Division

Municipal Division Records	Municipal division records are not maintained in an accurate, complete, and organized manner. We identified numerous discrepancies between manual records and electronic records, so we have no assurance the court properly handled transactions. Court administrators do not always accurately or timely post receipts to the case management system or reconcile case information to manual receipt slips and deposit records. Court Administrators do not always assess fines and court costs in accordance with the violation bureau schedule, Municipal Judge's orders, or plea agreements. In 4 cases related to 2 defendants, fines and court costs totaling $825 were waived with no evidence the Municipal Judge authorized the waivers. Court administrators do not ensure approved plea agreements are maintained in the case files, and the municipal division does not have adequate procedures to properly monitor the status of cases through final disposition. The court administrators could not locate 20 manual case files requested during the audit.
Accounting Controls and Procedures	Court administrators do not adequately monitor accrued costs and do not periodically reconcile the manual accrued costs report to balances recorded in the case management system. Some balances were overstated, while others were understated. The municipal division does not adequately segregate duties or perform adequate independent reviews of accounting records. The municipal division does not ensure noncash transactions are properly documented in the case management system. During the year ended March 31, 2014, court administrators made 314 noncash transactions totaling $19,699.
Municipal Division Procedures	Neither the police department nor the municipal division adequately accounts for the ultimate disposition of all traffic tickets, and the municipal division does not maintain adequate records to account for all parking ticket payments received. The municipal division has not provided a report of traffic violation tickets and associated fines and court costs revenues to the city for inclusion in the calculation and reporting required in the city's annual financial report filed with the State Auditor's office. The city's fiscal year end March 31, 2014, financial report did not provide an accounting of the percent of annual general operating revenue from fines and court costs related to traffic violations as required by Section 302.341.2, RSMo.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 17

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Thirty-Seventh Judicial Circuit
and
Municipal Judge
and
Honorable Mayor
and
Members of the City Council
West Plains, Missouri

We have audited certain operations of the City of West Plains Municipal Division of the Thirty-Seventh Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended March 31, 2014. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

3. Evaluate the municipal division's compliance with certain court rules.

4. Evaluate the city's compliance with Section 302.341.2, RSMo, which restricts the amount of fines and court costs that may be retained from traffic violations.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) deficiencies in internal control, (2) no significant noncompliance with legal provisions, (3) noncompliance with court rules, and (4) noncompliance with Section 302.341.2, RSMo. The accompanying Management Advisory Report presents our findings arising from our audit of the City of West Plains Municipal Division of the Thirty-Seventh Judicial Circuit.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Deborah Whitis, MBA, CPA, CIA, CFE
In-Charge Auditor:	John Lieser, CPA
	Connie James
Audit Staff:	David E. White

1. Municipal Division Records

Municipal division records are not maintained in an accurate, complete and organized manner. The 2 court administrators maintain manual and electronic records. The Municipal Judge indicated his manual notations on the docket sheets are the official record of the court proceedings and he prefers the electronic case management system to be the official accounting record of the court. The court administrators and the city are working towards issuing receipt slips electronically from the case management system, and once implemented, the court will be required to maintain accounting records electronically as required by Supreme Court Operating Rule 4.52. The court administrators began using the case management system in 1999 and the city recently purchased software to enable the system to generate receipts slips electronically. Currently the court administrators issue manual receipt slips and record case activity in both the manual case files and the case management system. Because the case management system is used to create the dockets for the court hearings and the court will need to maintain accounting records electronically when the receipting software is implemented, it is important that the information recorded is complete and accurate.

Our reviews identified numerous discrepancies between manual records and electronic records. As a result, we have no assurance transactions were properly handled.

1.1 Recording and reconciliation

Court administrators do not always accurately or timely post receipts to the case management system. In addition, the court has no process to reconcile case information to manual receipt slips and deposit records.

We reviewed 264 manual receipt slips issued during July 2013 and determined court administrators did not post 16 of the receipt slips to the case management system until 4 to 91 days after receipt. Also, the court administrators did not post 2 of the receipt slips to the system, posted 11 of the receipt slips with the wrong method of payment, and posted 3 of the receipt slips with the wrong amounts. For example, a receipt for $166 was recorded as $66 in the case management system because the court administrators had not assessed an additional $100 in fines and court costs to a case as ordered by the Municipal Judge. Instead of correcting the fines and court costs assessed and posting the full amount received, the court administrators only posted $66 of the $166 received in the system.

Our review of cases related to 115 defendants identified amounts recorded on 26 manual receipt slips and deposit records did not agree to amounts posted to the system. Court administrators indicated these differences were likely due to data entry errors.

Neither the municipal division nor city personnel reconcile a daily report of receipts posted to the case management system to the manual receipt slips

and the deposit. As a result, court administrators did not identify discrepancies between manual records and system records and did not detect and correct posting errors.

To reduce the possibility of loss, theft, or misuse of funds, and to ensure cases are processed properly, case activity should be accurately and timely recorded in the case management system and reconciled to monies received and deposited.

1.2 Fines and court costs

Court administrators do not always assess fines and court costs in accordance with the violations bureau (VB) schedule, Municipal Judge's orders, or plea agreements. The VB schedule shows the standard fines and court costs for violations payable through the VB prior to the court date. In addition, court administrators do not ensure adequate supporting documentation is obtained for changes to the assessed fines and court costs.

- Court administrators do not properly update fines and court costs assessed in the system to amounts ordered by the Municipal Judge when those amounts vary from standard fines and court costs. The system automatically assesses the standard fine and court costs for a violation when the ticket is initially recorded in the system. In our review of cases related to 115 defendants, we identified fines and court costs assessed in the case management system for 27 defendants did not agree to fines and court costs ordered by the Municipal Judge. For example, one defendant was initially assessed the standard fines and court costs of $225 when the ticket was recorded in the system and the Municipal Judge later ordered fines and court costs of $25 on the docket sheet, but the court administrators did not update the system to agree to the Municipal Judge's orders.

- A separate review identified 4 cases related to 2 defendants in which fines and court costs totaling $825 were improperly waived and reduced to zero in the system. The Municipal Judge indicated he normally authorizes the waiving of fines and court costs in writing on the manual docket sheets. The docket sheets for these cases did not include the Municipal Judge's written authorization. Rather, court administrators made written comments along with their initials on the docket sheets indicating the Municipal Judge had approved the waivers.

- Court administrators do not ensure approved plea agreements are maintained in the case files. When an alternative arrangement is agreed upon between the defendant and the Prosecuting Attorney, a plea agreement signed by both parties is necessary to document the amended charges and fines and court costs. For 7 of 12 cases reviewed, the case files did not contain documentation of approved plea agreements. For an

additional case reviewed, the Prosecuting Attorney did not sign the documented plea agreement.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, procedures should be established to ensure standard fines and court costs are collected through the VB, and any changes in assessed fines and court costs are approved by the Prosecuting Attorney or the Municipal Judge and properly recorded in the case management system.

1.3 Case disposition

The municipal division does not have adequate procedures to properly monitor the status of cases through final disposition. The court administrators enter the case status (such as hearing, failure to appear, payment plan, type of probation, extended, and finalized) and a future court date into the case management system. Because the court date determines which cases will appear on future dockets, it is important that the date be correctly entered. Neither the Municipal Judge nor city personnel adequately review the status and disposition of cases entered in the system.

In our review of cases related to 115 defendants, we determined the disposition or status of cases related to 59 defendants was not adequately tracked. Errors noted included inaccurate statuses and court dates in the case management system, inaccurate balances due and no active warrant for defendants with delinquent balances. For one case reviewed, the case management system showed a balance due of $100 with an incorrect status of failure to appear and an incorrect court date of Saturday, September 22, 2007. As a result, this case was not included on a future docket and the case was not properly disposed in the system. Our review of the manual records verified the case was paid in full on August 23, 2007, and should have been disposed in the system with the remaining $100 waived from the case at that time. The court administrators indicated that the defendant arrived late for court on August 23, 2007, paid the fine and court costs of $85, and the $100 fine for failure to appear was waived by the Municipal Judge. The court administrators failed to properly update the status, court date, and balance due in the system.

We also noted 2 instances where defendants received a suspended imposition of sentence (SIS) and the court administrators incorrectly entered future case disposition court dates of Friday, March 29, 2013, and Friday, April 11, 2014, following a 1 year probationary period. When we requested these case files in June 2014, they had not had any activity since the sentencing. However, the court administrators then changed the status in the system from "placed in SIS" to "discharged from SIS" and the related fines and court costs totaling $225 were reduced to zero. The $200 reduction of fines for one case appears appropriate per the manual docket sheet; however, the $25 reduction of court costs for the other case was not

authorized by the Municipal Judge and should have been paid. We were unable to trace the $25 to a manual receipt slip and deposit record.

Because the municipal division does not have adequate procedures to properly monitor the status of cases through final disposition in the case management system, the court administrators were not aware of these errors until we brought them to their attention.

Accurate and timely recording of the status and disposition of cases in the case management system is necessary to ensure cases are processed properly and to reduce the possibility of loss, theft, or misuse of funds. In addition, case activity should be periodically reviewed by persons independent of the receipting and recording process.

1.4 Missing records

The court administrators could not locate 20 manual case files requested during the audit. As a result, we could not determine if the case and financial activity and disposition of those tickets had been properly reflected in the case management system.

Supreme Court Operating Rule No. 8 requires all financial records be maintained for 5 years or upon completion of an audit. Retention of applicable records is necessary to properly account for the municipal division's case and financial activity.

Recommendations

The City of West Plains Municipal Division:

1.1 Ensure case activity is accurately and timely recorded in the case management system and reconciled to manual receipt records and the deposits.

1.2 Develop procedures to ensure fines and court costs assessed agree to the standard fines and court costs, plea agreement, or the Municipal Judge's orders. In addition, ensure changes to assessed fines and court costs contain a documented approval by the Prosecuting Attorney or the Municipal Judge and are properly posted to the case management system.

1.3 Ensure the status and disposition of all cases are accurately and timely recorded in the case management system and periodically reviewed by persons independent of the receipting and recording process.

1.4 Ensure case records are appropriately retained.

Auditee's Response

The City of West Plains Municipal Division provided the following written responses:

1.1 The court administrators have implemented a policy that all entries, both manual and electronic, shall be made immediately when at all possible and as soon thereafter otherwise. As far as the financial records of the court are concerned, the electronic record shall be the official and only record of the court upon the implementation of the electronic receipt recorder computerized component of the case management system, which is currently scheduled for the first day of December 2014. It is anticipated that the manual financial record (peg board system and handwritten receipts) will cease on December 31, 2014. After the implementation of the electronic receipt recorder component, all receipts of monies shall automatically update immediately upon the receipt of said payment. The City of West Plains financial accounting department shall do monthly reconciliations between all amounts receipted by the Municipal Division and the deposits made.

The written record in the court file shall continue to be the official record as to amounts assessed, setting dates, findings of law and fact, procedural matters, etc.

1.2 The Court has implemented a policy that the court administrators shall always confirm the amount assessed by the Municipal Judge on the docket sheet as opposed to referring to the court file label that provides for the standard fines and court costs amount. In addition, the Court has implemented a policy that any time the court administrators contact the Municipal Judge via telephone or other electronic means to discuss the amount of fines and court costs in regard to a particular file, that if the Municipal Judge assesses an amount different from the standard fines and court costs and verbally notifies the court administrator without having the file in front of the Municipal Judge, then the Municipal Judge shall make an entry on the docket in his own hand acknowledging the amount assessed if different from the standard fines and court costs as soon as possible thereafter. In addition, the court administrators shall receive a written plea agreement from the Prosecuting Attorney's office prior to the change in fines and court costs assessed if different from the standard fines and court costs assessed as a result of a recommendation from the Prosecutor's office.

1.3 Upon the implementation of the electronic receipt recorder computerized component, which is currently scheduled for the first day of December 2014, the court administrators shall print off a report showing all cases with an outstanding balance as well as a

report listing cases that are open but do not have a specific setting shown on the docket. These reports will be reviewed by the Municipal Judge as produced. It is the court's belief that many of the cases that were determined by the auditor to have inaccurate future setting dates (those set on weekend or holidays) and resulting in those cases not showing an accurate future docketing date were due to the fact that the court's case management system provides for automatic default date settings that are not in accordance with established court dates. For example, when a person makes a payment to the court, the case management system automatically shows the due date which is the third Thursday of each month. Additionally, Violator Compact (VC) (out of state) notices require a 15 day notice and Failure to Appear in Court for Traffic Violation (FACT) (in state) require a 30 day notice prior to the time being forwarded to the Missouri Department of Revenue. The court's case management system automatically defaults to a setting of 30 days for FACT or 15 days for VC in the future upon entry regardless as to whether that date is a weekend or holiday. The Court has contacted the court's case management provider as to whether a change may be made in the software to automatically set the matters on a court date as opposed to current default settings.

The City of West Plains financial accounting department shall perform a documented monthly reconciliation between all amounts receipted by the municipal division and the deposits made and review the report of cases with an outstanding balance.

1.4 The court administrators are now implementing a policy wherein all case files shall be segregated per file cabinet by year with each year being contained in a separate file cabinet from any other years. In addition, it is the belief of this department that, as to the financial records of the court, the implementation of the electronic receipt recorder component of the case management program, digitization of these records, and the discontinuation of the manual receipt records will help to ensure the location of all financial records.

2. Accounting Controls and Procedures

Accounting controls and procedures need improvement.

2.1 Accrued costs

Court administrators do not adequately monitor accrued costs and do not periodically reconcile the manual accrued costs report to balances recorded in the case management system.

Court administrators record fines, court costs, and restitution ordered by the Municipal Judge and defendant payments on a manual payment plan card maintained for each case. Information from the payment plan cards are compiled into a spreadsheet of accrued costs and reported to the city. Accrued costs related to restitution are not included in the report to the city because restitution represents monies owed to victims and not to the city. As of March 31, 2014, the spreadsheet reported accrued costs of $106,910.

The court administrators do not review or reconcile accrued costs recorded in the case management system to the manual records. The case management system can generate a report of balances due for citations with a conviction entered. The system calculates the accrued costs based on defendants with a conviction date and a balance due. As of April 2, 2014, the case management system reported $112,070 as the balance due to the court. After accounting for restitution and timing differences due to the different reporting dates, we were unable to reconcile the two reports.

We performed a comparison of the manual records and case management system reports by defendant name and reviewed all cases pertaining to 115 defendants. We identified numerous under and over statements of account balances in both records and incorrect conviction dates recorded in the system.

- The system balance due was overstated for 46 defendants by $3,802 because court administrators did not properly post some payments and did not properly record some documented waived fines and court costs.

- The system balance was understated for 5 defendants by $315 because court administrators did not properly post some payments and had not properly assessed some fines and court costs.

- The manual balances due were overstated for 10 defendants by $941 because court administrators did not properly post some documented waived fines and court costs on the payment plan cards and had not properly posted some payments to the cards.

- The manual balances due were understated for 18 defendants by $2,219 because court administrators do not include restitution in the accrued costs reported to the city, made some calculation errors on the payment plan cards, incorrectly posted some payments to the cards, and had not properly posted some assessed fines and court costs to the cards.

- The court administrators did not enter a conviction date in the system for 27 defendants. As a result, the balances due for these defendants were not in the system report. The defendants had either pled guilty or been found guilty and ordered to pay fines and court costs.

Proper and timely monitoring of receivables is necessary to help ensure unpaid amounts are collected and proper follow-up action is taken for non-payment. In addition, proper monitoring is necessary to provide information to the Municipal Judge and determine appropriate handling when amounts are deemed uncollectible.

2.2 Segregation of duties

The municipal division does not have an adequate segregation of accounting duties or independent review processes in place. Both court administrators perform the duties of receipting, recording, and depositing monies, and can handle transactions from receipt to deposit without involvement or review by other personnel. Neither the Municipal Judge nor city personnel perform adequate reviews of accounting records maintained by the court administrators. City personnel review copies of manual receipt slips and deposit slips but do not compare these records to the case management system and payment plan records.

To reduce the risk of loss, theft, or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by segregating duties to the extent possible and/or ensuring adequate independent reviews of accounting records are performed.

2.3 Noncash transactions

The municipal division does not ensure noncash transactions in the case management system are properly documented and has not established procedures for review and approval of noncash transactions by persons independent of the receipting process. The court administrators make noncash transactions to document community service performed in lieu of fines due, to correct posting errors as discussed above in MAR finding number 1.1, and to waive fines and court costs. Most noncash transactions should be supported by a judicial order on the docket sheet and a community service work form signed by a designated city supervisor attesting to hours of service completed. However, the municipal division did not maintain sufficient documentation to support numerous noncash transactions that occurred during the audit period. During the year ended March 31, 2014, court administrators made 314 noncash transactions totaling $19,699.

Our review of 60 noncash transactions identified 13 transactions totaling $706 that did not have adequate supporting documentation in the case files. For example, one of these transactions (for $112) occurred on October 2, 2013, and was posted in the system with a purpose indicating it was to correct a posting error for a case paid in full. The manual case file docket indicated payment was made in full through the VB on September 19, 2013; however, we were unable to trace this transaction to a receipt slip and deposit. Upon our inquiry in June 2014, the court administrators indicated no payment was received due to the case being dismissed, and they

proceeded to obtain documentation from the Prosecuting Attorney to support the dismissal of the case. We obtained confirmation from the defendant that no monies had been paid to the court for this case.

To reduce the risk of loss, theft, or misuse of funds, internal controls should provide reasonable assurance noncash transactions are approved and accounted for properly. Noncash transactions should be supported by adequate documentation and reviewed and approved by someone independent of cash custody and record-keeping functions to ensure such transactions are appropriate.

Recommendations

The City of West Plains Municipal Division:

2.1 Ensure accrued costs are adequately tracked and properly reported.

2.2 Segregate accounting duties to the extent possible. If it is not possible to segregate duties, documented periodic reviews of municipal division records should be performed by a person independent of accounting functions.

2.3 Require an independent review and approval of all noncash transactions, and retain adequate documentation to support noncash transactions.

Auditee's Response

The City of West Plains Municipal Division provided the following written responses:

2.1 As stated above, upon implementation of the electronic receipt recorder component within the court's case management system, all accounting will be electronic. In addition, reports will be generated accounting for all fines, restitution, recoupment and court costs that are part of the accounts paid and accounts receivable. The City of West Plains financial accounting department will also do monthly reconciliations of all funds, regardless of category, paid to or owed to the municipal division.

2.2 At this time there are only two court administrators for the municipal division and both are authorized to receipt and record funds received. The Municipal Judge neither receives nor receipts moneys paid to the court for any purpose. Due to the fact there are only two court administrators and the reality of only one of these two being at the court offices at any given time (vacations, lunch breaks, etc.), it is not possible to designate only one court administrator to be the only individual to accept or receipt payments. However, the City of West Plains financial accounting department will be doing monthly reconciliations of all funds,

regardless of category, paid to or owed to the municipal division. The court administrators will also include receipt printouts listing daily amounts collected with their deposit information that is sent to the city's accounting department.

2.3 The Municipal Judge currently does indicate on the docket those cases wherein the fines are waived or an individual may do Community Service Work (CSW) as a noncash transaction for payment of fines (court costs and restitution must be paid in cash) and has informed the court administrators that in those cases where so noted on the docket, they may accept noncash transactions of CSW as payment. The city and court have implemented a policy where the city shall keep track of the actual CSW performed by an individual and although the individual shall still be required to submit proof of completion of CSW in order to receive credit for the same, this completion of CSW will also be verified through comparison of records to be kept by the city also indicating the amount of CSW completed by the individual. In addition, the Municipal Judge will review a monthly report of all noncash transactions.

3. Municipal Division Procedures

Procedures related to ticket accountability for traffic tickets, parking ticket receipts, and monitoring excess revenues need improvement. Audit work determined the need for better records and monitoring procedures by the municipal division and city to ensure compliance with state law.

3.1 Traffic ticket accountability

Neither the police department nor the municipal division adequately accounts for the ultimate disposition of all traffic tickets.

The police department tracks the ticket numbers per ticket book assigned to each police officer. When tickets are issued the police department enters ticket information into a manual log and into a computerized system. The police department maintains the voided tickets and signed receipts for tickets forwarded to the Circuit Court. All remaining tickets are forwarded to the West Plains Prosecuting Attorney. The West Plains Prosecuting Attorney then decides to dismiss or file the ticket with the court. The court administrators only track the tickets the court receives from the West Plains Prosecuting Attorney.

For 2 of 20 traffic tickets tested, neither the court administrators nor the police department personnel could locate any record of the issuance, voiding, filing, or dismissal of the tickets. In addition, for 3 of 20 traffic tickets tested, the police department's manual log and computerized system indicate the tickets had been issued; however, neither the court administrators nor the personnel from the West Plains Prosecuting Attorney's office had a record of these tickets being filed and could not

verify the final disposition. As a result, the court and city could not account for 5 of 20 traffic tickets tested.

City of West Plains Municipal Court Operating Order Number 2, Section VII(D) requires the court administrators to work jointly with the police department to account for the numerical sequence of all traffic tickets and maintain a record of the disposition of all tickets assigned and issued by the police department. Without properly accounting for the numerical sequence and ultimate disposition of traffic tickets issued, the municipal division and the police department cannot ensure all tickets issued are properly submitted for processing. A record should be maintained to account for the ultimate disposition of each traffic ticket to decrease the risk of loss, theft, or misuse of funds.

3.2 Parking ticket receipts

The municipal division does not maintain adequate records to account for all parking ticket payments received and deposited by the court administrators. Police department records indicate the department issued 331 parking tickets during the year ended March 31, 2014. At $2 a ticket, $662 should have been collected but records indicate the city only received $325 during that period.

The police officer responsible for issuing the parking tickets is also responsible for collecting payments made at courtesy collection points. The court administrators do not issue a receipt slip to the police officer for total monies received when he transmits them to the court.

To ensure all monies received are properly recorded and deposited and to decrease the risk of loss, theft, or misuse of funds, receipt slips should be issued for all monies collected and reconciled to the deposits.

3.3 Monitoring of excess revenues

The municipal division has not provided a report of traffic violation tickets and associated fines and court costs revenues to the city for inclusion in the calculation and reporting required in the city's annual financial report filed with the State Auditor's office (SAO).

The municipal division does not have procedures in place to identify traffic violation tickets and the associated fines and court costs collected and transmitted to the city. This information is needed by the city to calculate the percent of annual general operating revenue from fines and court costs related to traffic violations, determine whether excess revenues should be distributed to the state Department of Revenue, and provide an accounting of the percent in its annual financial report as required by state law. The city's fiscal year end March 31, 2014, audited financial report was timely filed with the SAO, but did not provide an accounting of the percent of annual general operating revenue from fines and court costs related to traffic violations. With the completion of its current fiscal year (April 1, 2014,

through March 31, 2015), the city will again be required to report the percent of annual general operating revenue from fines and court costs related to traffic violations in its annual financial report. Thus, the municipal division needs to establish procedures and records to identify applicable traffic violations and the related fines and court costs revenues to assist the city in complying with state law.

Effective August 28, 2013, Section 302.341.2, RSMo, was amended, reducing the threshold for remitting excess revenues to the state, and requiring cities to provide an accounting of the percent of annual general operating revenue from fines and court costs in its annual financial report submitted to the State Auditor's office as required by Section 105.145, RSMo. Section 302.341.2, RSMo, further provides that a city that is noncompliant with the law ". . . shall suffer immediate loss of jurisdiction of the municipal court of said city . . . on all traffic-related charges until all requirements of this section are satisfied."

Recommendations

The City of West Plains Municipal Division:

3.1 Work with the police department to ensure the numerical sequence and ultimate disposition of all traffic tickets are accounted for properly.

3.2 Issue receipt slips for all parking ticket payments received and reconcile to the deposits.

3.3 Develop procedures and records to identify applicable traffic violations and the associated fines and court costs revenues and provide this information to the city.

Auditee's Response

The City of West Plains Municipal Division provided the following written responses:

3.1 The City of West Plains Prosecuting Attorney's office and police department are currently implementing a policy wherein there can be an accounting for all Uniform Traffic Citations (UTC) from the issuance of said UTC books to the officers to the filing of the same with the court and any intervening voiding, non-filing or dismissal that may occur prior to filing of the UTC with the court.

The procedure to track and record each ticket will occur from the time it is issued to the police officer to the time the officer returns the ticket to the police department, with a readily accessible log set up to explain, document, and record the disposition of any ticket that is not returned to the police department. Furthermore, each ticket that is returned to the police department will be tracked by an

officer, until the ticket is given to the City Prosecutor and a readily accessible log is set up to explain, document, and record the disposition of any ticket that is not given to the City Prosecutor. Each ticket will also be tracked from the time it is delivered to the City Prosecutor until the time the ticket is filed with the Municipal Division, with a readily accessible log set up to explain, document and record the disposition of any ticket received by the City Prosecutor and not filed with the Municipal Division.

3.2 *The Municipal Division does not administer or otherwise prosecute parking tickets with the City of West Plains. The role that the Municipal Division has had in such tickets is the receipt of money directly from the police department and occasionally from individuals that receive parking tickets who do not wish to pay through the police department. Additionally, the Municipal Division did then deposit those funds to the City of West Plains. The Court shall no longer receive or deposit these amounts and they shall instead go directly from the police department directly to the City of West Plains as determined between the City of West Plains and the police department.*

The City Prosecutor will review the city parking ordinances for the purpose of making recommendations to the City Council to improve parking ticket accountability and payment.

3.3 *The Municipal Division shall deliver to the City of West Plains financial accounting department a monthly report providing a breakdown of all fines and court costs assessed (both collected and outstanding) in all matters involving "Traffic Tickets" both moving and non-moving. The City of West Plains shall then report to the Auditor of the State of Missouri the amounts assessed by the West Plains Municipal Division for "Traffic Tickets" and indicate what percentage of the city's annual general operating revenue is represented by said fines and court costs.*

Thirty-Seventh Judicial Circuit
City of West Plains Municipal Division
Organization and Statistical Information

The City of West Plains Municipal Division is in the Thirty-Seventh Judicial Circuit, which consists of Carter, Howell, Oregon, and Shannon Counties. The Honorable David Evans serves as Presiding Circuit Judge.

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and court costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At March 31, 2014, the municipal division employees were as follows:

Title	Name
Municipal Judge	William T. Hass
Court Administrator	Peggy Lindberg
Court Administrator	Yavonne Richardson

Financial and Caseload Information

	Year Ended March 31, 2014
Receipts	$276,625
Number of cases filed	2,369

Report No. 2014-122

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Worth County

Financial Condition	The financial condition of the General Revenue Fund has declined and is not expected to improve during the year ended December 31, 2014. Disbursements have exceeded receipts in each of the last 4 years and are expected to again in 2014. The General Revenue Fund lost potential funding in past years due to administrative service fee transfers rom the various Road and Bridge Funds and Capital Improvement Sales Tax Funds not being consistantly made, or calculated correctly.
Property Tax System	The County Clerk did not maintain an account book or other records summarizing property tax charges, transactions, and changes. In addition, the County Clerk and the County Commission do not perform an adequate review of the County Collector's annual settlements and the County Clerk does not prepare or verify the accuracy of the current or delinquent tax books.
Officials' Salaries	Salaries paid to most Worth County elected officials during 2013 were not in compliance with state law. Since at least 2009, most county officials have been paid approximately 65 percent of the authorized amount. State law establishing base salaries for elected officials was amended in 2007 and now provides the minimum amount to be paid. The County Commission was unaware of this change in law and as a result, elected officials were underpaid by approximately $86,000 during 2013.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

2. Property Tax System 5
3. Officials' Salaries 6

Organization and Statistical Information 8

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Worth County

We have audited certain operations of Worth County in fulfillment of our duties under Section 29.230, RSMo. In addition, McBride, Lock & Associates, Certified Public Accountants, was engaged to audit the financial statements of Worth County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

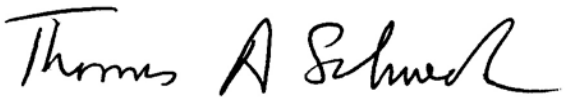
3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Worth County.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Richard Stuck
Audit Staff:	Alexander Druzenko, MBA, CPA
	Royce Lauer

1. Financial Condition

The financial condition of the General Revenue Fund has declined and is not expected to improve during the year ended December 31, 2014. The following table presents General Revenue Fund activity and balances as reflected in county budget documents:

	Year Ended December 31,				
	2014 Projected	2013 Actual*	2012 Actual*	2011 Actual	2010 Actual
Beginning balance	$ 13,896	29,567	36,995	53,781	65,088
Receipts	454,041	423,324	427,873	392,771	518,622
Disbursements	467,937	438,995	435,301	409,557	529,929
Ending balance	$ 0	13,896	29,567	36,995	53,781

* Amounts agreed to audited financial statements.

Disbursements have exceeded receipts in each of the last 4 years and are expected to again in 2014. The County Commission has limited opportunities to reduce disbursements from the General Revenue Fund as salaries paid are the majority of the disbursements. Most elected officials are currently only paid 65% of the base salary rate for their position based on assessed valuations, which is not in compliance with state law. As of November 1, 2014, the county had a liability of approximately $86,000 for underpaid salary amounts in 2013 relating to a statutory change affecting the base salary amounts paid to elected county officials (see MAR finding number 3).

In addition, the General Revenue Fund has lost potential funding in past years due to administrative service fee transfers from the various Road and Bridge Funds and Capital Improvement Sales Tax Funds not being consistently made, or calculated correctly. Section 50.515, RSMo, allows an administrative service fee to be imposed on the Road and Bridge Funds and the Capital Improvement Sales Tax Funds. The administrative service fee shall be imposed only to generate reimbursement sufficient to recoup actual disbursements made from the General Revenue Fund for related administrative services to the Road and Bridge Funds and Capital Improvement Sales Tax Funds, and shall not exceed 5 percent of the actual expenditures from these funds. The county has budgeted for these transfers in past years, but only began taking them in 2013.

The county cannot continue to spend more than it receives in the General Revenue Fund. The County Commissioners indicated they are aware of the concern, but have not developed a formal or specific plan to reduce disbursements or increase receipts in order to address the county's financial condition.

It is essential the County Commission address the county's financial condition both in the immediate and long-term future. The County Commission needs to consider significant changes to ensure the necessary funds are available to cover all liabilities. Possible options to improving the county's financial condition include reducing spending where possible, evaluating controls and management practices to ensure efficient use of county resources, maximizing all sources of revenue, and closely monitoring county budgets.

Recommendation

The County Commission closely monitor the county's financial condition and take the necessary steps to ensure the General Revenue Fund has sufficient monies available to pay salary liabilities and improve the overall financial condition of the General Revenue Fund.

Auditee's Response

The County Commission provided the following written response:

We will do our best to closely monitor the county's financial condition and take steps to ensure the General Revenue Fund is properly managed.

2. Property Tax System

Property tax system controls and procedures need improvement. For the year ended February 28, 2014, property taxes and other monies collected by the County Collector totaled approximately $2.3 million.

2.1 Account book

The County Clerk did not maintain an account book or other records summarizing property tax charges, transactions, and changes. In addition, the County Clerk and the County Commission do not perform adequate procedures to verify the accuracy of the County Collector's annual settlements. As a result, errors and irregularities on the annual settlement could go undetected. The County Clerk reviews the monthly and annual settlements for mathematical accuracy and the County Commission scans the annual settlements; however, a detailed review is not performed. The County Clerk indicated she was not aware an account book needed to be maintained and has now started to maintain one.

Section 51.150.1(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable into the county treasury. An account book or other records that summarize all taxes charged to the County Collector, monthly collections, delinquent credits, additions and abatements, and protested amounts should be maintained by the County Clerk. Such records would help the County Clerk ensure taxes charged and credited to the County Collector each year are accounted for properly and could also be used by the County Clerk and County Commission to verify the County Collector's annual settlements.

2.2 Tax books

The County Clerk does not prepare or verify the accuracy of the current or delinquent tax books. The county's computer programmer enters the property tax levies into the property tax system, as provided by the County

Clerk, and the County Collector extends and prints the current and delinquent tax books and tax statements and verifies the accuracy of amounts to be collected. The County Clerk does not test or verify the accuracy of the tax books. Because the County Collector is responsible for collecting property tax monies, good internal controls require that someone independent of that process be responsible for generating and testing the accuracy of the property tax books. A review of tax books should include verification of individual entries in the tax books and recalculating tax book totals and charges. Failure to perform adequate reviews of the tax books by an independent person may result in errors or irregularities going undetected.

Sections 137.290 and 140.050, RSMo, require the County Clerk to extend the current and delinquent tax books and charge the County Collector with the amount of taxes to be collected. If it is not feasible for the County Clerk to prepare the tax books, at a minimum, the accuracy of the tax books should be verified and approval of the tax book amounts to be charged to the County Collector should be documented.

Recommendations

The County Clerk:

2.1 Maintain a complete and accurate account book with the County Collector. In addition, the County Commission and the County Clerk should use the account book to review the accuracy and completeness of the County Collector's annual settlements.

2.2 Prepare the current and delinquent tax books, or at a minimum, verify the accuracy of the tax books prior to charging the County Collector with the property tax amounts to be collected. Procedures performed should be documented.

Auditee's Response

The County Clerk provided the following written responses:

2.1 Although I was unaware of these duties for my position, going forward, I will prepare an account book to help verify the annual settlement filed by the County Collector and closely monitor tax collections.

2.2 I will ensure I document the process for verifying the current and delinquent tax books in the future.

3. Officials' Salaries

During 2013, salaries paid to most Worth County elected officials were not in compliance with state law. Since at least 2009, county officials have been paid salaries set as a percentage of the base salary amounts authorized by state statute. For 2013, all elected officials, except the Public Administrator and County Assessor, received salaries set at approximately 65 percent of authorized amounts. The County Assessor received a salary set at

approximately 70 percent of the authorized amount, while the Public Administrator received the authorized amount. However, Section 50.327, RSMo, as amended in 2007, revised requirements regarding base salaries and now provides the minimum amount to be paid to each elected official. The County Commissioners indicated they were not aware of the statutory change affecting base salaries. As a result, by not paying the base salary, the county underpaid various elected officials approximately $86,000 during 2013.

Various state statutes include salary schedules that, according to Section 50.327, RSMo, are to be used as base schedules for those county officials. The County Commission should consult with legal counsel and review salaries paid to elected officials to ensure amounts comply with state law and to evaluate if amounts are owed to officials for any underpaid salaries since 2009.

Recommendation

The County Commission review salaries paid to elected officials since 2009 with legal counsel to ensure amounts comply with state law and to evaluate if any amounts are owed to officials for underpaid salaries.

Auditee's Response

The County Commission provided the following written response:

We will take this recommendation under advisement and work with the salary commission and legal counsel to find the best possible solution for Worth County.

Worth County
Organization and Statistical Information

Worth County is a county-organized, third-class county. The county seat is Grant City.

Worth County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 10 full-time employees and 9 part-time employees on December 31, 2013.

In addition, county operations include a Senior Citizen Services Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Ted Findley, Presiding Commissioner	$	15,320
Regan Nonneman, Associate Commissioner		13,199
Chevy Davidson, Associate Commissioner		13,199
Barbara Foland, Recorder of Deeds		19,998
Roberta Owens, County Clerk		19,998
David A. Baird, Prosecuting Attorney		25,515
Terry Sheddrick, Sheriff		24,825
Linda L. Brown, County Treasurer		19,998
Sharon Supinger, County Coroner		5,517
Patsy A. Worthington, Public Administrator		7,957
Julie Tracy, County Collector, year ended February 28,	19,998	
Carolyn J. Hardy, County Assessor, year ended August 31,		21,642

Financing Arrangements Arrangements

The county has entered into a lease-purchase agreement for a 2011 Case Motor Grader. Principal and interest payments are made from the Special Road and Bridge Fund. The lease is scheduled to be paid off in August 2017. The remaining principal outstanding at December 31, 2013, was $97,243. Interest remaining to be paid over the life of the agreement totals $7,433.

The county has entered into a lease-purchase agreement for a 2012 Case Motor Grader. Principal and interest payments are made from the Special Road and Bridge Fund. The lease is scheduled to be paid off in November 2017. The remaining principal outstanding at December 31, 2013, was $146,887. Interest remaining to be paid over the life of the agreement totals $11,569.

Thomas A. Schweich

Missouri State Auditor

Seventeenth Judicial Circuit

Cass County

December 2014

Report No. 2014-123

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Seventeenth Judicial Circuit, Cass County

Corrective Action	The court discovered $36,743 missing and through the Sheriff's office recovered $30,069 in checks and money orders from a deputy clerk. The deputy clerk pleaded guilty to felony stealing, was sentenced to 30 days in jail, and was ordered to pay $6,674 in restitution. After the court discovered missing monies, the Office of the State Court Administrator (OSCA) conducted a review and identified several accounting control deficiencies. The former Circuit Clerk did not respond to and took little corrective action to implement the OSCA recommendations. Subsequently, the former Circuit Clerk was suspended for failure to perform her duties and later resigned. She also withdrew her candidacy for another term in office in exchange for the Missouri Attorney General's office dropping a civil lawsuit and misdemeanor criminal case against her.
Accounting Controls and Procedures	The Circuit Clerk's office has not adequately segregated accounting duties or limited user access rights in the Judicial Information System (JIS), and adequate supervisory reviews of accounting records are not performed. The court does not record monies received in the mail on a mail log, checks received are not restrictively endorsed immediately upon receipt, and the Probate Clerk does not immediately issue receipt slips for monies received. The Circuit Clerk's office does not perform monthly bank reconciliations of the JIS account and has not timely resolved reconciling items identified by the OSCA. The Circuit Clerk's office has not established procedures to follow up on outstanding checks, and interest earned on two certificates of deposit has not been recorded in the JIS. Personnel independent of the receipting process do not review non-monetary and adjusting transactions in the JIS, and supporting documentation for these types of transactions is not always adequate. Total accrued costs owed to the court totaled $7.4 million as of January 28, 2014, but the Circuit Clerk's office does not review accrued case costs and the court's formal plan for debt is incomplete and has not been updated since January 2012. The former Circuit Clerk did not review cases with liabilities to ensure monies were disbursed in a timely manner, and, as of December 31, 2013, the court was holding $275,237 on cases that have been disposed. The Circuit Clerk's office maintains three inactive bank accounts which should be closed, and the former Circuit Clerk failed to pay some invoices for goods and services in a timely manner. The Circuit Clerk's office has not developed formal policies and procedures related to voided checks, and 3 voided checks for which stop-payment orders were not issued later cleared the bank.
Case Disposition	Court personnel do not always properly record the final disposition of each case in the JIS and do not periodically review the report of open cases. Ten of the 25 (40 percent) suspended cases we reviewed should have been disposed because judgment was made and the related costs were satisfied.

Law Library	The court has not adequately segregated accounting duties. The Acting Circuit Clerk performs all accounting duties related to the law library bank account and financial activities without an independent review. In addition, court personnel do not maintain an inventory list of law library materials and could provide no documentation that physical inventories were performed.
Missing Records	The former Circuit Clerk hired temporary employees to purge and scan court records but did not properly train or supervise these temporary employees. As a result, court personnel cannot locate numerous documents previously contained in case files.
Juvenile Office Reconciliation Procedures	The Juvenile Officer does not properly identify and resolve monies remaining in the account at the end of the month. The bank account should have a zero balance after each disbursement, but the office collected $545 more in restitution than ordered from a defendant and overpaid a victim $187, resulting in a balance of $358.

In the areas audited, the overall performance of this entity was **Poor**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 17

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge and Court en Banc
and
Circuit Clerk of the
Seventeenth Judicial Circuit
Cass County, Missouri

We have audited certain operations of the Seventeenth Judicial Circuit, Cass County in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the court's internal controls over significant financial functions.

2. Evaluate the court's compliance with certain legal provisions.

3. Evaluate the court's compliance with certain court rules.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the court, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the court's management, the Office of State Courts Administrator, and Cass County and was not subjected to the procedures applied in our audit of the court.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) noncompliance with court rules. The accompanying Management Advisory Report presents our findings arising from our audit of the Seventeenth Judicial Circuit, Cass County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Julie A. Moulden, MBA, CPA
Audit Staff:	Waleed Atout
	Nancy McDowell
	Ruben Lara

1. Corrective Action

The court has not taken sufficient steps to correct accounting control deficiencies identified by the Office of the State Court Administrator (OSCA) in January 2013. The OSCA review was conducted after monies were discovered missing by the court. Subsequent to the review, the former Circuit Clerk was suspended from her duties and later resigned.

Background

Between July 2012 and October 2012 monies from four deposits, totaling $36,743, were determined to be missing from circuit court receipts.

In October 2012, Circuit Clerk office personnel reviewed bank deposit records and bank statements and noted four deposits prepared between July and October 2012 never cleared the bank. In addition, court personnel indicated the court received phone calls from attorneys who were concerned that checks issued to the court had not cleared. The former Circuit Clerk notified the Sheriff's office and a detective from the County Sheriff's Department interviewed a deputy clerk who admitted to taking the deposits. The detective accompanied the deputy clerk to her home where she voluntarily turned over a bank bag containing $30,069 in checks, money orders, and deposit slips from the missing deposits. However, only 17 cents of $6,674 in missing cash was recovered. The recovered monies were subsequently deposited in the court account. The deputy clerk pleaded guilty to felony stealing on May 31, 2013, sentenced to 30 days in jail, and ordered to pay restitution totaling $6,674.

In August 2013, the Presiding Circuit Judge suspended the former Circuit Clerk with pay for failure to perform office duties. An Acting Circuit Clerk was appointed to oversee the duties of the office in September 2013. Also in September 2013, the Missouri Attorney General's office filed a civil lawsuit against the former Circuit Clerk alleging she failed to properly maintain the records of the court and properly manage the funds the court and state entrusted to her care. In addition, she was charged with two counts of failing to perform an act or duty required by law under Section 483.165, RSMo, which states that if any clerk knowingly and willfully does any act contrary to the duties of his office, or knowingly and willfully fails to perform any act or duty required by law, the clerk shall be deemed guilty of a misdemeanor in office. The civil trial began on June 30, 2014, but was dismissed on July 1, 2014, after the parties reached a settlement agreement. The former Circuit Clerk resigned and withdrew her candidacy for another term in office; in exchange, the Missouri Attorney General's office agreed to drop the civil lawsuit and the misdemeanor criminal case. The former Circuit Clerk was paid a total of $86,966 after she was suspended in August 2013.

OSCA recommendations

The former Circuit Clerk failed to implement recommendations made by the OSCA in January 2013. After the theft of monies was discovered in October 2012, the OSCA performed a financial review of the court. The former

Circuit Clerk did not respond to the OSCA recommendations and took little corrective action to implement the recommendations. Notable recommendations not implemented by the court included:

- Remove all supervisors from the monetary receipt process and require the supervisors to perform supervisory duties, including voiding/retaking receipts to resolve errors and correcting errors on assessed costs.

- Receipt all monies in the Judicial Information System (JIS) the day of the receipt.

- Designate a supervisor to prepare bank reconciliations. The Circuit Clerk should review them when completed and assign clerks to make corrections prior to the end of the month. The former Circuit Clerk was taking deposits to the bank and signing checks.

- Designate a supervisor to perform end of month procedures, including the creation and printing of end of month checks. A non-supervisory clerk was performing these duties.

- Perform monthly supervisory reviews of liabilities, the outstanding check list, fee adjustments, and non-monetary payments.

- Acquire a list of case management reports to run and conduct training on how to review the reports and identify corrections needed.

- Develop written procedures to review delinquent accounts at least quarterly and obtain an order from the Presiding Judge or Court en Banc to write off amounts deemed uncollectible.

Many of the unimplemented recommendations made by the OSCA are also weaknesses discussed in our report.

To ensure the Circuit Clerk's office is operating efficiently and reduce the risk of loss or misuse of funds, recommendations should be reviewed and corrective action taken.

Recommendation

The Circuit Clerk implement recommendations in a timely manner.

Auditee's Response

The Acting Circuit Clerk provided the following response:

Since the state audit began, I have made significant progress in implementing the various recommendations made by OSCA and am in the process of correcting the remaining items.

2. Accounting Controls and Procedures

Significant weaknesses exist with accounting controls and procedures.

According to court records, receipts collected during the year ended December 31, 2013, totaled approximately $4.6 million. Fines, bonds, and court costs are collected, recorded in the JIS, and deposited into the Circuit Clerk's general bank account by personnel of the Circuit Clerk's office.

2.1 Segregation of duties and supervisory review

The Circuit Clerk's office has not adequately segregated accounting duties or limited user access rights in the JIS, and adequate supervisory reviews of accounting records are not performed. The former Circuit Clerk had not established restrictions on system access and thus, the Acting Circuit Clerk and nineteen court employees have the ability to assess fees, receipt monies, post non-monetary transactions, enter voids, and adjust costs in the JIS, including the clerk primarily responsible for preparing deposits and reviewing daily cashier sessions. As a result, there are instances where the Acting Circuit Clerk and other court employees could be responsible for transactions from initial receipt to disbursement without involvement from other court employees. Neither the Acting Circuit Clerk nor other personnel independent of the cash custody and record-keeping functions provide adequate supervision or review of the work performed by court employees to ensure transactions are appropriate.

To reduce the risk of possible loss, theft, or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by segregating duties to the extent possible and limiting user access rights within the JIS. If proper segregation of duties is not possible, a documented independent or supervisory review of work performed is necessary.

A similar condition was noted in a financial review report issued by the OSCA after an on-site visit in December 2012.

2.2 Receipt processing procedures

Control weaknesses exist related to the recording and handling of monies received in the mail. In addition, monies received by the Probate Division are not receipted and deposited timely.

- The court does not record monies received in the mail on a mail log and checks received are not restrictively endorsed immediately upon receipt. Personnel initially open and distribute the mail to the various clerks; however, the employees opening the mail do not record the payments received or apply the endorsement immediately.

- The Probate Clerk does not immediately issue receipt slips for monies received. The court had not issued receipt slips or recorded 15 checks/money orders, totaling $1,905, for monies on hand during a cash

count conducted on January 29, 2014. Because a mail log is not maintained, it is unknown how long these checks/money orders had been on hand, but some were dated as far back as December 20, 2013. Receipt slips were not issued for these items until February 25, 2014.

To reduce the risk of loss, theft, or misuse of funds, an initial record of monies received combined with procedures to reconcile these monies to the JIS and deposit records is necessary. Failure to implement adequate receipting and recording procedures increases the risk that loss, theft, or misuse of monies received will go undetected.

Similar conditions were noted in the financial review report issued by the OSCA after an on-site visit in December 2012.

2.3 Bank reconciliations

We noted the following concerns during our review of the court's bank reconciliations.

- The Circuit Clerk's office does not perform monthly bank reconciliations of the JIS account. Since December 2012, the OSCA has been performing these reconciliations.

  .

- Reconciling items identified on bank reconciliations performed by the OSCA have not been resolved timely. The December 31, 2013, bank reconciliation included reconciling items, totaling $9,979, which had not been resolved as of April 2014. The cash receipts totaling $6,674 from the four deposits misappropriated by a former deputy clerk in 2012 are still shown as reconciling items because the monies have been recorded in the JIS, but have not been deposited to the JIS bank account. Other reconciling items totaling $3,305, including credit card and debt collection receipts, have not been recorded in the JIS and several non-sufficient funds checks receipted in the JIS have not been resolved.

- The Circuit Clerk's office has not established procedures to follow up on outstanding checks. As of December 31, 2013, JIS records indicate 217 checks, totaling $37,511, had been outstanding for over a year. Some checks have remained outstanding since June 2010.

- Interest receipts totaling $5,197 earned on two certificates of deposit between December 28, 2010 and December 31, 2013, have not been recorded in the JIS.

Monthly bank reconciliations and routine investigation and follow up procedures for reconciling items are necessary to ensure all accounting records balance, transactions have been properly recorded, and errors and discrepancies are detected and corrected on a timely basis. Additionally, to properly monitor disbursements and ensure monies are appropriately

disbursed to the payee or as otherwise provided by state law, procedures should be established to routinely investigate outstanding checks.

Similar conditions were noted in the financial review report issued by the OSCA after an on-site visit in December 2012.

2.4 Non-monetary, voided, and adjusting transactions

Personnel independent of the receipting process do not review non-monetary and adjusting transactions in the JIS, and supporting documentation for these types of transactions is not always adequate. In addition, while a supervisor indicated she reviews voided transactions in the JIS, this review is not documented. During the year ended December 31, 2013, non-monetary transactions were $4,519,394 and fee adjustments were $160,355.

Adjusting and non-monetary transactions, including judicial orders, garnishment payouts, and application of bonds, are transactions where no monies are received; however, a credit is applied or the amount due is changed. The Circuit Clerk and all court employees are allowed to enter non-monetary transactions, adjust costs, and void receipts in the JIS without supervisory review or approval. Also, documentation was not adequate for some of these transactions. The JIS can generate various reports to monitor these transactions; however, these reports are not generated and reviewed. Our review of 60 non-monetary transactions and 88 voided transactions identified:

- A docket sheet indicating the judge's approval was not prepared for 3 cases where fees totaling $2,015 were waived and a non-monetary receipt was recorded.

- Eight cases totaling $1,472 in which a clerk voided a monetary receipt to correct the payment type or to apply the amount received to the correct case or party; however, either the monetary receipt error was not detected and corrected, and/or the monetary receipt was not re-entered in a timely manner. For example, a credit card receipt of $145 in December 2012 was entered as a check. The receipt was voided in January 2013 but not reentered as a credit card receipt until May 2013.

- Five cases totaling $3,202 in which a clerk voided a monetary receipt, but never re-entered the monetary receipt and no explanation was documented for voiding the transactions. For example, a cash receipt of $1,000 in March 2012 was never re-entered.

To ensure all non-monetary, voided and adjusting transactions are valid and reduce the risk of loss, theft, or misuse of funds, proper documentation should be maintained and someone independent of receipting and recording functions should review and approve these transactions. In addition, a report

of these transactions should be periodically generated and reviewed to ensure posted transactions match the supporting documentation.

Similar conditions were noted in the financial review report issued by the OSCA after an on-site visit in December 2012.

2.5 Accrued case costs

The Circuit Clerk's office does not review accrued case costs owed to the court (court costs, incarceration costs, court-ordered restitution, fines, and other), as required by the court's formal plan for debt. Total accrued costs as of January 28, 2014, were approximately $7.4 million. The court adopted a formal Administrative Plan for Collections of Court Debt, as required by Court Operating Rule 21.11. This plan requires the court to review accounts receivable reports (accrued case costs) from the JIS and the debt collection vendor at least quarterly and determine if any accounts should be deemed uncollectible and written off by court order. The court has not reviewed the required reports and has not deemed any accounts to be uncollectible.

We noted several cases in which costs were not accurately reflected on the JIS list of accrued case costs. We reviewed 10 of the 193 cases in the system that had outstanding guardian ad litem (GAL) fees. Only 2 of the 10 cases reviewed had GAL fees ordered by the judge to be paid to the court. In the other 8 cases, the parties were ordered by a judge to pay the GAL directly. As a result, the GAL fees for these 8 cases, totaling $29,474, should not have been recorded to the JIS and debt collection procedures should not have been initiated.

To ensure the accuracy of the accrued case costs, and to provide the Judge and Circuit Clerk with the necessary information to ensure amounts owed are collected and make a determination about collectability, accrued case costs should be reviewed at least quarterly as required by the court's administrative plan.

In addition, the plan has not been updated since January 2012 and does not contain all of the required topics. Topics not included are settlement agreements, coordination with probation and parole, and collection of board bills. Supreme Court Operating Rule 21.11 requires all circuit courts to review and evaluate the formal administrative plan for collection of court debt annually to ensure results are consistent with plan objectives. The rule also requires the plans to include at least the following topics: settlement agreements, payment plans, coordination with probation and parole, collection of board bills, review and write off of accounts receivables deemed uncollectible, and sanctions for non-payment of debt.

Similar conditions were noted in the financial review report issued by the OSCA in December 2012.

2.6 Liabilities

The former Circuit Clerk did not review cases with liabilities to ensure monies were disbursed in a timely manner. As of December 31, 2013, the Acting Circuit Clerk had also not completed a review of the liability listing totaling $1,139,976.

As of December 31, 2013, the court was holding $275,237 on cases that have been disposed, including 113 bonds totaling $166,000. Further, 144 receipts totaling $57,784 and 161 bonds totaling $225,391 had been held by the court in excess of one year.

Procedures to routinely investigate monies remaining on the liabilities list over a specific period of time are necessary to properly monitor and ensure monies are appropriately disbursed as provided by state law. In addition, the court should attempt to identify and distribute the funds held and dispose of any unclaimed or unidentified funds.

A similar condition was noted in the financial review report issued by the OSCA after an on-site visit in December 2012.

2.7 Inactive bank accounts

The Circuit Clerk's office maintains three inactive bank accounts which should be closed.

- Two accounts, one of which has an unidentified balance of $432 at December 31, 2013, and the other which is an interest account totaling $757 at December 31, 2013, were Division III accounts prior to the court's consolidation in 2009.

- The other account, which had no activity since calendar year 2002, has an unidentified balance of $610 at December 31, 2013. The account was used to fund home studies.

Maintaining inactive accounts increases the risk of misuse of funds. To ensure funds are disposed of properly, the Circuit Clerk's office should dispose of the monies held in inactive bank accounts in accordance with state law and close the accounts.

2.8 Disbursements

The former Circuit Clerk failed to pay some invoices for goods and services in a timely manner. As of October 2013, examples of unpaid invoices included:

- Jury service payments, totaling over $12,000, to 297 jurors, serving from January 2013 through August 2013.

- Multiple office supplies invoices totaling approximately $4,800 received between January and August 2013.

- Several invoices from a drinking water vendor, totaling approximately $400, from September 2012 to August 2013.

The county paid these liabilities after they were discovered and are no longer outstanding.

In addition, the court erroneously disbursed $3,700 in garnishment payments to the wrong party between June 2012 and February 2013. The court has been unsuccessful in recovering these monies and therefore has not yet made payment to the correct litigant.

Procedures should be in place to ensure payments are made in accordance with court orders and judgments, and invoices for goods and services are paid timely to avoid late charges.

2.9 Voided checks

The Circuit Clerk's office has not developed formal policies and procedures related to voided checks. The former Circuit Clerk voided 3 checks totaling $169 in the JIS but did not issue stop-payment orders, and these checks later cleared the bank. In addition, between December 2010 and July 2013, the court received 112 checks totaling $25,048 that were returned as undeliverable. The former Circuit Clerk did not issue stop-payment orders, the checks were not defaced, and the checks were not voided in the JIS. Instead, the former Circuit Clerk maintained them in a drawer in her office. Further, as indicated in finding number 2.3, no follow up was performed on these outstanding checks.

To ensure voided and returned checks are handled and accounted for properly, the court should establish formal policies and procedures that include issuing stop payment orders, defacing the check so it cannot be negotiated, and voiding the check in the JIS.

Recommendations

The Circuit Clerk:

2.1 Segregate accounting duties to the extent possible, limit user access rights within the JIS to only those necessary for the user to perform job duties, and implement appropriate reviews and monitoring procedures.

2.2 Record and process receipts timely and restrictively endorse checks immediately upon receipt.

2.3 Perform timely monthly bank reconciliations, resolve reconciling items timely, and establish procedures to routinely follow up on outstanding checks and reissue them if necessary or dispose of these monies in accordance with state law.

2.4 Ensure adequate documentation is maintained to support all non-monetary, voided and adjusting transactions, and ensure an independent review and approval of these transactions is performed and documented. In addition, the Circuit Clerk should periodically generate and review reports of these transactions.

2.5 Develop procedures to review a complete and accurate list of accrued costs at least quarterly. In addition, the formal administrative plan for collection of court debt should be updated annually and should include all topics required.

2.6 Establish procedures to review the status of liabilities monthly to determine the appropriate disposition of funds.

2.7 Dispose of monies held in the inactive bank accounts in accordance with state law, and close the accounts.

2.8 Ensure invoices for services are paid timely, and recover the payment the court made in error and disburse those funds to the appropriate party.

2.9 Establish formal policies and procedures for voided and returned checks.

Auditee's Response

The Acting Circuit Clerk provided the following response:

2.1 I have already taken steps to limit user access within JIS. Void transactions are now only entered by 5 employees who do not receive monies and I will continue to work on improving control procedures.

2.2 I will investigate the viability of implementing new procedures for mail in receipts, but at a minimum I will ensure cash received in the mail is logged. I will discuss receipt and deposit procedures for the Probate Division with the Presiding Judge, who will ensure this concern is resolved.

2.3 The court plans for the new incoming Circuit Clerk to take over the bank reconciliation procedures once she takes office in January 2015. I have already assigned an employee to review outstanding checks and this issue will be resolved soon.

2.4 I am in the process of implementing control procedures related to non-monetary and adjusting transactions and have already implemented controls over voids. I will implement a process to

ensure a report of non-monetary and adjusting transactions is printed and reviewed monthly.

2.5 I will work with the judges in the circuit to implement this recommendation.

2.6 I agree and will implement this recommendation.

2.7& 2.8 These recommendations have been implemented.

2.9 I will discuss this recommendation with the incoming Circuit Clerk and ensure she is aware of the issue.

The Presiding Circuit Judge provided the following response:

2.5 I will discuss this recommendation with the other judges at the next court en banc meeting and will work with them to update the court plan and develop procedures with the newly elected Circuit Clerk to write off uncollectable amounts in the future.

3. Case Disposition

Court personnel do not always properly record the final disposition of each case in the JIS and do not periodically review the report of open cases. We obtained case reports from OSCA for 2013 which identified 1,220 cases that were suspended because court personnel canceled a future court date and did not reschedule a new court date. When case activity is suspended, the case no longer appears on the court docket and cannot be properly disposed.

Our review of 25 suspended cases identified 10 cases (40 percent) which should have been disposed because judgment was made and the related costs were satisfied. However, because the disposition has not been entered, these cases still appear on the open cases report. These errors occurred because the clerks failed to record all activity on the docket sheets or schedule subsequent court dates, and went undetected because there was no review of the open cases report.

Without procedures to ensure the proper disposition of all cases has been entered in the JIS, the court cannot be assured all cases are properly handled and associated costs are assessed.

A similar condition was noted in the financial review report issued by the OSCA after an on-site visit in December 2012.

Recommendation

The Circuit Clerk ensure the disposition of cases is properly recorded in the JIS and the report of open cases is periodically reviewed.

Auditee's Response

The Acting Circuit Clerk provided the following response:

This will be brought to the attention of the newly elected Circuit Clerk and procedures will be put in place to review the management reports regularly.

4. Law Library

Weaknesses were identified with accounting controls and procedures of the Law Library Fund. According to financial records, Law library receipts collected during the year ended December 31, 2013, were approximately $56,000.

4.1 Segregation of duties and supervisory review

The court has not adequately segregated the accounting duties or performed independent reviews of the law library bank account and financial activities. The Acting Circuit Clerk performs all accounting duties including depositing monies, recording receipts, writing and signing checks, and reconciling the account.

Internal controls would be improved by segregating duties. If proper segregation of duties is not possible, at a minimum, periodic reviews of the records should be performed and documented by someone independent of accounting functions.

4.2 Capital assets

Court personnel do not maintain an inventory list of law library materials and could provide no documentation that physical inventories of law library materials were performed. Court personnel indicated expenditures for law library publications, subscriptions, equipment, and other materials totaled approximately $36,000 during the year ended December 31, 2013.

The law library, which includes legal publications and technical equipment, is maintained for use by court personnel and the community. Physical inventories of law library materials, and reconciliation of those inventories to the inventory records, are necessary to ensure inventory records are accurate, identify unrecorded additions and dispositions, detect and deter theft of assets, and identify obsolete materials.

Recommendations

The Court En Banc and the Circuit Clerk:

4.1 Ensure accounting duties are adequately segregated or independent reviews are performed periodically.

4.2 Ensure periodic physical inventories of law library materials are performed, reconciled to inventory records, and documented.

Auditee's Response

The Acting Circuit Clerk and Presiding Circuit Judge provided the following response:

4.1 We will bring this recommendation to the attention of the newly elected Circuit Clerk and in the future we will ensure a supervisory review of all law library transactions is performed.

4.2 This has been implemented.

5. Missing Records

The former Circuit Clerk did not properly maintain certain court records. In 2013, the former Circuit Clerk hired temporary employees to purge and scan court records, and numerous documents previously contained in case files can no longer be located. Court personnel cannot locate various case file records, including an entire case file, exhibits, child support amount calculation worksheets, summons, judgments, and court orders. According to current court personnel, the former Circuit Clerk did not properly train or supervise these temporary employees as they purged records from case files.

Section 483.082, RSMo, requires court clerks to keep such records of the courts in such a manner as directed by rule of the supreme court to accurately record all essential matters relating to the causes and matters which are and have been pending before the court, including pleadings, motions and related documents, transactions, orders and judgments or related decrees showing the course and disposition of causes and matters, the taxing and collection of court costs, and the setting of trial calendars or dockets of pending cases.

Recommendation

The Circuit Clerk ensure court records are properly maintained.

Auditee's Response

The Acting Circuit Clerk provided the following response:

This was an isolated incident related to a project initiated by the former Circuit Clerk. Since I have taken over as Acting Circuit Clerk, all court records have been properly maintained.

The Presiding Circuit Judge provided the following response:

This project was terminated and a new policy regarding record retention has been adopted.

6. Juvenile Office Reconciliation Procedures

The Juvenile Officer does not properly identify and resolve monies remaining in the bank account at the end of the month. According to financial records, juvenile restitution collected during the year ended December 31, 2013, was approximately $20,000.

As of December 31, 2013, the Juvenile Officer bank account contained an unidentified balance of $358. The Juvenile Officer indicated all monies received are disbursed immediately upon receipt. As a result, the bank account should have a zero balance after each disbursement. However, we determined the office had collected $545 more in restitution than ordered from a defendant and overpaid a victim $187, resulting in the balance of $358.

Procedures to ensure all receipts are properly disbursed are necessary to ensure accounting records are in balance and to identify errors in a timely manner. Unidentified monies should be disposed of in accordance with state law.

Recommendation

The Juvenile Officer seek reimbursement for the overage paid to the victim and refund the overpayment to the appropriate party.

Auditee's Response

The Juvenile Officer provided the following response:

The overage has been collected and the refund has been made.

Seventeenth Judicial Circuit
Cass County
Organization and Statistical Information

The Seventeenth Judicial Circuit consists of Cass County as well as Johnson County.

The Seventeenth Judicial Circuit consists of two circuit judges and five associate circuit judges. The circuit judges hear cases in Cass and Johnson Counties. Of the five associate circuit judges, three are located in Cass County and two in Johnson County. Circuit personnel located in Johnson County are not included in the scope of the audit.

Personnel

At December 31, 2013, the judges, Circuit Clerk, and Juvenile Officer of the Seventeenth Judicial Circuit, Cass County, were as follows:

Title	Name
Circuit Judge, Division I	William B. Collins
Circuit Judge, Division II	Michael Wagner
Associate Circuit Judge, Division III	Meryl L. Lange
Associate Circuit Judge, Division IV	J. Michael Rumley
Associate Circuit Judge, Division V	Dan Olsen
Circuit Clerk	Amy Bell
Acting Circuit Clerk (1)	Kim Fitzgerald
Juvenile Officer	Beverly Newman

(1) Kim Fitzgerald was appointed as Acting Circuit Clerk in September 2013 after Amy Bell, former Circuit Clerk, was suspended in August 2013. Amy Bell resigned her position on July 1, 2014.

In addition, the Seventeenth Judicial Circuit, Cass County employed 19 full-time employees and 4 part-time employees on December 31, 2013.

Financial Information

Receipts of the Seventeenth Judicial Circuit, Cass County, were as follows:

	Year Ended December 31, 2013
Court deposits, fee, bonds, and other	$4,612,211
Juvenile restitution	20,039
Interest income	1,123
Total	$4,633,373

Caseload Information

From the Office of State Courts Administrator Missouri Judicial Reports, case filings of the Seventeenth Judicial Circuit, Cass County, were as follows:

	Year Ended June 30, 2013
Civil	4,600
Criminal	6,664
Juvenile	300
Probate	363
Total	11,927

*Includes selected findings

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge and Court en Banc
and
Circuit Clerk of the
First Judicial Circuit
Clark County, Missouri

We have conducted follow-up work on certain audit report findings contained in Report No. 2014-051, *First Judicial Circuit, Clark County*, issued in July 2014, pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the court about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Our methodology included working with the court, prior to completion of the audit report, to develop a timeline for the implementation of corrective action related to the audit recommendations. As part of the AFTER work conducted, we reviewed the written status of selected findings and recommendations and supporting documentation submitted by court officials, and held meetings with several court officials. Documentation provided by the court included bank statements, Judicial Information System (JIS) reports, and various other financial and court records. This report is a summary of the results of this follow-up work, which was substantially completed during October 2014.

Thomas A. Schweich
State Auditor

1. Missing Monies and Other Questionable Transactions

From January 2012 through July 2013, monies were determined to be missing from circuit court receipts. Additional missing monies were discovered dating back to 2001. Misappropriated court funds and missing monies totaled at least $12,181.

Our audit determined receipts totaling at least $3,743 were received but not deposited. Additional receipts totaling at least $750 could also have been missing or uncollected, based on payments likely received for filing fees paid when pro se divorce cases were filed. Also, 32 manual receipt slips were removed from the receipt slip books and could not be located, indicating additional funds could also be missing. Revenue totaling at least $7,688 may never be collected due to unsupported fee adjustments, failure to assess fines and court costs, changes made to case collection status, and failure to enter a case balance into the JIS. Mary Jones, the former Circuit Clerk, was charged with 2 counts of felony stealing on June 6, 2014.

Accounting duties in the circuit court were not adequately segregated. The former Circuit Clerk and all deputy court clerks receipted monies and made entries in the JIS, including fee adjustments, voiding transactions, and docket entries. There were no supervisory or independent reviews performed. In addition, the former Circuit Clerk prepared and signed all deposit slips and made all deposits, was the only person authorized to sign checks, and performed month-end close out procedures and reconciliations. The former Circuit Clerk was primarily responsible for the cases in which problems were identified, and her signature was noted on the majority of manual receipt slips discussed.

Recommendation

The Court en Banc and the Prosecuting Attorney continue to work with law enforcement officials regarding criminal prosecution related to the missing funds, including restitution of missing funds.

Status

Implemented

A pre-trial hearing was held on September 8, 2014, to determine if sufficient evidence was found to proceed with the case. Sufficient evidence was presented and the case was bound over to Division I of the Circuit Court. A deputy court clerk indicated a trial date for the case will be set in 2015.

2. Accounting Controls and Procedures

We identified significant weaknesses with accounting controls and procedures. As a result, several receipts were not accounted for properly.

2.1 Segregation of duties and oversight

The circuit court had not adequately segregated the duties of receiving and recording receipts, preparing deposits, and disbursing funds, and had not established adequate supervisory or independent review procedures.

The former Circuit Clerk accepted receipts from the public, accumulated receipts accepted by the deputy court clerks, and processed all deposits. In

addition, she was responsible for all disbursements, month-end reporting, and reconciliations prior to her resignation on July 25, 2013. No independent reviews of the former Circuit Clerk's work were performed.

After the Circuit Clerk's resignation, the circuit court did not adequately segregate accounting duties. All 3 deputy court clerks still had access in the JIS to process receipts, record transactions, void transactions and make fee adjustments, and prepare month-end disbursements. Also, 2 of the 3 clerks had "cash boss" permission rights allowing them to prepare deposits and process month-end reports. In addition, the deputy recorder of deeds, who previously performed some circuit court duties, had "cash boss" permission rights in the JIS. The court implemented a procedural change requiring one of the deputy court clerks to reconcile each cashier session to the monies collected and the Circuit Clerk to prepare deposits and compare the total to the deputy court clerk's total.

Recommendation

The Court en Banc and Circuit Clerk segregate accounting duties to the extent possible, limit user access rights within the JIS to only those necessary for the user to perform job duties, and implement appropriate reviews and monitoring procedures.

Status

Partially Implemented

The Circuit Clerk stated they are not able to implement the recommendation of segregating duties due to only having 3 deputy clerks working in the office. The Circuit Clerk also does not intend to limit user access rights within the JIS, instead preferring that all clerks have broad access rights in the event the clerks are asked to do tasks they may not normally perform. However, some reviewing and monitoring procedures have been implemented. One deputy court clerk reviews and reconciles the other deputy court clerk's daily cashier sessions and signs and dates the report documenting the review. In addition, the Circuit Clerk reconciles the composition of receipts to each of the deputy court clerk's daily cashier session reports and documents her review when she is preparing the deposit.

2.2 Manual receipt slips

The Circuit Clerk's office had not established proper controls or procedures for manual receipt slips. Based on the court's typical use of manual receipt slips, it appeared that multiple receipt slip books were missing.

Multiple manual receipt slip books were used concurrently and numerous manual receipt slips were missing, issued out of order, or not used. Case numbers were not always documented on the manual receipt slips. In addition, manual receipt slips issued by the court were not recorded timely or reconciled to the JIS, deposited timely, or reviewed by a supervisor or someone independent of the receipting process. Also, the former Circuit Clerk used manual receipt slips to record transactions unrelated to the operations of the circuit court.

Recommendation

The Court en Banc and Circuit Clerk ensure one manual receipt slip book is used at a time and the use of manual receipt slips is limited as required by court rule. The Circuit Clerk should also ensure manual receipt slips are recorded timely in the JIS and the monies deposited timely. In addition, the Circuit Clerk should ensure manual receipt slips are only used for circuit court transactions, the numerical sequence accounted for properly, and the case number documented on the receipt slip. Further, the Circuit Clerk should ensure manual receipt slips are reviewed and reconciled to the JIS and to the related deposits by someone independent of the receipting process.

Status

Implemented

The Circuit Clerk's office is no longer issuing manual receipt slips as a result of the Office of State Court Administrator's (OSCA) Court Operating Rule 4.53.2, effective January 1, 2014, which restricts the use of manual receipt slips to only when the automated system is unavailable or as authorized by order of the presiding judge. Clerks do not accept payments if the system is not available.

2.3 Receipting and depositing procedures

Procedures related to receipting and depositing receipts needed improvement. We identified the following issues:

- Payments received in the mail were not recorded on a mail log, issued a receipt slip, or restrictively endorsed immediately upon receipt.
- None of the 11 checks included in our July 29, 2013, cash count totaling $1,454 were restrictively endorsed.
- Six cashier sessions in the JIS totaling $8,384 were left open from December 14, 2012, through December 24, 2012, and the monies related to these sessions were not deposited until December 28, 2012.
- The composition of receipts as recorded in the JIS did not agree to the composition of the December 11, 2012, deposit.
- Electronic payments made by credit/debit card and debt collection payments were not posted to the JIS until the end of the month. The court receives notification daily when electronic payments occur.

Recommendation

The Court en Banc and Circuit Clerk require an initial record of monies received by mail be prepared and reconciled to the JIS, restrictively endorse checks and money orders immediately upon receipt, and require receipt slips be issued for all monies on a timely basis. In addition, the Circuit Clerk should maintain monies collected in a secure location and deposit receipts timely.

Status

Partially Implemented

The Circuit Clerk indicated office personnel do not prepare a record of checks received by mail due to time constraints and number of employees in the office. There are no plans to utilize a mail log. The Circuit Clerk indicated payments received in the mail are receipted into the computer on a daily basis. While deposits are now made at least weekly, as we noted during a review of the court's September 2014 and October 2014 bank statements, this frequency may still not be often enough considering the receipt totals collected each week. However, all payments made directly at the Circuit Clerk's office are issued a computer generated receipt slip when received. We observed a deputy court clerk performing this task. Checks and money orders are endorsed when received. In addition, all of the deputy court clerks maintain monies receipted at their unlocked desks until deposit, but the entrance into the office area is locked when all personnel are away from the office.

2.4 Non-monetary transactions, adjustments, and voids

Non-monetary and voided transactions and adjustments in the JIS were not properly documented or reviewed and approved by persons independent of the receipting process. In addition, the Circuit Clerk's office did not maintain documentation for numerous non-monetary and voided transactions and adjustments, that occurred during the audit period. Several transactions were possibly made to conceal missing monies.

Recommendation

The Court en Banc and Circuit Clerk require an independent review and approval of all non-monetary transactions, adjustments, and voids made in the JIS, and retain adequate documentation to support these transactions.

Status

Not Implemented

The Circuit Clerk indicated there is no independent documented review of non-monetary and voided transactions and adjustments. The Circuit Clerk indicated she or an independent deputy court clerk will review and orally approve all non-monetary and voided transactions and adjustments.

2.5 Accrued costs

The Circuit Clerk's office had not established a formal administrative plan for the collection of court debt and payment plans, and did not always assess time payment fees as required by Court Operating Rule 21. In addition, the Circuit Clerk's office had not taken steps to perform additional collection efforts or write off balances owed.

Recommendation

The Court en Banc and Circuit Clerk develop a formal administrative plan for debt collection and payment plans to ensure compliance with court operating rules. In addition, the Circuit Clerk should perform periodic reviews of cases with outstanding amounts due.

Status

Not Implemented

No formal administrative plan has been developed for debt collection and payment plans as of October 21, 2014 and court personnel gave no indication a plan would be developed. The Circuit Clerk indicated it will be difficult to review the receivables report periodically due to time constraints and periodic reviews have not been implemented. However, the receivables report has been reviewed at least once since the release of the audit report and the Associate Circuit Judge issued several court orders to write off approximately $125,000 of old outstanding receivables. We reviewed one order approving approximately $82,000 in bad debt be written off.

2.6 Liabilities

The court did not properly monitor liabilities. Liabilities reports were not generated in the JIS for review to ensure monies were disbursed timely and reconciled bank balances were sufficient to cover liabilities.

Recommendation

The Court en Banc and Circuit Clerk generate monthly liabilities reports from the JIS and establish procedures to review the status of liabilities to determine the appropriate disposition of funds held on closed or inactive cases.

Status

Implemented

A deputy court clerk is currently generating a monthly listing of liabilities when preparing the bank reconciliation and reviewing it to determine if monies in closed or inactive cases should be disbursed. A review of the court's liabilities as of October 21, 2014, indicated there were no disposed cases with undistributed bond monies. The deputy court clerk has been performing her review since July 2014.

3.2 Circuit Court Procedures - Change fund and petty cash fund

We noted several weaknesses concerning the change fund and the petty cash fund.

- The change fund and the petty cash fund were not reconciled at the end of each day or located in a safe, secure location.
- The change fund was not maintained at a constant amount. Also, a deputy court clerk indicated an additional $150 received for an unidentified case was missing from the change box.
- The petty cash fund was not maintained on an imprest basis.
- According to the 3 current deputy court clerks and the deputy recorder of deeds, the former Circuit Clerk would periodically retrieve monies from the Ex Officio Recorder of Deeds' office miscellaneous cash monies to replenish the court's petty cash fund.

Recommendation	The Court en Banc and Circuit Clerk maintain the change fund and the petty cash fund at a constant/imprest basis and periodically reconcile the ending balance. In addition, the Circuit Clerk should ensure monies are maintained in a secure location and the petty cash fund is replenished through disbursements made by the County Treasurer.
Status	**Implemented** The Circuit Clerk no longer has a petty cash fund and the change fund is reconciled daily and is maintained at $200. The change fund is located in a file cabinet in the Circuit Clerk's office. The entrance into the office area is locked when all personnel are away from the office.

3.3 Circuit Court Procedures - Bond monies	According to court personnel, the court would not accept bond monies from the Sheriff's office until a case number was assigned. However, the JIS allowed bonds to be receipted in the system before a case number was assigned. In addition, the former Circuit Clerk did not issue receipt slips documenting the receipt of bond monies received from the Sheriff's office.
Recommendation	The Court en Banc and Circuit Clerk accept and record bond monies into the JIS and issue corresponding receipt slips when bond monies are received from the Sheriff's office.
Status	**Implemented** The Circuit Clerk indicated all bond monies are receipted when received from the Sheriff's office. The September 2014 liabilities listing included 3 bonds from the Clark County Sheriff that had been receipted but not yet assigned a case number, indicating the Circuit Clerk has implemented this recommendation.

3.4 Circuit Court Procedures - Passwords and computer inactivity	Court employees did not log off their computers when unattended, passwords were not kept confidential, and a security control was not in place to shut down computers after a certain period of inactivity. In addition, the user account of a former court employee who resigned in April 2013 was not disabled until October 2013.
Recommendation	The Court en Banc and Circuit Clerk ensure employees log off their computers when unattended and passwords remain confidential and are changed periodically. In addition, the Circuit Clerk should establish a security control requiring computers to shut down after a certain period of inactivity and delete all user accounts for inactive employees.
Status	**Implemented** The Circuit Clerk has coordinated computer system changes with the OSCA requiring employees change their passwords quarterly and users to be

logged off after 5 minutes of inactivity. In addition, the user accounts for all inactive employees have been deleted in the JIS.

3.5 Circuit Court Procedures - Passport fees	The circuit court did not prepare an annual report of passport fees charged and expenditures of those fees, as required by state law.
Recommendation	The Court en Banc and Circuit Clerk ensure passport fees and expenditures are reported in accordance with state law.
Status	**In Progress** The Circuit Clerk has not prepared the 2014 annual report, but indicated she will prepare the report at the end of December.

4. Law Library Fund Controls and Procedures	The court had not adequately segregated accounting duties and an independent review was not performed related to the Law Library bank account and financial activities. In addition, bank reconciliations were not prepared.
Recommendation	The Court en Banc and Circuit Clerk ensure accounting duties are adequately segregated or independent reviews are performed periodically. In addition, bank reconciliations should be prepared monthly and periodically reviewed.
Status	**Implemented** The Associate Circuit Judge now approves all expenses prior to payment and initials and dates the monthly bank reconciliation documenting his review.

5. Drug Court Deposits	Receipts were not always deposited timely.
Recommendation	The Court en Banc and the Drug Court Supervisor ensure deposits are made timely.
Status	**Implemented** A review of the JIS general ledger indicated Drug Court monies are now receipted in the JIS when received and included in the court's deposits. With the court now making at least weekly deposits, the Drug Court monies are now deposited more timely.

Osage County

December 2014

Report No. 2014-125

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Osage County

Questionable Purchases and Misuse of County Assets	On August 7, 2014, a Road and Bridge foreman resigned his position after being confronted with allegations of questionable purchases and misuse of county assets. The county provided information to the Prosecuting Attorney, and as of November 30, 2014, no charges had been filed as the Prosecuting Attorney has requested additional information which has not yet been provided. The county did not always follow procedures over rock purchases, and Road and Bridge department controls and procedures identified 21 unusual and questionable rock purchases totaling $641. Various county officials and employees are authorized to purchase items from the Missouri State Agency for Surplus Property, but the county cannot locate several of the items purchased, most or all of which were purchased by the former foreman.
Payroll Records, Policies, and Procedures	Despite prior audit recommendations back to at least 1989, a recent legal settlement with a former employee, and the implementation of a standard county-wide timesheet, county payroll records and policies and procedures still need significant improvement. The County Clerk does not maintain centralized records of vacation, sick leave, and compensatory time or monitor balances for compliance with county policies and/or the Fair Labor Standards Act of 1938 (FLSA). We identified several errors in employee leave and compensatory time accruals which could have been detected by the County Clerk's office if centralized records and oversight procedures were in place. The FLSA and county policy require overtime be paid or compensatory time awarded at a rate of time and one-half, but the county awards compensatory time as straight time off. County policy does not distinguish between law enforcement employees and other employees for compensatory time/overtime purposes, as allowed by the FLSA. The county includes non-working time when calculating employee overtime, but the FLSA indicates it should not be used in the calculation of overtime. The county's vacation policy is not clear, and some Sheriff's department employees are awarded sick leave in excess of the county policy.
Review of Property Taxes	Neither the County Clerk nor the County Commission adequately review the financial activities of the County Collector. The County Clerk's account book is not accurate, does not track the taxes charged to the County Collector, and does not agree to the annual settlements submitted by the County Collector.
Sheriff Procedures	As noted in our 3 prior audit reports, the Sheriff's bookkeeper does not timely deposit monies received. The Sheriff's department does not account for the numerical sequence of bond forms issued or maintain a log of bond forms issued, does not always maintain copies of bond forms issued, and was unable to locate 8 bond forms. The Sheriff's department does not maintain a master listing of all seized property and does not conduct periodic inventories of seized property. The Sheriff spent approximately $6,000 on department renovations but did not maintain records supporting donations received and maintained the donations outside the county

	treasury. In addition, renovation project purchases were not made through the normal county procurement and budget process.
911/Emergency Management Department Receipts	The 911/Emergency Management department does not issue receipt slips for most monies received, utilized generic receipt slips, did not issue receipt slips sequentially, and did not always record the method of payment on receipt slips.
Capital Assets and Fuel Usage	County capital asset records are not complete and up to date. The County Clerk did not request annual inventories and inventory reports from various county officials and none of the county offices conducted inventories or submitted inventory information to the County Clerk during 2013. The Road and Bridge fuel tanks are not metered, and fuel usage is not reconciled to fuel purchases.
Computer Controls	Several offices lack adequate computer password controls. Neither the County Collector nor the County Assessor have security controls in place to lock computers after a specified number of incorrect logon attempts, county offices do not periodically test backup data, and the County Treasurer does not store backups at an off-site location.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Poor**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 21

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Osage County

We have audited certain operations of Osage County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones & Associates, Certified Public Accountants, was engaged to audit the financial statements of Osage County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Osage County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Kim Spraggs, CPA
In-Charge Auditor:	Wayne Kauffman, MBA
Audit Staff:	Alexander Druzenko, MBA, CPA
	Sherrye Lesmes
	Devin Jackson

1. Questionable Purchases and Misuse of County Assets

The county received concerns of questionable purchases and misuse of county assets, and further investigation of these concerns is needed. In addition, the county did not always follow procedures over rock purchases and lacks controls and procedures over surplus property purchases.

1.1 Former Road and Bridge department foreman concerns

During 2014, the county received concerns from Road and Bridge department personnel regarding possible misuse of county funds and property by the former Road and Bridge foreman. Items of concern included several loads of rock purchased by the former foreman with county funds at a local rock quarry and hauled by the former foreman in a county dump truck to a residence; and several items purchased by the former foreman with county funds that could not be located at the county, including a chainsaw and weed eater and several items purchased from the Missouri State Agency for Surplus Property (SASP). The County Commission addressed the allegations with the former foreman and he resigned his position on August 7, 2014. At that time, he returned several items to the Road and Bridge department, including a weed eater, a work light stand, a stool, and a staple gun. The County Commission provided certain information to the Prosecuting Attorney; and as of November 30, 2014, no charges had been filed as the Prosecuting Attorney has requested additional information which has not yet been provided.

Based on these concerns, we reviewed the county's procedures over rock and surplus property purchases, and tested some related purchases. We determined the county has controls over rock purchases; and while certain procedures were not followed for some purchases, the county's controls detected questionable rock purchases. We also determined the county's lack of adequate controls and procedures over surplus property purchases could result in untimely detection of improper purchases or misuse of county assets. As noted at section 1.3, we identified some additional missing surplus property items during the audit.

To identify any additional questionable purchases, the county should review records of rock, surplus property, and other Road and Bridge department disbursements and account for items purchased. The County Commission should continue to work with the Prosecuting Attorney to identify and follow up on the questionable rock purchases, improper use of a county truck, and missing property items, and seek criminal prosecution and/or restitution if appropriate.

1.2 Rock purchases

The county did not always follow procedures over rock purchases.

Rock is purchased at 4 quarries within the county and hauled to county roads by county employees in county dump trucks. Each employee is responsible for obtaining a delivery ticket from the rock quarry, signing the

ticket and documenting the delivery location, and submitting the ticket to the Road and Bridge department bookkeeper. The bookkeeper matches the individual delivery tickets to the monthly quarry invoices, attaches the tickets to the invoices, and submits the documentation to the County Clerk's office for payment. The County Clerk and the County Commission indicated they rely on the bookkeeper's procedures to verify accuracy and appropriateness of rock purchases. Rock purchases totaled approximately $51,000 during the year ended December 31, 2013, and approximately $41,000 during the period January 1 to August 31, 2014.

Road and Bridge department controls and procedures over rock purchases identified 21 questionable rock purchases during March, June, and July 2014, totaling $641. Concerns were communicated by Road and Bridge department personnel to the County Commission who investigated the 16 questionable rock purchases made in July 2014, and could not account for any of those rock purchases totaling $494. The Road and Bridge department bookkeeper indicated the rock purchases were questioned because they were made by the former foreman whose job duties typically did not include the purchasing or hauling of rock, and the rock was hauled in the county's small dump truck, which is not typically used for hauling rock. During its investigation, the County Commission inspected the county roads identified on the rock delivery tickets and determined rock had not been recently applied to those roads. The County Commission provided the rock invoices and tickets supporting the March, June, and July 2014 rock purchases to the Prosecuting Attorney for review; however, as of September 2014, no further investigation or review of other rock purchases had been performed.

Our review of the county's controls and procedures over rock purchases and testing of several related purchases, noted several instances where rock tickets lacked an employee signature and/or documentation of where the rock was delivered. Also, the rock tickets from one quarry for two March 2013 invoices were not attached to the invoices.

To ensure the validity and propriety for rock purchases, county employees should follow established documentation and monitoring procedures.

1.3 Surplus property purchases

The county lacks controls and procedures over items purchased from the SASP, and some items could not be located.

Various county officials and employees are authorized to purchase items from the SASP. During the period January 1, 2013, to August 31, 2014, they made 53 trips to purchase numerous surplus property items costing approximately $19,200. Examples of items purchased in recent years include 2 trucks, a welder, power tools, hand tools, cabinets, medical supplies, and shop supplies. While most of these items cost less than $50, the 2 trucks purchased cost $12,900 (2013) and $6,500 (2011).

Approximately half of the purchases in recent years were made by the former Road and Bridge foreman.

Due to concerns of missing property, including surplus property items purchased by the former foreman, the County Commission worked with Road and Bridge department employees to develop a list of surplus property and other items missing from the department. According to the County Clerk, county officials believe all items on the list were purchased by the former Road and Bridge foreman. This list was provided to the Prosecuting Attorney for further follow up; however, as of September 2014, no further investigation of missing items had been performed.

Prior to receiving concerns from Road and Bridge department personnel, the county had performed no procedures to monitor surplus property purchases. The County Commission approved surplus property invoices listing items purchased, but did not perform procedures to account for the items purchased. Due to the nature of surplus property items, most items purchased were not required to be tracked in county capital assets records. Our review of 25 surplus property items purchased by Road and Bridge department personnel during 2011, 2013, and 2014 noted 9 of the items could not be located by Road and Bridge department employees. These missing items included 4 tool bins, 2 pair of goggles, a cart, a fan, and a cargo cover. Most of these items were identified on the County Commission's list of missing items.

Section 102-37.450, Federal Management Regulation, requires that surplus property be used only for its approved purpose, placed in use within 1 year, and used for at least 1 year by the eligible donee. To ensure the validity and propriety of surplus property purchases and compliance with federal regulations, and to decrease the risk of theft or misuse of county assets occurring without detection, procedures should be established to monitor and account for items purchased.

Recommendations

The County Commission:

1.1 Review records of rock, surplus property, and other Road and Bridge department disbursements, account for items purchased, and identify any additional questionable purchases. The county should continue to work with the Prosecuting Attorney to investigate the questionable rock purchases, improper use of a county truck, and missing property items, and seek criminal prosecution and/or restitution if appropriate.

1.2 Ensure established controls and procedures are followed for all rock purchases. If questionable or unreasonable rock purchases are

noted, the county should promptly and properly follow up on these purchases.

1.3 Establish controls and procedures to monitor and account for items purchased from the SASP and comply with federal regulations.

Auditee's Response

The County Commission provided the following written responses:

1.1 The county is actively reviewing records for any additional questionable purchases. The county will continue to work with the Prosecuting Attorney to investigate questionable rock purchases, improper use of a county vehicle, and missing property items. The county will seek criminal prosecution or restitution if appropriate.

1.2 The county will work to see that established controls and procedures for rock purchases are followed for all rock purchases, including listing of roads on rock tickets and driver signature. Questionable or unreasonable purchases will be promptly investigated.

1.3 The county will establish controls and procedures to monitor and account for items purchased from the SASP. Items will be added to the shop inventory and will be tagged. Staff will comply with federal regulations for surplus property.

2. Payroll Records, Policies, and Procedures

Despite a recent legal settlement with a former employee, and the implementation of a standard county-wide timesheet, county payroll records and policies and procedures still need significant improvement.

2.1 Timesheets

The county incurred legal settlement costs in February 2013 due to the lack of time records maintained by the Sheriff's department and the county in prior years. Our audit reports dating back to at least 1989 have addressed concerns related to the lack of timesheets. In March 2013, the county implemented a standard county-wide timesheet on which employees are to record time worked (top half of the form) and various leave and compensatory/overtime information (bottom half of the form). However, the county lacks adequate procedures to monitor information recorded to ensure the accuracy of the timesheets.

Most county offices and departments continue to maintain separate time records for their employees. Employees record time worked on records that suit the needs of the office or department (e.g., Road and Bridge department project time records, 911/Emergency Management department time clock) and a supervisor reviews these records. Designated personnel enter information from the records into the standard county-wide timesheet and

print and submit the timesheets to the County Clerk's office for payroll processing. Some offices and departments do not maintain separate time records and simply utilize the standard county-wide timesheet.

Overtime settlement

In February 2013, the county entered into a legal settlement for $60,000 with a former Sheriff's deputy for unpaid overtime ($7,500 paid by the county and $52,500 paid by the county's insurance company). According to the County Clerk, neither the county nor the Sheriff's department maintained timesheets or leave records for the Sheriff's department during the period covered by the lawsuit (2009 through March 2011), and the overtime was reported on a personal record the former deputy maintained. Without time or leave records, the county could not confirm or dispute the accuracy of the overtime claimed.

Review procedures

Timesheets prepared by department bookkeepers for employees of the Sheriff and Road and Bridge departments are not always reviewed before submission to the County Clerk. Our review identified several instances where timesheets submitted to the County Clerk for Sheriff's department employees differed from department time records. For example, a deputy's timesheet shows he worked 10 hours on March 27, 2013, although he was on vacation that day according to department leave records.

Signatures

Our review identified numerous timesheets lacking the required employee and/or supervisor signatures. Personnel from the Sheriff, Road and Bridge, and 911/Emergency Management departments indicated the timesheets for their employees often lack these required signatures because there is not enough time for employees and supervisors to review the timesheets before submission to the County Clerk's office. In addition, the 911/Emergency Management Director indicated the department ensures the internal time cards are signed by the employee and supervisor.

To ensure proper control over payroll and the accuracy of time recorded, leave taken, and overtime paid, and to prevent disputes over these amounts, timesheets submitted to the County Clerk's office should be reviewed and signed by the employee and the employee's supervisor.

2.2 Leave and compensatory time records

The County Clerk does not maintain centralized records of vacation, sick leave, and compensatory time, or monitor balances for compliance with county policies and/or the Fair Labor Standards Act of 1938 (FLSA).

The new standard timesheet provides for the recording of leave and compensatory time information (accruals, usage, and balances). However, the information recorded on timesheets is not always accurate or complete and does not always agree to office or department records. Timesheets are submitted to the County Clerk's office and approved by the County Commission, but the County Clerk does not review leave and compensatory

time information for accuracy and compliance with county policy or use the information to maintain leave and compensatory time records. As a result, the county lacks an accurate and reliable centralized record of employee leave and compensatory time.

Current county policy requires officials and department directors to maintain records of leave and compensatory time balances for their employees. However, some offices and departments do not maintain these records, or monitor balances. For example, the Health Department Director indicated sick leave and vacation balances are not maintained and monitored for department employees because she believed this task was performed by the County Clerk's office.

We identified several errors in employee leave and compensatory time accruals. A Sheriff's deputy incorrectly received his vacation leave accrual 3 months prior to his employment anniversary date because his original hire date was not correctly recorded in the Sheriff's department's leave records. A Road and Bridge department employee received both paid overtime and compensatory time for the same 2 hours of overtime worked. In addition, a Health Department employee received 4 hours of compensatory time for 1/2 hour of overtime worked. These errors could have been detected by the County Clerk's office if centralized records and proper oversight procedures were in place. Without adequate review procedures, the county has no assurance of the accuracy of county employee leave and compensatory time balances and compliance with county policies.

As the county's payroll officer, the County Clerk should maintain centralized leave and compensatory time records to help ensure accuracy and compliance with county policies and/or the FLSA. Leave and compensatory time balances can represent significant liabilities to the county and centralized records allow the balances and compliance with county policy to be monitored more effectively. Also, these records should serve as the official county leave and compensatory time records, and are needed in the event disputes arise.

2.3 Policies and procedures

The county's compensatory time/overtime and leave policies need improvement.

Compensatory time/overtime

Employees who work more than the county's normal 40-hour work period receive overtime pay at a rate of time and one-half or earn compensatory time as straight time off. County policy and the FLSA require overtime to be paid or compensatory time awarded at a rate of time and one-half. In addition, the county policy does not distinguish between law enforcement employees and other employees for compensatory time/overtime purposes, and law enforcement employees receive this compensation when they work more than 40 hours during a work week. The FLSA provides the county the option of computing overtime for law enforcement employees based on a

work period of 7 to 28 days, and overtime pay is required when the number of hours worked exceeds 171 hours in a 28-day period, or similar proportion for shorter work periods (e.g., 86 hours in a 14-day period or 43 hours in a 7-day period). Compensating law enforcement employees based on a 40-hour week instead of 171 hours in a 28-day period would result in higher payroll costs.

Additionally, the county includes non-working time (vacation, sick leave, compensatory time taken, and holidays) when calculating employee overtime. As a result, the county sometimes awards more overtime pay/compensatory time than required. For example, during a week in August 2013, a Sheriff's department employee was awarded 10 hours of compensatory time during a week he worked 30 hours and used 20 hours of vacation. In addition, during a week in April 2013, a 911/Emergency Management department employee worked 44 hours and used 4 hours of sick leave, but was paid for 8 hours of overtime at a rate of time and one-half. The FLSA indicates nonworking time should not be used in the calculation of overtime worked and compensatory time earned.

Vacation leave

The county's vacation policy does not adequately address the number of vacation hours earned. The policy provides that full-time employees earn a certain number of vacation days at each employment anniversary date. Employees work different number of hours in a day, and as a result, some employees earned more vacation leave than others with the same amount of time employed with the county. For example, the vacation policy provides employees 5 days of vacation after 1 year of service, which equals 40 hours for an employee who works an 8-hour workday. However, Sheriff's department road deputies are awarded 50 hours because they work 10-hour shifts and jailers are awarded 60 hours because they work 12-hour shifts.

Sick leave

Some Sheriff's department employees are awarded sick leave at rates above amounts provided by county policy. The sick leave policy states full-time employees employed over 6 months shall accrue sick leave at a rate of 8 hours per month. However, Sheriff's road deputies are awarded 10 hours of sick leave per month, and jailers are awarded 12 hours per month. Sheriff's department personnel indicated employees are awarded the same number of hours as their daily shift.

Policies and procedures

Unclear personnel policies and noncompliance with policies may result in unnecessary costs to the county and inequitable treatment of employees. To ensure employees are treated equitably and properly compensated, personnel policies should be updated to reflect the county's intended practices and comply with FLSA requirements, and strict compliance with the policies is necessary. In addition, to reduce payroll costs, the county should consider revising the compensatory time/overtime policy for law enforcement employees in accordance with the FLSA.

Similar conditions previously reported

Similar conditions to sections 2.1 and 2.2 were noted in our prior audit report.

Recommendations

The County Commission:

2.1 Ensure timesheets submitted to the County Clerk are reviewed for accuracy. The County Commission should work with the County Clerk to ensure timesheets are reviewed and signed by the employee and the employee's supervisor.

2.2 Ensure centralized leave and compensatory time records are maintained by the County Clerk's office and monitored for compliance with the FLSA and county policies.

2.3 Revise personnel policies as needed, adopt overtime and compensatory time policies that comply with the FLSA, and consider revising the compensatory/overtime policy for law enforcement employees in accordance with the FLSA.

Auditee's Response

The County Commission provided the following written responses:

2.1 The county will ensure that timesheets submitted to the County Clerk are reviewed for accuracy. The County Commission will work with the County Clerk to see that all timesheets are reviewed and signed by the employee and employee's supervisor prior to submission for processing.

2.2 During the audit, the County Clerk and County Commission established centralized monitoring of leave, compensatory time, and sick leave records by the County Clerk. These records will be monitored for compliance with FLSA and county policies for all employees.

2.3 A draft personnel policy manual has been prepared and will be updated to adopt overtime and compensatory time policies that are consistent with the FLSA for all employees.

3. Review of Property Taxes

Neither the County Clerk nor the County Commission adequately review the financial activities of the County Collector, who processed property tax monies of approximately $9.4 million during the year ended February 28, 2014. The account book maintained by the County Clerk is not accurate, does not track the taxes charged to the County Collector, and does not agree to the annual settlements submitted by the County Collector. County Commissioners indicated they rely on the County Clerk's review of the annual settlements before they approve the annual settlements. However, since the account book is inaccurate, it is not possible for the County Clerk to adequately review the annual settlements. Without adequate review

procedures, there is an increased risk of loss, theft, or misuse of property tax monies going undetected.

Section 51.150.1(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable into the county treasury. An account book or other records that accurately summarize all taxes charged to the County Collector, monthly collections, delinquent credits, additions and abatements, and protested amounts should be maintained by the County Clerk. Such records would help the County Clerk ensure taxes charged and credited to the County Collector are complete and accurate and could also be used by the County Clerk and County Commission to verify the County Collector's annual settlements. Such procedures are intended to establish checks and balances related to the collection of property taxes.

Recommendation

The County Clerk maintain a complete and accurate account book with the County Collector. In addition, the County Clerk and the County Commission should use the account book to review the accuracy and completeness of the County Collector's annual settlements.

Auditee's Response

The County Commission and the County Clerk provided the following written response:

During the audit, the County Clerk implemented a complete and accurate account book on the County Collector. The County Clerk and County Commission will use this account book to review the accuracy and completeness of the County Collector's annual settlements.

4. Sheriff Procedures

Procedures over the Sheriff's deposits, bond forms, and seized property need improvement. In addition, the Sheriff's department lacked adequate controls and procedures over receipts and disbursements related to the department renovation project.

During the year ended December 31, 2013, Sheriff's department personnel deposited approximately $92,000 collected for conceal and carry permits, civil and criminal process fees, bonds, and other miscellaneous fees into the Sheriff's fee account.

4.1 Deposits

As noted in our 3 previous audit reports, the Sheriff's bookkeeper is not depositing monies received into the fee account timely. For example, $4,293 (including $225 in cash) received from November 1 through 5, 2013, was not deposited until November 15, 2013; and $525 (including $489 in cash) received from November 18 through 20, 2013, was not deposited until November 27, 2013.

Timely depositing procedures are necessary to adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds.

4.2 Bonds

The Sheriff's department lacks adequate controls over bonds and associated monies, and was unable to locate some bond forms. Bonds (cash and nonmonetary) are typically collected by jailers, who issue prenumbered bond forms. These forms and monies are transmitted to the bookkeeper for processing.

The Sheriff's department does not account for the numerical sequence of bond forms issued or maintain a log of bond forms issued, and does not always maintain copies of bond forms issued. We determined the numeric range of bond forms apparently utilized during November and December 2013, and attempted to account for the disposition of these 39 bond forms. We identified 8 missing bond forms. Upon review of office records and follow up with the court, Sheriff's department personnel could not locate these bond forms or determine whether the forms had been utilized. Sheriff's department personnel indicated since there were no deposits of monies associated with these missing forms, the forms were probably (1) not utilized and misplaced, (2) voided and not retained, or (3) used for nonmonetary bonds and not retained. In addition, we noted 1 instance where a bond form was not issued for a nonmonetary bond.

To reduce the risk of loss, theft, or misuse of bond monies received, and to provide assurance bond monies are accounted for properly, department personnel should complete bond forms for all bonds and bond monies received, maintain a log of bond forms and account for the numerical sequence of bond forms. In addition, department personnel should record voided bond forms on the bond log and retain all copies of defaced bonds.

4.3 Seized property

The Sheriff's department has not established adequate controls over seized property. A master listing of all seized property is not maintained; rather evidence tickets including seized property are prepared and stored in each case file. In addition, the Sheriff's department does not conduct periodic inventories of seized property.

Considering the often sensitive nature of seized property, adequate internal controls are essential and would significantly reduce the risk of loss, theft, or misuse of the stored items. Inventory control records should be maintained and periodic physical inventories performed and the results compared to the inventory records to ensure seized property and evidence are accounted for properly.

4.4 Department renovation

The Sheriff's department lacked adequate controls and records for monies donated to the department and used for renovations.

The Sheriff made various department renovations, including remodeling of ceilings and walls totaling approximately $6,000. The county paid approximately $2,200 toward the project; and the Sheriff received donations

for the remainder, primarily from one donor. The Sheriff indicated he received donations totaling approximately $5,200, and spent approximately $3,800 of these monies on the project.

The Sheriff kept no records supporting the donations received and maintained the donations outside the county treasury. The Sheriff indicated he paid the donations into an account at the local hardware store where he purchased the remodeling supplies. In addition, the Sheriff did not handle project purchases through the normal county procurement and budget process. The Sheriff indicated approximately $1,400 of the donations went unspent and after the hardware store refunded the money he returned it to the donor. However, there are no records to support the explanations provided by the Sheriff.

There is no statutory authority allowing the Sheriff to hold county monies outside the county treasury. Section 50.370, RSMo, requires every official of third and fourth class counties who receives any fees or other remuneration for official services to pay such monies to the County Treasurer. The failure to record and account for receipts and expending monies through unauthorized accounts outside the county's normal budgeting and disbursement process increases the risk of misuse or possibility of unnecessary purchases.

Recommendations

The Sheriff:

4.1 Timely deposit all monies.

4.2 Prepare bond forms for all bonds received and establish procedures to account for all bond forms and any associated monies.

4.3 Maintain inventory records of all items in the evidence room, perform periodic physical inventories, and compare the results to the inventory records.

4.4 Turn all donations over to the County Treasurer, ensure records of donations received are maintained, and ensure all purchases are made through the normal county procurement and budget process.

Auditee's Response

The Sheriff provided the following written responses:

4.1 Although I recognize the need to make deposits in an expedient manner, I am also met with extremely limited staffing for the Sheriff's department including having one secretarial employee. We will strive to make more than one deposit a week while also balancing the need to keep the Sheriff's department open for

business. The Sheriff's department secretary has increased the number of deposits she makes in a week.

4.2 There were no previous policies in place from the preceding administration regarding bond form handling. However this is a policy we have developed recently and have established procedures to account for all bonds, including a log and proper control procedures for all bonds and bond monies. This process has been implemented and has been very effective.

4.3 When I took office I was not provided any property or evidence log. The previous administration had more than 20 years of undocumented evidence and property. The very tedious and complex task of accounting for 20 years of property and evidence seems to have been an insurmountable task. Approximately 1 year ago, during the budget process, we requested funds to implement a computerized records management process; however, the County Commission and/or the County Clerk eliminated the requested funding from our proposed budget. We expect within the next year to accomplish the project. The Sheriff's department does record evidence in each narrative report and property/evidence seized is also documented on a property/evidence intake form which is included in the investigative case file. However, at this time a master listing of evidence/property does not, and to my knowledge has not existed in the history of the Osage County Sheriff's department. I recognized the need for a master log and have been working to accomplish this task which continues to take an extensive amount of time. Once this is accomplished, we will conduct routine inventories of property and evidence.

4.4 The physical Sheriff's department was inherited from the previous administration in a state of extreme physical hazard and disarray. After trying to be a good steward of the office I inherited, it was clear that the County Commission was responsible for failing to maintain its facilities and building. The Sheriff's department had community members, other elected officials, inmates, and Sheriff's department employees and their family members volunteer their time, tools, resources, and finances to help provide necessary working conditions to serve the people. The financial donation that was received in the form of a money order made out to the local hardware store was delivered to the Presiding Commissioner and two Associate Commissioners in an open session meeting. During that meeting, I was given the money order back and instructed to take the money order to the hardware store by the Presiding Commissioner and apply to the project's balance. The county could not deposit the citizen's donation as it was made out in money order form to the hardware store. I was simply abiding by the Presiding

Commissioner's directive. I will ensure future donations are turned over to the County Treasurer, that records of donations are maintained by the County Commission and/or County Clerk, and all purchases are made through the county purchasing and budgeting process.

The County Commission provided the following written responses:

4.1 The County Commission will ask to see deposit records for all monies received per the Sheriff's department monthly report to track timely deposits.

4.2 The county will ensure that the Sheriff's department prepares bond forms for all bonds and bond monies received and establishes procedures to account for all bond forms.

4.3 The county will ensure that the Sheriff's department maintains accurate inventory records of all items in the evidence room, and performs periodic physical inventories comparing results with the inventory records.

4.4 The county will ensure that the Sheriff's department turns all donations over to the County Treasurer, ensure that records of donations received are maintained, and ensure all purchases are made through the normal county procurement and budget process.

5. 911/Emergency Management Department Receipts

The 911/Emergency Management department receipting procedures are not adequate. The 911/Emergency Management department receives monies for maps, CPR classes, road signs, scrap metal, donations, and other miscellaneous items, and transmitted $4,378 to the County Treasurer during the year ended December 31, 2013.

The 911/Emergency Management department does not issue receipt slips for most monies received. Department staff issued only 7 receipt slips totaling $125 for the $4,378 transmitted to the County Treasurer during 2013. The 911/Emergency Management Director indicated staff only issue receipt slips when requested by the payor. In addition, the department issued generic receipt slips, and staff did not issue receipt slips sequentially or always document the method of payment on the receipt slips.

Without complete receipt records, and a detailed reconciliation of these records to transmittals, there is no assurance all monies have been transmitted to the County Treasurer. To reduce the risk of loss, theft, or misuse of monies received, procedures should be established to ensure all monies received are properly receipted and transmitted to the County Treasurer.

Recommendation

The County Commission work with the 911/Emergency Management Director to ensure official receipt slips are issued for all monies received, receipt slips are issued in sequential order, the method of payment is indicated on all receipt slips, and the composition of receipts is reconciled to the composition of transmittals.

Auditee's Response

The County Commission provided the following written response:

The County Commission will work with the 911/Emergency Management Director to ensure that official receipt slips are issued for all monies received, in sequential order, with the method of payment indicated on all receipt slips; and the record of receipts is reconciled to the records of transmittals.

The 911/Emergency Management Director provided the following response:

As of May 2014, this recommendation has been implemented.

6. Capital Assets and Fuel Usage

Procedures related to capital assets and Road and Bridge department fuel usage need improvement.

6.1 Capital assets

Procedures and records to account for county property are not adequate. In addition, the county does not have adequate procedures in place to identify and record capital asset purchases and dispositions throughout the year. As a result, the county's capital asset records are not complete and up to date. The County Clerk did not request annual inventories and inventory reports from various county officials and no county officials conducted inventories or submitted inventory information to the County Clerk during 2013. In addition, county assets are not tagged or properly identified as county property.

Adequate capital asset records and procedures are necessary to ensure effective internal controls, meet statutory requirements, and provide a basis for determining proper insurance coverage. Procedures to track capital asset purchases and dispositions throughout the year, along with periodic physical inventories and comparisons of the results to overall county capital asset records are necessary to evaluate the accuracy of the records, and deter and detect theft. Proper tagging of capital assets is necessary to facilitate the record-keeping process. Section 49.093, RSMo, requires third and fourth class counties to account for personal property costing $1,000 or more, assigns responsibilities to the officer or applicable designee of each county department, and describes details to be provided in the inventory records.

6.2 Road and Bridge department fuel usage

The fuel tanks for the Road and Bridge department are not metered, and fuel usage is not reconciled to fuel purchases. The Road and Bridge department maintains 6 diesel tanks and a gasoline tank for fueling 23 vehicles and

equipment and spent approximately $129,000 on fuel during the year ended December 31, 2013.

Procedures for reviewing fuel use and reconciling use to purchases are necessary to ensure the reasonableness and propriety of fuel use and disbursements, prevent paying vendors for improper billing amounts, and decrease the risk of theft or misuse of fuel occurring without detection. Metered fuel tanks are necessary to identify fuel usage for these reviews and reconciliations.

Similar conditions previously reported

Similar conditions were noted in our prior audit report.

Recommendations

The County Commission:

6.1 Work with the County Clerk and other county officials to ensure complete and accurate inventory records are maintained, purchases and dispositions of assets are tracked, annual physical inventories are conducted, and assets are tagged as county property.

6.2 Require fuel meters for all bulk fuel tanks, ensure fuel purchases are reconciled to fuel usage, and investigate any significant discrepancies.

Auditee's Response

The County Commission provided the following written responses:

6.1 The County Commission, through the County Clerk, will work with other county officials to maintain complete and accurate inventory records, and perform physical inventories on an annual basis. Purchases and dispositions of assets will be tracked, and assets of the county will be tagged as county property.

6.2 The County Commission will establish procedures to track purchase and use of fuel with the Road and Bridge department. The county will periodically obtain and review vehicle and equipment logs that track mileage, hours of use, and fuel dispensed; and compare the logs to fuel purchases to better identify any discrepancies. At this time it is not possible to meter the bulk fuel tanks.

7. Computer Controls

Controls over county computers are not sufficient to prevent unauthorized access by requiring password changes and restricting logon attempts or to restore key systems in the event of a disaster or system failure. As a result, county records are not adequately protected and are susceptible to unauthorized access or damage.

7.1 Password controls

The Recorder of Deeds, County Clerk, Prosecuting Attorney, County Treasurer, County Collector, County Assessor, and the 911/Emergency

Management Director have not established adequate password controls to reduce the risk of unauthorized access to computers and data. Employees are not required to change passwords on a periodic basis, and the County Collector's office employees share passwords.

Passwords are required to authenticate access to computers. The security of a computer password is dependent upon keeping passwords confidential. However, since passwords do not have to be periodically changed and are shared, there is less assurance passwords are effectively limiting access to computers and data files to only those individuals who need access to perform their job responsibilities. Passwords should be unique and confidential and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

7.2 Security controls

The County Collector and County Assessor do not have security controls in place to lock a computer after a specified number of incorrect logon attempts. In addition, the computers in the offices of the Recorder of Deeds, County Clerk, Prosecuting Attorney, County Treasurer, County Collector, and County Assessor do not lock after a certain period of inactivity.

Logon attempt controls lock the capability to access a computer after a specified number of consecutive invalid logon attempts and are necessary to prevent unauthorized individuals from continually attempting to logon to a computer by guessing passwords. Inactivity controls are necessary to reduce the risk of unauthorized individuals accessing an unattended computer and having potentially unrestricted access to programs and data files. Without effective security controls, there is an increased risk of unauthorized access to computers and the unauthorized use, modification, or destruction of data.

7.3 Backup data

Periodic testing of backup data is not performed for any county offices. Additionally, the County Treasurer does not store backups at an off-site location. Failure to store computer backup data at a secure off-site location results in the backup data being susceptible to the same damage as the data on the computer.

To help prevent loss of information and ensure all essential county information and computer systems can be recovered, backups should be tested on a periodic basis and stored at a secure off-site location.

Recommendations

The County Commission work with other county officials to:

7.1 Require unique passwords for each employee that are confidential and periodically changed to prevent unauthorized access to the county's computers and data.

7.2 Require each county computer to have security controls in place to lock the computer after a specified number of incorrect logon attempts and after a certain period of inactivity.

7.3 Ensure backup data is tested on a regular, predefined basis, and stored in a secure off-site location.

Auditee's Response

The County Commission provided the following written responses:

7.1 The county will include a requirement for separate confidential passwords for each employee that are to be changed every 90 days in our revised procedures manual.

7.2 The county will ensure that 3 incorrect logons will require that employee to contact their supervisor to reset the password to enable access to the server, and that the computers will lock after a certain period of inactivity.

7.3 The county will ensure that backup data is regularly tested and storage will be off-site and secure.

Osage County
Organization and Statistical Information

Osage County is a county-organized, third-class county. The county seat is Linn.

Osage County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 43 full-time employees and 16 part-time employees on December 31, 2013.

In addition, county operations include the Senate Bill 40 Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Dave Dudenhoeffer, Presiding Commissioner	$	26,354
John Glavin, Associate Commissioner		24,354
Larry Kliethermes, Associate Commissioner		24,354
Cindy Hoffman, Recorder of Deeds		36,900
Patrick Steele, County Clerk		36,900
Amanda L. Grellner, Prosecuting Attorney		44,000
Michael Dixon, Sheriff		40,500
Tim G. Neuner, County Treasurer		36,900
Lois Jaegers, County Coroner		11,700
Paul G. Stratman, Public Administrator		22,500
Doris J. Keilholz, County Collector (1), year ended February 28,	39,034	
Ross Seals, County Assessor, year ended August 31,		36,900
Ralph P. Kliethermes, County Surveyor (2)		5,000

(1) Includes $1,367 of commissions earned for collecting city property taxes.
(2) Compensation on a fee basis.

Financing Arrangements

The county entered into a lease purchase agreement with First Bank of Missouri in 2009. Certificates of participation totaling $1,910,000 were issued by First Bank of Missouri on behalf of the county and the proceeds of those certificates used to renovate the county courthouse. Payments are made from the proceeds of the half-cent sales tax passed by the voters in

August 2007. The lease-purchase agreement is scheduled to be paid off in 2027. The remaining principal outstanding at December 31, 2013, was $1,590,000. Interest remaining to be paid over the life of the agreement totaled $629,206.

The county entered into a lease-purchase agreement with Legends Bank in 2009 for the purpose of purchasing and renovating the county annex building. The lease-purchase agreement is for $1,665,000 and is scheduled to be paid off in 2018. Payments are made from the proceeds of the quarter-cent sales tax passed by the voters in August 2007. The remaining principal outstanding at December 31, 2013, was $845,580. Interest remaining to be paid over the life of the agreement totaled $90,599.

The county entered into a lease-purchase agreement with Legends Bank in 2013, for the purpose of purchasing six law enforcement vehicles for the Sheriff's department. The lease-purchase agreement is scheduled to be paid off in June 2017. The remaining principal outstanding at December 31, 2013, was $115,538. Interest remaining to be paid over the life of the agreement totaled $6,669.

Missouri State Auditor

PUBLIC SAFETY

Missouri State Highway Patrol's Use of Highway Funds

Year Ended June 30, 2014

December 2014

Report No. 2014-126

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Public Safety, Missouri State Highway Patrol's Use of Highway Funds

Background	The State Auditor is required by Article IV, Section 30(b) of the Missouri Constitution and Section 226.200.3, RSMo, to determine whether appropriations from the State Highways and Transportation Fund (State Highway Fund) to the Missouri State Highway Patrol (MSHP) are used for administering and enforcing state motor vehicle laws and traffic regulations.
Methodology	Audit staff reviewed pertinent documents, conducted interviews, and tested selected transactions. Audit staff assessed and tested internal controls and reviewed and tested MSHP calculations.
Conclusions	During the year ended June 30, 2014, the MSHP appears to be in compliance with legal provisions related to the use of Highway Funds.

Because of the limited objective of this review, no overall rating is provided.

State Auditor's Report 2

Background, Methodology, and Conclusions 3

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the General Assembly
and
Daniel Isom, Director
Department of Public Safety
and
Colonel Ronald K. Replogle, Superintendent
Missouri State Highway Patrol
Jefferson City, Missouri

We have audited the Department of Public Safety, Missouri State Highway Patrol's Use of Highway Funds, as required by Section 226.200.3, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended June 30, 2014. The objective of our audit was to determine whether the agency is in compliance with legal provisions related to the use of Highway Funds.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The Background, Methodology and Conclusions present our comments concerning the overall compliance related to the Department of Public Safety, Missouri State Highway Patrol's Use of Highway Funds.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Dennis Lockwood, CPA
In-Charge Auditor:	Lori Bryant
Audit Staff:	Steven J. Barton

Department of Public Safety
Missouri State Highway Patrol's Use of Highway Funds
Background, Methodology, and Conclusions

Background

The State Auditor is required to determine whether appropriations from the State Highways and Transportation Fund (State Highway Fund) to the Missouri State Highway Patrol (MSHP) are used for administering and enforcing state motor vehicle laws and traffic regulations pursuant to the constitution.

Limitations and requirements

Article IV, Section 30(b), Missouri Constitution, limits the MSHP's use of highway funds to activities related to administering and enforcing state motor vehicle laws or traffic regulations. In addition, Section 226.200.3, RSMo, provides, in part:

". . . Appropriations allocated from the state highways and transportation department fund to the highway patrol shall only be used by the highway patrol to administer and enforce state motor vehicle laws or traffic regulations. Beginning July 1, 2007, any activities or functions conducted by the highway patrol not related to enforcing or administering state motor vehicle laws or traffic regulations shall not be funded by the state highways and transportation department fund, but shall be funded from general revenue or any other applicable source. Any current funding from the highways and transportation department fund used for activities not related to enforcing state motor vehicle laws or traffic regulations shall expire on June 30, 2007. The state auditor shall annually audit and examine the appropriations made to the highway patrol to determine whether such appropriations are actually being used for administering and enforcing state motor vehicle laws and traffic regulations pursuant to the constitution. The state auditor shall submit its annual findings to the general assembly by January fifteenth of each year."

During the year ended June 30, 2014, the MSHP utilized appropriations from the State Highway Fund as follows:

	Appropriation Authority	Expenditures	Lapsed Balances*
Technical services personal service	$ 13,154,837	11,956,199	1,198,638
Administration personal service	5,595,363	5,404,043	191,320
Administration expense and equipment	422,589	357,940	64,649
Enforcement personal service	65,579,028	61,937,664	3,641,364
Law Enforcement Academy personal service	1,248,056	1,196,430	51,626
Law Enforcement Academy expense and equipment	73,576	59,034	14,542
Vehicle and driver safety personal service	10,685,200	9,995,001	690,199
Vehicle and driver safety expense and equipment	942,525	822,188	120,337
Enforcement expense and equipment	5,522,131	5,484,640	37,491
Technical services expense and equipment	13,686,001	13,342,665	343,336
Refund unused motor vehicle inspection stickers	100,000	37,126	62,874
Fringe benefits personal service	69,521,846	64,250,304	5,271,542
Fringe benefits expense and equipment	6,386,801	5,859,756	527,045
Vehicle replacement expense and equipment	4,818,182	4,654,971	163,211
Gasoline expenses	6,313,699	5,042,461	1,271,238
Crime laboratories personal service	3,749,420	3,458,356	291,064
Crime laboratories expense and equipment	914,499	887,064	27,435
Interoperable system highway	5,000,000	4,317,983	682,017
Interoperable ongoing highway	4,100,000	2,495,382	1,604,618
Total	$ 217,813,753	201,559,207	16,254,546

* The lapsed balances include withholdings made at the Governor's request totaling $4,109,609.

Methodology

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the agency; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objective and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objective, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions

To determine whether the MSHP complied with the limitations on the use of highway funds, we reviewed the MSHP calculations of amounts expended from the State Highway Fund for non-highway activities and the amounts

expended by the MSHP for highway-related activities from other funding sources. We compared the amounts used in the MSHP calculations to expenditures recorded in the state accounting system (SAM II) and other supporting documentation. In addition, we tested certain expenditures to determine if the expenditures were properly recorded.

Conclusions

We concluded the MSHP appears to be in compliance with legal provisions related to the use of Highway Funds. During fiscal year 2014, the MSHP spent approximately $2,179,000 appropriated from the State Highway Fund that was not related to highway activities. This amount included non-highway personal service and fringe benefit expenditures made from the State Highway Fund for the Crime Laboratory Division, Training Division, and Administrative Services Bureau; and some gasoline and expense and equipment expenditures from the Administrative Services Bureau. However, these expenditures were more than offset by expense and equipment expenditures of approximately $4,951,000 incurred by the Crime Laboratory Division, Training Division, and Technical Services Bureau that were related to highway activities but were not paid from the State Highway Fund. As a result, approximately $2,772,000 more was spent on highway-related activities than was paid from highway funds during fiscal year 2014.

Thomas A. Schweich

Missouri State Auditor

Scott County

December 2014

Report No. 2014-127

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Scott County

Prosecuting Attorney Controls and Procedures	The Prosecuting Attorney has not established adequate procedures for receipting, recording, and depositing monies. The clerks do not issue manual receipt slips for all monies received, do not always document adequate receipt information for all monies received, and do not always restrictively endorse money orders immediately upon receipt. The restitution clerk does not always deposit monies intact and timely, and does not always deposit restitution monies before disbursements are made to the applicable party. The restitution clerk also does not prepare monthly lists of liabilities for the restitution bank accounts, and consequently, liabilities are not compared to the reconciled bank balances. The Prosecuting Attorney has not adequately segregated accounting duties or performed supervisory reviews of accounting records. Restitution monies are not always timely disbursed and the Prosecuting Attorney has not established procedures to routinely follow up on outstanding checks.
Sheriff Commissary Account	The Sheriff has not adequately segregated accounting duties or performed supervisory reviews of accounting records relating to inmate monies. Office personnel do not prepare monthly lists of liabilities for the inmate account, and consequently, liabilities are not compared to the reconciled bank balances. The Sheriff's office has not turned over to the county treasury all profits earned on commissary and telephone card sales, inmate identification bracelet fees, and interest earned on the bank account. The Sheriff's office has not made adequate efforts to review and resolve old inmate commissary accounts. As of December 31, 2013, 357 inmates had inactive accounts totaling $3,571. Also, the Sheriff's office is collecting a $3 inmate identification bracelet fee that is not allowable by state law.
Sales Taxes	The county, as noted in our prior audit report, has exceeded the statutory maximum for general sales taxes allowed by Section 67.505, RSMo, by 1/2 of 1 percent. The county has imposed 2 sales taxes, totaling 1 percent, which exceeds the statutory maximum allowed. Additionally, the county has not properly reported property tax levy reductions to the State Auditor's office since 2009. The county has reported the sales tax rollback as a voluntary rollback.
Public Administrator's Annual Settlements	The Public Administrator does not timely file annual settlements, and 13 of the 14 settlements we reviewed were filed after the due date, including one settlement that was filed approximately 17 months after the due date.
Computer Controls	The County Commission has not established adequate password controls to reduce the risk of unauthorized access to computers and data. Employees of the County Collector's office and the County Clerk's office use the same shared passwords when accessing the computers in the respective offices. Sheriff's office employees are not required to change their password periodically and the passwords used to access the computers in the County Collector's office also are not required to be changed periodically.

Additional Comments

Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 15

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Scott County

We have audited certain operations of Scott County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones and Associates, Certified Public Accountants, was engaged to audit the financial statements of Scott County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

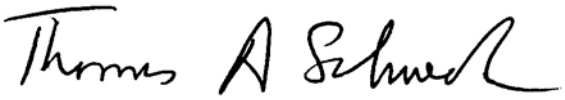
3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Scott County.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Robyn Vogt, M.Acct., CPA
In-Charge Auditor:	Tina Disney, M.Acct.
Audit Staff:	Albert Borde-Koufie, MBA
	Erica Schroer, MBA
	Keisha Williams
	Connor Dougan

1. Prosecuting Attorney Controls and Procedures

Despite similar concerns noted in our prior audits, significant weaknesses continue to exist in the Prosecuting Attorney's controls and procedures. With the exception of sections 1.3 and 1.4, we have reported similar findings related to the Prosecuting Attorney's office in one or more of our prior reports. Due to the concerns noted below, we were unable to determine if all monies were accounted for, deposited, and disbursed properly.

The Prosecuting Attorney's office collected bad check payment and fees, court-ordered restitution and fees, and delinquent taxes totaling approximately $169,700 for the year ended December 31, 2013.

1.1 Receipting, recording, and depositing monies

The Prosecuting Attorney has not established adequate procedures for receipting, recording, and depositing monies. The Prosecuting Attorney's office collects money orders for bad check payments and fees that are recorded and transmitted to the applicable party. Money orders are also collected for court-ordered restitution and fees, and these monies are recorded, deposited, and disbursed by check to the applicable party. We identified the following concerns:

- The clerks do not issue manual receipt slips for all monies received. The computerized accounting system has a function to issue pre-numbered receipt slips; however, the office does not use this function at the time receipts are collected. Instead, monies received for bad checks and restitution are not recorded in the computerized accounting system until monies are disbursed. In addition, case files do not always maintain the individual manual receipt logs used to record the monies received for that case. Since no complete record of receipts is maintained, the Prosecuting Attorney's office cannot reconcile receipts to deposits.

- The restitution clerk does not always deposit monies intact and timely. For example, monies collected on April 2, 2013, totaling $155, were not deposited until April 16, 2013, even though monies collected on April 3, 2013, were deposited on April 4, 2013. In addition, $800 collected on April 4, 2013, was not deposited until April 16, 2013, $200 collected on April 25, 2013, was not deposited until May 14, 2013, and $1,000 collected on June 13, 2013, was not deposited until July 3, 2013.

- The clerks do not always document adequate receipt information for all monies received. For example, monies deposited on March 7 and April 4, 2013, totaling $100 and $30, were not receipted or recorded in the computerized accounting system. Office personnel could not identify from whom these monies were received or to whom these monies should be disbursed. As a result, we could not determine if these monies were properly disbursed.

- The restitution clerk does not always deposit restitution monies before disbursements are made to the applicable party. For 4 of the 15 restitution cases reviewed, the clerk issued disbursements from the bank account before the corresponding receipts had been deposited. For example, $800 receipted on April 4, 2013, was disbursed on April 12, 2013, but not deposited until April 16, 2013, and $1,000 receipted on June 13, 2013, was disbursed on June 19, 2013, but not deposited until July 3, 2013.

- The clerks do not always restrictively endorse money orders immediately upon receipt.

To ensure all receipts are accounted for properly and timely, the Prosecuting Attorney should consider utilizing the receipt slip function of the computerized accounting system and record all receipts on the system immediately upon receipt. If the Prosecuting Attorney believes it is not practical to utilize this computerized function, other procedures should be implemented to record all receipts immediately upon receipt.

Failure to implement adequate receipting, recording, and depositing procedures increases the risk of loss, theft, or misuse of monies and the likelihood that errors will go undetected. Procedures should be established to ensure all monies received are properly receipted, promptly recorded, and deposited timely and intact.

1.2 Liabilities

The restitution clerk does not prepare monthly lists of liabilities for the restitution bank accounts, and consequently, liabilities are not compared to the reconciled bank balances. The Prosecuting Attorney has an old restitution bank account for cases prior to October 2013 and a new restitution bank account for cases as of October 2013. At our request, a list of liabilities was prepared for each account. For the old restitution account, identified liabilities totaled $11,641 at May 30, 2014. The reconciled bank balance was $31,315, leaving an unidentified balance of $19,674. For the new restitution account, identified liabilities totaled $10,298 at May 30, 2014. The reconciled bank balance was $6,768, indicating a shortage of $3,530. Monies in the restitution accounts include restitution monies and related fees, delinquent tax collections, and interest earned on bank balances.

Monthly lists of liabilities should be prepared and reconciled to cash balances to ensure records are in balance, errors are detected and corrected timely, and sufficient funds are available for payment of all liabilities.

1.3 Segregation of duties

The Prosecuting Attorney has not adequately segregated accounting duties or performed supervisory reviews of accounting records. All 3 office clerks issue manual receipt slips for monies received; however, the primary

accounting duties for bad check complaints and court-ordered restitution are divided between 2 clerks. One clerk is responsible for entering all information related to bad check complaints and payments (prior to charges being filed) in the computerized accounting system and for transmitting these payments and fees to the applicable party. A second clerk is responsible for entering all information related to court-ordered restitution (including bad checks filed with the court) and related payments into the accounting system, and disbursing these payments to the applicable party. This clerk is also responsible for performing bank reconciliations on the restitution bank accounts. The Prosecuting Attorney does not perform a documented supervisory review of the accounting records to ensure all monies received are properly recorded and transmitted/disbursed to the appropriate party.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, the Prosecuting Attorney should implement documented independent or supervisory reviews.

1.4 Disbursements

Restitution monies are not always timely disbursed. The Prosecuting Attorney's office generally does not disburse monies until restitution amounts owed are paid in full. As a result, some restitution monies are held for over one year before disbursement.

To adequately account for collections and reduce the risk of loss, theft, or misuse of funds, restitution disbursements should be made timely.

1.5 Outstanding checks

The Prosecuting Attorney has not established procedures to routinely follow up on outstanding checks. As a result, at May 31, 2014, 13 checks, totaling $1,706, had been outstanding for over a year in the old restitution account, with some checks dating back to 2011.

Proper follow-up procedures are necessary to prevent the accumulation of old outstanding checks and ensure monies are appropriately disbursed to the payee or as otherwise allowed by state law.

Recommendations

The Prosecuting Attorney:

1.1 Establish procedures to ensure all monies received are properly receipted, promptly recorded, and deposited timely and intact. In addition, ensure all money orders are restrictively endorsed immediately upon receipt.

1.2 Prepare a monthly list of liabilities for both restitution accounts and compare to the reconciled bank balances. Any differences should be

promptly investigated and resolved. Any unidentified monies should be disposed of in accordance with state law.

1.3 Adequately segregate accounting duties or ensure supervisory reviews of accounting records are performed and documented.

1.4 Disburse restitution receipts timely.

1.5 Develop procedures to routinely investigate outstanding checks. Old outstanding checks should be voided and reissued to payees that can be readily located. If the payee cannot be located, the amount should be disbursed in accordance with state law.

Auditee's Response

The Prosecuting Attorney provided the following written responses:

1.1 We have implemented your suggestions as agreed. All issues under this bullet have been addressed and modified in the computer system. We are scanning in every transaction.

1.2 We have implemented your suggestion as to managing the liabilities by hand based on the lack of software for the older bad check programs that are no longer supported by any software and we plan to reconcile liabilities to reconciled bank balances for both accounts.

1.3 We have implemented the suggestion as agreed.

1.4 The straight restitution cases and tax cases will be disbursed as the payments are processed with an eye toward efficiency. Generally, the bad check cases will be disbursed as payment has been made in full on a given check. Many times we will get in multiple small payments over a period of months for one check. Some of the checks paid are old and the business has already written them off as a loss for the year. The administrative time, processing costs of paperwork and checks, and mail costs do not support sending out small payments on multiple occasions. For instance, it is inefficient to send out multiple payments on small amounts costing the county $10 in costs when one complete payment may cost $2.50. This practice saves time, money, and eliminates confusion for both the staff and the merchant who question the staff on what the small payments are supposed to be applied to in their books. We continue to track all payments to the appropriate account.

1.5 We have sent the monies to the State Treasurer and plan to routinely review outstanding checks.

2. Sheriff Commissary Account

Accounting procedures and practices for the Sheriff's commissary account need improvement. The account is used for inmate monies, commissions earned on commissary and telephone card sales, inmate identification bracelet fees, and other miscellaneous receipts. Account deposits totaled approximately $122,000 for the year ended December 31, 2013.

2.1 Segregation of duties

The Sheriff has not adequately segregated accounting duties or performed supervisory reviews of accounting records relating to inmate monies. One clerk is responsible for maintaining accounting records, disbursing monies, and reconciling the bank account.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, the Sheriff should implement a documented independent or supervisory review to ensure bank records are in agreement with accounting records.

2.2 Liabilities

Office personnel do not prepare monthly lists of liabilities for the inmate account, and consequently, liabilities are not compared to the reconciled bank balances. At our request, a list of liabilities for the inmate account was prepared and identified liabilities totaled $34,671, at December 31, 2013. The reconciled bank balance was $41,537, leaving an unidentified balance of $6,866.

Monthly lists of liabilities should be prepared and reconciled to cash balances to ensure records are in balance, errors are detected and corrected timely, and sufficient funds are available for payment of all liabilities.

2.3 Profits, fees, and interest

The Sheriff's office has not turned over to the county treasury all profits earned on commissary and telephone card sales, inmate identification bracelet fees, and interest earned on the bank account. The Sheriff's office held approximately $20,200 in profits, fees, and interest in the inmate account as of December 31, 2013.

Section 221.102, RSMo (effective August 28, 2013), requires each county jail to keep revenues from its canteen or commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (profits) into the county Inmate Prisoner Detainee Security Fund. In addition, to adequately account for collections and reduce the risk of loss, theft, or misuse of funds, all remaining monies should be disbursed to the County Treasurer monthly.

2.4 Inmate commissary balances

The Sheriff's office has not made adequate efforts to review and resolve old inmate commissary accounts. As of December 31, 2013, 357 inmates had

inactive accounts totaling $3,571. These inmates were released from the county justice center, but did not claim the balance in their commissary accounts.

Follow up on inactive accounts is necessary to ensure monies are appropriately disbursed to the former inmates or as otherwise provided by state law. An attempt should be made to locate former inmates with commissary account balances. If the inmates cannot be located, or the check to the former inmate is not cashed, the Sheriff should dispose of the monies according to state law.

2.5 Inmate identification bracelet fees

The Sheriff's office is collecting a $3 inmate identification bracelet fee that is not allowable by state law. According to office personnel, the fee is collected from inmates at the time of booking and covers the cost of the bracelet, which is used to identify the inmates, as well as the cost of criminal record folders used to maintain an inmate's information. There is no statutory authority allowing the Sheriff to charge and collect such a fee at the time of booking.

Recommendations

The Sheriff:

2.1 Adequately segregate accounting duties or ensure supervisory reviews of accounting records are performed and documented.

2.2 Prepare a monthly list of liabilities for the inmate account and compare to the reconciled bank balance. Any differences should be promptly investigated and resolved. Any unidentified monies should be disposed of in accordance with state law.

2.3 Ensure existing and future commissary profits (including telephone card profits) not necessary to meet cash flow needs or current operating expenses are turned over to the County Treasurer for deposit into the Inmate Prisoner Detainee Security Fund. In addition, ensure all remaining monies are disbursed to the County Treasurer monthly.

2.4 Establish procedures to routinely review inactive accounts and timely disburse monies to former inmates. An attempt should be made to resolve unclaimed commissary balances. If the former inmates cannot be located, the monies should be disbursed in accordance with state law.

2.5 Discontinue charging and collecting the inmate identification bracelet fee at the time of booking.

Auditee's Response

The Sheriff provided the following written responses:

2.1 Corrective action has already been taken. Inmate fund bank statements are reconciled by the clerk and reviewed for accuracy by the office manager. The office manager signs off and dates the bank reconciliations upon approval. We implemented this practice in May before the audit team left Scott County.

2.2 Corrective actions have been implemented and the projected time frame for completion is December 31, 2014. This issue is due to an accounting software change to Archonix, an unidentified balance of $6,866 exists for the collection of monies for medical charges, telephone cards, e-cigs, inmate identification fees, and any prior booking negative balances, etc. The Archonix software lacked the proper tracking of inmate monies collected for these items. In an effort to resolve the tracking of these collected funds, we have worked hours with numerous Archonix employees requesting reports including detailed data of the funds. Archonix was UNABLE to resolve the accounting issues or provide the necessary reports forcing the Sheriff's office to return to the Keefe accounting software. Once the agreement was discontinued with Archonix, the company's assistance ceased, leaving us without the information we requested relating to inmate money collected for the above items. Our contact person with Keefe is continuing to work with us in an effort to assist with properly reconciling the unidentified balance to the best of her ability. The process has been time consuming because she travels and is not in the office weekly. The assistance she is providing goes above and beyond her regular job duties. Once this task is completed, she will provide us with a monthly report listing all liabilities to be used for reconciling cash balances. As you can see, we are working diligently to resolve this issue so that we can prepare these monthly lists and this recommendation will be implemented on a monthly basis.

2.3 All commissary commissions have been turned over to the county. All medical fees and fees collected for damages have been turned over to the county. Money collected for 2014 inmate identification fees, bank interest, and telephone card commissions remain in the inmate fund account to allow for sufficient cash flow funds for payment of all liabilities. Corrective actions for the remaining fees have been implemented.

2.4 Upon inmate release or transfer to another facility, any positive balance over $1 left on account is mailed to the address given by the inmate or forwarded to the transferred facility. If the check is returned for a bad address, a phone call is made to the number

provided by the inmate in an attempt to forward the check to the correct address. If no contact can be established, the inmate's funds remain in his account to be used if he returns to our facility. Any inmate money less than $1 is available for pick up in the office during normal business hours. We will establish procedures to routinely review inactive accounts and for any inmates not located, monies will be disbursed in accordance with state law.

2.5 We will look into changing the charging of this fee and consider alternative means to collect this fee as a cost of incarceration.

3. Sales Taxes

As noted in our prior audit report, the county exceeded the statutory maximum for general sales taxes allowed by Section 67.505, RSMo, by 1/2 of 1 percent. In addition, the county has not properly reported property tax levy reductions to the State Auditor's office for several years.

3.1 General sales taxes

The county has imposed the following 2 sales taxes, totaling 1 percent, which exceeds the statutory maximum allowed.

- In November 1979, voters approved a 1/2 of 1 percent general sales tax under Section 67.505, RSMo. The General Revenue Fund received approximately $1.8 million in 2013 from this tax.

- In February 2009, voters approved an additional 1/2 of 1 percent general sales tax under Section 67.505, RSMo. This sales tax has an expiration date of December 31, 2016, and was to replace the expired law enforcement sales tax. The General Revenue Fund received approximately $1.8 million in 2013 from this tax. Most of this sales tax is used for law enforcement.

The County Commission orders authorizing each of the issues to be placed on the ballot cited Section 67.505, RSMo, as the statutory authority. This section allows counties to impose a rate of 1/4, 3/8, or 1/2 percent. Although there is no provision against having two sales taxes under this section, the total sales tax cannot exceed 1/2 of 1 percent. Attorney General's Opinion No. 61, 1989 to Thompson, addresses a different but similar county sales tax law and states a county cannot exceed the 1/2 of 1 percent tax rate.

The prior audit recommended the County Commission consult with legal counsel to review the various sales taxes imposed and determine which are valid and what further action to take. The County Commission responded that the ballot language had been reviewed by legal counsel. However, the legal opinion did not address if the second sales tax complied with state law. The County Commission indicated voters will be asked to renew the second general sales tax in 2015.

Prior to submitting any future sales taxes to voters for approval, the county should review the current sales taxes imposed, research the statutory requirements for current and proposed sales taxes, and determine an allowable sales tax statute to ensure the sales taxes do not exceed statutory limits.

3.2 Property tax levy reductions

The county has not properly reported property tax levy reductions to the State Auditor's office since 2009. Included in the ballot language for the general sales taxes discussed in section 3.1, were provisions to reduce property taxes by a percentage of sales taxes collected. With the passage of these ballot measures, the county agreed to reduce the General Revenue property tax levy by 100 percent of sales tax collected. However, the county has reported this sales tax rollback reduction as a voluntary rollback.

Section 67.505, RSMo, requires the county to reduce property taxes for a percentage of sales taxes collected. The general sales tax passed in November 1979 included a provision to reduce property taxes by 50 percent of sales tax collected. The second general sales tax passed in February 2009 included a provision to reduce property taxes by 100 percent of sales tax collected.

The county is required to certify to the State Auditor's office the annual property tax levy including the amount the levy is reduced for sales tax collections, as well as voluntary reductions, if any. In 2009, the county incorrectly reported the reduction as voluntary instead of as a sales tax reduction. In 2010, the county certified a voluntary reduction and according to Section 137.073.5(4), RSMo (amended in 2008), a voluntary reduction taken in a non-assessment year (even year) results in a reduced tax rate ceiling during the subsequent reassessment year (odd year), causing the tax rate ceiling to be zero for the county in 2011 and thereafter. The county was apparently unaware the tax rate ceiling had been reduced to zero starting in 2011. The County Clerk believed that by reporting a tax rate of zero, the levy was being reduced for a sales tax reduction; however, the tax rate certification letter issued by the State Auditor's office indicated no tax rate ceiling, no sales tax reduction, no voluntary reduction, and a certified tax rate of zero for 2011, 2012, and 2013. Section 137.073.5(4), RSMo, allows the county to reinstate its tax rate ceiling and Section 137.073.6(3), RSMo (effective September 11, 2013), allows the county to submit amended tax rate forms to the State Auditor's office. After we discussed these concerns with county officials, the County Clerk took the necessary steps to correct the tax rate forms and reinstate the county's tax rate ceiling.

To ensure property tax levies are properly set and property tax rate ceilings are maintained, the County Commission and County Clerk should ensure property tax levy reductions are accurately calculated, reported, and certified. Documentation of tax rate setting decisions is important to

demonstrate compliance with statutory provisions and ballot language and serve as a reference tool should questions arise.

Recommendations

The County Commission and County Clerk:

3.1 Review current sales taxes imposed, research the statutory requirements for current and proposed sales taxes, and determine an allowable sales tax statute to ensure sales tax levies do not exceed statutory limits prior to submitting any future sales tax proposals to voters for approval.

3.2 Properly report property tax rate reductions (sales tax or voluntary). During the tax rate setting process, the County Commission and County Clerk should ensure tax rate information reported back to the county in the State Auditor's office certification letter is consistent with expectations and, if not, promptly follow up on any discrepancies.

Auditee's Response

The County Commission and County Clerk provided the following written responses:

3.1 As stated in a past audit concerning the sales tax issue, the County Commission stands strong that the voters approved the sales tax as presented. The taxpayers have received a zero tax rate for County Real Estate and Personal Property taxes as stated in the ballot question. In 2015 the County Commission is planning to ask the voters to continue the 1/2 cent sales tax for a zero tax rate for the county taxes under Section 67.547, RSMo.

3.2 The county has not been charging a tax levy for County Real Estate and Personal Property since the sales tax was passed in 2009. The tax rate has been reported to be zero but was reported as a voluntary reduction instead of a sales tax reduction (rollback). The outcome is the same of not charging any county taxes. Tax rate forms have been resubmitted to the Missouri State Auditor and future reports will be submitted as recommended.

4. Public Administrator's Annual Settlements

The Public Administrator does not timely file annual settlements. We reviewed settlements filed for 14 of the 208 wards or estates and noted annual and final settlements for 13 of the 14 wards or estates were filed after the Probate Clerk's due date, including one final settlement that was filed approximately 17 months after the due date. The Probate Clerk sends a reminder letter to the Public Administrator 30 days before a settlement is due. The Probate Clerk will send a second reminder if the settlement is not filed by the due date. Despite these procedures, settlements have been filed late.

Sections 473.540 and 475.270, RSMo, require the Public Administrator to file an annual settlement with the court for each ward or estate. Timely settlements are necessary for the court to properly oversee the administration of cases and reduce the possibility that loss, theft, or misuse of funds will go undetected.

Recommendation

The Public Administrator ensure annual settlements are filed timely.

Auditee's Response

The Public Administrator provided the following response:

Due to unavoidable circumstances, I was behind on the annual settlements. I am now caught up and future settlements will be completed timely.

5. Computer Controls

The County Commission has not established adequate password controls to reduce the risk of unauthorized access to computers and data. Employees of the County Collector's office and the County Clerk's office use the same shared passwords when accessing the computers in the respective offices. Sheriff's office employees are not required to change their password periodically and the passwords used to access the computers in the County Collector's office also are not required to be changed periodically.

Passwords are required to authenticate access to computers. The security of a computer password is dependent upon keeping passwords confidential. However, since passwords are shared and do not have to be periodically changed, there is less assurance passwords are effectively limiting access to computers and data files to only those individuals who need access to perform their job responsibilities. Passwords should be unique and confidential and changed periodically to reduce the risk of a compromised password and unauthorized access to and use of computers and data.

A similar condition was noted in our prior audit report.

Recommendation

The County Commission require unique passwords for each employee that are confidential and periodically changed to prevent unauthorized access to the county's computers and data.

Auditee's Response

The County Commission provided the following written response:

These issues were resolved immediately. The County Commission will add the recommendation of the State Auditor of unique passwords for each employee and being periodically changed to the County Personnel Policy.

Scott County
Organization and Statistical Information

Scott County is a county-organized, third-class county. The county seat is Benton.

Scott County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 108 full-time employees and 7 part-time employees on December 31, 2013.

In addition, county operations include the Senate Bill 40 Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Jamie Burger, Presiding Commissioner	$	38,229
Dennis Ziegenhorn, Associate Commissioner		35,820
Donnie Kiefer, Associate Commissioner		35,820
Tara L. Mason, Recorder of Deeds		54,270
Rita Milam, County Clerk		54,270
Paul R. Boyd, Prosecuting Attorney		116,858
Rick Walter, Sheriff		60,303
Glenda Enderle, County Treasurer		54,270
Scott C. Amick, County Coroner		19,302
Pam Dirnberger, Public Administrator		54,270
Mark Hensley, County Collector (1), year ended February 28,	62,362	
Teresa Houchin, County Assessor, year ended August 31,		54,270

(1) Includes $8,092 of commissions earned for collecting drainage taxes.

Thomas A. Schweich

Missouri State Auditor

Thirty-Ninth Judicial Circuit

City of Kimberling
Municipal Division

December 2014

Report No. 2014-128

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Thirty-Ninth Judicial Circuit, City of Kimberling Municipal Division

Accounting Controls and Procedures	The municipal division does not have an adequate segregation of accounting duties or independent review processes in place. The Court Clerk does not adequately monitor accrued costs owed to the municipal division and does not utilize a system generated report of balances due to review accrued costs. We determined 7 cases had differeneces between the balances reported in the manual case file and the balances shown in the computerized system. The municipal division does not reconcile manual receipt slips issued to manual receipt slips recorded in the computerized system. Also, the Court Clerk, who handles and has access to monies, is not covered by the city's bond.
Municipal Division Procedures	The Prosecuting Attorney does not always sign tickets, does not sign any plea agreements to amend violations submitted to the municipal division, and does not clearly document his approval of dismissed tickets. The Court Clerk is allowed to dismiss traffic violations issued for no proof of insurance but there is no indication the dismissals are reviewed by the Prosecuting Attorney to ensure their propriety. The municipal division does not maintain case records in a complete and accurate manner, and assesses a potentially improper $25 warrant fee for each warrant issued. According to municipal division records, warrant fees collected totaled approximately $1,500 during the year ended December 31, 2013. The municipal division has not provided a report of traffic violation tickets and associated fines and court costs revenues to the city for inclusion in the calculation and reporting required in the city's annual financial report filed with the State Auditor's office.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Management Advisory Report - State Auditor's Findings
1. Accounting Controls and Procedures 4
2. Municipal Division Procedures 6

Organization and Statistical Information 10

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Thirty-Ninth Judicial Circuit
and
Municipal Judge
and
Honorable Mayor
and
Members of the Board of Aldermen
City of Kimberling, Missouri

We have audited certain operations of the City of Kimberling Municipal Division of the Thirty-Ninth Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

3. Evaluate the municipal division's compliance with certain court rules.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) noncompliance with court rules. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Kimberling Municipal Division of the Thirty-Ninth Judicial Circuit.

A petition audit of the City of Kimberling, fulfilling our obligations under Section 29.230, RSMo, is still in process, and any additional findings and recommendations will be included in the subsequent report.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Randall Gordon, M.Acct., CPA, CGAP
Audit Manager:	Deborah Whitis, MBA, CPA, CIA, CFE
In-Charge Auditor:	Michelle Crawford, M.Acct., CIA
Audit Staff:	Amber M. Carlile
	Marian Seevers, M.Acct.

1. Accounting Controls and Procedures

Accounting controls and procedures need improvement. During the year ended December 31, 2013, the municipal division collected approximately $47,000 in fines and court costs and approximately $8,000 in bonds.

The municipal division has experienced significant personnel changes, and as a result, the current Court Clerk assumed responsibilities after the audit period. There were two different court clerks during 2013, and three different court clerks during 2014, as of our review in August 2014. In addition, the city's Accounting Clerk served as interim Court Clerk for approximately 3 months during 2014.

1.1 Segregation of duties

The municipal division does not have an adequate segregation of accounting duties or independent review processes in place. The Court Clerk is responsible for all duties related to collecting and recording monies, posting fines and court costs into the computerized system, and preparing deposits and disbursements. Neither the Municipal Judge nor other personnel independent of the cash custody and record-keeping functions provide adequate supervision or review of the work performed by the Court Clerk.

To reduce the risk of loss, theft, or misuse of funds, internal controls should provide reasonable assurance all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by segregating duties to the extent possible. If proper segregation of duties is not possible, the Municipal Judge should establish procedures to ensure a documented independent review of accounting records is performed.

1.2 Accrued costs

The Court Clerk does not adequately monitor accrued costs owed to the municipal division, including fines and court costs, incarceration costs, and court-ordered restitution. A computerized system tracks accrued costs and can produce a report of balances due. The Court Clerk has not used this report to review accrued costs because she was not aware of it until we discussed the report with her. Instead, the Court Clerk performs a monthly review of balances due as recorded in the manual case files. At our request, the Court Clerk printed an accrued costs report, and as of June 19, 2014, accrued costs totaled approximately $24,000.

We reviewed 10 accrued costs cases and determined 5 cases had differences between the balances reported in the manual case file and the balances shown on the computerized system report, resulting in the computerized system balances being understated by $743. A separate review of tickets issued identified 2 additional cases where the balances due in the computerized system were understated by $74.

Proper and timely monitoring of accrued costs is necessary to help ensure unpaid amounts are collected and proper follow up action is taken for non-payment. In addition, proper monitoring is necessary to provide information

to the Municipal Judge and determine appropriate handling when amounts are deemed uncollectible.

1.3 Manual receipt slips

The municipal division does not reconcile manual receipt slips issued to manual receipt slips recorded in the computerized system. Prior to July 9, 2014, the Court Clerk issued manual receipts slips during court and later recorded the receipts into the computerized system and prepared the deposit for transmittal to the City Clerk. Neither the municipal division nor city personnel reconciled manual receipt slips issued to the system generated receipt reports and the deposits. As a result, there is no assurance all monies collected were properly recorded in the system and deposited.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, procedures should be established to account for manual receipt slips and verify receipts have been recorded in the computerized system and deposited.

1.4 Court Clerk bonding

The Court Clerk, who handles and has access to monies, is not covered by the city's bond. Failure to properly bond individuals who have access to funds exposes the municipal division to risk of loss.

Recommendations

The City of Kimberling Municipal Division:

1.1 Segregate accounting duties to the extent possible. If it is not possible to segregate duties, documented periodic reviews of municipal division records should be performed by a person independent of accounting functions.

1.2 Establish procedures to ensure the accuracy of the accrued costs report, and properly follow up on amounts due.

1.3 Ensure manual receipt slips are recorded in the computerized system and deposited.

1.4 Maintain bond coverage for all personnel with access to municipal division monies.

Auditee's Response

The City of Kimberling Municipal Division provided the following written responses:

1.1 Currently, duties are separated. The Deputy Clerk is the primary collector of all monies, although monies are sometimes collected by the Finance Clerk or the Court Clerk. The Court Clerk posts fines and court costs into the computer system and prepares deposits and disbursements. All deposits and supporting records are reviewed by the City Administrator prior to deposit. All disbursements are

reviewed by the City Administrator, entered into the payment system by the Finance Clerk, approved by the Board of Aldermen, and signed by the City Administrator and Mayor.

1.2 All accrued costs (receivables) are tracked monthly in the computer system and presented to the City Administrator for review to ensure amounts are collected and follow up action is taken for non-payment. Receivables are balanced against amounts assessed and monies received on a monthly basis.

1.3 All fines and court costs are entered into the computer system and manual receipt slips are only used when the system is down. If the system is down during court, manual receipt slips are then entered into the system as soon as the system is available. The City Administrator will review manual receipt slips issued to the entries into the computer system during his review of deposits. Additionally, the Court Clerk is currently reviewing each manual receipt slip issued by prior court clerks and computer system receipt entries to ensure all monies are correctly accounted for.

1.4 Currently, the Court Clerk and other staff members handling money are not bonded. The city will ensure that all such employees, including the Court Clerk, will be bonded as soon as possible.

2. Municipal Division Procedures

Municipal division procedures need improvement. Audit work determined the need for better records and monitoring procedures by the municipal division and city to ensure compliance with state law.

2.1 Prosecutor approval

The Prosecuting Attorney does not always sign tickets and does not sign any plea agreements to amend violations submitted to the municipal division. In addition, the Prosecuting Attorney's approval of dismissed tickets is not clearly documented.

Our review of 40 tickets identified 3 tickets filed with the court but not signed by the Prosecuting Attorney. We also identified 2 plea agreements to amend charges for traffic violations printed on plain paper and not signed by the Prosecuting Attorney. The Prosecuting Attorney prepares plea agreements in a standard word processor and his secretary electronically submits them to the Court Clerk for printing and filing in the case files. Due to the generic nature of the plea agreements and lack of signature, there is less assurance the Prosecuting Attorney authorized all plea agreements.

Additionally, our review of 40 tickets identified 8 dismissed tickets (7 for no insurance and 1 for failure to stop at a stop sign). The Court Clerk is allowed to nolle pros (dismiss) traffic violations issued for no proof of insurance if the defendant later provides proof of insurance. It is not

possible to determine which charges were dismissed by the Prosecuting Attorney or dismissed by the Court Clerk and there is no indication charges dismissed by the Court Clerk are reviewed by the Prosecuting Attorney to ensure their propriety.

Supreme Court Rule 37.35 states citations shall be in writing and signed by the prosecutor and filed with the municipal division. To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, a procedure should be established to ensure amended charges and dismissals are approved and signed by the Prosecuting Attorney indicating his review and approval.

2.2 Case records

The municipal division does not maintain case records in a complete and accurate manner. The Court Clerk could not locate 2 case files requested during the audit and entries in the computerized system are not always accurate. For 3 of 40 cases reviewed during our test of tickets issued, the fines and court costs assessed in the computerized system did not agree to the fines and court costs established for the violations bureau or the Municipal Judge's orders due to data entry errors. We identified additional differences between case files and computer system records in our review of accrued costs (see MAR finding number 1.2).

Supreme Court Operating Rule No. 8 requires all financial records be maintained for 5 years or until completion of an audit. Retention of applicable records is necessary to properly account for the municipal division's financial activity. In addition, failure to implement adequate case entry procedures increases the risk that loss, theft, or misuse of funds will go undetected and court records will contain errors.

2.3 Warrant fee

The municipal division assesses a potentially improper $25 warrant fee for each warrant issued. According to municipal division records, warrant fees collected totaled approximately $1,500 during the year ended December 31, 2013. Per Section 479.260, RSMo, a municipality may by ordinance provide for court fees pursuant to sections 488.010 to 488.020, RSMo. However, there is neither a city ordinance nor statutory provision that authorizes the municipal division to assess the warrant fee. There is also no statutory provision expressly prohibiting such a fee.

2.4 Monitoring of excess revenues

The municipal division has not provided a report of traffic violation tickets and associated fines and court costs revenues to the city for inclusion in the calculation and reporting required in the city's annual financial report filed with the State Auditor's office (SAO).

The municipal division does not have procedures in place to identify traffic violation tickets and the associated fines and court costs collected and transmitted to the city. This information is needed by the city to calculate the percent of annual general operating revenue from fines and court costs

related to traffic violations, determine whether excess revenues should be distributed to the state Department of Revenue (DOR), and provide an accounting of the percent in its annual financial report as required by state law. The city's audited financial report for the year ended December 31, 2013, was timely filed with the SAO, but did not provide an accounting of the percent. With the completion of its current year (2014), the city will again be required to report the percent of annual general operating revenue from fines and court costs related to traffic violations in its annual financial report. Thus, the municipal division needs to establish procedures and records to identify applicable traffic violations and the related fines and court costs revenues to assist the city in complying with state law.

Effective August 28, 2013, Section 302.341.2, RSMo, was amended, reducing the threshold for remitting excess revenues to the state, and requiring cities to provide an accounting of the percent of annual general operating revenue from fines and court costs in its annual financial report submitted to the State Auditor's office as required by Section 105.145, RSMo. Section 302.341.2, RSMo, further provides that a city that is noncompliant with the law ". . . shall suffer immediate loss of jurisdiction of the municipal court of said city . . . on all traffic-related charges until all requirements of this section are satisfied."

Recommendations

The City of Kimberling Municipal Division:

2.1 Ensure the Prosecuting Attorney signs all tickets and reviews and approves all amended and dismissed tickets.

2.2 Ensure necessary records are appropriately retained and case activity is recorded accurately in the computerized system.

2.3 Work with the city and legal counsel to reevaluate the warrant fee and the authority to assess the fee. If determined appropriate, the municipal division should work with the city and legal counsel to establish an ordinance authorizing the fee.

2.4 Develop procedures and records to identify applicable traffic violations and the associated fines and court costs revenues and provide this information to the city.

Auditee's Response

The City of Kimberling Municipal Division provided the following written responses:

2.1 Going forward, all tickets to be filed with the court will be signed by the Prosecuting Attorney. The Prosecuting Attorney will also approve all tickets he amends or dismisses. Any "no proof of

insurance" tickets dismissed by the Court Clerk will be independently verified by the City Administrator monthly.

2.2 A large cause of this issue has been turnover in the court clerk position. Our current Court Clerk has been with the city for six months and will be promoted to full-time status at the first of the year. Her records maintenance skills are considerable, and the city is confident that this issue will be resolved. Moreover, the city will independently audit case records annually in the future to ensure compliance.

2.3 Until an ordinance authorizing this fee is located, no warrant fee will be assessed.

2.4 The Court Clerk will differentiate between income from traffic tickets and other tickets and report this information to the city. The total traffic ticket revenues will be placed on the city's annual financial report along with a calculation of the ratio of traffic ticket revenue to general revenue.

Thirty-Ninth Judicial Circuit
City of Kimberling Municipal Division
Organization and Statistical Information

The City of Kimberling Municipal Division is in the Thirty-Ninth Judicial Circuit, which consists of Stone, Barry and Lawrence Counties. The Honorable Jack Goodman serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and court costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At December 31, 2013, the municipal division employees were as follows:

Title	Name
Municipal Judge	Mark Rundel
Court Clerk	Kimberly Walden[1]

[1] Kimberly Walden resigned in January 2014 and Amy Carroll was hired in April 2014.

Financial and Caseload Information

	Year Ended December 31, 2013
Receipts	$47,429
Number of cases filed	507

Missouri State Auditor

Dallas County

December 2014

Report No. 2014-129

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Dallas County

Sheriff Accounting Controls and Procedures	Controls and procedures for receipting, recording, transmitting, and depositing bond monies are poor. As a result, the Sheriff's office could not account for some cash bonds totaling $1,055. The Sheriff has not established adequate segregation of accounting duties or review and approval procedures. Receipting and depositing procedures performed by the Chief Administrator are in need of improvement, and the controls and procedures for receipting and recording concealed carry weapon fees by the Chief Deputy are not sufficient. In January 2014, the Sheriff selected a vendor to provide commissary items to inmates, but did not enter into a written agreement with the vendor. In addition, the Sheriff does not properly control his signature stamp.
Sheriff Seized Property and Inmate Monies	As noted in our prior 2 audits, the Sheriff has not implemented procedures to periodically review cases and dispose of related seized cash. In addition, a physical inventory of all seized property has not been conducted since January 2011. Also, property intake forms completed when an inmate is booked into the jail are not prenumbered and both the inmate and officer did not always sign them at the time of arrest or release. The Sheriff did not handle inmate monies consistently.
County Procedures	County employees prepare multiple records regarding fuel use, but do not always complete the records properly and use them to reconcile to fuel billings. The Sheriff and 3 of his deputies use their county vehicles to transport family members to work, school, and daycare, against county policy. In addition, 20 employees of the Sheriff's office carried forward a total of 1,828 in vacation hours from December 2013 to January 2014, and the county had no documentation approving the carryover of this leave.
County Assessor Controls and Procedures	County Assessor's office personnel issue unofficial generic receipt slips rather than official prenumbered receipt slips for plat book receipts, and receipt slips are not issued for other types of monies received. The method of payment is not always indicated on the receipt slips. Our review of receipts and transmittals identified $60 in cash received that was apparently not transmitted to the County Treasurer. The County Assessor's office also does not prepare monthly reports of fees as required by law.
Prosecuting Attorney Controls and Procedures	The Prosecuting Attorney's clerk does not timely transmit bad check and criminal restitution to victims and bad check fees to the County Treasurer. The Prosecuting Attorney has not established adequate procedures to ensure charges are filed timely with the court for unresolved bad check complaints. Additionally, the Prosecuting Attorney's office does not generate a monthly list of unpaid bad checks and restitution, and is not proactive in identifying cases with unpaid receivables.

Public Administrator Controls and ProceduresPublic Administrator Controls and Procedures	The Public Administrator does not adequately review the annual settlements prepared by attorneys, and she filed some incomplete or inaccurate annual settlements filed with the Associate Circuit Court. The Associate Circuit Court does not perform sufficient reviews of the annual settlements, and as a result, the same errors and omissions also went undetected by the court.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.* However, the audit revealed serious shortcomings with the Sheriff's office.

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 20

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Dallas County

We have audited certain operations of Dallas County in fulfillment of our duties under Section 29.230, RSMo. In addition, Nichols, Stopp & VanHoy, LLC, Certified Public Accountants, was engaged to audit the financial statements of Dallas County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Dallas County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Pamela Allison Tillery, CPA
In-Charge Auditor:	Roberta Bledsoe
Audit Staff:	Albert Borde-Koufie, MBA
	Katelyn Crosson
	Alex R. Prenger, M.S.Acct., CPA
	Terese Summers, MSAS, CPA

1. Sheriff Accounting Controls and Procedures

Significant weaknesses exist in accounting controls and record-keeping procedures in the Sheriff's office. The Sheriff's office processed approximately $132,000 in civil and criminal process fees, concealed carry permits, bonds, and other miscellaneous receipts during 2013.

1.1 Bond monies

Controls and procedures for receipting, recording, transmitting, and depositing bond monies are poor. As a result, the Sheriff's office could not account for some cash bonds. Deputies or jailers collect cash bonds, issue bond receipt slips, and prepare the related bond forms and booking reports. The deputies or jailers slide the bond monies and the bond form under the Chief Deputy's office door. The Chief Administrator obtains the bond monies and bond form for processing. The original bond form is filed with the court and the Chief Administrator makes a copy for her records.

- Cash bonds totaling $1,055 were not deposited. A review of the copy of the related receipt slips showed the same former jailer issued the receipts for these bonds in September 2012 and September 2013, and someone marked void in ink on the carbon copies after issuance. Also, the original (top) copies of the receipt slips and the related bond forms were not retained.

  We notified the Sheriff of our concerns on June 12, 2014, and he contacted the Missouri State Highway Patrol (MSHP) to investigate possible unaccounted for monies. We provided requested information to the MSHP on September 17, 2014. Due to poor records, the MSHP could not determine if there was criminal activity.

- Bond forms are not prenumbered and voided bond forms are not retained. Office personnel indicated it is the Sheriff's office practice to shred voided bond forms.

- Deputies or jailers did not prepare booking reports for 6 defendants arrested even though bond receipt slips were issued for cash bonds totaling $1,097.

- Documentation is not maintained to support the transmittal of bond monies from deputies and jailers to the Chief Administrator.

  The Chief Administrator did not always deposit bond monies intact and timely. For example, receipt number 2293 was issued on January 31, 2014, for a $200 cash bond, but was not deposited until February 5, 2014, while receipt number 2295 was issued on February 2, 2014, and was deposited on February 3, 2014. In another example, a $1,000 cash bond received on October 3, 2013, was held and not deposited until October 7, 2013. These examples are exceptions to the office's typical practice to deposit more timely. Because these monies were held for

more than the typical timeframe prior to deposit, multiple individuals handled these monies without adequate transmittal records, and records were not sufficient in some cases, these monies are at greater risk of loss, theft, or misuse.

Properly receipting, recording, transmitting, and depositing bond monies is necessary to ensure receipts are adequately safeguarded and to reduce the risk of loss, theft, or misuse of funds going undetected.

1.2 Segregation of duties

The Sheriff has not established adequate segregation of accounting duties or review and approval procedures. The Chief Administrator performs the duties of receiving, recording, depositing, and disbursing monies, and preparing month-end bank reconciliations for the Sheriff's 2 bank accounts (fee and inmate/commissary account). In addition, the Chief Administrator is an approved signer on the Sheriff's bank accounts that require only 1 signature on checks. Neither the Sheriff nor other office personnel perform a documented review of accounting and bank records or complete a comparison of monies received to those deposited.

Proper segregation of duties helps ensure transactions are accounted for properly and assets are adequately safeguarded. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of accounting and bank records are essential.

1.3 Receipting and depositing procedures

Receipting and depositing procedures performed by the Chief Administrator need improvement. The method of payment (cash, check, or money order) is not recorded on receipt slips, and as a result, the composition of receipts is not reconciled to the composition of deposits. In addition, the Chief Administrator does not include an itemized listing of cash, check, and money orders on deposit slips. Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected and accounting records will contain errors.

1.4 Concealed carry weapon fees

Controls and procedures for receipting and recording concealed carry weapon (CCW) fees by the Chief Deputy are not sufficient. The Chief Deputy does not issue prenumbered receipt slips for CCW permits (new permits and renewal permits). In addition, the original receipt number issued for a new permit is used again for the renewal permit, and as a result, receipt slips for renewal permits are not issued in sequential order. The Chief Deputy also did not issue receipt slips for some CCW permits, and the method of payment (cash, check, or money order) is not always recorded on the related receipt slips. Properly receipting and recording CCW fees is necessary to ensure receipts are adequately safeguarded and to reduce the risk of loss, theft, or misuse of funds going undetected.

1.5 Written agreements

In January 2014, the Sheriff selected a vendor to provide commissary items to inmates, but did not enter into a written agreement with the vendor. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing.

1.6 Signature stamp

The Sheriff does not properly control his signature stamp. He allows the Chief Administrator to apply the signature stamp to timesheets documenting his supervisory approval, but does not subsequently review use of the stamp.

The Chief Administrator used the Sheriff's signature stamp to approve 12 of 18 of her monthly timesheets from January 2013 to June 2014, and the Sheriff did not document a subsequent review of these timesheets. Additionally, in August 2013, the Chief Administrator used the Sheriff's signature stamp to approve her request for payment of 100 hours of compensatory time, and in December 2013, the stamp was used to approve a deputy's request for payment of 95 hours of compensatory time.

Allowing employees to apply a signature stamp to their timesheet and payment requests reduces controls over payroll and could lead to improper payroll claims. If the Sheriff is unavailable to sign timesheets or other payroll records, he should subsequently document his review of documents approved using his signature stamp.

Similar conditions previously reported

Conditions similar to points 1.2, 1.4, and 1.5 were noted in our prior audit report.

Recommendations

The Sheriff:

1.1 Should ensure all copies of voided receipt slips are retained, the numerical sequence of receipt slips is accounted for properly, prenumbered bond forms are issued, retained, and accounted for properly; the transmittal of bond monies between persons is documented, and bond monies are deposited intact and timely.

1.2 Segregate accounting duties to the extent possible or ensure adequate independent or supervisory reviews of accounting and bank records are performed and documented.

1.3 Ensure the Chief Administrator issues receipt slips with the method of payment documented, reconciles the composition of receipt slips to the composition of deposits, and maintains an itemized list of receipts included in deposits.

1.4 Issue official prenumbered receipt slips with the method of payment documented for CCW fees, and reconcile the composition of receipt slips to the composition of deposits.

1.5 Enter into written agreements defining services provided and benefits received.

1.6 Limit use of the signature stamp and document a subsequent review of the documents approved using the signature stamp.

Auditee's Response

The Sheriff provided the following written response:

1.1 I, Sheriff Rackley, have reviewed all procedures for the receipt and handling of bond monies, which have been in place for my office and previous Sheriffs.

In regards to the missing receipts, I have turned over the findings of the Auditor's office to the Missouri State Highway Patrol – Division of Drug and Crime Control (DDCC). DDCC and I have followed up with the affected arrestee and no documentation has been found to substantiate that any bond monies were missing. Since the discovery of the missing original receipts, no receipt is to be written until monies are received and confirmed by 2 employees. It was also the practice of the Sheriff's office, if a receipt was voided, the original would be shredded and the yellow carbon copy was retained and "void" written across the receipt in an effort to avoid the original being issued. All of the yellow voided carbon copy receipts were still intact in the receipt book(s). New receipt books have been purchased that are numbered for tracking purposes.

The failure of my deputies to book subjects into the jail on 6 occasions is not acceptable and is a mistake that can't be made in the future. By reviewing daily jail bookings, bonds received and warrants served and ongoing training, this issue has been remedied. It was my review and finding that all bond monies were accounted for and subjects who were arrested and bonded were properly receipted for their monies and the appropriate courts were properly notified of the receipt of the bond monies.

I reviewed time sheets of the Chief Administrative Officer, dating from September 2013 to February 2014, in review of the bond receipts. Bond receipt number 2293 was dated January 31, 2014, and was in the Jail Administrator's office until being turned over to the Chief Administrative Officer on February 4, 2014, and subsequently deposited on February 5, 2014. Bond receipt number 2295 was dated Sunday, February 2, 2014. The Chief

Administrative Officer subsequently deposited the monies on Monday, February 3, 2014. Bond receipt number 2213 was received on Thursday, October 3, 2013, after the Chief Administrative Officer had left for the day. The monies were not received and deposited by the Chief Administrative Officer until October 7, 2013, due to sick and scheduled days off.

Out of the hundreds of bonds in excess of $200,000 the Sheriff's office processed over the audited years, not once were there monies unaccounted for. Delays in depositing any funds the Sheriff's office is in receipt were attributed to scheduled days off and unexpected sick or personal days of the Chief Administrative Officer. It is my finding that all bond monies were deposited in a timely manner. All bond monies were placed in the Chief Deputy's locked office, with jailers sometimes mistakenly placing bond monies in the Jail Administrator's locked office, subsequently received by the Chief Administrative Officer and then deposited.

The Sheriff's office has discarded all previous receipt books. At the recommendation of the Auditor's office and to come into compliance with the recommendation, I have purchased numbered receipt books and a drop safe and am accounting for the numerical sequence of receipt slips issued. I have also purchased prenumbered bond forms and am ensuring the numerical sequence of all bond forms is accounted for and copies of all voided bond forms are retained. During the audit, procedures were changed and all receipted monies are now placed in a secure drop safe that is only accessed by the Chief Administrative Officer and Jail Administrator and the receipts are signed by the Chief Administrative Officer when monies are receipted from the drop safe.

1.2 *The Sheriff's office is a small office with only one person assigned to the administration of the office, the Chief Administrative Officer. All other staff are assigned multiple duties to include but not limited to jail, inmate food, cleaning, courts, transports, civil service, Missouri Uniform Law Enforcement System (MULES) operations, patrol and investigations.*

The Chief Administrative Officer is responsible for all of the accounting and personnel management of the office. I do review from time to time the work that is completed by the Chief Administrative Officer and have found the accounting and personnel management to be completed properly. The Chief Administrative Officer and I do assign tasks to other personnel from time to time to assist in the accounting of the office.

The Chief Administrative Officer, in my review is the position and person best trained and equipped to handle the accounting and personnel management of the office on mine and the county's behalf. I will document periodic reviews of the Chief Administrative Officer's work, and complete a comparison of monies received to those deposited.

1.3 *I have reviewed the procedures for receipting and depositing monies, which have been in use for previous Sheriffs and my office. I have directed the receipts and deposits to reflect the method of payment (cash and check) and the receipts be numbered. At the time of the audit, the Sheriff's office purchased numbered receipt books and the Chief Administrative Officer is signing the receipt when monies are receipted from the drop safe. The Chief Administrative Officer currently reconciles the receipt slips to deposit slips, and is maintaining an itemized list of receipts included in deposits.*

1.4 *I have reviewed the procedures for the receipt of monies received for CCW permits by the Chief Deputy. The Sheriff's office has purchased new numbered receipt books, and I have directed the Chief Deputy to reflect the method of payment (cash and check) on the receipt slip, which is in effect at this time, and we are reconciling the composition of payments recorded on receipt slips to the composition recorded on deposit slips.*

1.5 *The Sheriff's office is in the process of obtaining a written agreement between the commissary vendor and the county for the County Commission to review and sign.*

The commissary vendor is a Missouri based company, providing inmate services. Neighboring county jails utilize the vendor's services and have done so for multiple years. The commissary vendor is a well-respected and trusted company in the jail commissary business. By the Sheriff's office not having a binding contract, I am better able to review the service provided by the commissary vendor and make any appropriate changes in the future without delay. Commissions from the items purchased by inmates is handled and transferred directly from commissary vendor to the Dallas County Treasurer's office. No fees are paid from county taxpayer funds to the commissary vendor for services provided.

1.6 *My signature stamp is not used without my prior approval. My staff and I do periodically review employee timesheets and accrued compensatory time is approved at a supervisor level during the current time period. Since 2005, the Sheriff's office has lost several positions due to retirements, loss of employees, hiring freezes and*

lack of funding for increased costs such as fuel, insurance, inmate food and medical, utilities, but workloads have increased without compensation for the increased costs or additional staff.

In the absence of my approval of using the signature stamp, I have directed the Chief Deputy to review and make the appropriate authorization signatures. The signature stamp will not be used to authorize timesheets, even though I have no issue with the timesheets that have had my signature stamp used.

2. Sheriff Seized Property and Inmate Monies

Improvement is needed in the Sheriff's controls and procedures over seized property and inmate monies.

2.1 Seized property

As noted in our prior 2 audit reports, the Sheriff has not implemented procedures to periodically review cases and dispose of related seized cash. In addition, a physical inventory of all seized property has not been conducted since January 2011.

Seized property records indicated the Sheriff held approximately $28,000 of seized cash at July 23, 2014. This amount includes $7,292 that was reported on hand in our prior audit report and relates to cases disposed of by the court from 1998 to 2005. The total also includes $10,000 of cash seized in February 2011, despite sentencing of the defendant in the related case in October 2011. The Sheriff has not requested the court to review these cases and order disposition of the funds.

Considering the often sensitive nature of seized property, adequate internal controls are essential and would significantly reduce the risk of loss, theft, or misuse of the stored items. Complete and accurate inventory records should be maintained and periodic physical inventories should be performed and the results compared to inventory records to ensure seized property is accounted for properly. Section 542.301, RSMo, provides guidance for the disposition of unclaimed seized property. Proper disposal of such items would eliminate the significant risks of unauthorized access, use, or theft.

2.2 Inmate monies

Prenumbered receipt slips are not issued for monies received from (or for) inmates. Property intake forms are completed when an inmate is booked into the jail; however, these forms are not prenumbered and were not always signed by both the inmate and officer at the time of inmate arrest or release. In addition, inmate monies were not handled consistently during the year ended December 31, 2013. Sometimes employees deposited these monies into the inmate/commissary bank account, and other times they stored the monies in lockers at the jail. Properly receipting, recording, and depositing

inmate monies is necessary to ensure receipts are adequately safeguarded and to reduce the risk of loss, theft, or misuse of funds going undetected.

Recommendations

The Sheriff:

2.1 Obtain written authorization from the court to dispose of these seized monies, and dispose of monies in accordance with court orders. The Sheriff should also ensure a periodic physical inventory is conducted and reconciled to the records, and investigate any differences.

2.2 Issue prenumbered receipt slips for all monies received from or on behalf of the inmates, ensure receipt slips are signed by the inmate and officer at the time of arrest and release, and consistently handle inmate monies.

Auditee's Response

The Sheriff provided the following written responses:

2.1 Since the previous state audit, the Sheriff's office has requested disposal orders of hundreds of items seized. Since January 1, 2011, the Sheriff's Office has implemented the use of a report management system, which includes the inventory of seized property.

As staffing becomes available, an inventory of evidence on hand will be conducted, and I am currently working with the Dallas County Prosecuting Attorney in an attempt to dispose of seized property in a more timely manner.

2.2 During the current audit, procedures were implemented to document monies inventoried from inmate property. Numbered receipts are now utilized and placed in the inmate property, signed by the inmate and jailer/deputy, and the money is placed in the drop safe, which is accessed by the Chief Administrative Officer and the Jail Administrator. The receipts are signed by the Chief Administrative Officer, when monies are receipted from the safe. The money receipted from the inmate is also documented in the inmate's bank in the jail management system.

3. County Procedures

Improvement is needed in the county's controls and procedures over fuel, vehicles, and personnel policies.

3.1 Fuel use

The county lacks adequate procedures to account for fuel use by the road and bridge department and Sheriff's office. Accounting records indicated fuel purchases totaled approximately $190,000 for the road and bridge department and $61,000 for the Sheriff's office during the year ended December 31, 2013.

County employees prepare multiple records regarding fuel use (fuel and usage logs, Sheriff's office daily work logs, and data entered into the pumps at fill up for reporting on detailed billings), but they did not always properly complete these records or use them to reconcile to fuel billings. We identified instances where the same odometer reading was recorded multiple times or no odometer reading was entered. Also, receipts at the pump are not obtained, and fuel and usage logs maintained by the Sheriff's office are shredded. In addition, a portable fuel tank used by the road and bridge department is not metered.

Without sufficient and accurate information the county cannot evaluate propriety and reasonableness of fuel pumped/used or to reconcile to fuel billings. Failure to account for fuel purchases could result in loss, theft, and misuse going undetected.

A similar condition was noted in our prior report.

3.2 Personnel use of vehicles

According to County Commission minutes and various county officials/employees, the Sheriff and 3 of his deputies use their county vehicles to transport family members to work, school, and daycare. We also observed the Sheriff transporting his wife to work. In May 2008 and again in September 2014, the County Commission notified all county employees in writing that only county personnel are allowed in county vehicles. In addition, the county's personnel policy states, "County resources will not be used for personal business, misused, or otherwise misappropriated." Personal use of county-owned vehicles results in a significant potential liability for the county. Individuals not employed by the county, such as spouses and children should not be passengers in county vehicles, unless they are involved in the conduct of county business.

3.3 Personnel policies

County officials have not always followed established employee leave policies. Twenty employees of the Sheriff's office carried forward a total of 1,828 in vacation hours from December 2013 to January 2014. The county personnel policy indicates employees must take all vacation days in each year and no vacation time will be carried from one year to the next unless in case of an emergency and when approved by the supervisor and Personnel Director. The county had no documentation approving the carryover of this leave.

Unclear policies and allowing employees to carry leave in excess of county policy may result in unnecessary costs to the county. To ensure employees are treated equitably and are properly compensated, strict compliance with personnel policies is necessary, or personnel policies should be updated to reflect the county's intended and actual practices.

Recommendations

The County Commission:

3.1 Ensure fuel logs are reviewed for accuracy, reconciled to fuel purchases, and any significant discrepancies investigated. The County Commission should also meter the portable fuel tank and require a fuel use log be maintained, require odometer readings be entered, and fuel receipts to be obtained and submitted for its review.

3.2 Consider other means to stop the practice of allowing individuals not employed by the county to be passengers in county-owned vehicles.

3.3 Ensure compliance with leave policies or revise personnel policies as needed.

Auditee's Response

The County Commission provided the following written responses:

3.1 These recommendations have been implemented. Receipts are being printed at the time of re-fueling and turned in to the County Clerk's office for reconciliation to the statement. A meter for the portable fuel tank has been ordered, and we plan to maintain records of fuel use to reconcile to fuel pumped into the portable tank.

3.2 The Sheriff has refused to comply with the County Commission's directive that personal use of vehicles is not allowed and has instructed his employees to disregard it as well. Other departments have complied in the past, and continue to comply with the policy.

3.3 A letter will be given to each employee advising them that any accrued vacation must be used by December 31, 2015, or it will be lost. The policy requiring approval by the supervisor and the Personnel Director will be changed to "written approval by the supervisor and the County Commission." The policy will also be revised to indicate any approved carryover of vacation from one year to the next must be used in the next calendar year or it will be lost.

The Sheriff provided the following written responses:

3.1 The Dallas County Sheriff's office has fuel cards issued from the fuel vendor to individual deputies. The deputies keep detailed logs in their vehicles, documenting the date, mileage and amount of fuel purchased. The deputies also account for other fuel purchases (lawn mowing, all-terrain vehicle usage, generators, etc.) on the fuel logs. At the recommendation of the State Auditor's office, the deputies will now obtain receipts at the time of purchase from the

fuel vendor along with keeping the detailed log. Periodic reviews of the fuel vendor's statements and the deputies' fuel logs have been performed prior to this audit and will continue in the future, with the addition of the Sheriff's or his designee's signature to document the review.

3.2 The Dallas County Sheriff's office is a community based law enforcement agency and will continue to be. In the light of school shootings and other violence in schools, deputies will still be allowed to transport children to school when the deputy is on duty, the school is within Dallas County, and there is no extra mileage added to the vehicle. The insurance policy is still in effect performing such duties. It should be noted that the County Commission does not set policy regarding the use of the Sheriff's office vehicles.

3.3 Funding and staffing issues persist at the Sheriff's office and the employees have and will accrue compensatory time in order to staff the jail, courts, and provide law enforcement services. Deputies are encouraged to take their vacation and compensatory time, but staffing levels make it impractical to do so much of the time. I will still attempt to get my deputies the time off that they have earned and will work to preserve the time off that they have earned up to this time. I will work with the County Commission to implement a policy regarding the usage and carryover of unused leave.

4. County Assessor Controls and Procedures

Significant weaknesses exist in accounting controls and record-keeping procedures in the County Assessor's office. The County Assessor's office collected approximately $12,000 for maps, plat books, Geographical Information System (GIS) subscriptions, and miscellaneous fees during the year ended December 31, 2013.

County Assessor's office personnel issue unofficial generic receipt slips rather than official prenumbered receipt slips for plat book receipts. Receipt slips are not issued for other types of monies received. The method of payment (cash, check, or money order) is not always indicated on the receipt slips. As a result, the composition of receipt slips cannot be reconciled to the composition of monies transmitted to the County Treasurer and there is less assurance all monies collected are appropriately handled and transmitted. Our review of receipts and transmittals identified $60 in cash received during February 2013 and January 2014 that was apparently not transmitted to the County Treasurer. In addition, the County Assessor's office does not prepare monthly reports of fees as required by law.

To properly account for all monies and ensure they are handled properly, official prenumbered receipt slips should be issued for all monies received,

and the method of payment received should be recorded and reconciled to the composition of monies transmitted to the County Treasurer. In addition, Section 50.370, RSMo, requires county officials to file a report with the county commission and pay monies received for official services to the county treasurer monthly. It also provides that the officials are liable for monies collected but not accounted for and paid into the county treasury as required.

Recommendation

The County Assessor investigate the missing recorded cash receipts. The County Assessor should also ensure official prenumbered receipt slips are issued for all receipts, the numerical sequence of receipt slips is accounted for, the method of payment is indicated on all receipt slips, and the composition of receipt slips is reconciled to the composition of transmittals. The County Assessor should also file a monthly report of fees with the County Commission.

Auditee's Response

The County Assessor provided the following response:

I will investigate the missing recorded cash receipts. I am currently issuing unofficial prenumbered receipt slips for all receipts, accounting for the numerical sequence of the receipt slips, indicating the method of payment, and reconciling the composition of receipt slips to the composition of transmittals. Also, I am currently filing a monthly report of fees with the County Commission.

5. Prosecuting Attorney Controls and Procedures

Improvement is needed in the accounting controls and procedures of the Prosecuting Attorney's office. Bad check restitution and fees, criminal restitution, and delinquent taxes collected by the Prosecuting Attorney's office totaled approximately $13,000 during the year ended December 31, 2013.

5.1 Transmittals

The Prosecuting Attorney's clerk does not timely transmit bad check and criminal restitution to victims and bad check fees to the County Treasurer. For example, 4 money orders totaling $1,000 received on April 1 and 30, May 29, and June 30, 2014, had not been transmitted to the victim as of July 30, 2014. We identified numerous other examples of untimely transmittals during our review of case files. Additionally, $655 of bad check fees collected from February 3 to February 18, 2014, were not transmitted to the County Treasurer until March 27, 2014.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, procedures should be established to ensure bad check and court-ordered restitution is transmitted to the victims timely and bad check fees collected should be transmitted to the County Treasurer timely.

5.2 Charges filed

The Prosecuting Attorney has not established adequate procedures to ensure charges are filed timely with the court for unresolved bad check complaints.

We reviewed 5 cases for which charges were filed and determined charges were not filed timely for any of the cases. Charges were not filed until 301 to 587 days after the initial bad check complaint was received. For example, the Prosecuting Attorney's office received a bad check complaint from a local vendor on August 30, 2012, and her office issued a 10-day letter on September 17, 2012; however, charges were not filed against the bad check writer until April 9, 2014.

Procedures should be established to ensure charges are timely filed with the court for unresolved bad check complaints.

5.3 Accounts receivables

Improvement is needed to better monitor and pursue collection of unpaid receivables. The Prosecuting Attorney's office does not generate a monthly list of unpaid bad checks and restitution, and is not proactive in identifying cases with unpaid receivables. In addition, the Prosecuting Attorney indicated she was given a box of unpaid bad check cases from the former Prosecuting Attorney in January 2011; however, these cases have not been entered into the computerized accounting system.

A complete and accurate list of unpaid bad checks and restitution would allow the Prosecuting Attorney's office to more easily review the amounts due to the office and to take appropriate steps to ensure amounts owed are collected or to determine if amounts are uncollectible.

Recommendations

The Prosecuting Attorney:

5.1 Ensure all monies are transmitted timely.

5.2 Establish procedures to file charges with the court timely.

5.3 Establish procedures to monitor and collect accounts receivables.

Auditee's Response

The Prosecuting Attorney provided the following written responses:

5.1 The 4 money orders referred to were transmitted to the victim which was the state of Missouri. Since the recent change in Missouri statutes which made it the responsibility of the Prosecuting Attorney to collect restitution (formerly collected by the Circuit Clerk), we have acquired a restitution component to our case management software to assist as we must now not only collect restitution, including interest when ordered by the court, but also provide amortization schedules. There were problems with the system which were corrected by the software provider in October 2014. The system now seems to be functioning properly. We have also implemented additional procedures for the handling of restitution (other than bad check payments) which include providing that we will send out restitution payments on the date they are received.

Bad check payments which are received from check writers are mailed to victims unless they choose to pick them up. We call the victim the same day a payment is received. We then mail the payment if the victim so directs. If they choose to pick up the payment, we hold the payment for thirty days. If they do not pick up the payment within that time, we call again or mail.

To reduce the risk of loss, theft, or misuse of funds we do not accept cash. All payments must be made by money order or cashier's check payable to the victim and fees owed to the county must be made payable to Dallas County. Numbered receipts are given for all payments received. The fees, along with a monthly restitution collection report, are transmitted to the Dallas County Treasurer once a month.

5.2 *The charges referred to were filed within the statute of limitations under Missouri law. We have one attorney handling our entire caseload, including filing bad check charges. In 2010, there were three attorneys performing those duties. Since that time our workload has not decreased but has increased and additional duties added. We also recognize that we cannot always rely only on the bad check complaint on its own. We have had numerous bad check complaints turned in which we discovered were not accurate or complete so more investigation and work has been necessary, including investigative subpoenas and confirming that the identifiers, such as date of birth and driver's license numbers match the alleged check writer. We have received bad check complaints on particular persons, only to discover the actual check writer was a different person, such as a family member, a roommate or someone who had stolen the checks. With the increase in identity theft, we must be particularly careful so as not to file charges on an innocent person. This work requires proper review and consideration of each case which is obviously time-consuming when multiplied by our caseload. However, while this additional review is time consuming, I would rather take the time required to be certain that the right person is being properly charged, that people who did not commit a crime are not charged and that our victims receive their restitution.*

5.3 *The box of unpaid bad check cases referred to were cases which have been filed with the court and a warrant has been outstanding for the defendant's arrest for more than 4 years. Until such time as the defendant is located and arrested by law enforcement, I have no way to further contact the defendant or collect on these bad checks. We do not generate a monthly list of unpaid bad checks as we keep a detailed log for review at any time which documents 10-day*

letters sent, charges filed, date payment received, and the date payment is picked up by or mailed to the victim.

As we are now collecting restitution generally and have software to keep track of not only the amount of restitution ordered, but the interest accrued as well, we now have the capability of printing a report which lists outstanding balances for restitution, including interest. We have run that report, but found that not all balances due are listed. We are actively trying to resolve the issues and will be using that report monthly. We still have the paper files and logs which list each bad check and restitution ordered as we always have and can look to those files for the amounts owed by each defendant. By now putting all of this data in the computer, we now have duplicate records of the restitution amounts owed and paid.

6. Public Administrator Annual Settlements

Reviews of annual settlements are not sufficient. During the year ended December 31, 2013, the Public Administrator served as the court appointed guardian, conservator, or personal representative for 40 individuals (wards/estates).

The Public Administrator does not adequately review the annual settlements prepared by attorneys, and some annual settlements filed with the Associate Circuit Court, Probate Division by the Public Administrator were not complete or accurate. The Associate Circuit Court, Probate Division also does not perform sufficient reviews of the annual settlements, and as a result, the same errors and omissions also were undetected by the court.

For example, annual settlements for 1 ward did not include all estate assets, such as a vehicle, a $7,500 burial plan, and other personal property purchased totaling $1,216. In addition, the attorneys preparing the annual settlements only included checks that had cleared the bank, and did not identify voided checks. The Public Administrator was not aware of these issues until we discussed them with her.

Failure to adequately review settlements increases the risk that errors or loss, theft, or misuse of funds could go undetected. To ensure the financial activity of the estates is accurately reported to the court, all assets, receipts, and disbursements should be accurately reflected on the annual settlement.

Recommendation

The Public Administrator ensure annual settlements are accurately prepared. The Associate Circuit Judge should establish procedures to adequately review annual settlements filed with the court.

Auditee's Response

The Public Administrator provided the following written response:

I will review line by line the annual settlement prepared by attorneys as required by the court prior to signing and turning them into the court. This will begin immediately.

The Associate Circuit Judge provided the following written response:

The Associate Circuit Court reviews and approves numerous settlements annually. The audit report states that the Associate Circuit Court "does not perform sufficient reviews of the annual settlements" however, of all the files scrutinized by the auditors, the majority of the concerns noted related to a single file. In that case, the audit references a vehicle that was included on the initial inventory at a value of $0.00. This was apparently because there was a loan against the vehicle which exceeded its value. The annual settlements which followed included an aggregate value of all personal property equal to that listed on the original inventory. The court monitors the aggregate value of all personal property for increases and decreases in value, which in most instances, is due to the sale or exchange of an asset, and in that event, there will be a corresponding transaction in the settlement to explain the change in value of the personal property, whether up or down. The court believes that this system of checks and balances adequately protects the ward from financial misuse. However, to address the auditor's concerns, the Public Administrator will amend the inventory to provide clarification and better accounting by the Public Administrator of this asset. With regard to that same case, the audit took issue with the failure of the Public Administrator to report on the annual settlement, an irrevocable burial plan that was purchased by the ward prior to establishment of the conservatorship. This burial plan was reported in the Guardian's annual report in 2011 and 2012 and is well documented in the court file. In the past, the court did not require an irrevocable burial plan to be reported as an asset of the estate unless necessary to explain disbursals from the estate to purchase the burial plan. The burial plan was not required to be inventoried, as it could not be sold or exchanged and had no cash value which could be used for support of the ward. To address the auditor's concern, the court will require that burial plans be inventoried and reported on all settlements. Finally, with regard to this estate, the court concedes that the purchases of personal property items, totaling $1,216, should have been reported as an asset in the settlement following purchase. The Public Administrator will amend the annual settlement in this case to show acquisition of the personal property purchased for the ward's use.

To address the auditor's final concern, the court will require that all voided checks are identified on settlements so that they may be accounted for in sequential order, even though they never pass through the account.

Dallas County
Organization and Statistical Information

Dallas County is a county-organized, third-class county. The county seat is Buffalo.

Dallas County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 52 full-time employees and 7 part-time employees on December 31, 2013.

In addition, county operations include the 911 Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Kevin D. Sharpe, Presiding Commissioner	$	28,400
Rex (Pete) Barclay, Associate Commissioner		26,400
Owen Kjar, Associate Commissioner		26,400
Stacy Satterfield, Recorder of Deeds		40,000
Pam Louderbaugh, County Clerk		40,000
Barbara J. Viets, Prosecuting Attorney		116,858
Mike Rackley, Sheriff		44,000
Becky Schofield, County Treasurer		40,000
Lamont Swanson, County Coroner		12,000
Carol Johnson, Public Administrator		40,000
Sheryl Ferrell, County Collector, year ended February 28,	40,000	
Sue Doty, County Assessor, year ended August 31,		40,000
Greg Maynard, County Surveyor (1)		

(1) Compensation on a fee basis.

Financing Arrangements

In March 2013, the county entered into a lease-purchase agreement for 4 motor graders. Principal and interest payments are made from the Capital Improvements Fund. The final payment on the lease-purchase agreement is scheduled for June 2018. The remaining principal outstanding at December 31, 2013, was $955,135. Interest remaining to be paid over the life of the agreement totals $124,407.

In December 2012, the county entered into an agreement to purchase land at a cost of $125,000. Principal and interest payments are made from the Capital Improvements Fund. The final payment on the purchase agreement is scheduled on or before January 1, 2015. The remaining principal outstanding at December 31, 2013, was $50,000. The agreement has no stated interest rate.

In October 2011, the county entered into a lease-purchase agreement for 4 dump trucks and refinanced the lease-purchase agreement in October 2014. Principal and interest payments are made from the Capital Improvements Fund. The final payment on the lease-purchase agreement is scheduled for October 2015. The remaining principal outstanding at December 31, 2013, was $171,019. Interest remaining to be paid over the life of the agreement totals $3,729.

INSURANCE, FINANCIAL INSTITUTIONS, AND PROFESSIONAL REGISTRATION

Division of Professional Registration

State Board of Pharmacy

December 2014

Report No. 2014-130

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Division of Professional Registration, State Board of Pharmacy

Inspections	The Board has inspectors on staff that perform inspections of pharmacies/drug distributors, but inspectors do not maintain documentation supporting requirements reviewed, and checklists are not used to ensure critical requirements are considered during inspections. Inspectors began using an electronic observation report, but this has prevented them from obtaining a signature from either the pharmacist-on-duty or permit holder acknowledging the completion of the inspection and any observations noted.
Board Appointments	As of June 30, 2014, the Board had three vacancies, dating from January 2011, January 2012, and April 2013. If any current member is absent from a Board meeting, the Board would not have a quorum and could not conduct business.
Board Meetings	The Board did not follow the Sunshine Law for email meetings held. The Board's policy is that meeting minutes be approved before being made available for public inspection, but our review noted Board meeting minutes were not approved for up to 12 months after the meeting was held. As such, documentation of business conducted was not available for inspection and review by the general public within a reasonable amount of time.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
John M. Huff, Director
Department of Insurance, Financial Institutions, and Professional Registration
and
Jane A. Rackers, Director
Division of Professional Registration
and
State Board of Pharmacy
Jefferson City, Missouri

We have audited certain operations of the Department of Insurance, Financial Institutions, and Professional Registration, Division of Professional Registration, State Board of Pharmacy, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2014 and 2013. The objectives of our audit were to:

1. Evaluate the board's internal controls over significant management and financial functions.

2. Evaluate the board's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the board, and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the board's management and was not subjected to the procedures applied in our audit of the board.

For the areas audited, we identified (1) deficiencies in internal control, (2) noncompliance with legal provisions, and (3) no significant deficiencies in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Department of Insurance, Financial Institutions, and Professional Registration, Division of Professional Registration, State Board of Pharmacy.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Keriann Wright, MBA, CPA
In-Charge Auditor:	Joyce Thomson
Audit Staff:	Nicholas Schafer, MBA
	Erica Schroer, MBA
	Dustin Davis

1. Inspections

Controls and procedures over pharmacy and drug distributor inspections need improvement. As of June 30, 2014, the Board of Pharmacy (Board) had 2,421 licensed pharmacies and 1,387 licensed drug distributors. The Board inspected a total of 2,081 pharmacies and drug distributors during the 2 years ended June 30, 2014.

Section 338.360, RSMo, authorizes the Board to inspect pharmacies and drug distributors in Missouri. Inspections are completed for any pharmacy/drug distributor that is new, has not had an inspection in the past 18 months, and did not have a clean inspection from the Federal Drug Administration (FDA) in the past 2 years. Pharmacies/drug distributors may be exempt from any inspection if they received an inspection from the FDA in the past 2 years that resulted in no significant issues.

Board inspections consist of a review of various statutory requirements based on an inspector's general review of a pharmacy/drug distributor through a limited sampling of records. At the end of the inspection, the inspector typically issues an observation report and/or a compliance notice, depending on the significance of issues found. An observation report is issued if no compliance issues or less than significant compliance issues are noted, and a compliance notice is issued when significant compliance concerns are noted and require immediate corrective measures.

1.1 Documentation

Inspectors do not maintain documentation supporting requirements reviewed during inspections, and checklists are not used to ensure critical requirements are considered at each inspection. According to personnel, the chief inspector reviews weekly summaries, compliance notices, and some observation reports; however, these reviews are not documented.

The Board has 8 inspectors on staff that perform inspections throughout the state, including a chief inspector who oversees inspections completed. Weekly summaries are submitted to the chief inspector along with any resulting reports of issues noted. Both weekly summaries and resulting inspection reports, such as the observation report and the compliance notice, only address issues or noncompliance found. Documentation relating to what specific requirements were reviewed during inspections is not prepared or maintained. According to personnel, inspectors are licensed pharmacists that operate in a professional capacity. They are extensively trained and are provided guidance for performing their inspections, including a citation inspection guide that lists out all critical compliance requirements. The Executive Director indicated that documenting everything reviewed would be time consuming and inefficient.

Adequately documenting the requirements reviewed, periodically reviewing the documentation to ensure critical requirements are reviewed, and documenting the chief inspector's supervisory reviews of weekly summaries

and inspection reports would provide additional assurance inspections are properly completed.

1.2 Pharmacist acknowledgment

The Board does not ensure observation reports are signed by the pharmacist on duty or the permit holder during inspections. Observation reports include a signature line for the pharmacy to acknowledge the completion of the inspection and any observations noted. Our review found observation reports submitted electronically did not include a signature from a representative of the pharmacy/drug distributor. According to personnel, during 2013, inspectors began using electronic versions of the observation report, preventing inspectors from being able to obtain a signature.

Without obtaining a signature of the pharmacist or permit holder on observation reports, the Board has less assurance the inspection was completed as required and any observations were discussed and acknowledged by the pharmacy/drug distributor. According to personnel, the Board is currently developing a method to obtain signatures electronically.

Recommendations

The State Board of Pharmacy:

1.1 Maintain adequate supporting documentation of requirements reviewed during inspections. Supporting documentation should be periodically reviewed, and reviews of supporting documentation and resulting inspection reports should be documented.

1.2 Ensure all observation reports are signed by the pharmacy/drug distributor.

Auditee's Response

1.1 The Board utilizes an Inspection Cite Guide that identifies over 420 individualized inspection standards in addition to compliance standards set forth in statutes and regulations. Under these circumstances, risk focused inspections effectively and efficiently produce results superior to those that could be achieved with inspection checklists. The chief inspector reviews all compliance notices and initials the compliance notice to document his review. The Board will continue to review its inspection procedures and requirements for efficiency and effectiveness.

1.2 In 2013, the Missouri General Assembly appropriated funds to purchase a new licensure system for all boards within the Division of Professional Registration, including the Missouri Board of Pharmacy. The Board requested that the new licensing system include the capability of capturing electronic signatures during an inspection. It is anticipated that electronic signature capture will be

available in mid-2015. The Board will promptly implement electronic signature requirements once available.

2. Board Appointments

The Division of Professional Registration should improve procedures to ensure Board vacancies are filled timely. As of June 30, 2014, the Board had three vacancies. The positions became vacant in January 2011, January 2012, and April 2013.

Section 338.110, RSMo, requires the State Board of Pharmacy to be composed of seven members appointed by the Governor with the advice and consent of the senate, with six licensed pharmacists actively engaged in the practice of pharmacy, and one voting public member. At least one member must be a person who provides pharmaceutical services to a hospital, skilled nursing facility, or intermediate care facility on a full-time basis. The term of office for Board members is 5 years and members serve until a replacement is appointed and qualified.

The day-to-day operations of the Board are overseen by the Executive Director; however, Board vacancies could negatively impact the operations of the Board. In order to have a quorum and hold Board meetings, four members must be present, which is the current level of Board membership. If any member is absent for a meeting, the Board would not have a quorum, and a meeting could not be held to conduct business. Section 338.140, RSMo, indicates a majority of the State Board of Pharmacy will constitute a quorum for the transaction of business.

Recommendation

The Division of Professional Registration work with the Governor's office to fill Board vacancies timely.

Auditee's Response

The Board will continue to cooperate with the Governor's office.

3. Board Meetings

Policies and procedures over Board meetings need improvement.

3.1 Closed meetings

The Board was not in compliance with the Sunshine Law for email meetings held. Periodically, the Board holds closed meetings through email to vote on specific issues. Agendas for these meetings were posted; however, the Board did not motion to close and/or take a roll call vote in open meeting to close email meetings held, as required. As a result, the Board was conducting business outside of regular board meetings.

Section 610.022, RSMo, provides that a public governmental body planning to hold a closed meeting should follow the notice procedures for an open meeting, include notice that a closed meeting will be held, and cite the specific provision of the law that allows the meeting to be closed. Further, a

meeting may not be closed without the affirmative public vote of the majority of a quorum.

3.2 Approvals

The Board did not approve meeting minutes timely. It is the Board's policy that meeting minutes be approved before the minutes become available for public inspection. As a result, documentation of business conducted was not available for inspection and review by the general public within a reasonable amount of time.

Our review noted Board meeting minutes were approved up to 12 months after the meeting was held, including 11 Board meeting minutes that were not approved for at least 6 months after the meeting was held. For example, the Board did not approve the October 9, 2013 Board meeting minutes until October 16, 2014, over 12 months later. According to the Executive Director, approvals of meeting minutes got delayed due to significant turnover of Board personnel that shifted their priorities.

Section 610.020.7, RSMo, states minutes of open and closed meetings shall be taken and retained by the Board and Section 610.023.2, RSMo, requires the Board to make records available to the public for inspection and copying. Without timely approving Board meeting minutes, the public records of open Board meetings are not made available to the public for inspection within a reasonable amount of time.

Recommendations

The State Board of Pharmacy:

3.1 Ensure meetings are closed by an affirmative vote by each Board member during open session.

3.2 Approve Board meeting minutes and make such records available to the public timely.

Auditee's Response

3.1 Missouri law is unclear as to the handling of closed session e-mail ballots. The Board's current process was adopted after consultation with legal counsel and will be reviewed to assess continued compliance with Missouri's Sunshine Law.

3.2 The Board historically approves minutes during its regularly scheduled in-person meetings (which occur approximately every three (3) months) when public participation is at its highest. The Board will continue to monitor its processes to ensure timely completion of minutes.

Division of Professional Registration
State Board of Pharmacy
Organization and Statistical Information

The State Board of Pharmacy was established in 1909 under House Bill 87 by an act of the Missouri General Assembly. The Omnibus State Reorganization Act of 1974 transferred the Board to the Division of Professional Registration. By Executive Order 06-04, the division moved from the Department of Economic Development to the reorganized Department of Insurance, Financial Institutions, and Professional Registration on August 28, 2006.

The Board has superintending control over the practice of pharmacy in the State of Missouri, and its primary duties consist of examining and licensing pharmacists, pharmacy technicians, intern pharmacists, pharmacies, and drug distributors; investigating complaints; disciplining licensees; and inspecting pharmacies and drug distributors. At June 30, 2014, there were approximately 34,700 licensed pharmacists, pharmacy technicians, intern pharmacists, pharmacies, and drug distributors. Pharmacist initial license fee is $150 with a biennial renewal license fee of $200; pharmacy technician license fee is $35 with an annual renewal fee of $35; intern pharmacist license fee is $50 with a biennial renewal license fee of $80; and pharmacy and drug distributor license fees are $300 with a biennial renewal fee of $450.

The Board consists of seven members, with six members actively engaged in the practice of pharmacy and one voting public member. At least one member must be a person who provides pharmaceutical services to a hospital, skilled nursing facility, or intermediate care facility on a full-time basis. Board members are appointed by the Governor with the advice and consent of the senate and serve a term of 5 years. Members whose terms expire may continue to serve until a replacement is appointed and qualified. Board members at June 30, 2014, were:

Member	Term Expires
Janine M. Burkett, President	April 18, 2015
Pamela L. Marshall, Vice-President	September 24, 2015
Barbara A. Bilek, Member	June 1, 2012
Anita K. Parran, Member	April 27, 2010
Vacant	
Vacant	
Vacant	

Board members receive a $50 per diem compensation and expenses while performing their duties. The Board appoints an executive director to perform the administrative duties of the Board. Kimberly Grinston serves as Executive Director. Thirteen other employees perform administrative duties and responsibilities.

Missouri State Auditor

AGRICULTURE

Department of Agriculture

December 2014

Report No. 2014-131

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Agriculture

Inspections	The Metrology/Moisture Meter Program failed to inspect some grain moisture meters and scales in calendar year 2013 as required by state law. The Petroleum/Propane/Anhydrous Ammonia Program failed to inspect some petroleum devices in calendar year 2013 as required by state law.
Missouri Wine and Grape Board Annual Reports	The Missouri Wine and Grape Board's annual reports do not provide any information related to the expenditures made during the year.
Salary Increases	The MDA provided significant salary increases to six employees during fiscal year 2013 and four employees during fiscal year 2014, representing an annual total increase in salaries of $51,864 (ranging from 6 to 30 percent for these employees).
Board Appointments	The MDA oversees 4 boards, 4 commissions and an authority (boards). The MDA has not ensured the appointing authority filled vacant board positions timely. As of June 30, 2014, 7 appointments remained vacant. The MDA should also improve monitoring procedures to ensure members do not serve longer than allowed by state law. As of June 30, 2014, 48 of 72 (67 percent) active board members were serving beyond their term expiration date.
Analysis of Fees	As noted in our prior audit report, various program fees of the MDA do not cover the related costs of the program, forcing the programs to be more dependent upon funding appropriated from the General Revenue Fund. For example, expenditures for the Agriculture Business Development Division exceeded revenues by $1,490,000 and $1,450,000 during the 2014 and 2013 fiscal years, respectively, and the division did not perform and document an analysis of some fees charged. Some program fees have not been adjusted in more than a decade.

In the areas audited, the overall performance of this entity was Good.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Richard Fordyce, Director
Department of Agriculture
Jefferson City, Missouri

We have audited certain operations of the Department of Agriculture, excluding the Missouri State Fair, which is reported on separately, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2014, and 2013. The objectives of our audit were to:

1. Evaluate the department's internal controls over significant management and financial functions.

2. Evaluate the department's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the department; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the department's management and was not subjected to the procedures applied in our audit of the department.

For the areas audited, we identified (1) no significant deficiencies in internal control, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Department of Agriculture.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Douglas J. Porting, CPA, CFE
Audit Manager:	Jeannette Eaves, CPA
In-Charge Auditor:	Matthew Schulenberg, CFE
Audit Staff:	Rachelle Thompson
	Morgan Alexander

Department of Agriculture
Management Advisory Report
State Auditor's Findings

1. Inspections

The Weights, Measures and Consumer Protection Division failed to inspect some grain moisture meters and scales and petroleum devices, as required by state law.

1.1 Grain Moisture Meters and Scales

The Metrology/Moisture Meter Program, within the Weights, Measures and Consumer Protection Division, failed to inspect some grain moisture meters and scales in calendar year 2013 as required by state law.

The Metrology/Moisture Meter Program is responsible for ensuring the accuracy of grain moisture meters and associated equipment, such as scales. Owners and operators of moisture meters are required to register all commercial meters with the Weights, Measures and Consumer Protection Division each January. During 2013, they registered 504 moisture meters. Grain test scales are not required to be registered with the division. Program staff use the list of these scales inspected in the previous year to determine the scales needing inspection during the current year. During 2012, the Missouri Department of Agriculture (MDA) performed inspections of 408 grain test scales. Under Section 413.065(7), RSMo, and 2 CSR 90-21.025, the MDA is required to inspect and seal all commercial weighing and measuring devices annually. We tested inspection documentation for 26 registered moisture meters and 22 grain test scales for calendar year 2013 and determined the program did not perform an annual inspection on 5 of the 26 registered moisture meters tested (19 percent) or on 5 of the 22 grain test scales tested (23 percent) for which an annual inspection was required.

Failure to perform annual inspections, as required by state law, could result in inaccurate results of grain tests.

1.2 Petroleum Devices

The Petroleum/Propane/Anhydrous Ammonia Program, within the Weights, Measures and Consumer Protection Division, failed to inspect some petroleum devices as required by state law in calendar year 2013.

The Petroleum/Propane/Anhydrous Ammonia Program is responsible for a variety of services that ensure consumer protection and public safety; including, but not limited to, the inspection of petroleum dispensers. Under Section 414.072.1, RSMo, the MDA is mandated to inspect all petroleum measuring devices at least every 6 months, except that devices installed at marinas are required to be inspected at least once a year. There were a total of 3,880 petroleum sites inspected during 2013. Of the 3,880 petroleum sites inspected, 125 (3 percent) were not inspected on the required basis.

Failure to perform inspections, as required by state law, could result in inaccurate petroleum measurements.

Recommendations

The MDA ensure the Weights, Measures and Consumer Protection Division:

1.1 Performs annual inspections of all grain moisture meters and grain test scales as required by state law.

1.2 Performs inspections of all petroleum devices as required by state law.

Auditee's Response

An unusual rate of staff vacancies due to retirements and illnesses, as well as limited access to some petroleum sites due to station renovations, repairs, or changes of ownership, resulted in an inspection rate slightly less than 100 percent. The MDA will continue to work toward inspecting 100 percent of the petroleum devices, grain moisture meters and grain test scales.

2. Missouri Wine and Grape Board Annual Reports

The Missouri Wine and Grape Board's annual reports do not set forth the complete operating and financial statement of the Board.

The Missouri Wine and Grape Board is responsible for researching, developing, and promoting Missouri grapes, juices, and wine. The Board is primarily funded by a tax on all wine sold in Missouri. Section 262.859, RSMo, requires the Missouri Wine and Grape Board to submit an annual report of its activities for the preceding year that sets forth a complete operating and financial statement of the Board. The fiscal year 2012 and 2013 annual reports present the asset balance at the end of the fiscal year and provide a breakdown of monies received during the fiscal year. However, the reports do not provide any information related to the expenditures made during the year. As a result, the annual reports are incomplete.

Without presenting a complete operating and financial statement, the Missouri Wine and Grape Board's annual reports are not in compliance with state statute and do not present the public with a transparent representation of the Board's activities.

Recommendation

The Missouri Wine and Grape Board prepare a complete annual operating and financial statement detailing the Board's activities, as required by state statute.

Auditee's Response

The Missouri Wine and Grape Board will review the content of the annual report to ensure compliance with state statutes.

3. Salary Increases

The MDA provided salary increases to some employees that were not provided to other state employees.

In July 2012, state employees earning less than $70,000 per year received a 2 percent cost of living adjustment. The budget approved by the General Assembly authorized an annual increase of $500 ($42 per month) for state employees effective January 1, 2014. The MDA provided significant additional salary increases to six employees during fiscal year 2013 and four employees during fiscal year 2014. These additional salary increases represented an annual increase in staff salaries totaling $51,864, and represented annual increases ranging from approximately 6 to 30 percent for these employees. MDA personnel indicated these salary increases were based on additional job duties and responsibilities or supervisory responsibilities and a desire to bring the salary of certain MDA staff to a level equal to other staff in similar positions. Although MDA officials provided memos or email messages indicating some of these raises resulted from additional job duties, they did not provide documentation detailing the specific job duties added for these employees or how they determined the positions for which salaries would be realigned.

Given the recent state budget constraints and that other state employees have generally not received such pay increases, the department should re-evaluate the reasonableness and necessity for these salary increases.

Recommendation

In the future, the MDA discontinue providing pay increases significantly over and above those provided to other state employees.

Auditee's Response

The MDA compensates employees consistent with job duties and/or classification and will document any adjustments.

4. Board Appointments

The MDA should improve procedures to ensure timely filling of Board vacancies, including replacing members who have served past their term expiration date.

The MDA oversees 4 boards, 4 commissions, and 1 authority (boards). Each board is governed by state laws and regulations that define the number, term length, and qualifications of members. These boards serve various functions such as advising the MDA, the Governor, and the General Assembly, overseeing state fair operations, administering milk inspections, and approving grants. Functions of other boards include promoting the development of agriculture and small businesses; promoting Missouri grapes, juices, and wine; promoting the development, sale, and distribution of alternative fuels; and developing a referendum for boll weevil eradication.

Member vacancies

Various state laws require the appointment of a total of 79 board members. However, the MDA has not ensured the appointing authority filled vacant positions timely. As of June 30, 2014, 7 appointments (9 percent) remained vacant. The following table lists the number of members and vacancies.

BOARD	Members	Vacancies
AgriMissouri Advisory Commission for Marketing Missouri Agricultural Products	9	0
Missouri Agricultural and Small Business Development Authority	8	1
Missouri Cotton Growers' Organization Board of Directors	9	0
Missouri Alternative Fuels Commission	9	4
Missouri Pet Spay/Neuter Fund Board	3	0
Missouri Propane Gas Commission	9	1
Missouri Wine and Grape Board	11	0
State Fair Commission	9	1
State Milk Board	12	0
Totals	79	7

Vacancies result in boards that contain fewer members than authorized or required by state law. Although the day-to-day operation of boards is overseen by each board's executive director, multiple vacancies could result in the lack of a quorum and prevent impacted boards from conducting business.

Term limits

The MDA should improve monitoring procedures to ensure appointing authorities are notified when members' terms end to ensure members do not serve longer than allowed by state law. Of the 72 active board members, 48 (67 percent) were serving beyond their term expiration date as of June 30, 2014, with 6 members serving more than 5 years beyond their term expiration date.

Board members should not be allowed to serve significant years beyond the term expirations established by state laws and regulations.

Recommendation

The MDA work with the Governor's office and other applicable appointing authorities to fill board vacancies timely.

Auditee's Response

The MDA will work with the Governor's office and other applicable appointing authorities to fill board vacancies. The State Fair Commission vacancy was filled October 2, 2014.

5. Analysis of Fees

As noted in the previous MDA audit report, fees charged by various programs at the MDA do not cover the related costs of the program, forcing the program to be more dependent upon funding appropriated from the General Revenue Fund. In addition, fees charged by some programs have not been analyzed on a periodic basis or as required by state regulations. Some program fees charged have not been adjusted in more than a decade.

Animal Care and Animal Health Disease Control Programs

Expenditures for the Animal Care and the Animal Health Disease Control programs exceeded program revenues by approximately $572,000 and $300,000, respectively, during the year end June 30, 2014 and by approximately $690,000 and $475,000, respectively, during the year ended June 30, 2013. In addition, the Animal Health Division did not perform and document a periodic analysis of some division fees charged nor have per capita fees been analyzed on an annual basis, as required by the state code of regulations.

The Animal Health Disease Control Program is responsible for controlling, eradicating and testing for livestock disease in Missouri. The Animal Care Program is responsible for regulating breeders, dealers, boarders, shelters and pet stores to ensure they meet state standards regarding feed, water, shelter, veterinary care, building maintenance, socialization, identification and record-keeping requirements. These programs receive various license and registration fees from qualifying entities and charge various fees for the services performed.

The Animal Health Division last performed and documented a fee analysis during the year ended June 30, 2010 and that analysis only addressed the division's lab service fees. The division could not provide documentation of when it last performed a fee analysis of livestock brand fees, livestock sales and markets fees, and Animal Care Facilities Act fees. The division last adjusted livestock brand fees in 1992 and livestock sales and markets fees in 1990. No documentation could be provided of any fee analysis performed after these dates.

In addition, the division charges a per capita fee in the Animal Health Disease and Animal Care programs for each service performed or board day per animal, or animal sold, traded, bartered, brokered, auctioned, given, or otherwise disposed of other than by euthanasia or death. Per 2 CSR 30-9.020, these per capita fees shall be assessed annually and be based upon the budgetary needs of the program. According to division management, the per capita fees were established in the early 1990s and have not been assessed or analyzed since establishment.

Grain Regulatory Services Program

Expenditures for the Grain Regulatory Services Program exceeded program revenues by approximately $685,000 and $765,000 during the years ended June 30, 2014, and June 30, 2013. In addition, the Grain Regulatory Services Program did not periodically perform and document an analysis of fees charged by the program.

The program is responsible for licensing and regulating grain warehouses and grain dealers in Missouri. The program receives various license and registration fees from qualifying entities and charges various fees for the services performed. The program last adjusted grain warehouse license fees

in 1977 and grain dealer license fees in 1997. The program could not provide documentation of any fee analyses performed after these dates.

Agriculture Business Development Division

Expenditures for the Agriculture Business Development Division exceeded revenues by approximately $1,490,000 and $1,450,000 during the years ended June 30, 2014, and June 30, 2013. In addition, the division did not periodically perform and document an analysis of some division fees charged.

The division helps to create opportunities for success for Missouri's farmers and agribusiness. The division administers AgriMissouri memberships, the domestic and international marketing of Missouri agricultural products, and the agriculture market news reporting service. The division receives various membership registration fees from qualifying entities and charges various fees for the services performed.

The AgriMissouri Commission, through the division, established the AgriMissouri membership fees and bar code fees in 2003 and 2005, respectively. These fees have not been analyzed since establishment. In addition, the division established market news subscription fees in 2003, which also have not been analyzed since that time. Although these fees would not necessarily be expected to cover all division costs, the fees should be analyzed periodically to determine if a change is needed.

Overall

The MDA should perform and document an analysis of fees charged by the various programs and consider adjusting fees where possible to cover more of the expenditures of the programs. By periodically performing a fee analysis and charging the most appropriate fee amount, the MDA will be able to ensure programs are maximizing their revenues, more adequately cover program costs, and become less dependent upon General Revenue funding. If the MDA determines that a program's fees cannot be set at a level to cover all expenditures of the program, the MDA should determine what percentage of expenditures should be covered by program revenues and establish fees accordingly.

Recommendation

The MDA periodically perform an analysis of fees and expenditures for all fee funded programs, consider adjusting fees where possible by administrative action to cover the programs' costs, and report the results of the analysis to the legislature for consideration.

Auditee's Response

The MDA will periodically analyze fees for operations of the programs.

Department of Agriculture
Organization and Statistical Information

The Department of Agriculture was created in 1933 by an act of the legislature to replace the Missouri State Board of Agriculture. Operating under a director, the department's divisions are charged with enforcing state laws regulating the handling and marketing of agribusiness products, as well as protecting producers, processors, distributors, and consumers of food and fiber and promoting Missouri's agricultural economy.

The following are the various responsibilities of the Office of the Director, the five divisions of the department, the Missouri Agricultural and Small Business Development Authority, the Missouri Wine and Grape Board, and the State Milk Board:

1. The Office of the Director determines department policy, assigns duties among departmental units, obtains financial and personnel resources to discharge department responsibilities, and monitors departmental performance.

2. The Animal Health Division, under the direction of the state veterinarian, promotes and protects Missouri's livestock industry, and administers the laws and regulations pertaining to livestock and poultry disease control, state licensed meat processors, livestock markets and dealers, and licensed commercial companion animal breeders and dealers.

3. The Grain Inspection and Warehousing Division is responsible for the enforcement of the Missouri grain dealers and grain warehouse laws and U.S. Grain Standards Act. The Grain Inspection Program serves as a disinterested third-party which, upon request, will determine the grade, weight, and protein content of grain for any interested party. The Grain Regulatory Services Program oversees the regulation of the storage, purchase, and sale of grain in Missouri. Additionally, the division administers the commodity check-off program and the Missouri agricultural mediation program.

4. The Agriculture Business Development Division administers the AgriMissouri program, the domestic and international marketing programs for Missouri agricultural products, the agriculture market news reporting service, and loans and grants for the betterment of rural agriculture. The division also administers the Agriculture Development Fund Program, which provides youth development programs and scholarships. In addition, the division works with the Missouri Agricultural and Small Business Development Authority and the Wine and Grape Board.

5. The Plant Industries Division licenses pesticide applicators and administers regulations concerning the use of pesticides, herbicides, and other chemical products. The division also licenses plant nurseries and growers and inspects them for plant pests and diseases, licenses animal feed manufacturers and dealers and tests feed products for safety and compliance with labeling guarantees. In addition, the division licenses plant seed distributors and tests seed products for compliance with labeling guarantees, administers the fruit and vegetable inspection and the noxious weed programs, and regulates treated timber producers and sellers.

6. The Weights, Measures and Consumer Protection Division licenses and tests commercial weighing and measuring devices to ensure accuracy and fair dealing in the exchange of commodities. The division performs small-scale and large-scale testing, price scanner verification, and egg inspections. The division also performs motor fuel quality testing, volumetric testing and safety inspections of petroleum distributors and dealers, and tests liquefied petroleum gas meters. The division tests the accuracy of grain moisture meters and the metrology lab maintains standards for mass, volume, and length and certifies test weights, test measures, and volume provers for industry and agency testing programs.

7. The Missouri Agricultural and Small Business Development Authority was established in 1981 and its governing body consists of members who are appointed by the Governor with the advice and consent of the Senate and the department director as an ex-officio member. The authority issues tax-free bonds to lenders who make low-interest loans to farmers and small businesses and administers the beginning farmer loan, family farm breeding livestock loan, animal waste treatment system loan, single-purpose animal facilities loan guarantee, and Missouri value-added grant and loan guarantee programs. The authority also administers the New Generation Cooperative Incentive Tax Credit and the Agriculture Products Utilization Contributor Tax Credit programs.

8. The Missouri Wine and Grape Board was established in 2005 and its governing body consists of seven members who are appointed by the Governor with the advice and consent of the Senate and four ex-officio members including the department director. The Board promotes grapes, juice, and wine produced in Missouri using funds paid by grape and wine producers.

9. The State Milk Board was established in 1972 and its governing body consists of twelve members, ten of whom are nominated by the department director and appointed by the Governor with the

advice and consent of the Senate, with the remaining two members being from the state Department of Health and Senior Services and the Department of Agriculture. Four of the appointed members of the Board must be Grade A dairy farmers representing recognized producer organizations, four are active members of local health departments in the state, and two represent processor and consumer interests. The Board administers milk inspections in relation to Grade A milk and milk supplies to ensure uniformity of procedures and interpretation of milk inspection regulations.

In addition, the department includes the State Fair Commission, which is audited and reported upon separately.

Dr. Jon Hagler served as the department director until October 11, 2013. Richard Fordyce was appointed department director on December 19, 2013, and confirmed on February 6, 2014, and continues to serve in this capacity. The department employed 283 full-time employees and 83 part-time employees as of June 30, 2014. An organization chart follows.

Thomas A. Schweich

Missouri State Auditor

Lee's Summit Missouri New Longview Transportation Development District

December 2014

Report No. 2014-132

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Lee's Summit Missouri New Longview Transportation Development District

Accounting Controls	The Transportation Development District (TDD) Board does not provide oversight or review the financial records provided by its banking institution and an accountant hired to prepare its year-end financial statements. Instead, the Board Chairman approved disbursements which were then made by the bank. During the 2 years ended December 31, 2013, the bank made only $5,930 in debt payments for the Board, even though the TDD had over $70,000 in its bank account at December 31, 2013. The board was not aware debt payments had not been made because it did not obtain or review bank statements, disbursement documentation, or financial statements. The district's financial statements were not accurate or submitted to the State Auditor's Office timely.
Board of Directors	The TDD property owners have not elected successor directors and the Board has not met regularly. As a result, the Board has not adopted annual budgets in accordance with state law. In addition, budgets which have been adopted do not contain some required elements.

In the areas audited, the overall performance of this entity was **Fair**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 7

THOMAS A. SCHWEICH
Missouri State Auditor

G. David Gale, Chairman
and
Board of Directors
Lee's Summit Missouri New Longview Transportation Development District
Lee's Summit, Missouri

We have audited certain operations of the Lee's Summit Missouri New Longview Transportation Development District in fulfillment of our duties under Section 238.272, RSMo. The scope of our audit included, but was not necessarily limited to, the 2 years ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the district's internal controls over significant management and financial functions.

2. Evaluate the district's compliance with certain legal provisions.

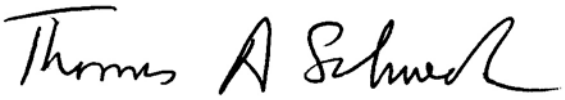
3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, procedures, financial records, and other pertinent documents; interviewing various personnel of the district, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the district's management and was not subjected to the procedures applied in our audit of the district.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Lee's Summit Missouri New Longview Transportation Development District.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	John Luetkemeyer, CPA
Audit Manager:	Todd M. Schuler, CPA
In-Charge Auditor:	Rex Murdock, M.S.Acct.

Lee's Summit Missouri New Longview Transportation Development District
Management Advisory Report - State Auditor's Findings

1. Accounting Controls

The board lacks supervision of financial transactions, and financial statements were inaccurate and not submitted to the State Auditor's Office (SAO) in a timely manner.

1.1 Supervision

The Transportation Development District (TDD) Board does not provide oversight or review the financial records provided by its banking institution and an accountant hired to prepare its year-end financial statements. The Board relies on its bank to prepare reports of summarized transactions of the district and to remit those reports to an accountant that prepares financial statements. In addition, the Board did not review and approve disbursements. Instead, the Board Chairman approved and the bank made disbursements for the TDD. The bank is required to make a debt payment to the developer equal to the district's cash balance after paying other expenses. However, during the 2 years ended December 31, 2013, the bank made only $5,930 in debt payments even though the TDD bank account balance was over $70,000 at December 31, 2013. The Board was not aware debt payments had not been made because it does not obtain or review bank statements, disbursement documentation, or financial statements.

Without adequate reviews of financial records, the TDD Board has less assurance the financial reports and transactions are proper and debt service payments are made.

1.2 Financial statements

The district's financial statements were not accurate or submitted to the SAO in a timely manner. The financial statements prepared for the years ended December 31, 2013 and 2012, (1) overstated revenues of the district by $37,619, (2) understated disbursements by $11,000, (3) did not include beginning or ending cash balances, and (4) were not submitted to the SAO until October 1, 2014, which is not in compliance with the filing deadlines established by state law.

Complete and accurate accounting records and financial statements are necessary to keep district officials and citizens informed of the financial activity and condition of the district. Section 105.145.2, RSMo, requires TDDs to file annual financial statements with the SAO. Section 105.145.8, RSMo, states any district that fails to timely submit a copy of the annual financial statement to the SAO shall be subject to a fine not to exceed $500 per day. 15 CSR 40-3.030 provides if a political subdivision is audited by an independent auditor, a copy of the audit report can be filed in lieu of a separate financial report. An unaudited financial report is to be filed within 4 months of the entity's fiscal year end, while an audit report is to be filed within 6 months of the entity's fiscal year end.

Recommendations

The TDD Board:

1.1 Review and approve financial reports and transactions prepared by the bank and its accountant.

1.2 Ensure financial statements accurately reflect the financial activity of the district and are filed with the SAO timely.

Auditee's Response

The Chairman of the Board provided the following written responses:

1.1 I agree. In the future, bank statements and financial reports will be reviewed monthly.

1.2 I agree. We will ensure in the future there is no confusion between Tax Increment Financing Economic Activity Tax reimbursements and the TDD revenue. We will ensure the financial statements are filed timely in the future.

2. Board of Directors

The TDD property owners have not elected successor directors and the board has not met regularly in past years, and as a result, has not adopted annual budgets in accordance with state law. In addition, budgets which have been adopted do not contain some required elements.

2.1 Successor directors

The property owners have not met to elect successors for directors whose terms on the TDD Board have expired. When director terms expire, the remaining board members, instead of current property owners, vote to reappoint individual directors.

Section 238.220.2(3), RSMo, requires successor directors to be elected by the property owners and Section 238.202.2(2)(b), RSMo, allows votes of other qualified voters to be included with the property owners' votes.

2.2 Board meetings/budgets

The Board Chairman indicated the board did not meet in 2011 or 2012, and a 2014 meeting had not been held as of October 31, 2014. The Board Chairman indicated the board approved resolutions to adopt budgets for 2011 and 2012, even though meetings of the Board were not held. At the annual meeting in June 2013, a budget for the year ended December 31, 2013 was adopted per the board minutes. The district provided a summary of budgets for our review which included budget information for fiscal years 2009 through 2013 on one spreadsheet. It is unclear when this summary was prepared, as the budgeted revenue amounts shown for each year agreed to actual revenues reported in the district's financial statements. The Board Chairman could not provide the actual budgets approved by the board. In addition, the summary of budgets did not contain some elements required by state law. The budgets did not include a comparative statement of actual or

estimated revenues and expenditures for the preceding 2 years, or beginning and ending cash balances.

Sections 67.010 to 67.040, RSMo, include provisions regarding annual budgets. Board meetings, conducted at least annually, to review and approve the budget appear necessary for the Board to properly fulfill their duties as prescribed by state law.

Recommendations

2.1 The TDD property owners elect directors to serve on the board in accordance with state law.

2.2 The TDD Board conduct a meeting at least annually to properly fulfill their duties, including adopting annual budgets containing all elements required by state law.

Auditee's Response

The Chairman of the Board provided the following written responses:

2.1 I agree. Minutes will reflect the correct vote procedure for Board membership in the future.

2.2 I agree. The 2014 Property Owners meeting is scheduled for December 29th; the TDD Board meeting will immediately follow the Property Owners meeting. I have invited the City of Lee's Summit Finance Director to attend and he has confirmed he will be there. We will ensure the 2015 budget is adopted timely and contains the information required by state law.

Lee's Summit Missouri New Longview Transportation Development District Organization and Statistical Information

The Lee's Summit Missouri New Longview Transportation Development District (TDD) is located in the City of Lee's Summit. The TDD was organized in July 2003 by petition of the property owner/developer within the proposed TDD. The Board of Directors of the district are elected by the property owners and currently include two property owners and three members representing the property owners.

The qualified voters of the TDD, in this case the property owners, approved the imposition of a sales tax of up to 1-cent (1 percent) on all taxable transactions within the boundaries of the district. The Board of Directors subsequently passed a resolution in January 2006 that set the sales tax rate at 1-cent (1 percent), and the TDD started collecting sales tax in January 2006. The TDD expects the sales tax to remain in effect for 20 years, unless terminated sooner after all obligations have been paid.

The TDD was formed for the purpose of acquiring property (right-of-way and/or easements) and constructing transportation projects, with a total cost of approximately $10.7 million. The City of Lee's Summit was the public entity with jurisdiction over these projects and accepted dedication of the completed projects.

Prior to January 1, 2012, the property owner/developer sold several portions of property within the TDD and as of October 31, 2014 there are five property owners.

The TDD has a fiscal year end of December 31, and did not have an independent audit performed of its financial statement during the two years ended December 31, 2013.

As of December 31, 2013 the district owed the developer approximately $4.1 million for project costs advanced by the developer.

District Board

An elected board acts as the policy-making body for the district's operations. The board's five members serve 3-year terms without compensation. Members of the board at December 31, 2013, were:

G. David Gale, Chairman (1)
Jeanne Marshall, Member (2)
Jeffrey Smith, Member (1)
Hunter S. Gale, Member (2)
Matt Faulkner, Member (2)

(1) Property owner
(2) Property owner representative

Financial Activity

A summary of the district's financial activity for the 2 years ended December 31, 2013, follows:

	Year Ended December 31,	
	2013	2012
RECEIPTS		
Sales taxes	$ 40,756	41,870
Total Receipts	40,756	41,870
DISBURSEMENTS		
Professional fees	1,102	0
Debt service	0	5,930
Accounting and auditing	0	4,673
Total Disbursements	1,102	10,603
RECEIPTS OVER (UNDER) DISBURSEMENTS	39,654	31,267
BEGINNING CASH	31,271	4
ENDING CASH	$ 70,925	31,271

December 2014

Report No. 2014-133

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Reynolds County

County Disbursements	The county does not always solicit competitive proposals or bids for purchases of goods and services. The County Commission did not solicit bids for a multi-phase courthouse interior renovation project that began in 2010. The County Commission did not obtain proposals for legal and property appraisal services and neither the County Commission nor the Sheriff solicited bids for prisoner meals. The county did not enter into written agreements for professional services related to protested property taxes and the prorating of these costs among taxing authorities.
Employee Classification and Salaries	The county did not document the reasons for different classifications of 2 individuals hired to perform courthouse renovations. The county classified one individual as an employee and the other as an independent contractor, although the county required both individuals to furnish their own tools and paid each a fixed hourly rate as established by the County Commission. The Reynolds County Salary Commission has not met since 2009, yet the county increased the salaries of some elected officials starting in 2013 due to an increase in the county's assessed valuation.
Public Administrator Undeposited Checks	The Public Administrator holds checks received on behalf of some wards for extended periods of time before depositing to help wards retain Medicaid eligibility. Additionally, the Public Administrator does not restrictively endorse checks until the deposit is prepared. Our cash count performed on August 25, 2014, noted the Public Administrator held 4 checks totaling $2,577 for approximately 5 months based upon the check issue dates.
County Collector Controls and Procedures	The County Collector made several errors in the annual settlements filed for the 2 years ended February 28, 2014. The annual settlements did not accurately present current collections and protested property taxes. The County Clerk and County Commission's review of annual settlements is not adequate to detect errors. In September 2014, the County Collector overpaid taxing authorities approximately $124,000 when distributing protested taxes resolved because she did not deduct amounts previously distributed. Additionally, as of November 2014, the County Collector had not refunded the portion of the resolved protested taxes and interest due to the mining corporation that had protested its taxes. The County Collector does not accurately allocate interest earned on the protested tax account to the individual parcels and, as a result, cannot determine the proper amount of interest to disburse or refund when a protested parcel is settled.
Property Tax Controls	The County Commission does not approve changes to the property tax system for additions, abatements, and outlawed personal property taxes. During the year ended February 28, 2014, additions totaling over $69,000 and abatements and outlawed taxes totaling over $21,000 were recorded in the property tax system.

Sheriff Controls and Procedures	The Sheriff does not have proper controls to follow up and ensure the timely collection of amounts billed for civil paper service fees. The Sheriff and Circuit Clerk do not communicate regarding collections of civil paper service fees received. As a result, the Sheriff cannot ensure his office's accounts receivable balances are correct. Controls and procedures over receipting and depositing monies are not sufficient and the Sheriff maintains some monies in the Sheriff's fee account outside the county treasury without statutory authority allowing the Sheriff to do so. The Sheriff's office has not disbursed approximately $900 held in the fee account to the County Treasurer as of August 31, 2014, and made several purchases from these monies. Additionally, the Sheriff's office has not turned over commissary profits to the county treasury timely.
Prosecuting Attorney Controls and Procedures	The Prosecuting Attorney has not established adequate segregation of accounting duties or review and approval procedures. Additionally, the Prosecuting Attorney has not assessed statutorily required fees from defendants who owe court-ordered restitution and bad check fees collected are not deposited in the correct fund.
County Assessor Controls and Procedures	The County Assessor does not ensure independent or supervisory reviews of the accounting records are performed. In addition, the County Assessor does not reconcile receipts per the manual receipt slips to the manual ledger to ensure all monies are transmitted to the County Treasurer. Additionally, receipt slips are issued from separate receipt slip books and receipt slips are recorded in the manual ledger by date issued instead of numerical sequence, making it difficult to account for the numerical sequence of receipt slips issued.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 20

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Reynolds County

We have audited certain operations of Reynolds County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones and Associates, Certified Public Accountants, was engaged to audit the financial statements of Reynolds County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Reynolds County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Travis Owens, MBA, CPA, CFE
In-Charge Auditor:	Erica Schroer, MBA
Audit Staff:	Sara Lewis, CPA
	Joshua Shope, M.Acct.
	Connor Dougan

1. County Disbursements

County procedures related to disbursements including bidding and written agreements need improvement.

1.1 Bidding

The county does not always solicit competitive proposals or bids for purchases of goods and services. As a result, the County Commission could not demonstrate that reasonable steps were taken to ensure the county received the lowest and best price for some purchases.

Courthouse renovation

The County Commission did not solicit bids for a multi-phase courthouse interior renovation project that began in 2010 and is still ongoing. The county spent about $118,000 for this project during 2010, 2011, 2012, and 2013, and budgeted $15,000 for the project during 2014.

The County Commission determined there were a limited number of local contractors qualified to perform the work due to the age of the courthouse built in 1871. As a result, the County Commission selected a local individual with expertise in renovating historic structures and hired him as a temporary, hourly employee. The County Commission established the hourly wage and purchased materials as needed through local suppliers. The project was performed in 4 phases with each phase designed to target a different portion of the building. The County Commission only advertised to hire an individual for the temporary position once, prior to the second phase of the project, after a citizen voiced concerns about the lack of competition. The only applicant that responded was the individual that performed phase one of the renovation project. As a result, the same individual was rehired for the second phase. After this individual left employment, the County Commission selected a different individual with the necessary expertise to complete the third and fourth phases though the county did not solicit applicants.

Legal and professional services

The County Commission did not obtain proposals for legal and property appraisal services. The services primarily related to representing the county and local taxing authorities in the resolution of protested property taxes. The property appraisal consultants also provided services related to property reassessments. The county paid the attorney approximately $48,000 and paid the property appraisal consultants approximately $91,000 during the year ended December 31, 2013.

The County Clerk indicated county officials considered these firms sole source vendors because of their expertise and qualifications with the mining industry; however, the county did not document this reasoning for not soliciting competitive proposals.

Prisoner meals

Neither the County Commission nor the Sheriff solicited bids for prisoner meals. The county spent over $41,000 for prisoner meals during the year

ended December 31, 2013. The Sheriff indicated he contacted the only two local diners in 2012 for price quotes but did not document these contacts and has not advertised for these services or contacted other vendors outside the immediate area.

Section 50.660, RSMo, provides bidding requirements. Routine use of a competitive procurement process for major purchases ensures the county has made every effort to obtain the best and lowest price and all interested parties are given an equal opportunity to participate in county business. Documentation of the various proposals received, the selection process, and criteria should be retained to demonstrate compliance with applicable laws or regulations and support decisions made.

A similar condition was noted in our prior audit report.

1.2 Professional services agreements

The county did not enter into written agreements for professional services related to protested property taxes and the prorating of these costs among various taxing authorities.

As discussed in section 1.1, the county obtained legal and appraisal services to assist with resolving property taxes protested by a mining corporation. The county did not enter into written agreements with these vendors. According to the County Clerk, the county and various political subdivisions verbally agreed to share all expenses incurred. The portion of fees owed is based on the portion of taxes the various taxing authorities would receive if the real estate taxes due are not abated. The county periodically bills the various taxing authorities for their share of the expenses; however, there are no written agreements in place describing the terms and conditions of this arrangement.

Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing.

Recommendations

The County Commission:

1.1 Ensure bids are solicited for all applicable purchases of goods or services in accordance with state law.

1.2 Enter into written agreements with vendors and taxing authorities as required by state law.

Auditee's Response

The County Commission provided the following responses:

1.1 We believe each of the goods or services listed in this audit finding are sole source procurements. Two of the current commissioners were not in office at the time the renovation project was started.

Prior to the start of the renovation project, an engineering firm provided a cost estimate that was significantly more than the amount we spent by hiring an individual to perform the work. We were unable to locate a copy of this estimate to provide the auditors. For prisoner meals, we are unable to order from outside the immediate area because there are no vendors who offer delivery and it would not be cost effective to require Sheriff's office staff to make 3 daily trips to pick up food needed.

We believe we are acting in the best interest of the county by attempting to purchase most good or services within the county, which supports the local economy and returns money back to the county indirectly when individuals employed by local businesses spend their wages locally. In the future we will ensure more detail is included in the minutes to provide our reasoning for exempting some types of purchases from competitive procurement.

1.2 We will consider implementing a written agreement between the county and parties responsible for sharing the cost of these professional services. The County has not had any difficulties collecting amounts billed to the various taxing authorities and there are no amounts currently due. The cost sharing arrangement relates to a single taxpayer who began protesting taxes over 10 years ago. At that time the various taxing authorities were notified of the cost sharing requirements and verbally agreed to the terms and the terms have not significantly changed since that time.

Auditor's Comment

1.1 The County Commission's desire to purchase goods and services locally does not relieve them of their obligation to comply with statutory bidding requirements. If the county has determined a good or service to be sole source then sufficient documentation should be retained which includes an explanation of why there are no other qualified vendors who can supply the good or service. Unless the good or service is deemed to be a sole source the county should follow relevant statutory requirements for competitive bidding.

1.2 The county indicated there have been no billing disputes; however, the county's failure to enter into written agreements could lead to future billing disputes. As a result, it is necessary to implement written agreements outlining the method of prorating costs so that all parties understand their duties and responsibilities and provide a legal recourse in the event of a dispute.

2. Employee Classification and Salaries

The county assigned 2 individuals hired to perform courthouse renovations different employment classifications though both performed similar work. Additionally, the Salary Commission did not meet as required, yet the county increased salaries for some officials.

2.1 Employee classification

The county did not document the reasons for different classifications of 2 individuals hired to perform courthouse renovations.

The county hired the first individual in December 2010, classified him as an employee, and reported his compensation to the Internal Revenue Service (IRS) on a W-2 form. After he left employment, the county hired another individual in January 2012, classified him as an independent contractor, and reported his compensation to the IRS on a 1099-MISC form. For both individuals, a County Commissioner reviewed and approved their timesheets or invoices. The county required both individuals to furnish their own tools and paid them a fixed hourly rate.

Section 105.300, RSMo, defines an elected or appointed officer or employee of a political subdivision as an employee for Social Security and Medicare tax purposes. For employees, the IRS requires employers to report employee compensation on W-2 forms and withhold and remit income and payroll taxes. Similarly, Chapter 143, RSMo, includes requirements for reporting wages and withholding state income taxes. State and federal laws require employers to pay the employer's share of Social Security and Medicare on the compensation paid to employees. Proper classification of employees is necessary to ensure compliance with various state and federal laws and regulations. The failure to withhold and properly report payroll and income taxes for county employees makes the county potentially subject to additional tax liabilities along with penalties and interest.

2.2 Salary Commission

The Reynolds County Salary Commission has not met since 2009, yet the salaries of some elected officials increased starting in 2013. The Salary Commission last met in August 2009 and established salaries for elected officials with terms beginning in 2011. For officials with terms beginning in 2013, the county increased salaries due to an increase in the county's assessed valuation.

Section 50.333.7, RSMo, states the Salary Commission shall meet as many times as it deems necessary on or before November 30th of each odd numbered year for the purpose of determining the amount of compensation to be paid for the next term of office for each county officer to be elected in the next general election. Section 50.333.9, RSMo, states the current compensation of each affected office or officer shall continue to be paid if the Salary Commission fails to meet or reach agreement. Salaries represent a significant disbursement for the county and, as a result, it is essential the Salary Commission meet regularly as required and document decisions.

Recommendations

The County Commission:

2.1 Ensure all persons hired by the county are properly classified as employees or independent contractors in compliance with state and federal laws and regulations, and all compensation paid is subject to applicable income and payroll taxes and properly reported.

2.2 Ensure the Salary Commission meets at least once prior to November 30th of each odd numbered year as required by state law. In addition, the Salary Commission should review the current salary schedule and consult with legal counsel as appropriate to ensure the schedule complies with state law.

Auditee's Response

The County Commission provided the following responses:

2.1 We will take this under advisement for future hiring. We made the decision to classify the first individual as a county employee because the individual did not have secondary employment and worked on a continuous daily schedule. The second individual was classified as an independent contractor because the individual had secondary employment and was not working on the courthouse renovation on a continuous basis.

2.2 We were unware the Salary Commission was required to meet every odd year and believed the 2009 decision applied to all future years. We will seek legal advice to determine whether the current schedule is in compliance with state law and whether the Salary Commission can still meet in 2014 to adjust salaries for terms starting in 2015. We will ensure the Salary Commission meets every odd numbered year in the future.

3. Public Administrator Undeposited Checks

The Public Administrator holds checks received on behalf of some wards for extended periods of time before depositing them to help wards retain Medicaid eligibility, and checks are not restrictively endorsed until the deposit is prepared. The Public Administrator is the court appointed personal representative for wards or decedent estates of the Associate Circuit Court, Probate Division, and is responsible for the financial activity of 17 individuals.

On August 25, 2014, our cash count noted 4 checks (for 4 different wards), totaling $2,577, had been held by the Public Administrator for approximately 5 months based upon the check issue dates. These 4 checks were also counted during our cash count performed on July 8, 2014. In addition, these checks were not restrictively endorsed. According to the Public Administrator, checks are often held for future expenses so a ward's assets remain below Medicaid eligibility limits. We reviewed Medicaid eligibility forms and identified some differences between reported cash

balances and actual cash available. For example, a Medicaid eligibility form filed for one ward during May 2014 indicated a bank account balance of $242; however, this balance did not include a tax refund check of $750 received in March 2014 held by the Public Administrator and not deposited.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, monies should be deposited timely and checks should be restrictively endorsed immediately upon receipt. When initially applying for or re-determining eligibility for Medicaid through the Department of Social Services (DSS), the Public Administrator is required to report all assets for each ward that may be in the form of cash, property, or other assets on the program application or eligibility review form. In addition, Section 208.210.1, RSMo, requires recipients to notify county welfare offices if they possess property that affects their right to receive benefits. Further, Section 208.210.2, RSMo, provides that if it is found that a recipient or spouse possessed income in excess of the amount reported that would affect his/her right to receive benefits, the amount of benefits may be recovered as a debt due to the state.

Recommendation

The Public Administrator discontinue the practice of holding checks and report accurate asset information for wards to the DSS, Family Support Division. Additionally, the Public Administrator should contact the DSS, Family Support Division to determine whether any monies are due to the state. Also, monies should be deposited timely and checks restrictively endorsed immediately upon receipt.

Auditee's Response

The Public Administrator provided the following written response:

Prior to the audit, I had already spoken with employees of the DSS and Social Security Administration, and a representative of the Missouri Association of Public Administrators and each of these agencies or organizations informed me it was acceptable to hold checks to ensure continued eligibility of assistance such as Medicaid. The 4 checks have since been deposited. These checks were all tax refunds received only once per year and never for more than $750. The wards assigned to me have very little income or resources, with these refunds being the only monies available for them to spend on things that they need and want other than their room and board. I believe it is my duty to make sure they have as many available resources as possible. In the future I will continue to safeguard checks prior to deposit and will restrictively endorse the checks. There were no monies from wards missing and the wards receive all of the monies owed to them from these checks at the time they need it. As a Public Administrator, I must do what is in the best interest of my wards and with the permission of DSS, the Social Security Administration, and the Missouri Association of Public Administrators, I have been able to do that in the manner it was currently done at the time of the audit.

Auditor's Comment

For 2 of the 4 wards, the Public Administrator submitted the Medicaid eligibility forms after receiving the tax refund checks, but did not report these monies as assets as required by state law and DSS procedures. DSS procedures and state law require reporting of all assets including monies available to the ward, not just monies held in a bank account. When a Public Administrator does not provide a complete and accurate listing of a ward's income and assets, the DSS does not have all of the information needed to make the proper eligibility determination.

4. County Collector Controls and Procedures

Improvement is needed in accounting controls and procedures of the County Collector's office. The County Collector's office processed tax collections and other revenues of approximately $7.4 million during the year ended February 28, 2014.

4.1 Annual settlements

The County Collector made several errors in the annual settlements filed for the 2 years ended February 28, 2014. The annual settlements did not accurately present current collections and protested property taxes. A mining corporation protested property taxes for 2011, 2012, and 2013. The County Collector included all or a portion of protested taxes still being held in escrow and pending resolution in the current collections and distributions amounts rather than separately reporting these amounts as protested taxes. As a result, the annual settlements overstated collections and distributions amounts reported by approximately $2.2 million for the year ended February 28, 2014, and approximately $839,000 for the year ended February 28, 2013. After we discussed the errors with her, the County Collector revised the annual settlements and plans to refile the amended settlements.

The County Clerk and County Commission's review of annual settlements is not adequate to detect errors. The County Commission approved the annual settlement for the year ended February 28, 2014, containing the $2.2 million overstatement of collections and distributions (22 percent of charges totaling about $10 million). Without adequate review procedures, there is an increased risk of loss, theft, and misuse of property tax monies going undetected, and less assurance the annual settlements are complete and accurate.

4.2 Distributions and refunds

In September 2014, the County Collector overpaid taxing authorities approximately $124,000 when distributing protested taxes resolved because she did not deduct amounts previously distributed.

A mining corporation protested 6 parcels annually for tax years 2011, 2012, and 2013. For each parcel the taxpayer originally paid the full amount owed and submitted a proposed assessed valuation and notice of the company's intent to protest a portion of the assessed valuation. The County Collector used the taxpayer's proposed assessed valuation amount to determine what

portion of the monies to distribute immediately to taxing authorities and what portion of the monies to place in escrow as the amount protested. The County Collector marked the parcels as paid in the tax system and manually adjusted the amounts distributed to taxing authorities to account for monies that were protested and required to be held until resolution.

In August 2014, the State Tax Commission reached resolution on the valuation of 1 parcel that was protested for tax years 2011 and 2012. The taxpayer's bill was reduced and the adjusted assessed valuation for the resolved parcel is approximately 47 percent of the original assessed valuation determined by the County Assessor. Using the adjusted valuation, the County Collector manually calculated the taxes and interest amounts to distribute to taxing authorities and disbursed these amounts in September 2014. However, the County Collector did not account for the property taxes from this parcel already distributed in December 2011 and December 2012. The County Collector discovered this discrepancy when we requested documentation of her calculations to support the distribution of taxes and interest, and the County Collector plans to request refunds from the various taxing authorities. Additionally, as of November 2014, the County Collector had not refunded the portion of the resolved protested taxes and interest due to the mining corporation. Future distributions will be needed but the State Tax Commission has not yet reached resolution on the valuation of this parcel for tax year 2013 or the valuation of the remaining 5 parcels for tax years 2011, 2012, or 2013.

To ensure future distributions are accurate, the County Collector should maintain appropriate accounting records of prior distributions, amounts escrowed, interest earned, and adjustments to assessed valuations for all parcels with protested taxes. Additionally, the County Collector should process refunds to taxpayers timely if protested taxes have been resolved and result in a reduction of taxes owed.

4.3 Protested interest

The County Collector does not accurately allocate interest earned on the protested tax account to the individual parcels and, as a result, cannot determine the proper amount of interest to disburse or refund when a protested parcel is settled.

Protested property taxes for a mining corporation totaled approximately $2.2 million on 6 parcels for 2011, 2012, and 2013. The County Collector deposited the protested taxes in a separate bank account that earns interest monthly. As of February 28, 2014, the protested bank account had earned interest of approximately $24,000. While all interest earned relates to the mining corporation's protested taxes, the mining corporation has protested multiple parcels during multiple tax years.

Interest earned on the protested account is only applied to the most recent year's total of protested taxes rather than to all tax years or parcels protested and held in escrow. As a result, the County Collector does not have accurate

records to determine how much interest to distribute or refund when the value of individual parcels is settled.

Since the County Collector had not properly allocated the monthly interest earned, the County Collector did not disburse the correct amount of interest to the taxing authorities in September 2014. The County Collector should ensure the appropriate amount of interest is disbursed or refunded as the value of each parcel is resolved.

Section 139.031.7, RSMo, requires the County Collector to disburse the proportional amount of interest earned either to the taxpayer, taxing authority, or both. To ensure interest earned on the protested account is properly distributed, controls should be in place to ensure interest is properly allocated and proper records are maintained.

Recommendations

4.1 The County Collector ensure future annual settlements are accurately prepared. In addition, the County Clerk and County Commission should establish procedures to adequately review and approve the annual settlement.

4.2 The County Collector recalculate the amount of distributions to the taxing authorities and the refund due to the mining corporation. The County Collector should obtain refunds from the taxing authorities for amounts overpaid, issue a refund to the mining corporation, and ensure future distributions and refunds are calculated correctly and processed timely.

4.3 The County Collector recalculate accumulated interest earned on each protested property tax parcel held in the protested account and consider these amounts when correcting errors made in distributions and refunds for the parcel recently resolved. Additionally, the County Collector should adopt procedures to ensure future interest allocations are accurate.

Auditee's Response

The County Collector provided the following responses:

4.1 After discussing with the auditors during the audit process I have revised both annual settlements and submitted them to the County Clerk in September 2014. There are no published instructions or guidance on how to prepare the annual settlement and I made my best attempt to present amounts that were true and accurate. While the protested amounts were shown in distributions in the original settlements, they were clearly identified as amounts transferred to escrow and not distributed to taxing authorities.

4.2 I discovered the error in distributions and immediately took action to correct the error. This was an unusual situation where I had

multiple assessed valuations including the county's original assessed valuation, proposed valuation from the taxpayer, and final valuation from the State Tax Commission. I am in the process of obtaining refunds from the various taxing authorities, and a refund has already been received from the school district. A refund will be issued to the taxpayer as soon as possible. As future parcels are resolved I will account for amounts previously distributed to each taxing authority.

4.3 This situation was complex due to the number of parcels and tax years involved. I previously sought assistance from others including a bank but did not receive adequate assistance. I have already performed calculations to weight monthly interest by the tax year the escrowed funds relate to. I used these corrected interest amounts when determining the amounts taxing authorities should repay (related to section 4.2) and amount to refund to the taxpayer. I will continue to use this method of tracking and allocating interest going forward.

The County Clerk provided the following response:

4.1 I have established various checks and balances to ensure the accuracy of the annual settlement before I certify and file the settlement. When reviewing these two annual settlements, I found them to be complete and accurate because the protested amount held in escrow was reported in the distributions section and properly labeled as amounts escrowed. The charges, credits, and distributions balanced on the settlement. In the future I will compare the presentation of protested property taxes on the current settlement to the prior year to ensure the county is consistent in our presentation and, if protested taxes are still being held in escrow, I will verify that amounts are reported in the protested line of the credits. After I have reviewed the annual settlement each year I will continue to notify the County Commissioners of the results and provide them access to the documents for review.

5. Property Tax System

The County Commission does not approve changes to the property tax system for additions, abatements, and outlawed personal property taxes. During the year ended February 28, 2014, county officials recorded additions totaling over $69,000 and abatements and outlawed taxes totaling over $21,000 in the property tax system.

The County Assessor prints a court order of each change to the property tax system and provides the court orders to the County Clerk and County Collector. On a monthly basis the Deputy County Clerk calculates the total changes based on the court orders received from the County Assessor and

compares to the changes processed in the tax system. The County Clerk and County Commission do not document their approval of the changes to the tax system. Additionally, the minutes of the County Commission do not include any discussion of additions, abatements, or outlawed taxes.

Section 137.260 and 137.270, RSMo, assign responsibility to the County Clerk for making corrections to tax books with the approval of the County Commission. In addition, if changes to the amount of the taxes the County Collector is charged with collecting are not properly monitored, errors or irregularities could go undetected.

Recommendation

The County Commission and County Clerk ensure all changes made to the property tax system are supported by court orders approved by the County Commission.

Auditee's Response

The County Commission and County Clerk provided the following response:

The County Commission believes the County Clerk has always adequately reviewed all orders for additions and abatements. In response to this recommendation, the County Clerk will begin preparing a monthly summary of additions and abatements which the County Commission will review and approve. We will include this information in the meeting minutes.

6. Sheriff Controls and Procedures

Controls and procedures in the Sheriff's office need improvement. The Sheriff's office collected monies related to civil service fees, mileage, concealed carry weapon fees, all-terrain vehicle permits, bonds, prisoner board, and other miscellaneous receipts totaling approximately $50,500 for the year ended December 31, 2013. Deposits into the Sheriff's inmate account for inmate receipts totaled approximately $11,400 for the year ended December 31, 2013.

6.1 Civil service papers

The Sheriff does not have proper controls to follow up and ensure the timely collection of amounts billed for civil paper service fees. The Sheriff's office collected approximately $5,900 in civil paper service fees and mileage for the year ended December 31, 2013.

The Sheriff's office typically collects a fee prior to performing the civil paper service, and sends a bill for mileage and any remaining fees once the papers have been served. Records of civil papers requested and served, fees assessed, and amounts collected are maintained on receipt ledgers and in the Sheriff's computer system. After the papers have been served, the Sheriff sends the documents to the Circuit Clerk and notifies the Circuit Clerk of any remaining balance due.

The Sheriff and Circuit Clerk do not communicate regarding collections received. As a result, the Sheriff cannot ensure his office's accounts receivable balances are correct. We reviewed the collection status on 10

civil paper services occurring in 2013 and for 4 services the Sheriff's records indicated a balance due while the Circuit Clerk's records indicated the balance had been paid in full.

To ensure amounts owed are collected timely, the Sheriff's office should maintain accurate and complete records of civil paper service fees and properly follow up on all unpaid amounts. Additionally, the Sheriff's office should work with the Circuit Clerk's office to ensure the accuracy of account receivables records.

6.2 Receipts and deposits

Controls and procedures over receipting and depositing monies are not sufficient.

- The Sheriff's secretary does not record civil paper service fees immediately and does not deposit these fees timely and intact.

- The Sheriff's secretary does not issue receipt slips for some monies received and does not reconcile receipt records, including composition of receipts, to deposits. We noted the Sheriff's secretary did not issue receipt slips for 3 transactions totaling $403 deposited in August 2013 and 2 of these 3 receipts were not included in the manual ledger.

- The Sheriff's secretary did not always indicate the method of payment on receipt slips issued.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected.

6.3 Sheriff account disbursements

The Sheriff maintains some monies in the Sheriff's fee account outside the county treasury.

The Sheriff's office has not disbursed approximately $900 held in the fee account to the County Treasurer as of August 31, 2014. These monies consisted of commissions from calendar sales, donations for purchase of flowers, donations for chaplain services, and drug testing fees. Additionally, the Sheriff made several purchases totaling approximately $700 from these monies in 2014 for advertising and supplies for educational activities at local schools. Expending monies outside the county's normal budgeting and disbursement process increases the risk of misuse or unnecessary purchases being made.

There is no statutory authority allowing the Sheriff to maintain fees or donations outside the county treasury. Section 50.370, RSMo, requires all county officials who receive fees or any other remuneration for official services to pay such monies to the County Treasurer.

6.4 Commissary profits

The Sheriff's office has not turned over commissary profits to the county treasury since March 2014. As of August 31, 2014, the Sheriff's office held profits of approximately $2,900 in the commissary account. While some monies may be needed to purchase inventory or process pending orders, the Sheriff has not determined the amount needed for these purposes.

Section 221.102, RSMo (effective August 28, 2013), requires each county jail to keep revenues from its canteen or commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (profits) into the county Inmate Prisoner Detainee Security Fund.

Recommendations

The Sheriff:

6.1 Develop procedures to track, monitor, and pursue collection of civil paper service fees and periodically reconcile the balance of civil service paper fees owed with the Circuit Clerk.

6.2 Ensure receipts are recorded immediately and deposited intact and timely, receipt slips are issued for all monies received, and receipt records and the composition of receipts are reconciled to the composition of deposits. Also, the Sheriff should ensure the method of payment is recorded on all receipt slips.

6.3 Establish procedures to ensure all monies are disbursed to the County Treasurer timely.

6.4 Ensure existing and future commissary profits not necessary to meet cash flow needs are turned over to the County Treasurer for deposit to the Inmate Prisoner Detainee Security Fund.

Auditee's Response

The Sheriff provided the following responses:

6.1 The Circuit Clerk routinely receives payments for civil service papers, but I do not have access to the Circuit Clerk's records. In response to the recommendation we have implemented new procedures and are now performing a monthly reconciliation with the Circuit Clerk to ensure our accounts receivable balance reconciles with the Circuit Clerk's balance. Any differences between the two offices will be investigated and corrected. Additionally, I will continue to attempt collection of unpaid amounts.

6.2 I do not plan to change our procedures of holding monies received for civil paper service. The receipts identified by the auditors as either not receipted or where the receipt slip did not indicate the method of payment are isolated instances where normal procedures

were not followed. In some cases monies are received at night or on weekends when the secretary is unavailable and monies are properly secured until normal business hours. My office already has procedures in place to ensure all receipts are accounted for on the ledger and included in each deposit. The auditors did not locate any monies missing from my office.

6.3 I plan to transmit the drug testing fees to the County Treasurer. I do not plan to transmit the other monies including calendar sales and donations because these monies may be needed for immediate use. I will work with the County Commission to determine if a separate county fund can be established to deposit these monies while still providing me access to expend monies if necessary. These monies are currently held and accounted for in a separate Sheriff's office checking account which is reconciled monthly.

6.4 After auditors brought this issue to our attention, we immediately began transmitting monies not needed to meet cash flow needs to the County Treasurer. Monies were transmitted in September, October, and November 2014 and we will continue to do this monthly.

Auditor's Comment

6.2 The transactions without receipt slips or without method of payment pertained to 4 separate deposits of the 16 deposits we reviewed, indicating these weaknesses are not isolated instances. Due to the numerous problems identified during our review, it is clear improvement is needed. The failure to implement recommended procedures increases the risk that the theft, loss, or misuse of monies will go undetected.

7. Prosecuting Attorney Controls and Procedures

Controls and procedures in the Prosecuting Attorney's office need improvement. During the year ended December 31, 2013, the Prosecuting Attorney's office collected approximately $15,400 in bad check fees, and bad check and court-ordered restitution.

7.1 Segregation of duties

The Prosecuting Attorney has not established adequate segregation of accounting duties or review and approval procedures. Two secretaries are responsible for receipting, recording, depositing, and transmitting monies received for bad checks and court-ordered restitution. Neither the Prosecuting Attorney nor other clerks perform documented supervisory or independent reviews of accounting records or comparisons of monies received to those transmitted.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are safeguarded. If proper segregation of

duties cannot be achieved, documented independent or supervisory reviews of accounting and bank records are essential.

7.2 Administrative fees

The Prosecuting Attorney has not assessed statutorily required fees from defendants who owe court-ordered restitution and does not deposit bad check fees in the correct fund.

Based on the statutorily authorized fee amounts, the Prosecuting Attorney's office should have collected $500 in fees on 8 restitution cases (approximately $8,700 in restitution ordered) assigned to the office after the statutory changes occurred. Additionally, the bad check fees collected by the Prosecuting Attorney are not deposited into the Administrative Handling Cost Fund and are instead deposited into the Prosecuting Attorney Bad Check Fund. The Prosecuting Attorney indicated he was unaware of these new statutory provisions.

Section 559.100.3, RSMo (effective August 28, 2013), requires the Prosecuting Attorney to collect an administrative handling cost fee on cases of court-ordered restitution. Section 570.120.5, RSMo (effective August 28, 2013), requires the Prosecuting Attorney to collect an administrative handling cost fee on bad checks. The County Treasurer is required to deposit these fees in the Administrative Handling Cost Fund.

Recommendations

The Prosecuting Attorney:

7.1 Adequately segregate accounting duties or ensure an independent or supervisory review of accounting and bank records is performed and documented.

7.2 Assess and collect fees on all restitution cases as required by state law. Additionally, the Prosecuting Attorney should work with the County Commissioners to establish an Administrative Handling Cost Fund.

Auditee's Response

The Prosecuting Attorney provided the following responses:

7.1 I have implemented additional procedures to ensure proper segregation of duties. A clerk who is not responsible for receipting and recording the transactions will independently review and approve each deposit to ensure all monies received are transmitted.

7.2 I will immediately begin assessing this fee on cases of court-ordered restitution as required by statute. In many cases, the defendant is incarcerated and there is less likelihood that I will be able to collect the fees owed; however, I will attempt to collect. Additionally, I will

work with the County Treasurer and County Commission to establish the Administrative Handling Cost Fund.

8. County Assessor Controls and Procedures

Controls and procedures of the County Assessor's office need improvement. The County Assessor's office collected approximately $7,700 during the year ended December 31, 2013.

The County Assessor does not ensure independent or supervisory reviews of the accounting records are performed. Two employees are primarily responsible for collecting, receipting, and transmitting monies received to the County Treasurer. The County Assessor does not reconcile receipts per the manual receipt slips to the manual ledger to ensure all monies are transmitted to the County Treasurer. In addition, the County Assessor's office issues receipt slips from separate receipt slip books and receipt slips are recorded in the manual ledger by date issued instead of numerical order, making it difficult to account for the numerical sequence of receipt slips issued.

If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of accounting and bank records are essential. To adequately account for receipts and reduce the risk of loss, theft, or misuse of funds, receipts should be recorded in the ledger when received and the numerical sequence of receipt slips issued should be accounted for and compared to amounts transmitted.

Recommendation

The County Assessor ensure an independent or supervisory review of accounting records is performed and documented. In addition, the County Assessor should record all receipt slips on the ledger when received, account for the numerical sequence of receipt slips, and reconcile the receipt slips to the ledger and amounts transmitted.

Auditee's Response

The County Assessor provided the following response:

My employees are now using only one receipt slip book to record transactions. On a monthly basis, I will start reviewing selected transmittals to ensure all receipt slips have been recorded on the ledger and are accounted for and reconcile the receipt slips to the amount transmitted to the County Treasurer.

Reynolds County
Organization and Statistical Information

Reynolds County is a county-organized, third-class county. The county seat is Centerville.

Reynolds County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 44 full-time employees and 10 part-time employees on December 31, 2013.

In addition, county operations include the Senate Bill 40 Board and the Senior Services Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Joe Loyd, Presiding Commissioner	$	28,400
Doug Warren, Associate Commissioner		27,390
Eddie Williams, Associate Commissioner		27,390
Myra Turner, Recorder of Deeds		40,000
Mike Harper, County Clerk		40,000
Robert A. Johnson, Prosecuting Attorney		47,000
Tom Volner, Sheriff		46,000
Wanda Corder, County Treasurer		40,000
Jeffrey N. McSpadden, County Coroner		14,000
Mallory N. Fox, Public Administrator		20,000
Cindy Jenkins, County Collector, year ended February 28,	40,000	
Rick Parker, County Assessor, year ended August 31,		41,500

Missouri State Auditor

Laclede County

December 2014

Report No. 2014-134

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Laclede County

Sheriff Commissary Records and Procedures	The Sheriff's office bookkeeper does not prepare monthly lists of liabilities to reconcile to the available cash balances for the inmate trust bank account or prepare bank reconciliations for the account timely or accurately. Additionally, the Sheriff has not established adequate segregation of accounting duties or review and approval procedures. The bookkeeper also does not deposit inmate monies timely, resulting in the accumulation of substantial amounts of cash. In addition, the Sheriff's office has not established procedures to ensure inmate's personal monies are refunded, and monies refunded are properly documented. The bookkeeper did not always timely or accurately disburse to the County Treasurer monies collected from commissary purchases, kiosk fees, telephone cards, and medical services. In addition, the bookkeeper did not consistently charge medical service costs to inmate accounts. The bookkeeper also does not maintain records to account for telephone cards and electronic cigarettes purchased and sold to inmates, and inventory remaining on hand, and does not maintain records to account for debit card stock received, issued, and on hand. The Sheriff contracted with a vendor to provide inmate telephone services, circumventing the county's budgetary and disbursement procedures, and violating state law.
Sheriff Controls and Procedures	The Sheriff has not adequately segregated the duties of collecting, recording, transmitting, depositing, and disbursing bond monies. The Sheriff's office bookkeeper performs all of these duties. Controls and procedures over receipting, recording, transmitting, and depositing bond monies also need improvement. The Sheriff's office terminated two jailers in February 2013 after a total of $1,100 in cash bonds were taken. Despite these incidents, the Sheriff has not sufficiently corrected weaknesses related to the handling of bond monies. A civil processing clerk in the Sheriff's office does not receipt civil process fees received or endorse the related checks and money orders immediately upon receipt. In addition, the Sheriff's office does not track civil process papers served or reconcile papers served to monies received. In addition, the Sheriff's office manager does not prepare accurate bank reconciliations for the civil account, and does not identify liabilities. The Sheriff has not established adequate controls over seized property; 312 items on the computerized inventory listing did not contain location information, and 189 items had incomplete location information. The Sheriff's office also has not established procedures to dispose of seized property items held for years, and a physical inventory of seized property items has not been performed in at least 2 years.
Assessment Fund Withholdings	The County Collector did not adequately reduce the percentage used to calculate amounts withheld from tax collections for the Assessment Fund, resulting in $43,888 more withheld from tax collections and disbursed to the Assessment Fund than was allowed by state law during the 5 years ended December 31, 2013.

Prosecuting Attorney Controls and Procedures	The Prosecuting Attorney's office does not generate a monthly list of unpaid bad checks and restitution, and maintains a delinquent tax bank account outside the county treasurey. There is no statutory authority allowing the Prosecuting Attorney to maintain this account.
County Meeting Minutes and Procedures	The county needs to improve its procedures over open and closed meetings of the County Commission. For 3 of the 7 closed meetings held during the year ended December 31, 2013, open meeting minutes did not document the specific reasons or section of law allowing the County Commission to close the meeting. In addition, some issues discussed in closed sessions were not allowable by law. The County Commission did not properly review and approve authorizing resolutions of tax abatement arrangements established by the Enhanced Enterprise Zone (EEZ) Board. Our review of the EEZ Board and County Commission minutes identified several real estate tax abatements approved by the EEZ Board where no subsequent public hearings occurred and no resolutions were passed authorizing the tax abatement. In addition, the county did not report the amount of city commissions paid to the County Collector or subject the payments to payroll tax withholdings, in violation of a strict interpretation of the payroll tax regulations. The county maintains fuel and usage logs for all county-owned vehicles and equipment, but does not reconcile this information to fuel purchases. The county also has not updated the listing of county assets for several years, and has not completed a physical inventory since 2011. In addition, the county does not have adequate procedures in place to identify capital asset purchases and dispositions throughout the year.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.* However, the audit revealed serious shortcomings with the Sheriff's office.

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 20

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Laclede County

We have audited certain operations of Laclede County in fulfillment of our duties under Section 29.230, RSMo. In addition, KPM, Certified Public Accountants, P.C. was engaged to audit the financial statements of Laclede County for the year ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

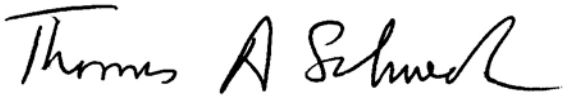
3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Laclede County.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Pamela Allison Tillery, CPA
In-Charge Auditor:	Natalie B. McNish, CGAP
Audit Staff:	Connie James
	Amber Carlile
	Katelyn Crosson
	Tracy Allen Schnakenberg

1. Sheriff Commissary Records and Procedures

The Sheriff operates a 100 bed jail, housing Laclede County inmates and inmates from cities and neighboring counties. The Sheriff maintains a separate checking account to handle personal inmate monies and provides a commissary through an outside vendor. The Sheriff also sells telephone cards and began selling electronic cigarettes to inmates in 2014.

The county purchased and installed a new computerized accounting and kiosk receipting system in July 2013. The jail has 2 kiosks (one in the lobby and one in the booking area) allowing individuals to apply cash or credit card deposits to inmate accounts. The Sheriff's bookkeeper removes the cash from the kiosks and deposits it into the inmate trust bank account. The monies received, commissary purchases made, and available cash for each inmate are recorded in a computerized accounting system maintained by the bookkeeper. Remaining personal inmate monies are paid to inmates upon their release through use of a debit card or a check issued by the bookkeeper.

The bookkeeper deposited approximately $205,000 of personal inmate monies into the Sheriff's inmate trust bank account during the year ended December 31, 2013.

1.1 Inmate bank account

The bookkeeper does not prepare monthly lists of liabilities to reconcile to the available cash balances for the inmate trust bank account. In addition, the bookkeeper does not prepare bank reconciliations for the inmate trust bank account timely or accurately.

The bookkeeper only prepared bank reconciliations about once every 2 months during 2013, and as of July 15, 2014, the May 2014 bank reconciliation had not been completed. Additionally, the bookkeeper recorded 2 deposits totaling $1,811 and 2 debit card transactions (used to distribute inmate monies upon their release) totaling $389 twice in the computerized accounting system during December 2013. Instead of correcting the accounting system, the bookkeeper made reconciling adjustments on the bank reconciliations. The bookkeeper also has not prepared lists of liabilities.

We identified inmate trust bank account liabilities as of December 31, 2013, totaling $20,659. A comparison to the reconciled bank account balance of $13,269 shows an apparent shortage of $7,390. The liabilities included amounts that need to be turned over to the County Treasurer for commissary commissions and costs, telephone card sales, kiosk fees, reimbursements for medical charges initially paid by the county, and inmate balances on hand at December 31, 2013. Considering the problems with the December 2013 bank reconciliation, errors in posting transactions into the accounting system, and no periodic identification of liabilities, the accuracy of the book balance is uncertain.

Liabilities should be identified monthly and reconciled to cash balances to ensure sufficient cash is available for the payment of all amounts due and all monies in the bank account can be identified. Prompt follow up on discrepancies is necessary to resolve errors and ensure monies are properly disbursed. The preparation of timely and accurate monthly bank reconciliations and an adequate review of the reconciliations is necessary to ensure accounting records are in balance and to identify errors timely.

1.2 Segregation of duties

The Sheriff has not established adequate segregation of accounting duties or review and approval procedures. The bookkeeper performs the duties of receiving, recording, depositing, and disbursing all inmate and commissary monies. The bookkeeper also maintains telephone cards and electronic cigarettes sold to inmates and debit cards in her office. She records sales in the computerized accounting system and distributes items sold to the jailers. Neither the Sheriff nor other office personnel perform a documented review of accounting or inventory records or complete a comparison of monies received to those deposited.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of accounting and bank records are essential.

1.3 Depositing and refunding inmate monies

The Sheriff's office has not established adequate procedures for the deposit and refunding of inmate monies.

The bookkeeper does not deposit inmate monies timely. The bookkeeper removes monies from 2 kiosks for deposit approximately once a month. This results in substantial cash amounts accumulating in the kiosks prior to deposit. For example, the bookkeeper deposited cash from the lobby kiosk totaling $5,045 for transactions occurring between November 20, 2013, and December 30, 2013, on January 2, 2014.

In addition, the Sheriff's office has not established procedures to ensure inmate's personal monies are refunded and those refunds are properly documented. Refunds made in person to inmates are by debit card, and the inmates are not required to sign for the receipt of the debit card. The bookkeeper relies on jailers to convey inmate requests for refunds when the bookkeeper is not available. If inmates do not request a refund upon release, no effort is made to refund their monies. At December 31, 2013, the computerized accounting system indicated the county held $1,821 for released inmates.

Ensuring all monies are deposited timely will help safeguard receipts and reduce the risk of loss and theft. In addition, establishing procedures to

ensure refunds of inmates personal monies are made and are documented will help ensure inmate monies are not misappropriated.

1.4 Monthly disbursements

The bookkeeper did not always disburse monies collected for commissary purchases, kiosk fees, telephone cards, and medical services to the County Treasurer timely, some disbursements did not agree to the related accounting records, and some disbursements did not include all monies collected. The bookkeeper also did not consistently charge medical service costs to inmate accounts.

- The bookkeeper did not disburse to the County Treasurer monies collected from commissary purchases during January through April 2014, totaling $31,266, until May 22, 2014. In addition, the amount of monies turned over to the County Treasurer for commissary purchases did not always agree with supporting documentation. Accounting records indicated the Sheriff's office received only $26,756 from inmates for commissary purchases during January through April 2014, for turnover to the County Treasurer; however, the bookkeeper turned over an additional $4,510.

- The bookkeeper did not disburse to the County Treasurer kiosk fees collected from July 2013 through March 2014, totaling $4,245, until July 2014. The commissary vendor charges a $3 transaction fee on each kiosk transaction.

- The bookkeeper did not disburse to the County Treasurer monies collected for telephone cards sold during May through October 2013, totaling $12,450, until November 27, 2013.

- The bookkeeper did not disburse to the County Treasurer $3,698 of $6,740 for the cost of medical services collected from inmates from January 2014 to May 2014.

  Additionally, the bookkeeper did not consistently charge inmate accounts for medical services provided. The bookkeeper failed to charge inmate accounts for medical services for July, August, September, and December 2013, and February through May 2014. The Sheriff provides medical services to inmates held in the jail, and if inmate funds are available, the inmate is to be charged for these services. Untimely assessment of medical charges to inmate balances may result in unreimbursed costs to the county.

Timely disbursement of inmate monies collected for commissary items, kiosk fees, telephone cards, and medical services is necessary to provide adequate controls over account balances and reduces the risk of loss, theft, or misuse of funds going undetected. A comparison of medical costs

incurred to inmate accounts should be performed to ensure all amounts owed are collected.

1.5 Inventory records and procedures

The bookkeeper does not maintain records to account for telephone cards and electronic cigarettes purchased and sold to inmates, and inventory remaining on hand. Batches of telephone cards and cases of electronic cigarettes are periodically purchased for $5.50 per card and $2.97 per cigarette and held by the bookkeeper until sold to inmates for $10 per card and cigarette. The telephone card vendor provided the Sheriff's office with 500 complimentary cards valued at $5,000 (500 cards to be sold for $10 each), and the Sheriff's office purchased additional cards valued at $26,000 (2,600 cards to be sold for $10 each) during 2013. The Sheriff's office began selling electronic cigarettes in March 2014, and purchased cigarettes valued at $3,000 (300 cigarettes to be sold for $10 each) in February 2014. Significant revenues are generated from the sale of these items, therefore, proper accounting controls and procedures are needed.

Additionally, the bookkeeper does not maintain records to account for debit card stock received, issued, and on hand. The Sheriff's office received 1,250 debit cards during the year ended December 31, 2013, for use in refunding personal inmate monies upon release.

Loss, theft, or misuse of the inventory and related monies may go undetected without adequate inventory records and procedures.

Detailed inventory records are necessary to account for telephone cards, electronic cigarettes, and debit card stock. Comparisons of purchases and sales of telephone cards and cigarettes and the receipt and issuance of debit card stock to inventory records are necessary to ensure these items and associated monies are properly recorded and handled.

1.6 Accountable fees

The Sheriff violated state law by contracting with a vendor to pay operating expenses of his office. In March 2013, the Sheriff contracted with a vendor to provide inmate telephone service. One of the provisions of the contract provided for the vendor to set aside $20,000 in a technology fund to be used at the direction of the Sheriff. In July 2014, the Sheriff requested the vendor purchase and pay for installation of a video monitoring system costing $9,394 using these funds. As of September 2014, the vendor held the $10,606 remaining balance of these funds. As a result of these arrangements, the county's budgetary and disbursement procedures have been circumvented, and transactions have occurred that are not reflected in the county's records.

There is no statutory authority for the Sheriff to retain monies outside the county treasury. Section 50.370, RSMo, requires every county official who receives any fees or renumeration for official services to file a monthly

report with the county and pay such monies to the County Treasurer. Operating expenses of the Sheriff's office should be paid from county funds and handled through the county's normal budgeting and disbursement practices.

Similar conditions previously reported

Similar conditions to sections 1.1 and 1.2 were noted in our 3 prior audit reports and similar conditions to section 1.4 was noted in our 2 prior audit reports.

Recommendations

The Sheriff:

1.1 Review receipt and disbursement records to determine the reason for the shortage, prepare accurate bank reconciliations and a list of liabilities monthly, and reconcile the cash balances to the list of liabilities. Any differences should be investigated and promptly resolved.

1.2 Segregate accounting and inventory duties to the extent possible or ensure documented independent or supervisory reviews of accounting and bank records are performed.

1.3 Deposit inmate monies timely, establish procedures to ensure inmate monies are refunded upon release, and require a signature from the inmate and applicable Sheriff's office employee for all refunds.

1.4 Ensure all commissary monies collected are turned over to the County Treasurer on a monthly basis, and a comparison of medical costs incurred to inmate accounts should be performed to ensure all amounts owed are collected.

1.5 Maintain inventory records of telephone cards, electronic cigarettes, and debit card stock and reconcile these records to telephone cards and cigarettes purchased and sold, debit card stock received and issued, and perform periodic physical inventory counts.

1.6 Turn over all accountable fees to the County Treasurer as required by state law. Payment of expenses should only be made through the normal county disbursement process as provided for in the county budgets.

Auditee's Response

The Sheriff provided the following written responses:

1.1 We will review receipt and disbursement records to determine the reason for the shortage, and ensure accurate bank reconciliations

and lists of liabilities are prepared and reconciled to available cash balances, and investigate any discrepancies noted.

1.2 We have hired additional help and will ensure accounting and inventory duties are more segregated. In addition, supervisory reviews of accounting and bank records will be performed each month.

1.3 Monies are being deposited in a more timely fashion now and we have established procedures to ensure inmate monies are refunded upon release. Signatures showing payment of these monies are obtained from both the inmate and the Sheriff's employee refunding the monies, and this documentation will be retained.

1.4 We have implemented procedures to ensure monies payable to the County Treasurer are disbursed each month. The collection of medical costs will now be the responsibility of the court.

1.5 We have established inventory records for needed items and complete a monthly reconciliation of items sold/used to items on hand. The reconciliation is then reviewed by the Office Administrator.

1.6 The commissary vendor does inmate phone contracts all over Missouri and other states. I thought this was the way the vendor did business and it was approved and signed by all three County Commissioners. I will check with the vendor and the County Treasurer to see if the remaining money can be placed in the Inmate Security Fund. I will work with the vendor to revise the contract.

2. Sheriff Controls and Procedures

Significant weaknesses exist in accounting controls and record-keeping procedures in the Sheriff's office. According to the county's 2014 budget, the Sheriff's office collected approximately $39,000 in civil fees and approximately $49,000 in concealed carry weapon permit fees during the year ended December 31, 2013. The Sheriff's office also collected approximately $128,000 in bonds during the year ended December 31, 2013.

2.1 Segregation of duties

The Sheriff has not adequately segregated the duties of collecting, recording, transmitting, depositing, and disbursing bond monies. The Sheriff's office bookkeeper performs all of these duties. Bond monies are initially received by jailers, and the bookkeeper collects all bond monies from the booking area of the jail. Laclede County bond receipts are transmitted by the bookkeeper to the Circuit Court. Bond monies collected for other political subdivisions are recorded by the bookkeeper on a log and deposited into the Sheriff's bond bank account for disbursement. The office

manager prepares the bank reconciliation, but neither the Sheriff nor the office manager performs a comparison of monies received to those transmitted or deposited.

Proper segregation of duties is necessary to ensure bond transactions are accounted for properly and assets are adequately safeguarded. If a proper segregation of duties cannot be achieved, a documented comparison of monies received to those transmitted, or deposited and disbursed should be performed.

2.2 Bond monies

Controls and procedures over receipting, recording, transmitting, and depositing bond monies need improvement. The Sheriff's office terminated a jailer in February 2013, after a Missouri State Highway Patrol investigation concluded a $1,000 cash bond was taken in May 2012, and terminated another jailer in February 2013, related to a $100 cash bond taken in January 2013. Despite these incidents, our review of procedures shows the Sheriff has not sufficiently corrected weaknesses related to the handling of bond monies.

- Jailers did not always retain voided bond receipt slips, and did not always accurately document the method of payment on bond receipt slips.

- The bookkeeper did not record bonds received in the bond log timely and inaccurately recorded some information. We reviewed the bond log on March 25, 2014, and found the log had not been updated since sometime in December 2013. Additionally, the bond log listed inaccurate information, including wrong bond receipt slip dates and wrong dates of court issued receipts. In one instance, the log listed the wrong court for a disbursed bond.

- The bookkeeper did not timely transmit bonds to the Laclede County Circuit Court. We reviewed 209 bonds received by the Sheriff's office for the court and determined 55 bonds (26 percent) totaling $15,379 were not transmitted within 5 days, with some being held up to 18 days before transmittal.

- The bookkeeper did not timely deposit and disburse bonds to other courts. We reviewed 142 bonds received by the Sheriff's office for other courts and determined 71 bonds (50 percent) totaling $22,560 were not deposited and disbursed within 5 days, with some being held up to 20 days before deposit and 19 days before disbursement.

Properly receipting, recording, depositing, disbursing, and transmitting bonds is necessary to ensure receipts are adequately safeguarded and to reduce the risk of loss, theft, or misuse of funds going undetected.

2.3 Civil process fees

A civil processing clerk in the Sheriff's office does not receipt civil process fees received or endorse the related checks and money orders immediately upon receipt. The Sheriff's office also does not track civil process papers served or reconcile papers served to monies received to ensure all paper service fees due have been collected and accounted for properly. The Sheriff's office typically collects civil process fees prior to performing the civil process; however, if monies are not received or an insufficient amount is received, the clerk indicated she contacts the party by phone requesting an additional payment. However, unpaid civil process fees are not tracked, and no other effort is made to collect unpaid amounts. The Sheriff's office collected approximately $39,000 in civil process fees for the year ended December 31, 2013.

To adequately account for civil process fees and reduce the risk of loss, theft, or misuse of funds, receipt slips should be issued, checks or money orders received should be endorsed immediately upon receipt, and civil process papers served should be tracked and reconciled to the related monies received and deposited. A list of unpaid civil process fees would allow the Sheriff's office to more easily review current amounts due and to take appropriate steps to ensure collection of unpaid amounts.

A similar condition was noted in our prior audit report.

2.4 Civil account bank reconciliations and liabilities

The Sheriff's office manager does not prepare accurate bank reconciliations for the civil account. The office manager has been carrying a $4,500 deposit in transit reconciling item on the civil account bank reconciliations since May 2012. We reviewed supporting documentation and determined this reconciling item was incorrectly shown as a deposit in transit and actually represents an adjustment needed because of a duplicated $4,500 deposit entry in the accounting system made on May 14, 2012. By continuing to carry such an item on the bank reconciliation the office manager is inflating the reconciled balance of the civil account.

The office manager does not identify liabilities. At our request, a list of liabilities was prepared for the civil account as of December 31, 2013. The list of liabilities prepared totaled $5,698, while the reconciled bank balance (adjusted for the $4,500 error noted above) was $8,184, resulting in an overage of $2,486 in the account.

The preparation of accurate monthly bank reconciliations and an adequate review of the reconciliations is necessary to ensure accounting records are in balance and to identify errors timely. Additionally, a list of liabilities should be prepared monthly and reconciled to cash balances to ensure sufficient cash is available for the payment of all amounts due and all monies in the bank account can be identified. Prompt follow up on discrepancies is necessary to resolve errors and ensure monies are properly disbursed.

2.5 Seized property

Adequate controls over seized property have not been established. The computerized inventory listing indicated the Sheriff's office held 2,497 items as of February 2014; however, the listing recorded no location information (building, room, shelf or bin, and box where items are stored) for 312 of these items and had incomplete location information for another 189 items. In addition, the Sheriff's office has not established procedures to dispose of seized property items held for long time periods, and a physical inventory of seized property items has not been performed in at least 2 years. According to the inventory listing, several items had been held for years with some dating back to 2005.

Considering the often sensitive nature of seized property, adequate internal controls are essential and would significantly reduce the risk of loss, theft, or misuse of the stored items. Complete and accurate inventory records should be maintained, and periodic physical inventories should be performed and the results compared to inventory records to ensure seized property is accounted for properly. Section 542.301, RSMo, provides guidance for the disposition of unclaimed seized property.

Recommendations

The Sheriff:

2.1 Segregate accounting duties to the extent possible or perform a comparison of bond monies received to those transmitted, or deposited and disbursed.

2.2 Retain voided receipt slips, ensure the method of payment is accurately recorded, record all bond transactions accurately and timely, and timely transmit or deposit and disburse bonds.

2.3 Ensure civil process fees are receipted, endorse checks and money orders immediately upon receipt, track civil process papers served, and perform a comparison of papers served to the related fees collected and deposited.

2.4 Prepare accurate bank reconciliations and a list of liabilities monthly, and reconcile the cash balances to the list of liabilities. Any differences should be investigated and promptly resolved.

2.5 Ensure a complete and accurate seized property inventory record is maintained, and a periodic inventory is conducted and reconciled to the records, and investigate any differences. The Sheriff should also make timely and appropriate dispositions of seized property.

Auditee's Response

The Sheriff provided the following written responses:

2.1 We have established additional supervisory review of bond records, including a comparison of bond monies received to those transmitted or deposited and disbursed.

2.2 We are retaining all copies of voided bond receipt slips, ensuring method of payment is adequately recorded, requiring all bond transactions to be recorded timely and accurately on the bond log, and transmitting or depositing and disbursing bonds more timely. A supervisory review of these processes is completed monthly.

2.3 We now receipt and endorse all monies received immediately upon receipt and have developed a method to track civil process papers served. A monthly comparison of papers served to the related fees collected and deposited is completed and reviewed by a supervisor.

2.4 We will ensure accurate reconciliations including a list of liabilities is prepared and will reconcile the total liabilities to the available cash balance each month. We have started to review the differences in the account.

2.5 A physical inventory of evidence is now in progress, and we will ensure an accurate and complete list of seized property is maintained. Evidence maintained for 2008 and older cases has been properly disposed. Evidence from 2009 cases has been reviewed and paperwork has been filed with the Prosecuting Attorney for appropriate disposition. Once the 2009 evidence dispositions are approved by both the Prosecuting Attorney and the Associate Circuit Judge, we will send 2010 and 2011 cases to these officials for disposition approval.

3. Assessment Fund Withholdings

The County Collector did not adequately reduce the percentage used to calculate amounts withheld from tax collections for the Assessment Fund, and as a result, $43,888 more was withheld from tax collections and disbursed to the Assessment Fund than allowed by state law during the 5 years ended December 31, 2013.

The County Collector monitored total collections monthly to determine when the limit had been reached, but did not adjust the Assessment Fund withholding percentage at that time. In March 2014, the County Collector submitted documentation to the County Treasurer requesting the disbursement of these excess withholdings to various taxing authorities within the county, and the County Treasurer indicated she plans to distribute these monies in January 2015.

Sections 137.720.1 and 137.720.3, RSMo, each provide a percentage to be deducted from property tax collections and deposited into the Assessment Fund (1 percent and 0.5 percent, respectively, for a total of 1.5 percent). However, Section 137.720.3, RSMo, limits the 0.5 percent deduction to $75,000. After this limit is reached, the percentage reduces to 1 percent. Adequate monitoring and proper calculation of Assessment Fund withholdings is necessary to ensure compliance with statutory provisions.

Recommendation

The County Collector should ensure amounts withheld from property taxes for the Assessment Fund is properly reduced in future years once the $75,000 limit is reached. The County Treasurer should also disburse amounts owed to the taxing authorities from the Assessment Fund.

Auditee's Response

The County Collector provided the following written response:

The County Collector's office strives to do everything in a timely manner and also do it correctly. This office has been in contact with the State Auditor's office, State Tax Commission, and local legislators to find proper procedures in the collection and distribution of the assessment funds in regards with statutes concerning the $75,000 cap. All agencies and commissions agree that there are not clear guidelines on how to properly calculate the overage. Also, there are possible assessment funds from municipalities that are not collected by the County Collector's office and are therefore not included in the calculation. We will continue to monitor amounts withheld from property taxes for the Assessment Fund each year and either reduce the percentage of withholding once the $75,000 limit is reached or timely refund any amount over withheld.

The County Treasurer provided the following written response:

These monies will be distributed in January 2015. Any future amounts will be timely disbursed.

4. Prosecuting Attorney Controls and Procedures

Controls and procedures over the Prosecuting Attorney's operations need improvement. Bad check restitution and fees, criminal restitution, and delinquent taxes collected by the Prosecuting Attorney's office totaled approximately $238,000 during the year ended December 31, 2013.

4.1 Accounts receivable

The Prosecuting Attorney's office does not generate a monthly list of unpaid bad checks and restitution. A complete and accurate list of unpaid bad checks and restitution would allow the Prosecuting Attorney's office to more easily review current amounts due and to take appropriate steps to ensure collection of current amounts owed.

4.2 Delinquent tax bank account

The Prosecuting Attorney maintains a delinquent tax bank account outside the county treasury. At December 31, 2013, the bank account held a reconciled cash balance of $19,952. There is no statutory authority allowing the Prosecuting Attorney to maintain this account outside the county treasury. Section 56.312.1, RSMo, requires deposit of these monies by the county treasurer into a separate interest-bearing fund to be expended at the direction of the Prosecuting Attorney.

Recommendations

The Prosecuting Attorney:

4.1 Generate a monthly list of unpaid bad checks and restitution and review the list for accuracy.

4.2 Transfer the balances of the delinquent tax account to the County Treasurer and close the account.

Auditee's Response

The Prosecuting Attorney provided the following written responses:

4.1 The Prosecuting Attorney's office is in the process of changing software for bad check cases and collecting restitution. That software will be incorporated into our case management system. The software provider is still trying to solve some issues with the software, but the Prosecuting Attorney's office is hopeful that the conversion will be made in 2015. At that time, the Prosecuting Attorney's office will strive to keep any lists or reports that are generated complete and accurate.

4.2 Years ago, I pointed out during the budget process, that Missouri statutes specifically state that money paid to the Prosecuting Attorney for collecting delinquent taxes is not to be budgeted by the governing body of the county. I was told at that time, the Prosecuting Attorney's office would have to be responsible for those funds and the funds would not go through the county accounts. Therefore, the Prosecuting Attorney's office has maintained that account separately from other county accounts. However, upon your recommendation, the funds in the delinquent tax account have been transferred to the County Treasurer and the account has been closed.

5. County Meeting Minutes and Procedures

Improvement is needed in the county's controls and procedures over minutes, Enhanced Enterprise Zone (EEZ) tax abatements, the County Collector's city commissions and contract, fuel, and capital assets.

5.1 Meeting minutes

Procedures over open and closed meetings of the County Commission need improvement. The County Commission held 7 closed meetings during the year ended December 31, 2013.

For 3 of the 7 closed meetings, open meeting minutes did not document the specific reasons or section of law allowing the meetings to be closed. In addition, some issues discussed in closed sessions were not allowable by law, such as salary increases for County Assessor's office employees.

The Sunshine Law, Chapter 610, RSMo, indicates the specific reasons for the closed meetings shall be voted on at an open meeting and limits discussion topics and actions in closed meetings to only those specifically allowed by law.

5.2 EEZ tax abatements

The County Commission did not properly review and approve authorizing resolutions for tax abatements approved by the EEZ Board. The County Commission established the EEZ Board in 2005. The purpose of the EEZ Board is to advise the County Commission regarding real estate tax abatements and other economic development incentives for businesses within a designated area who meet specific criteria for economic growth. After the EEZ Board approves an abatement agreement, the County Commission is required by Section 135.963, RSMo, to hold a public hearing prior to authorizing the tax abatement through a formal resolution. Our review of the EEZ Board and County Commission minutes identified several real estate tax abatements approved by the EEZ Board where no subsequent public hearings occurred and no resolutions were passed authorizing the tax abatements. The County Commission indicated the EEZ Board did not provide notification of these abatement agreements and therefore no authorization actions took place.

5.3 County Collector's city commissions and contracts

The county did not report the amount of city commissions paid to the County Collector or subject the payments to payroll tax withholdings as required. During the year ended December 31, 2013, the county paid the County Collector $16,398 in city property tax commissions without reporting this amount on his W-2 form or withholding payroll taxes.

The county's current practice of handling city commissions in this manner is in violation of a strict interpretation of payroll tax regulations. The county is at risk of incurring additional payroll liabilities plus interest and penalties by utilizing the current practice. IRS regulations require all compensation paid to employees be subject to payroll tax and reported on W-2 forms. In addition, the County Commission and County Collector should consider these additional costs to the county and reevaluate the existing city tax collection contracts.

In addition, Section 52.290, RSMo, allows for the collection of the 7 percent penalty on delinquent taxes and provides for the penalty to be distributed as follows: two-sevenths to the County General Revenue Fund, two-sevenths to the Tax Maintenance Fund, and three-sevenths to the County Employee Retirement Fund (CERF). However, for the City of Lebanon and City of Phillipsburg, the County Collector personally retains five-sevenths of the 7 percent penalty collected instead of distributing the 2 percent penalty to the Tax Maintenance Fund and the 3 percent penalty to the CERF. While the 7 percent penalty collected on delinquent city taxes is assessed, it is not distributed as provided by state law. Of the $4,931 in penalties collected on city taxes, $3,522 was retained by the County Collector rather than distributing the monies to the Tax Maintenance Fund ($1,409), and CERF ($2,113) as specified by law. Any penalty charged to taxpayers should be based on state law.

5.4 Fuel use

The county does not have procedures in place to reconcile fuel logs with fuel purchases. Fuel and usage logs are maintained for all county-owned vehicles and equipment. However, this usage information is not reconciled to fuel purchases. Accounting records indicate fuel purchases totaled approximately $370,000 during the year ended December 31, 2013.

Procedures for reviewing fuel use and reconciling use to fuel purchased are necessary to ensure the reasonableness and propriety of fuel use and disbursements. Failure to account for fuel purchases could result in loss, theft, and misuse going undetected.

5.5 Capital assets

Procedures and records to account for county property are not adequate. The listing of assets maintained has not been updated in many years, and the last physical inventory completed was in 2011. In addition, the county does not have adequate procedures in place to identify capital asset purchases and dispositions throughout the year. As a result, the county's capital asset records are not complete and up to date. Records valued the county's buildings and contents at approximately $25 million at January 2014.

Adequate capital asset records and procedures are necessary to ensure effective internal controls, meet statutory requirements, and provide a basis for determining proper insurance coverage. Procedures to track capital asset purchases and dispositions throughout the year and compare to physical inventory results would enhance the county's ability to account for capital assets and potentially identify unrecorded additions and dispositions, identify obsolete assets, and deter and detect theft of assets. Section 49.093, RSMo, provides that the officer or designee of each county department is responsible for performing annual inspections and inventories of county property used by that department and for submitting an inventory report to the County Clerk.

Similar conditions previously reported

Similar conditions to sections 5.1 and 5.4 were noted in our prior audit report.

Recommendations

5.1 The County Commission ensure specific reasons for closing a meeting are documented, and discuss only allowable topics in closed meetings.

5.2 The County Commission should hold public hearings to review tax abatement proposals made by the EEZ Board. If the County Commission approves the abatements, the County Commission should authorize them through formal resolutions.

5.3 The County Commission ensure commissions paid to the County Collector are subject to payroll taxes and properly reported on W-2 forms. The County Commission and County Collector should consider these additional costs and reevaluate the existing city tax collection contracts, and ensure fees and penalties charged on delinquent city taxes are based upon applicable state laws or city ordinances.

5.4 The County Commission ensure fuel use is reconciled to fuel purchases, and promptly investigate any significant discrepancies.

5.5 The County Commission and the County Clerk work with other county officials to ensure complete and accurate inventory records are maintained and annual physical inventories are conducted, and implement procedures for tracking capital asset purchases and dispositions throughout the year.

Auditee's Response

The County Commission provided the following written responses:

5.1 We feel we have used the closed session policy as per the Sunshine Law for our intended purposes. We are sure the procedures need to be improved upon and we will continue to strive to do so.

5.2 The County Commission will work with the EEZ Board to ensure public hearings to review tax abatement proposals are held, and if the County Commission approves the abatements, we will authorize them through formal resolutions.

5.3 As per the agreements with the city and village, the city and village covenant and agree to compensate the Laclede County Collector; the County Collector is contracted for the city's and village's purposes and is not collecting taxes for the county under these agreements. We will work with the County Collector and the city and village to update the agreements, ensure compliance with

payroll tax regulations, and ensure penalties charged on delinquent city and village taxes are distributed in compliance with state law.

5.4 We have implemented fuel logs on all county-owned pieces of equipment. We promptly check out any discrepancies significant or not.

5.5 We need to update our inventory records. We need to and are working with our inventory person, as well as officeholders, to create a better and more accurate, complete inventory system. The person assigned to inventory now is new at inventory responsibility.

The County Clerk provided the following written responses:

5.1 I do not know what we are going to talk about in detail most of the time. I have asked the County Commission to cite statutes, and they are going to work on making sure the specific statutes are identified in their motions. I will encourage them to and help provide information related to this process.

5.5 Inventory tracking responsibilities were given to an employee in the County Treasurer's office by the County Commission.

The County Collector provided the following written response:

5.3 The County Collector would consider renegotiating with the County Commission the percentage of total collections in place of the delinquent penalty phrase of the cooperative agreement.

Laclede County
Organization and Statistical Information

Laclede County is a county-organized, third-class county. The county seat is Lebanon.

Laclede County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 145 full-time employees and 15 part-time employees on December 31, 2013.

In addition, county operations include the Senate Bill 40 Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Danny Rhoades, Presiding Commissioner	$	32,334
Joe Pickering, Associate Commissioner		29,700
Jack Glendenning, Associate Commissioner		29,700
Lynn Stowe, Recorder of Deeds		45,900
Glenda Mott, County Clerk		45,900
Jon Morris, Prosecuting Attorney		56,100
Wayne Merritt, Sheriff		50,000
Jean Cook, County Treasurer		45,900
Steve Murrell, County Coroner		16,000
Sherry Shamel, Public Administrator		45,000
Steve Pickering, County Collector (1), year ended February 28,	63,104	
Johnny North, County Assessor, year ended August 31,		45,000
Robert Shotts, County Surveyor (2)		8,000

(1) Includes $17,204 of commissions earned for collecting city property taxes.
(2) Compensation on a fee basis.

Financing Arrangements

In 1997, the county issued $78,000 in Limited General Obligation Bonds. The bonds bear interest at the rate of 6.5 percent. Principal and interest payments are due on March 1 of each year. The remaining principal outstanding at December 31, 2013, was $24,000. Interest remaining to be paid over the life of the agreement totals $4,095.

In 2011, the county entered into a loan agreement with the Missouri Department of Natural Resources through the Energy Efficiency Leveraged Loan Program in the amount of $133,010, with zero interest. Semi-annual principal payments are due in February and August each year. The remaining principal outstanding at December 31, 2013, was $96,725. Final payment is due in August 2016.

In 2011, the county entered into a promissory note agreement in the amount of $33,180 for the purpose of constructing certain road improvements within the Neighborhood Improvement District of Harrill Lane. The note bears an interest rate of 6.75 percent. Principal and interest payments are due annually on March 20. The remaining principal outstanding at December 31, 2013, was $19,908. Interest remaining to be paid over the life of the agreement totals $2,688.

In 2009, the county entered into a cancelable lease-purchase agreement to finance the purchase of a grader at a total cost of $202,866. The agreement requires annual payments of $10,113 through 2013 with a balloon payment of $157,833 due in 2014. The lease bears interest at the rate of 3.15 percent. The remaining principal outstanding at December 31, 2013, was $152,570. Interest remaining to be paid over the life of the agreement totals $5,263.

In 2009, the county entered into a cancelable lease-purchase agreement to finance the purchase of a grader at a total cost of $202,866. The agreement requires annual payments of $13,859 through 2013 with a balloon payment of $161,579 due in 2014. The lease bears interest at the rate of 3.15 percent. The remaining principal outstanding at December 31, 2013, was $156,200. Interest remaining to be paid over the life of the agreement totals $5,379.

In 2010, the county entered into a cancelable lease-purchase agreement to finance the purchase of two graders at a total cost of $412,000. The agreement requires annual payments of $29,190 through 2014 with a balloon payment of $318,000 due in 2015. The lease bears interest at the rate of 3 percent. The remaining principal outstanding at December 31, 2013, was $328,085. Interest remaining to be paid over the life of the agreement totals $19,105.

In 2011, the county entered into a cancelable lease-purchase agreement to finance the purchase of a grader at a total cost of $226,850. The agreement requires annual payments of $13,970 through 2015 with a balloon payment of $157,000 due in 2016. The lease bears interest at the rate of 3.38 percent. The remaining principal outstanding at December 31, 2013, was $168,683. Interest remaining to be paid over the life of the agreement totals $16,257.

In 2012, the county entered into a cancelable lease-purchase agreement to finance the purchase of a backhoe at a total cost of $196,227. The agreement

requires annual payments of $28,742, with a balloon payment of $110,000 in 2015. The lease bears interest at the rate of 2.65 percent. The remaining principal outstanding at December 31, 2013, was $132,394. Interest remaining to be paid over the life of the agreement totals $6,348.

In 2012, the county entered into a cancelable lease-purchase agreement to finance energy upgrades in the amount of $3,100,000. The agreement requires semi-annual payments of $133,881 through 2026. The lease bears interest at the rate of 3.01 percent. The remaining principal outstanding at December 31, 2013, was $2,859,699. Interest remaining to be paid over the life of the agreement totals $621,207.

In 2013, the county entered into a cancelable lease-purchase agreement to finance the purchase of a motor grader in the amount of $181,821. The agreement requires annual payments of $17,745 through 2016 with a balloon payment of $119,645 due in 2016. The lease bears interest at the rate of 1.56 percent. The remaining principal outstanding at December 31, 2013, was $164,076. Interest remaining to be paid over the life of the agreement totals $8,804.

In 2013, the county entered into a cancelable lease-purchase agreement to finance the purchase of a motor grader in the amount of $155,321. The agreement requires annual payments of $12,279 through 2016 with a balloon payment of $114,179 due in 2017. The lease bears interest at the rate of 1.5 percent. The remaining principal outstanding at December 31, 2013, was $143,042. Interest remaining to be paid over the life of the agreement totals $7,974.

Perry County

December 2014

Report No. 2014-135

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Perry County

Financial Condition	As noted in our prior audit report, the financial condition of the General Revenue Fund is weak. The balance of the fund at December 31, 2013, was $77,885 and is not expected to significantly improve during 2014. In 1997, the county authorized the sale of $10.4 million in general obligation bonds to pay for the cost of constructing a multi-purpose center. Voters approved a one-half cent sales tax to fund annual principal and interest payments; however, the sales tax is set to expire on March 31, 2017, and revenues are expected to fall short in paying off the bonds. As a result, projected shortfalls of at least $202,000 in the Local Park Sales Tax Fund may further weaken the General Revenue Fund. Further, the county has reduced property tax rates more than required during a time when the financial condition of the General Revenue Fund is weak.
Property Tax System	Neither the County Commission nor the County Clerk adequately reviews the financial activities of the County Collector. The County Clerk updates the tax books based on changes made to the property tax system, but does not use this record to review the County Collector's annual settlements, and this record does not include all information needed to verify annual settlements. The County Commission does not review and approve the County Collector's annual settlements.
Sheriff Controls and Procedures	The Sheriff has not adequately segregated accounting duties and does not perform an adequate supervisory review of the accounting records. The Sheriff holds profits generated by the jail commissary for future use by his office, and does not deposit them into the county Inmate Prisoner Detainee Security Fund as required by state law. The Sheriff uses the profits to purchase supplies and equipment, circumventing the normal budget and procurement process. The Sheriff's office does not track commissary profits and it is unclear whether the Sheriff's office can account for all profits. The Sheriff also does not reconcile fuel purchases to fuel usage for the Sheriff's bulk fuel tank, and does not document his review of fuel usage reports.
County Procedures	The county does not have adequate procedures to monitor rock usage by the road and bridge department from the county-owned rock quarry. As noted in our prior audit, the county does not properly monitor fuel use from the department's 2 bulk fuel tanks or reconcile fuel billings to fuel use records for the road and bridge department. The County Clerk, County Collector, Prosecuting Attorney, Sheriff, Public Administrator, and County Assessor do not require employees to change passwords on a periodic basis, and security controls are not in place for most county offices to lock a computer after a certain period of inactivity. The County Clerk did not maintain documentation of calculations used to support sales tax and voluntary reductions, and the County Clerk did not properly consider prior year levy reduction results when performing his annual calculations.

Prosecuting Attorney Controls and Procedures	The Prosecuting Attorney does not have controls and procedures in place to ensure court-ordered restitution received is timely remitted to victims. For 4 of 10 cases reviewed, restitution received, totaling $6,185, had not been disbursed as of December 31, 2013. The Prosecuting Attorney's office received payments for restitution on these cases between January 2006 and December 2013 and balances available for disbursement ranged from $933 to $2,381 for each case.
Public Administrator Controls and Procedures	The Public Administrator's office does not issue receipt slips for or maintain a log of monies received, endorse checks upon receipt, or deposit receipts timely. The Public Administrator does not reconcile prepayments made for burial plans to actual funeral expenses subsequently incurred, and as a result, the Public Administrator has paid more than actual cost for funeral expenses for at least one ward.
Recorder of Deeds Segregation of Duties	The Recorder of Deeds has not adequately segregated accounting duties. The deputy clerk receipts monies and prepares the deposit; however, the Recorder of Deeds performs all remaining functions. An independent review of detailed accounting records or a comparison of monies received and deposited to the bank statements is not performed.
Senate Bill 40 Board Closed Minutes	The Senate Bill 40 Board held 3 closed meetings from January 2013 to January 2014, but did not always follow Sunshine Law requirements. The Board did not cite a specific section of the law as the reason for entering into closed session or document the vote of each member approving to enter into closed session. Additionally, the Board did not make public the results of the votes taken and the final disposition of matters discussed in closed meetings, when required.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 17

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Perry County

We have audited certain operations of Perry County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones & Associates, Certified Public Accountants, was engaged to audit the financial statements of Perry County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

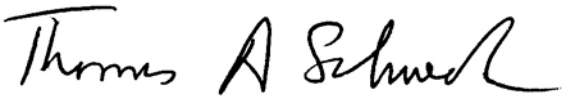
3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Perry County.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Keriann Wright, MBA, CPA
In-Charge Auditor:	Steven Re', CPA
Audit Staff:	Erica Schroer, MBA
	Sara Lewis, CPA
	Christopher A. McClain

Perry County
Management Advisory Report
State Auditor's Findings

1. Financial Condition

As noted in our prior audit report, the financial condition of the General Revenue Fund is weak. Additionally, future liabilities may further weaken the fund's financial condition. The following table reflects actual receipts, disbursements, and ending cash balances of the General Revenue Fund for the last 3 years and anticipated amounts for 2014.

General Revenue Fund		2014 Budgeted *	2013 Actual **	2012 Actual **	2011 Actual *
Beginning Balance, January 1	$	77,885	75,101	190,422	80,428
Receipts		3,421,199	3,187,570	3,212,852	3,145,617
Disbursements		3,374,651	3,184,786	3,328,173	3,035,623
Ending Balance, December 31	$	124,433	77,885	75,101	190,422

* Amounts were obtained from county budget documents.
** Amounts were obtained from audited financial statements.

The General Revenue Fund balance at December 31, 2013, was $77,885 and is not expected to significantly improve during 2014. Overall receipts and disbursements have remained fairly similar in prior years, resulting in little growth, if any, in the fund balance. The financial condition of the fund may be further weakened by projected shortfalls of at least $202,000 in the Local Park Sales Tax Fund anticipated to occur between 2015 and 2017.

In 1997, the county authorized the sale of $10.4 million in general obligation bonds to pay for the cost of constructing a multi-purpose center consisting of a library, swimming pool, gym, movie theatre, and other amenities. Voters approved a one-half cent sales tax, effective April 1, 1997, for 20 years, to provide revenues to make annual principal and interest payments on the bonds. The sales tax is set to expire on March 31, 2017, and according to projections from the county's bond underwriter, sales tax revenues are expected to fall short in paying off the bonds. As a result, additional monies from the General Revenue Fund may be needed to offset revenue shortages in the Local Park Sales Tax Fund.

Since 2012 the county has borrowed monies to make the bond payments due until sales tax revenues were sufficient to cover the payments. For example, in 2012 the county transferred $85,000 from the General Revenue Fund to the Local Park Sales Tax Fund to cover cash flow shortages, and in 2013 the County Commission issued $300,000 in tax anticipation notes to have sufficient funds to pay the principal and interest payment due. The county repaid the General Revenue Fund and the tax anticipation notes in full when sales tax revenues were sufficient. Bond principal payments average approximately $886,000 each year for the next 4 years.

In April 2014, the county refinanced the bonds in an effort to reduce the interest owed. The bond underwriter assisting in the refinancing arrangement provided a projection that estimated an annual cash flow

shortage ranging from $66,000 to $69,000 each year in the Local Park Sales Tax Fund (approximately $202,000 in total) from 2015 to 2017, when the final bond payment is due. If these shortages occur and receipts and disbursements of the county's General Revenue Fund remain steady, it is unlikely the fund will be able to cover the total shortage.

Further, the county has reduced property tax rates more than required during a time when the financial condition of the General Revenue Fund is weak. As described in MAR finding number 4.5, Perry County voters enacted a one-half cent sales tax with a provision to reduce property taxes by 50 percent of sales taxes collected. For many years, the county has chosen to reduce the property tax rate to .18 for the General Revenue Fund, which exceeds the required reduction of 50 percent of general revenue sales taxes collected. The County Commission should evaluate the financial needs of the General Revenue Fund when calculating the voluntary reduction (additional reduction beyond the required sales tax reduction), if any, to the property tax rate.

The County Commissioners are aware of the projected sales tax revenue shortfalls in the Local Park Sales Tax Fund and are considering alternatives to resolve the issue. At the September 4, 2014, public tax rate hearing, the County Commission proposed and approved an increase in the General Revenue tax levy from 0.18 to 0.22 (a 22 percent increase). The county estimates this increase will generate approximately $120,000 in additional revenue for the General Revenue Fund in 2015. Additionally, the county passed a local use sales tax in April 2013 that is expected to generate an additional $80,000 in annual revenues for the General Revenue Fund. The County Commission is also exploring other alternatives to increase revenues and is continually monitoring and searching for areas to reduce disbursements.

Recommendation

The County Commission should make changes necessary to ensure adequate funds are available to cover all liabilities. Possible options to improving the county's financial condition include reducing spending where possible, evaluating controls and management practices to ensure efficient use of county resources, maximizing all sources of revenue, and closely monitoring county budgets.

Auditee's Response

The County Commission provided the following response:

The County Commission agrees with the recommendation and has made changes to increase revenues. The county has increased the property tax levy from .18 to .22 which will generate an additional $120,000. In addition, the county passed a local use sales tax in April 2013 and are expecting a decrease in some personnel benefit disbursements in 2015.

2. Property Tax System

Neither the County Commission nor the County Clerk adequately reviews the financial activities of the County Collector. The County Clerk updates the tax books based on any changes made to the property tax system, such as additions and abatements; however, the County Clerk does not use the updated tax books to review the County Collector's annual settlements and does not include all information, such as collections and protested taxes, needed to verify annual settlements. The County Clerk uses the County Collector's property tax system to verify the amounts reported in the annual settlements. Further, the County Commission does not review and approve the County Collector's annual settlements. The County Clerk discusses the annual settlements with the County Commission; however, the County Commission does not review and approve the annual settlements.

Section 51.150.1(2), RSMo, requires the County Clerk to maintain accounts with all persons chargeable with monies payable into the county treasury. An accurate account book or other records summarizing all taxes charged to the County Collector, monthly collections, delinquent credits, additions and abatements, and protested amounts should be maintained by the County Clerk. Such records should be used by the County Clerk and County Commission to verify the County Collector's annual settlements. Such procedures are intended to establish checks and balances related to the collection of property taxes.

Recommendation

The County Clerk maintain a complete and accurate account book or other records summarizing the financial activity of the County Collector. In addition, the County Clerk and County Commission should use the account book or other records to review the accuracy and completeness of annual settlements.

Auditee's Response

The County Clerk provided the following written response:

The County Clerk receives the tax books from the County Assessor's office in June and once received all additions and abatements are entered by the County Clerk and staff. Addition and abatement reports, although being in the same system that the County Collector uses, are reviewed monthly. The County Clerk receives each monthly report from the County Collector and it is also reviewed. The annual settlement from the County Collector is presented to the County Commission by the County Collector and accepted by the County Commission. The county's taxing and collection program is in the process of being updated to separate the addition and abatement reports and we expect this update to satisfy the Auditor's concerns with these procedures. In addition, records summarizing the activities in the County Collector's office will be maintained. System changes will also help with this record.

The County Commission provided the following response:

The County Commission agrees with the recommendation and will review the County Collector's annual settlement for accuracy using the County Clerk's account book.

3. Sheriff Controls and Procedures

Controls and procedures in the Sheriff's office need improvement. The Sheriff's office deposited approximately $249,000 into the general bank account and approximately $36,000 into the commissary bank account during the year ended December 31, 2013.

3.1 Segregation of duties

The Sheriff has not adequately segregated accounting duties and does not perform an adequate supervisory review of the accounting records. One office clerk is primarily responsible for receipting; recording; depositing/transmitting to the County Treasurer; and disbursing monies for the general, commissary, and uniform bank accounts. The Sheriff's review of bank reconciliations is not documented and a detailed review of accounting records is not performed.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receiving, recording, depositing, and disbursing monies. If proper segregation of duties cannot be achieved, documented independent supervisory reviews of accounting and bank records are essential and should include comparing daily receipt activity to deposits.

3.2 Commissary profits

Procedures over commissary profits need improvement. The Sheriff's office operates a commissary to provide various goods to inmates, paid for from personal inmate commissary accounts. The Sheriff's office indicated approximately $38,700 in commissary profits and accumulated interest was in the Sheriff's commissary bank account as of December 31, 2013.

The Sheriff does not deposit commissary profits into the county Inmate Prisoner Detainee Security Fund as required by state law. Instead, the Sheriff accounts for commissary sales, purchases, and resulting profits in the commissary bank account and holds profits for future use by his office. The Sheriff uses the profits to purchase various supplies and equipment; however, these purchases do not go through the normal budget and procurement process and are not approved by the County Commission. The Sheriff stated he approves all purchases. During 2013, the Sheriff's office made purchases for computer equipment, software, and office equipment using commissary profits totaling $3,626.

In addition, the Sheriff's office does not track commissary profits and it is unclear whether all profits can be accounted for. The Sheriff's clerk determines profits when comparing liabilities to the available cash balance

when preparing the bank reconciliations. Any monies remaining in the bank account after accounting for inmates' commissary balances are assumed to be commissary profits. However, without adequate tracking procedures, profits cannot be fully accounted for and the Sheriff's office cannot support that the amount in the commissary bank account is accurate. Further, without adequate tracking there is less assurance the Sheriff's office complies with state laws regarding the accounting and use of commissary profits.

Section 221.102, RSMo (effective August 28, 2013), requires each county jail to keep revenues from its canteen or commissary in a separate account and pay for goods and other expenses from that account, allows retention of a minimum amount of money in the account for cash flow purposes and current expenses, and requires deposit of the remaining funds (profits) into the county Inmate Prisoner Detainee Security Fund held by the County Treasurer. In addition, Section 488.5026.3, RSMo, provides guidance concerning the usage of those funds.

3.3 Fuel reconciliation

The Sheriff does not have procedures in place to reconcile fuel purchases to fuel usage for the Sheriff's bulk fuel tank, and does not document his review of fuel usage reports. Deputies fuel patrol cars using the bulk fuel tank. The fuel tank is monitored by video camera; however, the tank is easily accessible, unlocked, and the pump is always turned on. During the year ended December 31, 2013, the Sheriff's office spent approximately $58,400 on fuel for 19 vehicles.

Each time patrol cars are fueled, deputies contact the dispatcher to report the car number, fuel tank reading, and odometer reading for office records. This information is compiled, miles per gallon (mpg) is calculated for each vehicle, and the Sheriff reviews a monthly summary report of this information for reasonableness. The Sheriff does not document his review and the information is not used to reconcile fuel used to fuel purchased. During 2013, gallons used per month ranged from 1,200 to 1,900 and mpg for each vehicle ranged from 11 to 23. Gallons used and mpg per month can vary depending on the primary focus of each deputy during the month and the varied time spent driving versus idling.

Procedures for reviewing fuel use and reconciling use to fuel purchased are necessary to ensure the reasonableness and propriety of fuel use and disbursements. Failure to account for fuel purchases could result in loss, theft, and misuse going undetected.

Recommendations

The Sheriff:

3.1 Adequately segregate accounting duties or ensure supervisory reviews of detailed accounting records are performed and documented.

3.2 Ensure existing and future commissary profits are adequately tracked, turned over to the County Treasurer to be deposited in the Inmate Prisoner Detainee Security Fund, and used in accordance with state law.

3.3 Establish procedures to reconcile fuel purchased to fuel used and document reviews of fuel use for completeness and reasonableness.

Auditee's Response

The Sheriff provided the following written responses:

3.1 I trust the personnel here completely. I agree that review by another person would assure accountability; however, I only have one person available for these duties. My remedy for this situation will be to ask the County Commission for additional secretarial staff in the next budget year. We did have a part-time secretary that served this role, but she was needed full-time at the 911 office.

3.2 I will confer with my secretary to determine what cash will need to be kept on hand in the bank account, and forward the balance to the County Treasurer. In addition, we will start tracking commissary profits.

3.3 I concur with your recommendation. We plan to take steps to implement additional controls over fuel use.

4. County Procedures

Controls and procedures over rock and road and bridge fuel usage, county computer controls, and county sales tax reduction calculations need improvement.

4.1 Rock usage

The county does not have adequate procedures to monitor rock usage by the road and bridge department. The county owns and operates a rock quarry for the purpose of maintaining and paving county roads. The county contracts with a local vendor to drill, blast, and stockpile rock, and paid approximately $280,000 for this service during the year ended December 31, 2013.

Road and bridge employees maintain a daily usage log in their work truck detailing the location of work completed and the number of loads of rock used. The road and bridge supervisor and the County Commission review individual logs weekly; however, there are no quarry records to compare the logs against and there are no other controls in place to ensure rock usage is appropriate and accounted for properly. Further, there are no county employees at the quarry to monitor or account for rock removed.

Without adequate controls over rock usage, there is less assurance theft, waste, or misuse of county assets would be detected timely.

4.2 Fuel reconciliation

As noted in our prior audit, the county does not properly monitor fuel use or reconcile fuel billings to fuel use records for the road and bridge department. The road and bridge department maintains 26 vehicles and 22 equipment items and spent approximately $149,000 on fuel for the year ended December 31, 2013. The road and bridge department purchases fuel from local vendors for 2 bulk fuel tanks (one diesel and one unleaded) located at the road and bridge facilities.

The bulk fuel tanks are electronically metered and fuel usage reports are generated showing required information entered by employees when fueling vehicles/equipment. In addition, employees are required to enter an individualized pin number prior to pumping fuel and maintain mileage logs in each vehicle. County officials review the logs for reasonableness of fuel use, but do not reconcile usage per the logs to fuel purchased.

Procedures for reconciling fuel use to fuel purchased are necessary to ensure vehicles and equipment are properly utilized, prevent paying vendors for improper billing amounts, and decrease the risk of loss, theft, or misuse of fuel occurring without detection.

4.3 User passwords

The County Clerk, County Collector, Prosecuting Attorney, Sheriff, Public Administrator, and County Assessor have not established adequate password controls to reduce the risk of unauthorized access to office computers and data. Passwords are required to authenticate access to computer systems for most offices; however, county employees are not required to change passwords periodically to help ensure passwords remain known only to the assigned user and to reduce the risk of a compromised password. In addition, the County Treasurer does not require passwords to log on to that office's computer. Without requiring passwords to access the County Treasurer's computer, there is no assurance that the county's financial information is protected from unauthorized access and use.

The security of a computer is dependent upon requiring passwords and keeping passwords confidential. However, since employees in several offices are not required to change passwords periodically, there is less assurance passwords are effectively limiting access to computers and data files to only those individuals who need access to perform their job responsibilities. Passwords should be unique and confidential and changed periodically to reduce the risk of unauthorized access to and use of computers and data.

4.4 Security controls

Security controls are not in place for most county offices to lock a computer after a certain period of inactivity. Inactivity controls are necessary to reduce the risk of unauthorized individuals accessing an unattended computer and having potentially unrestricted access to programs and data files. Without effective security controls, there is an increased risk of

unauthorized access to computers and the improper use, modification, or destruction of data.

4.5 County sales tax

Procedures for calculating property tax levy reductions need improvement. The County Clerk did not maintain documentation of calculations to support levy reductions, and did not properly consider prior year results in his calculations.

Section 67.505, RSMo, requires the county to reduce property taxes for a percentage of sales taxes collected. As described in MAR finding number 1, Perry County voters enacted a one-half cent sales tax with a provision to reduce property taxes collected. The county is required to estimate the annual property tax levy to meet the 50 percent reduction requirement and provides for an adjustment for actual sales tax collections of the preceding year that are more or less than the estimate for the preceding year.

The county is required to certify to the State Auditor's office the annual property tax levy including the amount the levy is reduced for sales tax collections, as well as any voluntary reductions, if any. For many years, the county has chosen to set the general revenue property tax levy at .18, which involves a voluntary reduction beyond the required sales tax reduction. The County Clerk calculates the sales tax reduction based on an estimate of sales taxes collected, and the remainder of the reduction needed to reach an .18 property tax levy is reported as a voluntary reduction. The County Clerk did not maintain documentation of calculations used to support the sales tax and voluntary reductions, and did not properly consider prior year levy reduction results when performing his annual calculations

To ensure property tax levies are properly set and property tax rate ceilings are maintained, the County Commission and County Clerk should ensure property tax levy reductions are accurately calculated, reported, and certified. Documentation of calculations and tax rate setting decisions is important to demonstrate compliance with statutory provisions and serve as a reference tool should questions arise.

Recommendations

4.1 The County Commission establish procedures to monitor and account for rock use.

4.2 The County Commission establish procedures to reconcile fuel purchased to fuel used, and promptly investigate any significant discrepancies.

4.3 The County Commission work with county officials to require a unique password for each employee that is confidential and periodically changed to prevent unauthorized access to computer systems and data.

4.4 The County Commission work with county officials to require each employee's computer to have security controls in place to lock the computer after a certain period of inactivity.

4.5 The County Clerk should properly consider prior year levy reduction results when performing annual calculations for property tax reductions (sales tax or voluntary), and maintain documentation of the calculations to support the property tax reductions made.

Auditee's Response

The County Commission provided the following responses:

4.1 The County Commission has implemented procedures and is tracking and accounting for rock usage. In addition, the road and bridge supervisor is reviewing the log of rock usage to the rock spread on county roads.

4.2 The County Commission continuously monitors fuel usage and will develop procedures to track and account for fuel purchases and perform a reconciliation of fuel purchases to fuel usage.

4.3 The County Commission will work with other officials to establish adequate password controls, including establishing and changing passwords periodically.

4.4 The County Commission will work with other officials to adequately lock computer access after a period of inactivity.

The County Clerk provided the following written response:

4.5 The County Clerk maintains that adequate rollbacks were taken each year but not properly classified as to sales tax reduction or voluntary reduction, per this finding. Changes will be made to maintain documentation of the calculations to support all property tax reductions and I will make the incoming County Clerk aware of this issue.

5. Prosecuting Attorney Controls and Procedures

The Prosecuting Attorney does not have controls and procedures in place to ensure court ordered restitution received is timely remitted to victims. The deputy clerk receipts and deposits restitution payments received into the restitution bank account for future disbursement to victims; however, some restitution received has been held for extended time periods. For 4 of 10 cases reviewed, restitution received, totaling $6,185, had not been disbursed as of December 31, 2013. The Prosecuting Attorney's office received payments for restitution on these cases between January 2006 and December 2013 and balances available for disbursement ranged from $933 to $2,381 for each case. The deputy clerk stated the timing of restitution

disbursements is made on a case-by-case basis and disbursements are typically made when either all or a substantial portion of restitution owed has been collected. Further, the Prosecuting Attorney indicated many cases have multiple victims and a substantial portion of restitution must be received before they can make disbursements to each of the victims. As of December 31, 2013, the Prosecuting Attorney held restitution totaling $14,156 relating to 45 cases.

To adequately account for collections and reduce the risk of loss, theft, or misuse of funds, restitution received should be disbursed timely.

Recommendation

The Prosecuting Attorney develop procedures to ensure restitution monies collected are disbursed timely.

Auditee's Response

The Prosecuting Attorney provided the following written response:

Cases are reviewed monthly for payment of restitution; however, a policy for more specific procedures to ensure that restitution monies collected are disbursed in a timely manner will be instituted.

6. Public Administrator Controls and Procedures

Procedures for receipting and depositing monies and reconciling burial plan costs for some wards need improvement. As of December 31, 2013, the Public Administrator had 91 wards with assets totaling $913,000, of which 23 wards' assets included prepaid burial plans totaling $125,500.

6.1 Receipts and deposits

The Public Administrator's office does not issue receipt slips for or maintain a log of monies received, endorse checks upon receipt, or deposit receipts timely. As a result, there is less assurance all monies received are properly accounted for and deposited. The deputy clerk places checks received in the ward's folder until the deposit is prepared, at which time the deputy clerk endorses the checks and enters the amounts into the ward's checkbook register. A cash count performed on June 4, 2014, identified 7 checks totaling $1,238 with dates ranging from May 28 to May 30, 2014. None of the checks had been recorded in the receipt records or restrictively endorsed. In addition, the checks were deposited on June 11, 2014, and June 12, 2014, approximately 2 weeks after issuance. Because the Public Administrator does not maintain adequate receipt records, it is not clear when her office received these checks.

To safeguard receipts and reduce the risk of loss, theft, or misuse of funds, issue receipt slips for all monies received, enter receipts into the accounting records, and endorse checks upon receipt. In addition, deposit monies timely.

6.2 Burial plan costs

The Public Administrator does not reconcile prepayments made for burial plans to actual funeral expenses subsequently incurred. As a result, the Public Administrator has paid more than actual cost for funeral expenses for at least one ward. The Public Administrator periodically prepays funeral homes for future funeral expenses for some wards and adds to burial plans as funds allow. During a review of a ward's final annual settlement, we noted the amount prepaid for burial expenses exceeded actual costs by $475. At the time of our review in July 2014, the Public Administrator had not requested a statement from the funeral home to compare actual costs to the amount prepaid although the funeral took place in February 2014.

To ensure payments are valid and proper, the Public Administrator should maintain adequate supporting documentation for disbursements paid and ensure amounts prepaid on burial plans do not exceed actual cost.

Recommendations

The Public Administrator:

6.1 Issue prenumbered receipt slips or maintain a log for all monies received, endorse checks upon receipt, and deposit timely.

6.2 Reconcile prepaid burial plans to actual cost and seek reimbursement when appropriate. In addition, the Public Administrator should maintain adequate supporting documentation for disbursements.

Auditee's Response

The Public Administrator provided the following written responses:

6.1 All incoming checks are now logged on the day they arrive and stamped with our deposit stamp. The date they are deposited is also logged on the same sheet. Additionally, checks will be deposited at least weekly.

6.2 Receipts will be kept for each payment made on prepaid burial plans. A final statement for all charges will be obtained from the funeral home after burial and will be reconciled with receipts and payments made.

7. Recorder of Deeds Segregation of Duties

The Recorder of Deeds has not adequately segregated accounting duties and independent reviews of detailed accounting records are not performed. The Recorder of Deeds collects various fees for recording documents such as deeds and marriage licenses. During the year ended December 31, 2013, receipts totaled approximately $179,000.

The deputy clerk receipts monies and prepares the deposit; however, the Recorder of Deeds performs all remaining functions including taking the deposit to the bank, disbursing monies at month-end, preparing bank reconciliations, and comparing the bank balance to end of month reports. An

independent review of detailed accounting records or a comparison of monies received and deposited to the bank statements is not performed.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receiving, recording, depositing, and disbursing monies. If proper segregation of duties cannot be achieved, documented independent or supervisory reviews of detailed accounting and bank records are essential and should include comparing daily receipt activity to deposits.

Recommendation

The Recorder of Deeds segregate accounting duties or ensure adequate independent or supervisory reviews of detailed accounting and bank records are performed and documented.

Auditee's Response

The Recorder of Deeds provided the following response:

Additional segregation of duties was implemented as of September 2014.

8. Senate Bill 40 Board Closed Meetings

The Senate Bill 40 Board (Board) does not always follow Sunshine Law requirements relating to closed meetings. The Board is responsible for development and operation of services for individuals with developmental disabilities. The Board held 3 closed meetings from January 2013 to January 2014.

- The Board did not cite a specific section of the law as the reason for entering into closed session or document the vote of each member approving to enter into closed session.

- The Board did not make public the results of the votes taken and the final disposition of matters discussed in closed meetings, when required. For example, during the February 15, 2013, closed meeting, the Board approved the renewal of a lease agreement and in the January 17, 2014, closed meeting, a salary increase was approved. These results were not made public in the open meeting minutes or by other means.

Section 610.022, RSMo, provides that the question of holding a closed meeting and the reason for the closed meeting be voted on during open meeting. In addition, Chapter 610.021, RSMo, provides that after a closed meeting, the governmental body must make any votes or decisions public or available to the public, depending on the reason for the meeting.

Recommendation

The Senate Bill 40 Board ensure a roll call vote is taken during open meetings to close any meeting and minutes document the vote of each member and cite the specific reasons for holding the closed meeting. The Senate Bill 40 Board should also ensure votes taken and decisions made in closed meetings are properly made public when required.

Auditee's Response

The Senate Bill 40 Board provided the following written response:

A review of the documentation provided that all votes to enter, decide, or exit closed session were unanimous, so we were fortunate that no information was lost with our former recordkeeping. While not documented on the agendas, the Board always verbally announced the reason for entering closed session. Thank you for bringing to our attention the fact that a roll call vote was not taken when entering, deciding, or exiting closed session meetings. The Board will make it a practice of ensuring this protocol is implemented per the statute.

The Board has understood that after 72 hours the decision was discoverable under the Sunshine Law, should a proper request be made regarding the substance of the closed session meeting. The Board would have complied and provided the requested information. The Board understood the statute section to allow a 3 day time elapse to properly inform the affected employees, but not as a requirement to make public disclosure. The Board has every intention of abiding by Section 610, RSMo, as required. Thank you for your observations; we will implement your suggestions.

Perry County
Organization and Statistical Information

Perry County is a county-organized, third-class county. The county seat is Perryville.

Perry County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 90 full-time employees and 26 part-time employees on December 31, 2013.

In addition, county operations include the Senate Bill 40 Board, Mental Health Board, Youth Board, Senior Citizen Board, Recycling Board, and 911 services. In addition, in conjunction with the City of Perryville, the county operations include maintenance of a community multi-purpose facility.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Carl Lueckel Jr., Presiding Commissioner	$	34,843
Patrick Heaps, Associate Commissioner		32,843
Jim Sutterer, Associate Commissioner		32,843
Sue Oster, Recorder of Deeds		49,763
Randy Taylor, County Clerk		49,763
Thomas L. Hoeh, Prosecuting Attorney		61,154
Gary J. Schaaf, Sheriff		49,570
Veronica J. Hershey, County Treasurer		49,763
Herbert E. Miller, County Coroner		15,176
Tamara M. Tarrillion, Public Administrator		45,000
Rodney J. Richardet, County Collector (1), year ended February 28,	54,901	
Charles Triller, County Assessor, year ended August 31,		49,763
Tim Baer, County Surveyor (2)		

(1) Includes $5,138 of commissions earned for collecting taxes for drainage districts and a levee district.
(2) Compensation on a fee basis.

Financing Arrangements

In November 1996, the county passed a half-cent sales tax effective April 1, 1997, for the purpose of constructing a multi-purpose center. The county entered into a lease agreement on December 1, 1997, with Perry County Multi-Purpose Center Commission, Inc., a not-for-profit corporation. The terms of the agreement provide for the not-for-profit corporation to issue revenue bonds for the purpose of constructing the multi-purpose center and lease the multi-purpose center back to the county for payments totaling the principal and interest due on the outstanding bonds. The bonds in the amount of $8,785,000 were refinanced in June 2005. Bond principal is due annually on May 1 and interest is due semi-annually on May 1 and November 1. The remaining principal outstanding at December 31, 2013, was $3,840,000. Interest remaining to be paid over the life of the agreement totaled $316,854.

A lease-purchase agreement was entered into with the Perry County Multi-Purpose Center Commission, Inc., to lease the road and bridge building and property on April 1, 2006. The terms of the agreement are for the Perry County Multi-Purpose Center Commission to purchase the property and lease it back to the county for payments on the promissory note. Payments are made from the Road and Bridge Fund. The promissory note is scheduled to be paid off in 2026. The remaining principal outstanding at December 31, 2013, was $487,078. Interest remaining to be paid over the life of the agreement totals $215,705.

Missouri State Auditor

Shannon County

December 2014

Report No. 2014-136

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of Shannon County

Financial Condition and County Sales Tax	The county's Special Road and Bridge (SRB) Fund financial condition has continued to decline over the past several years, and the county's General Revenue (GR) Fund has significant liabilities not reflected in the cash balances. SRB Fund disbursements have generally exceeded receipts and are projected to again exceed receipts in 2014. The county's 2014 GR Fund budget estimated revenues would decrease by about $91,000 while expenditures would increase by about $214,000. As of December 31, 2013, the GR Fund owes the SRB Fund $139,898 for excess administrative transfers and incorrect payment of payroll taxes from the SRB Fund for non-road and bridge employees. In 2013, the county inappropriately transferred $15,797 from the Sheriff's Revolving Fund to the GR Fund. Property tax reductions were not sufficient to offset 50 percent of sales tax monies received by approximately $260,000. The county did not perform sales tax reduction calculations, and therefore, did not have documentation to support property tax levy reductions reported to the State Auditor's office or demonstrate compliance with state law.
County Collector's Controls and Procedures	The County Collector had not prepared annual settlements since taking office March 1, 2007. The County Collector did not routinely prepare monthly lists of liabilities and compare the balance to the reconciled bank balance and, she did not investigate any differences for months for which a comparison was performed. In addition, the County Collector does not maintain a running check register balance. Further, the County Collector did not use the correct withholding rates for current personal property tax collections for the Assessment Fund in November and December 2013, and she found similar errors on the November and December settlements in 2011 and 2012. The County Collector also failed to withhold mailing commissions on current delinquent real estate and personal property taxes, and has not withheld mailing commissions on current delinquent real estate and personal property taxes since she took office in 2007. The total not withheld likely exceeds $5,000.
Property Tax System Controls and Procedures	Access to the property tax system is not adequately restricted. The County Collector and her deputies have access rights in the property tax system, which allows changes to be made to individual tax records throughout the tax year. In addition, the County Clerk does not prepare or verify the accuracy of the current and delinquent tax books prepared by the county's computer programmer.
Sheriff's Controls and Procedures	The office manager's receipting and transmitting procedures are not adequate. Receipts are not always transmitted intact, the numerical sequence of receipt slips is not accounted for properly, and the composition of receipts is not reconciled to the composition of transmittals. Checks and money orders are not restrictively endorsed immediately upon receipt, and transmittals are not made timely. The office manager did not adequately identify Deputy Sheriff Salary Supplementation Fund (DSSSF) fees collected on civil process papers on transmittal reports. Additionally, the

	Sheriff does not deposit inmates' monies, but instead keeps the cash in separate envelopes for each inmate along with his/her personal effects.
County Procedures	The Sheriff authorized $18,285 of unallowable disbursements from the Sheriff's Revolving Fund during 2013. The County Clerk does not maintain overall county property records and none of the county officials or departments perform and submit an annual inventory list. The Sheriff does not require mileage logs to be maintained for some Sheriff's office vehicles. Full-time employees of the Sheriff's office do not prepare timesheets, and the value of personal commuting mileage for using a county-owned vehicle to commute between home and work is not reported on road and bridge employees' W-2 forms as required by Internal Revenue Service guidelines.
Prosecuting Attorney's Controls and Procedures	The Prosecuting Attorney does not provide adequate oversight to ensure all monies received are properly transmitted to victims or fees deposited and disbursed to the County Treasurer. The Prosecuting Attorney's secretary does not prepare monthly bank reconciliations and listings of liabilities, maintain a running check register balance, compare total deposits for the month with the amounts of fees disbursed to the County Treasurer, and has allowed unidentified amounts to accumulate in the bank account. Receipts are not deposited timely, and receipt slips are not issued for court-ordered restitution monies received. The Prosecuting Attorney defers prosecution on certain non-traffic tickets by requiring defendants to make a donation to the county's Law Enforcement Restitution Fund. There is no authority for the Prosecuting Attorney to require a donation to dismiss charges filed on these tickets.
Public Administrator's Annual Settlements	The Public Administrator does not always timely file annual settlements in compliance with state law. In addition, the Probate Divisions does not timely notify the Public Administrator prior to the deadline for the annual settlement or follow up on annual settlements not filed by the required date.
Additional Comments	Because counties are managed by several separately-elected individuals, an audit finding made with respect to one office does not necessarily apply to the operations in another office. The overall rating assigned to the county is intended to reflect the performance of the county as a whole. It does not indicate the performance of any one elected official or county office.

In the areas audited, the overall performance of this entity was **Fair**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 21

THOMAS A. SCHWEICH
Missouri State Auditor

To the County Commission
and
Officeholders of Shannon County

We have audited certain operations of Shannon County in fulfillment of our duties under Section 29.230, RSMo. In addition, Daniel Jones and Associates, Certified Public Accountants, was engaged to audit the financial statements of Shannon County for the 2 years ended December 31, 2013. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the county's internal controls over significant management and financial functions.

2. Evaluate the county's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the county, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the county's management and was not subjected to the procedures applied in our audit of the county.

For the areas audited, we identified (1) deficiencies in internal control, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of Shannon County.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Dennis Lockwood, CPA
In-Charge Auditor:	Lori Bryant
Audit Staff:	Shannon Spicer
	Sheila Hohenstreet
	David E. White
	Waleed Atout

1. Financial Condition and County Sales Tax

The county's Special Road and Bridge (SRB) Fund financial condition has continued to decline over the past several years and the county's General Revenue (GR) Fund has significant liabilities not reflected in the cash balances. The county did not prepare sale tax reductions and property tax levy reductions have not been sufficient.

1.1 Financial condition

As indicated in the chart below, the SRB Fund has had declining balances (with the exception of 2012) for the past several years, and the projected balance at December 31, 2014, is estimated to be approximately $12,000. The declining SRB Fund balance was noted in our prior audit of 2009.

While the chart below indicates increasing balances for the GR Fund for the years 2010 through 2013, we project a serious decline by the end of 2014, and we have noted the GR Fund has been in poor financial condition in several prior audits dating back to 1999. The GR Fund balances noted below do not reflect various liabilities totaling over $415,000 at December 31, 2013, as discussed in the following paragraphs and in section 1.2. The following chart reflects ending cash balances of these funds for the last 4 years and the anticipated ending cash balances for 2014, according to the approved county budgets.

Cash Balance, December 31	2014 Budgeted	2013 Actual*	2012 Actual*	2011 Actual	2010 Actual
Special Road and Bridge Fund	$ 12,027	24,525	171,356	153,666	359,698
General Revenue Fund	16,677	250,792	179,604	129,701	47,862

* Amounts agreed to audited financial statements.

SRB Fund disbursements have generally exceeded receipts and are projected to again exceed receipts in 2014. As noted in our prior audit, the county had purchased 12 acres of undeveloped land for $31,657 to be used as a county quarry. The county was unable to obtain a permit to use this land for a quarry. The county still owns the land and there is no current plan for selling it.

Total receipts and disbursements of the GR Fund have remained fairly consistent during the past 4 years. The county's 2014 GR Fund budget estimated revenues would decrease by about $91,000 while expenditures would increase by about $214,000. We noted increased expenditures for elected officials salaries (due to the increase in the county's total assessed valuation), employee salaries, health insurance costs, and for buildings and grounds improvements. The GR Fund cash balances noted above do not reflect the various liabilities discussed in the following paragraphs.

As discussed in our prior audit, the GR Fund owed $202,598 to the SRB Fund for excess administrative transfers and incorrect payment of payroll taxes from the SRB Fund for non-road and bridge employees. As documented in the June 16, 2014, meeting minutes, the County Commission has resolved a portion of this liability by not making the budgeted administrative transfers to the GR Fund from the SRB Fund of $31,350 in both 2009 and 2013. The GR Fund still owes the SRB Fund $139,898 at December 31, 2013.

In 2013, the county inappropriately transferred $15,797 from the Sheriff's Revolving Fund to the GR Fund to cover the budget overruns in the Sheriff's office (see MAR finding number 5.1). The GR Fund should repay $15,797 to the Sheriff's Revolving Fund.

As noted in section 1.2, the county failed to adequately reduce the GR property tax levy and must develop a plan to correct for the $260,000 over collection of property taxes in prior years.

It is essential the County Commission address the situation both in the immediate and long-term future. To improve the financial condition of the county, the County Commission should review disbursements and reduce discretionary spending as much as possible, evaluate controls and management practices to ensure efficient use of county resources, and attempt to maximize all sources of revenue.

1.2 County sales tax

Property tax reductions were not sufficient to offset 50 percent of sales tax monies received by approximately $260,000 at December 31, 2013. The county did not perform sales tax reduction calculations, and therefore, did not have documentation to support property tax levy reductions reported to the State Auditor's office or demonstrate compliance with state law.

Additional or increased property tax levy reductions will be required in future years to offset this liability. The county has not adopted adequate procedures to monitor or assess the results of the actual property tax reductions. The following table presents the cumulative liability resulting from insufficient reductions.

	Year Ended December 31,			
	2013	2012	2011	2010
Required property tax revenue reduction	$ 112,348	111,978	113,770	117,179
Actual property tax revenue reduction	47,251	44,513	48,710	58,483
Amount not sufficiently reduced	65,097	67,465	65,060	58,696
Prior years under/(over) reduction	194,562	127,097	62,037	3,341
Total insufficient property tax revenue reduction	$ 259,659	194,562	127,097	62,037

The county voters have approved two sales tax ballot proposals (2001 and 1987). The August 1987 sales tax proposal includes a provision to reduce property taxes by 50 percent of sales taxes collected. The county did not perform a sales tax rollback calculation to support the sales tax rollback reported to the State Auditor's office when certifying property tax rates. In addition, county officials were not aware the rollback was insufficient, which of the county's general sales taxes had a statutory rollback requirement, or how to properly calculate the rollback. The County Clerk said the General Revenue tax rate was set at the rate needed to meet the county's financial needs and the difference between the tax rate ceiling and the necessary General Revenue tax rate was reported as the sales tax rollback.

Section 67.505, RSMo, requires the county to reduce property taxes for a percentage of sales taxes collected. In August 1987, Shannon County voters approved a one-half cent sales tax with a provision to reduce property taxes by 50 percent of sales tax collected. Therefore, the county is required to estimate the annual property tax levy to meet the 50 percent reduction requirement and in the following year calculate any excess property tax collected based upon actual sales tax collection.

Recommendations

The County Commission:

1.1 Closely monitor the county's financial condition and take the necessary steps to improve the financial condition of the General Revenue Fund and the Special Road and Bridge Fund. In addition, the County Commission should repay $15,797 to the Sheriff's Revolving Fund and $139,898 to the Special Road and Bridge Fund from the General Revenue Fund.

1.2 Work with the County Clerk to properly calculate and adequately reduce property tax levies for 50 percent of sales tax revenue, and develop a plan to correct for the accumulation of prior years' insufficient property tax levy reductions.

Auditee's Response

The County Commission provided the following response:

1.1 The County Commission will work on developing a plan to repay those funds and to improve the financial condition of the General Revenue Fund and the Special Road and Bridge Fund.

The County Commission and the County Clerk provided the following response.

1.2 The County Clerk has properly calculated the 2014 sales tax rollback. The County Commission will work on developing a plan to correct for past over collections.

2. County Collector's Controls and Procedures

Weaknesses exist in the County Collector's accounting controls and procedures. The County Collector's office processed transactions totaling approximately $3.1 million for the year ended February 28, 2014.

2.1 Annual settlements

The County Collector had not prepared annual settlements since taking office in March 2007. The County Collector indicated she did not understand how to prepare the annual settlement. Our audit staff provided her guidance on compiling the necessary information and preparing an annual settlement. Subsequently, the County Collector filed an annual settlement for the year ended February 28, 2014, with the County Clerk on July 28, 2014.

Because the County Collector did not file annual settlements, the County Clerk was unable to ensure taxes charged and credited to the County Collector each year were accounted for properly and the County Clerk and County Commission were unable to verify the County Collector's annual settlements. For related comments, see MAR finding number 3.

Section 139.160, RSMo, requires the County Collector to annually settle with the County Commission the accounts of all monies received from taxes and other sources. To help ensure the validity of tax book charges, collections, and credits, and for the County Clerk and County Commission to properly verify these amounts, it is imperative the County Collector file annual settlements timely. Section 139.190, RSMo, requires the County Commission to carefully and fully examine the annual settlement of the County Collector and for the County Clerk to certify the amounts to the state.

2.2 Liabilities

The County Collector did not routinely prepare monthly lists of liabilities and compare the balance to the reconciled bank balance. In addition, when the County Collector did prepare lists of liabilities, she made no attempt to investigate differences between total liabilities and the reconciled bank balance.

For the year ended February 28, 2014, there were reconciliations documented for December, January, and February only. In addition, a

running check register balance is not maintained for the bank account. The County Collector prepared a list of liabilities as of February 28, 2014, totaling $138,039, which included February taxes to be distributed and surtax distributed annually. At this date, the reconciled bank balance totaled $142,022, exceeding identified liabilities by $3,983. However, the County Collector understated the surtax amount included in her list of liabilities by $1,039 due to an error when recording the April 2013 surtax amount on her surtax worksheet. This amount remains in the bank account as the annual surtax distribution was based on the surtax worksheet. After adjusting for this error, the County Collector held unidentified monies totaling $2,944 as of February 28, 2014.

Maintaining running check register balances and performing monthly bank reconciliations helps ensure records are accurate and increases the likelihood errors will be identified. Regular identification and comparison of liabilities to the reconciled bank balance, is necessary to ensure records are in balance and monies are available to satisfy all liabilities. Differences must be adequately investigated and explained. Applicable state laws address the disposition of unidentified monies.

2.3 Assessment withholdings

The County Collector did not use the correct withholding rates for current personal property tax collections for the Assessment Fund, and as a result, $1,867 is due to the Assessment Fund for the period November and December 2013. The County Collector reviewed the monthly settlements for prior years and found similar errors totaling $3,202 on the November and December settlements in 2011 and 2012.

Withholdings on tax collections for the Assessment Fund should have been at the rate of 1.7 percent; however, the County Collector used a rate of 1.45 percent. In addition, the County Collector made no withholdings from collections for the hospital district.

Section 137.720.1, RSMo, requires a one percent commission on ad valorem property tax collections allocable to each taxing authority be deducted from the collections of taxes each year and deposited into the assessment fund of the county. Section 137.720.3, RSMo, requires an additional one-half percent commission, but limits the amount deducted to $75,000. An additional one-fifth of one percent is allowed per Section 137.082, RSMo.

Adequate monitoring and proper calculation of Assessment Fund withholdings is necessary to ensure compliance with statutory provisions.

2.4 Commissions

The County Collector failed to withhold mailing commissions of approximately $810 on current delinquent real estate and personal property taxes for the period January 1, 2014, through February 28, 2014. The

County Collector indicated she has not withheld mailing commissions on current delinquent real estate and personal property taxes since she took office in 2007. Given this date and amount not withheld for the year ended February 28, 2014, the total mailing commissions not withheld likely exceeds $5,000.

Section 52.250, RSMo, provides for a one-half of one percent mailing commission on all current taxes collected, except railroad and utility tax collections, to be paid to the county's General Revenue Fund.

Similar conditions previously reported

Similar conditions to sections 2.1 and 2.2 were noted in our prior audit report.

Recommendations

The County Collector:

2.1 Prepare and file annual settlements timely. In addition, the County Commission should ensure the annual settlements are filed timely and are carefully and fully examined to ensure the tax book charges and credits are accurately reported.

2.2 Maintain a running book balance, prepare monthly lists of liabilities, reconcile the lists to the reconciled bank balance, and promptly investigate any differences. In addition, the County Collector should disburse the undistributed $1,039 surtax to the taxing districts and unidentified monies in accordance with state laws.

2.3 Review Assessment Fund withholdings for past years, calculate the amount owed by each taxing district, withhold amounts from future tax collections and disburse amounts under withheld to the Assessment Fund.

2.4 Ensure commissions calculations comply with statutory provisions. The County Collector should review commissions on current delinquent real estate and personal property tax collections for past years, and calculate the amount owed by each taxing district.

Auditee's Response

The County Collector provided the following responses:

2.1 The County Collector will continue to prepare and file annual settlements and will do so in a timely manner.

2.2 This recommendation has been implemented. The $1,039 of surtax was disbursed on the July 2014 monthly settlement. The County Collector intends to go back and investigate the remaining unidentified differences as time permits.

2.3 The County Collector has reviewed the Assessment Fund withholdings and identified the amounts to be withheld from each taxing district. The amounts will be withheld from the November 2014 monthly settlement and turned over to the Assessment Fund in December.

2.4 For the current delinquent taxes collected in 2015 and future years, the correct commissions will be withheld. The County Collector will go back and review prior years commissions and calculate the amounts owed by each taxing district.

The County Commission and the County Clerk provided the following response:

2.1 The County Commission will work with the County Clerk and the County Collector to ensure annual settlements are filed timely. In addition, the County Clerk will ensure tax book charges and credits are accurately reported as she did for the annual settlement in July 2014.

3. Property Tax System Controls and Procedures

Controls and procedures over the property tax system need improvement. As a result of the significant control weaknesses identified, there is less assurance property tax monies have been accounted for properly.

3.1 Computer access

Access to the property tax system is not adequately restricted. The County Collector and her deputies have access rights in the property tax system, which allows changes to be made to individual tax records throughout the tax year. Because the County Collector and her deputies are responsible for collecting tax monies, good internal controls require they not have system access rights allowing the alteration or deletion of tax rates, assessed values, and property tax information.

Without adequate computer access restrictions, there is an increased risk of loss, theft, misuse, and errors occurring and going undetected. In addition, due to the lack of oversight of the County Collector's office activities (as explained in the following section), any erroneous or improper changes made in the system by the County Collector could go undetected.

3.2 Tax books

The County Clerk does not prepare or verify the accuracy of the current and delinquent tax books prepared by the county's computer programmer. The County Clerk verifies some individual entries in the current tax book, but does not recalculate the tax book totals and charges. A review of the tax books should include verification of individual entries in the tax books and recalculating tax book totals and charges.

Sections 137.290 and 140.050, RSMo, require the County Clerk to extend the current and delinquent tax books and charge the County Collector with the amount of taxes to be collected. If it is not feasible for the County Clerk to prepare the tax books, she should implement procedures to verify the accuracy of the tax books and document approval of the tax book amount to be charged to the County Collector. Failure to prepare and review the tax books may result in errors, irregularities, or misuse going undetected. In addition as discussed in MAR finding number 2, accurate tax books are necessary to verify the County Collector's annual settlements.

Recommendations

3.1 The County Commission ensure property tax system access rights are limited to only what is needed for users to perform their job duties and responsibilities.

3.2 The County Clerk prepare the current and delinquent tax books, or at a minimum, verify the accuracy of the tax books prior to charging the County Collector with the property tax amounts to be collected. Procedures performed should be adequately documented.

Auditee's Response

The County Commission provided the following response:

3.1 The County has implemented a new software system that appropriately limits computer access.

The County Clerk provided the following response:

3.2 The County Clerk will verify the accuracy of the tax books and will maintain documentation of the procedures performed.

4. Sheriff's Controls and Procedures

Accounting controls and procedures need improvement. Sheriff's office records indicate the office processed receipts of approximately $63,000 during the year ended December 31, 2013.

4.1 Receipts

The office manager's receipting and transmitting procedures are not adequate. The office manager issues receipt slips, accumulates monies for transmittal, and prepares transmittal reports. Monies are transmitted to the Crime Victim Advocate who makes deposits, prepares checks, reconciles the bank account and prepares the report of fees for the County Treasurer.

- Receipts are not always transmitted intact. Civil paper services fees are receipted immediately, but maintained on hand in the Sheriff's office until papers are served.

- The numerical sequence of receipt slips is not accounted for properly on the transmittal reports and the composition of receipts (cash, check, or money order) is not reconciled to the composition of transmittals.

- Checks and money orders are not restrictively endorsed immediately upon receipt, but are endorsed when transmittals are prepared.

- Transmittals are not made timely. Transmittals are made on average twice a month. For monies received during August 2013, office personnel made transmittals on August 14 for $1,199, August 19 for $480, and September 6, 2013, for $645 and deposited monies on the day transmitted.

Proper receipting and timely transmitting procedures are necessary to reduce the risk of loss, theft, or misuse of monies received.

4.2 Deputy Sheriff Salary Supplementation Fund fees

The office manager did not adequately identify Deputy Sheriff Salary Supplementation Fund (DSSSF) fees collected on civil process papers on transmittal reports. As a result, the fees were not properly reported to the County Treasurer and monies were not disbursed as required by state law.

During our review of civil paper service fees collected during the year ended December 31, 2013, we identified approximately 161 civil paper fees received and deposited, for which $1,610 ($10 for each service) should have been disbursed to the County Treasurer as DSSSF fees. However, because the office manager did not identify the breakdown of the fees on transmittal reports to the Crime Victim Advocate, the Crime Victim Advocate identified all amounts received for civil paper service as civil fees on the report she prepared for the County Treasurer. As a result, the County Treasurer deposited these fees into the Sheriff Civil Fees Fund and did not disburse them to the State Treasurer in compliance with state law. The Sheriff indicated all DSSSF fees collected since implementation of the fee in 2008 were deposited into the Sheriff Civil Fees Fund.

Effective August 28, 2008, Section 57.280.4, RSMo, provides the sheriff shall receive $10 for service of any civil summons, writ, subpoena, or other order of the court. These monies shall be paid into the county treasury and the county treasurer shall make such monies payable to the state treasurer who shall deposit them into the DSSSF created under Section 57.278, RSMo. The Sheriff's office increased the fee for civil process paper service in compliance with this law.

4.3 Inmate monies

The Sheriff does not deposit inmates' monies, but rather keeps the cash in separate envelopes for each inmate along with his/her personal effects. The monies an inmate has at the time he/she arrives at the jail are recorded on an arrest and booking property receipt form. Any additional monies received on behalf of the inmate are recorded on the outside of the envelope but no receipt slip is issued. Prisoner monies can only be used for phone card purchases and a receipt slip is issued for these purchases. The cash remaining in the envelope is returned to the inmate upon release and the

inmate and officer both sign in the property returned section at the bottom of the arrest and booking property receipt form. The envelopes are given to inmates when they are released and a copy is not retained.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, the Sheriff should establish alternative procedures for maintaining inmate monies and ensure receipt slips are issued for all monies received and a record documenting each inmate's balance, receipts, and disbursements is maintained.

Recommendations

The Sheriff:

4.1 Ensure receipts are transmitted intact and timely, the numerical sequence of receipt slips is accounted for properly, the composition of receipts is reconciled to the composition of transmittals and deposits, and checks and money orders are restrictively endorsed immediately upon receipt.

4.2 Work with the County Treasurer to identify DSSSF fees deposited into the Sheriff Civil Fees Fund and distribute funds in compliance with state law.

4.3 Deposit all inmate monies in an official bank account and maintain records indicating balances, receipts, and disbursements by inmate. These records should be reconciled monthly to the bank account balance. In addition, issue prenumbered receipt slips for all monies received from or on behalf of inmates.

Auditee's Response

The Sheriff provided the following responses:

4.1 The Sheriff will make sure these things are done.

4.2 The Sheriff is currently working with the County Treasurer to identify the DSSSF fees collected and plans on distributing the monies to the state in compliance with state law.

4.3 The Sheriff will implement this recommendation.

5. County Procedures

Disbursements from the Sheriff's Revolving Fund were not always appropriate. Procedures related to capital assets, fuel usage, and payroll need improvement.

5.1 Sheriff's Revolving Fund

The Sheriff authorized $18,285 of unallowable disbursements from the Sheriff's Revolving Fund during 2013 out of disbursements totaling $19,127. None of these purchases and/or transfers were related to the issuance of concealed carry weapon permits as required by state law. The

unallowable disbursements were for computers and computer accessories totaling $1,488, a desk phone for $127, labor arbitration training costing $364, shirts for $92, supplies for $77, a meal for $13, a $15,797 transfer to the General Revenue Fund, and a $327 transfer to the Crime Victim Advocate Fund.

Per Section 50.535, RSMo, Sheriff's Revolving Fund monies are to be used for the purchase of equipment, to provide training, and to make necessary expenditures to process applications for concealed carry endorsements or renewals, including but not limited to the purchase of equipment, training, fingerprinting, background checks, and employment of additional personnel.

5.2 Capital assets

The County Clerk does not maintain overall county property records. The county only maintains records of road and bridge and Sheriff department vehicles and equipment and some Local Emergency Planning Committee equipment. None of the county officials or departments perform and submit an annual inventory list. Neither the County Clerk nor other county officials track property purchases and dispositions of assets throughout the year or performed annual physical inventories. In addition, property is not tagged, identifying it as county property.

Adequate county property records and procedures are necessary to ensure effective internal controls, meet statutory requirements, and provide a basis for determining proper insurance coverage. Procedures to track property purchases and dispositions throughout the year, along with periodic physical inventories and comparisons of the results to overall county property records are necessary to evaluate the accuracy of the records, and deter and detect theft. Proper tagging of county property items is necessary to facilitate the record-keeping process. Section 49.093, RSMo, requires third and fourth class counties to account for personal property costing $1,000 or more, assigns responsibilities to the officer or applicable designee of each county department, and describes details to be provided in the inventory records.

5.3 Fuel use and purchases

The Sheriff does not require mileage logs to be maintained for some Sheriff's office vehicles. Logs maintained were not submitted for review and reconciliation of fuel usage to fuel purchases. Fuel is purchased for vehicles with fuel cards from a local vendor. Accounting records indicate office personnel purchased approximately $19,600 of fuel during the year ended December 31, 2013.

Procedures for reviewing fuel use and reconciling use to fuel purchased are necessary to ensure the reasonableness and propriety of fuel use and disbursements. Also, mileage and fuel logs are necessary to document the appropriate use of vehicles and to support fuel charges. Failure to account for fuel purchases could result in loss, theft, and misuse going undetected.

5.4 Timesheets

Full-time employees of the Sheriff's office do not prepare timesheets. As a result, the county cannot substantiate compliance with Fair Labor Standards Act of 1938 (FLSA) requirements for these employees.

Detailed timesheets would document hours actually worked, provide information necessary to monitor tasks performed, and are beneficial in demonstrating compliance with the county personnel policy and FLSA requirements.

5.5 Commuting mileage

The value of personal commuting mileage for using a county-owned vehicle to commute between home and work is not reported on road and bridge employees' W-2 forms as required by Internal Revenue Service (IRS) guidelines. According to county officials, because of the large geographic area of the county, road and bridge worksites in many instances are closer to employees' homes than to the two county road sheds. The road and bridge employees are not required to maintain mileage logs showing business and personal use.

IRS reporting guidelines indicate personal and commuting mileage are a reportable fringe benefit and require the full value of the provided vehicle to be reported if the employer does not require the submission of detailed logs that distinguish between business and personal use. Additionally, the county may be subject to penalties and/or fines for failure to report all taxable benefits.

Similar conditions previously reported

Similar conditions to sections 5.2, and 5.4 were noted in our 3 prior audit reports and similar conditions to sections 5.3 and 5.5 were noted in our 2 prior audit reports.

Recommendations

The County Commission:

5.1 And the Sheriff use Sheriff's Revolving Fund monies in accordance with state law. In addition, the County Commission should authorize the transfer of $327 from the Crime Victim Advocate Fund to the Sheriff's Revolving Fund.

5.2 And the County Clerk work with other county officials to ensure complete and accurate inventory records are maintained, purchases and dispositions of assets are tracked, annual physical inventories are conducted, and assets are tagged as county property.

5.3 Require fuel use logs be maintained for all county-owned vehicles, and ensure these logs are reviewed for accuracy and reconciled to fuel purchases. Any significant discrepancies should be investigated.

5.4 Require all employees to prepare and submit timesheets to the County Clerk's office.

5.5 Comply with IRS guidelines for reporting fringe benefits related to commuting miles and require mileage logs that distinguish between business and commuting use.

Auditee's Response

The County Commission provided the following responses:

5.1 The County Commission will discuss with the Sheriff how to implement this recommendation. We will authorize the transfer from the Crime Victim Advocate Fund to the Sheriff's Revolving Fund.

5.2 The County Commission will implement this recommendation.

5.3 The County Commission will work with the Sheriff to implement this recommendation.

5.4 The County Commission will implement this recommendation.

5.5 The County Commission will require each employee who drives a county vehicle to sign a memo acknowledging the vehicle is to be used for official county business only.

The Sheriff provided the following response:

5.1 The Sheriff will implement this recommendation.

The County Clerk provided the following response:

5.2 The County Clerk will implement this recommendation.

6. Prosecuting Attorney's Controls and Procedures

Accounting duties are not adequately segregated and supervisory reviews are not performed. Bank reconciliation, and depositing and receipting procedures are not adequate. The Prosecuting Attorney's practices related to deferred prosecution are not authorized under state law. The Prosecuting Attorney's office collected approximately $17,000 in restitution payments and $4,800 in fees during the year ended December 31, 2013. The office only accepts money orders. Restitution payment money orders are generally transmitted directly to the victim. Fees are deposited into the Prosecuting Attorney's bank account.

6.1 Segregation of duties

The Prosecuting Attorney does not provide adequate oversight to ensure all monies received are properly transmitted to victims or fees deposited and disbursed to the County Treasurer. The Prosecuting Attorney's secretary is responsible for the duties of receipting, recording, depositing bad check

fees, preparing checks, and transmitting monies received for bad checks and court-ordered restitution.

Proper segregation of duties is necessary to ensure transactions are accounted for properly and assets are safeguarded. If proper segregation of duties cannot be achieved, the Prosecuting Attorney should implement and document a supervisory review of accounting records.

6.2 Bank reconciliations

The Prosecuting Attorney's secretary does not prepare monthly bank reconciliations and listings of liabilities and unidentified amounts have accumulated in the bank account. In addition, a running check register balance is not maintained for the bank account. The Prosecuting Attorney's secretary indicated all monies received are disbursed at the end of the month and the bank account should zero out; however, it does not because she does not have procedures in place to ensure this happens. She does not compare total deposits for the month with the amounts of fees being disbursed to the County Treasurer and at December 31, 2013, the bank account had an unidentified balance of $2,799. Our prior report noted an unidentified balance of $1,345 at December 31, 2009. We scanned bank statements and identified $1,575 in restitution had been deposited into the bank account in February 2011 since the money order had been made payable to the office instead of the victim; but, a check had never been issued to disburse the monies to the victim.

Maintaining running check register balances and performing monthly bank reconciliations helps ensure records are accurate and increases the likelihood errors will be identified. Regular identification and comparison of liabilities to the reconciled cash balance, is necessary to ensure records are in balance and monies are available to satisfy all liabilities. Differences must be adequately investigated and explained. Various statutory provisions provide for the disposition of unidentified monies.

6.3 Deposits

Fees are not deposited timely. Deposits are normally made once a month and averaged approximately $400. The office only accepts money orders.

Failure to implement adequate depositing procedures increases the risk that loss, theft, or misuse of monies received will go undetected. Proper depositing procedures are necessary to ensure all receipts are handled and accounted for properly.

6.4 Receipting

Receipt slips are not issued for court-ordered restitution monies received. Manual receipt slips are only issued for bad check restitution and fees monies. Failure to implement adequate receipting procedures increases the risk that loss, theft, or misuse of monies received will go undetected.

6.5 Deferred prosecution

The Prosecuting Attorney defers prosecution on certain non-traffic tickets by requiring defendants to make a donation (up to $300) to the county's Law Enforcement Restitution Fund. Once the agreed upon amount has been paid by the defendant to the fund, the Prosecuting Attorney dismisses the case. During the year ended December 31, 2013, the Prosecuting Attorney deferred prosecution on 58 cases and collected $14,350 in donations to the Law Enforcement Restitution Fund for these cases.

There is no authority for the Prosecuting Attorney to require a donation to dismiss charges filed on these tickets. Section 50.565, RSMo, provides for the deposit of certain assessments and payments into the county law enforcement restitution fund, however, this statute relates to a court ordering an assessment after a plea or finding of guilt.

Similar conditions previously reported

Similar conditions to sections 6.1 and 6.2 were noted in our 2 prior audit reports and a similar condition to section 6.3 was noted in our 3 prior audit reports.

Recommendations

The Prosecuting Attorney:

6.1 Ensure periodic supervisory reviews of accounting records are performed and documented.

6.2 Ensure running balances in the check register are maintained, and monthly bank reconciliations are performed and reconciled to lists of liabilities. In addition, the Prosecuting Attorney should disburse $1,575 of restitution monies held in error to the appropriate party. Any differences between accounting records and reconciliations should be investigated and resolved. After sufficient efforts are made to resolve differences, any remaining unidentified monies should be disposed of in accordance with state law.

6.3 Ensure receipts are deposited timely.

6.4 Require issuance of receipt slips for all monies received.

6.5 Reevaluate the practice of requiring donations to the Law Enforcement Restitution Fund to defer prosecution.

Auditee's Response

The Prosecuting Attorney provided the following responses:

6.1 We will attempt to segregate duties but, as a two person office, this is difficult to do. But we will attempt to incorporate your recommendation.

6.2 We will ensure running balances in the check register are maintained, and monthly bank reconciliations are performed and reconciled to lists of liabilities. Our bank account had an excess amount in it when I took office. The large restitution amount ($1,575) is from a victim who had already been compensated by the victim's credit card company. That amount will be distributed to the merchants who were also victims and the remaining amounts will be sent to the office for unclaimed property.

6.3 We will make deposits weekly as long as we have a deposit to make.

6.4 We send letters to people paying restitution and also to the person receiving restitution. We have already began issuing receipts for restitution.

6.5 I disagree with this finding. First, we do not accept "donations" in exchange for dismissals. We use this as a tool for punishment and place defendants basically on unsupervised probation with a contribution to the fund. We require these payments as a condition of the agreement so that defendants receive some type of punishment without losing any financial aid they might be receiving nor losing their license if they have no prior offenses. I do not believe the statute precludes our collection under the circumstances in which we do so.

Auditor's Comment

6.5 Political subdivisions of the state may only do those things specifically authorized by law. This is especially true of counties. Article VI, Section 7, Missouri Constitution requires county business to be managed as prescribed by law. The General Assembly authorized county commissions to establish a county law enforcement restitution fund when it enacted Section 50.565, RSMo. However, as it is with all funds created by the General Assembly, the only monies that can go into that fund are those specifically prescribed by the law. "Donations" to the fund are not authorized.

7. Public Administrator's Annual Settlements

The Public Administrator does not always timely file annual settlements in compliance with state law. In addition, the Associate Circuit Court, Probate Division does not timely notify the Public Administrator prior to the deadline for the annual settlement or follow up on annual settlements not filed by the required date.

We reviewed the 11 cases managed during the year ended December 31, 2013, by the current Public Administrator who took office January 2013. We noted 6 of 11 cases had an annual settlement due during January through April of 2014, but none of these settlements had been filed as of July 31, 2014. The Public Administrator indicated she thought she only had

to prepare annual settlements on cases when notified by the Associate Circuit Court, Probate Division until she learned about the annual statutory requirement at a training session in early 2014.

Sections 473.540 and 475.270, RSMo, require the Public Administrator to file an annual settlement with the court for each ward or estate. In addition, while Sections 473.557 and 475.280, RSMo, require the clerk of the court to notify the conservator or guardian (Public Administrator) of the deadline for the annual settlement, these sections do not excuse the Public Administrator from making the settlement at the time required by law. Timely settlements are necessary for the court to properly oversee the administration of cases and reduce the possibility that errors or misuse of funds will go undetected.

Recommendation

The Public Administrator ensure annual settlements are timely filed. In addition, the Associate Circuit Court, Probate Division should notify the Public Administrator of annual settlement deadlines timely and follow up on those settlements which are not filed by the required date.

Auditee's Response

The Public Administrator provided the following response:

I have implemented procedures to ensure annual settlements are filed timely.

The Associate Circuit Judge provided the following written response:

I will direct the Probate Clerk to send timely notices to the Public Administrator regarding filing annual settlements.

Shannon County
Organization and Statistical Information

Shannon County is a county-organized, third-class county. The county seat is Eminence.

Shannon County's government is composed of a three-member county commission and separate elected officials performing various tasks. All elected officials serve 4-year terms. The county commission has mainly administrative duties in setting tax levies, appropriating county funds, appointing board members and trustees of special services, accounting for county property, maintaining county roads and bridges, and performing miscellaneous duties not handled by other county officials. Principal functions of these other officials relate to law enforcement, property assessment, property tax collections, conduct of elections, and maintenance of financial and other records important to the county's citizens. The county employed 30 full-time employees and 12 part-time employees on December 31, 2013.

In addition, county operations include the Senate Bill 40 Board and the Senior Citizens' Service Board.

Elected Officials

The elected officials and their compensation paid for the year ended December 31 (except as noted) are indicated below:

Officeholder	2014	2013
Jeff Cowen, Presiding Commissioner	$	22,064
Dale Counts, Associate Commissioner		20,064
Herman Kelly, Associate Commissioner		20,064
Melany Williams, Circuit Clerk and Ex Officio Recorder of Deeds (1)		
Shelly McAfee, County Clerk		30,400
Jodie R. Brumble, Prosecuting Attorney		37,050
Steven Blunkall, Sheriff		36,100
Michelle Shedd, County Treasurer		30,400
Tim Denton, County Coroner		8,550
Linda Wolff-Brewer, Public Administrator		15,000
Susie Needels, County Collector (2), year ended February 28,	31,489	
Summer J. Crider, County Assessor, year ended August 31,		30,400

(1) Compensation is paid by the state.
(2) Includes $773 of commissions earned for collecting city property taxes.

Financing Arrangements

The county entered into capital leases for 2 pieces of road and bridge equipment and a maintenance shed. Principal and interest payments are made from the Special Road and Bridge Fund. The final payment on the lease purchase agreements is scheduled for October 2017. The total

remaining principal outstanding at December 31, 2013, was $115,407. Interest remaining to be paid over the life of the agreements totals $8,078.

State Board of Accountancy

December 2014

Report No. 2014-137

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Division of Professional Registration, State Board of Accountancy

License Fees	The Board did not document the vote and outcome of the vote for its approval of a $10 decrease in initial and renewal fees charged, so there is no assurance the fee change was approved by the majority of the Board.
Closed Meetings	The Board did not motion to close, cite the reasons for closing, or document the vote of each member to close 10 of the 13 closed Board meetings held during the 2 years ended June 30, 2014, and several committee meeting minutes did not cite the specific reasons for closing the meeting. In addition, the Board did not limit discussions in closed meetings to the reasons cited in the open meetings.

In the areas audited, the overall performance of this entity was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
John M. Huff, Director
Department of Insurance, Financial Institutions, and Professional Registration
and
Jane A. Rackers, Director
Division of Professional Registration
and
State Board of Accountancy
Jefferson City, Missouri

We have audited certain operations of the Department of Insurance, Financial Institutions, and Professional Registration, Division of Professional Registration, State Board of Accountancy, in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2014 and 2013. The objectives of our audit were to:

1. Evaluate the board's internal controls over significant management and financial functions.

2. Evaluate the board's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the Board, and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We tested certain of those controls to obtain evidence regarding the effectiveness of their design and operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the board's management and was not subjected to the procedures applied in our audit of the board.

For the areas audited, we identified (1) no significant deficiencies in internal control, (2) noncompliance with legal provisions, and (3) no significant deficiencies in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Department of Insurance, Financial Institutions, and Professional Registration, Division of Professional Registration, State Board of Accountancy.

Division of Professional Registration
State Board of Accountancy
Management Advisory Report - State Auditor's Findings

1. License Fees

The State Board of Accountancy (Board) did not document its approval of a $10 decrease in initial and renewal fees charged for individual licensing of certified public accountants. The Executive Director indicated the Board approved the fee change during the August 17, 2012 Board meeting; however, meeting minutes only indicate a motion was made and the outcome of the vote was not documented. As a result, there is no assurance the fee change was approved by the majority of the Board.

Section 326.286.2, RSMo, requires application and renewal fees be determined by the Board by rule.

Recommendation

The State Board of Accountancy ensure fee changes are approved and documented in the Board meeting minutes.

Auditee's Response

The Missouri State Board of Accountancy agrees with this finding and recommendation.

2. Closed Meetings

The Board did not always comply with the Sunshine Law for closed meetings. The Board held 13 closed meetings and various closed committee meetings during the 2 years ended June 30, 2014.

The Board did not motion to close, cite the reasons for closing, or document the vote of each member to close 10 of the 13 closed Board meetings held, and several committee meeting minutes did not cite the specific reasons for closing the meeting. In addition, the Board did not limit discussion in closed meeting minutes to the reasons cited in the open meeting. For example, the January 22, 2013, open meeting minutes indicate the reason for closing the meeting was to discuss complaints, investigations, and disciplinary action; however, the Board also discussed applications, continuing professional education audits, and an exam issue.

Section 610.022, RSMo, provides that the public governmental body planning to hold a closed meeting should follow the notice procedures for an open meeting and include there will be a closed meeting and cite the specific provision of the law that allows the meeting to be closed. Before any meeting may be closed, the question of holding the closed meeting and the reason for the closed meeting shall be voted on during open meeting. A record of the vote of each member should be documented. In addition, public governmental bodies shall not discuss any business during a closed meeting that does not directly relate to the specific reasons announced to justify such meeting.

Recommendation

The State Board of Accountancy comply with state law before closing a meeting and limit issues discussed in closed meetings to only those specific reasons cited to justify the closed meeting.

Auditee's Response

The Missouri State Board of Accountancy remains committed to compliance with the Sunshine Law. The Board will continue our ongoing efforts to ensure that its meeting minutes are well documented.

Division of Professional Registration
State Board of Accountancy
Organization and Statistical Information

The State Board of Accountancy was established in 1909 under Senate Bill 112 by an act of the 44th Missouri General Assembly. By Executive Order 06-04, the division moved from the Department of Economic Development to the reorganized Department of Insurance, Financial Institutions, and Professional Registration on August 28, 2006.

The Board is responsible for the examining, licensing, and regulation of certified public accountants, and licensing and regulation of certified public accounting firms. At June 30, 2014, there were approximately 12,855 licensed certified public accountants and firms. An individual license fee was $65 with a biennial renewal fee of $80, and a certified public accounting firm permit fee was $90 annually.

The Board consists of seven members, with six members possessing a license to practice in the state of Missouri and one voting public member. Board members are appointed by the Governor with the advice and consent of the senate and serve a term of 5 years. Members serve no more than 2 consecutive terms, or 11 years, except that members whose terms expire may continue to serve until a replacement is appointed. The Board members at June 30, 2014, were:

Member	Term Expires
Robert Helm, President	July 1, 2016
Ryan Cook, Vice-President	July 1, 2015
James Mintert, Treasurer	July 1, 2016
Jeanne Dee, Secretary	July 1, 2013
John Sheehan, Member	July 1, 2017
Sandra Wedewer, Member	July 1, 2018
Travis Ford, Public Member	July 1, 2017

Board members receive a $70 per diem compensation and expenses while performing their duties. The Board appoints an executive director to perform the administrative duties of the Board. Thomas DeGroodt serves as Executive Director. Seven other employees perform administrative duties and responsibilities.

THOMAS A. SCHWEICH
Missouri State Auditor

The Citizens of Missouri

This report was compiled from follow-up reports issued in 2014. The State Auditor's office conducted 21 follow-up reviews pursuant to the Auditor's Follow-Up Team to Effect Recommendations (AFTER) program. The objectives of the AFTER program are to:

1. Identify audit report findings that require immediate management attention and any other findings for which follow up is considered necessary at this time, and inform the auditee about the follow-up review on those findings.

2. Identify and provide status information for each recommendation reviewed. The status of each recommendation reviewed will be one of the following:

    - Implemented: Auditee fully implemented the recommendation, either as described in the report or in a manner that resolved the underlying issue.
    - In Progress: Auditee has specific plans to begin, or has begun, to implement and intends to fully implement the recommendation.
    - Partially Implemented: Auditee implemented the recommendation in part, but is not making efforts to fully implement it.
    - Not Implemented: Auditee has not implemented the recommendation and indicates that it will not do so.

Auditors conduct follow-up work for any audit receiving an overall "Poor" rating, significant or serious findings in audits receiving a "Fair" rating when determined necessary, and any other audits at the discretion of the State Auditor.

Of 296 recommendations included in the follow-up reports 134 had a status of implemented, 107 had a status of in progress, 28 had a status of partially implemented, and 27 had a status of not implemented.

Partially Implemented	4

12. New Madrid County

Report number 2014-066

New Madrid County received a "Poor" overall audit rating. The follow-up report focused on 12 recommendations.

Status determined:

Implemented	6
In Progress	2
Not Implemented	4

13. Brownfield Redemption Tax Credit Program

Report number 2014-099

The Brownfield Redemption Tax Credit Program received a "Poor" overall audit rating. The follow-up report focused on 9 recommendations.

Status determined:

Implemented	3
In Progress	2
Not Implemented	4

14. Eleventh Judicial Circuit City of New Melle Municipal Division

Report number 2014-107

The Eleventh Judicial Circuit, New Melle Municipal Division received a "Poor" overall audit rating. The follow-up report focused on 9 recommendations.

Status determined:

Implemented	5
In Progress	4

15. Ash Grove R-IV School District

Report number 2014-108

The Ash Grove R-IV School District received a "Fair" overall audit rating. The follow-up report focused on 22 recommendations.

Status determined:

Implemented	12
In Progress	9
Partially Implemented	1

16. Forty-Second Judicial Circuit City of Bourbon Municipal Division

Report number 2014-112

The Forty-Second Judicial Circuit, City of Bourbon Municipal Division received a "Poor" overall audit rating. The follow-up report focused on 9 recommendations.

Status determined:

Implemented	5
In Progress	4

17. Hickman Mills C-1 School District

Report number 2014-114

The Hickman Mills C-1 School District received a "Fair" overall audit rating. The follow-up report focused on 18 recommendations.

Status determined:

Implemented	12
In Progress	2
Partially Implemented	4

18. Fifth Judicial Circuit Buchanan County

Report number 2014-116

The Fifth Judicial Circuit, Buchanan County received a "Fair" overall audit rating. The follow-up report focused on 7 recommendations.

Status determined:

Implemented	4
In Progress	2
Not Implemented	1

19. Morgan County

Report number 2014-117

Morgan County received a "Poor" overall audit rating. The follow-up report focused on 15 recommendations.

Status determined:

Implemented	7

Not Implemented	1

20. Webster County Procurement Procedures and County Clerk

Report number 2014-118

Webster County Procurement Procedures and County Clerk received a "Poor" overall audit rating. The follow-up report focused on 7 recommendations.

Status determined:

Implemented	1
In Progress	2
Partially Implemented	3
Not Implemented	1

21. First Judicial Circuit Clark County

Report number 2014-124

The First Judicial Circuit, Clark County received a "Poor" overall audit rating. The follow-up report focused on 13 recommendations.

Status determined:

Implemented	8
In Progress	1
Partially Implemented	2
Not Implemented	2

Thomas A. Schweich

Missouri State Auditor

City of Kimmswick

December 2014

Report No. 2014-139

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the City of Kimmswick

City Festivals	Each year the city holds the Strawberry Festival and the Apple Butter Festival, but the city does not maintain adequate records of festival monies received, so the city cannot ensure all monies collected are accounted for and properly deposited. The city does not issue pre-numbered receipt slips for booth rentals or sponsor fees received, does not maintain a record of vendors and fees paid, and does not reconcile registration forms to fees deposited. The city does not track city booth sales or reconcile products sold to monies collected, does not deposit monies timely and intact, and does not maintain monies in a secure location until deposit. Various members of the community work at city festivals, but only some are paid for their services, and the city did not maintain documentation to support compensation paid to festival workers, and it was not clear whether the Board approved the amounts. The city did not always comply with its own purchasing policy for festival disbursements, the Board did not review bid documentation prior to approving the recommended vendors, and the city did not enter into written contracts with some service providers. Festival disbursements were not always approved by the Board before payment, and the Festival Committee does not comply with the Sunshine Law.
Accounting Controls and Procedures	The Board has not segregated duties or performed adequate reviews of the work performed by the City Clerk. The City Clerk performs various accounting duties for the city and manages events held at the Anheuser Estate. The city does not issue pre-numbered receipt slips and cannot demonstrate all monies received were deposited. The city does not deposit monies intact or timely, restrictively endorse money orders upon receipt, deposit all monies related to events held at the Anheuser Estate, or keep receipts for estate events in a secure location. The City Clerk does not properly mutilate and retain voided checks.
City Policies and Procedures	The city made several disbursements prior to obtaining Board approval, and it is unclear whether all disbursements were approved. The city paid 4 relatives of the Mayor a total of $2,468 during 2013 and paid a total of $5,762 to 2 city employees who are related to Board members. To reduce the risk and appearance of a conflict of interest, the city should develop policies and procedures concerning related parties. The city did not properly report the mayor's $200 per month stipend as compensation for tax purposes and did not file required 1099-MISC forms for 9 individuals and 2 vendors.
Anheuser Estate	In 2001, the family estate of Fred and Mabel Anheuser was bequeathed to the city, along with a $1.5 million permanent trust fund for the purpose of maintaining the estate as a library and museum. The estate is overseen by a 5 person board of trustees (Trust Board), and the city and Trust Board has approval authority over estate disbursements. The city does not retain

	documentation to support its approval of disbursements made from the trust fund, so it is not clear that all disbursements were approved by the city as required. The city has used an outdated capital assets listing to insure the property and has not conducted an inventory of the estate. The city began renting the estate to the public for special events, but the city does not have a formal agreement with the Trust Board outlining how income from such events will be divided between the city and the Trust Board.
Closed Meetings	Prior to November 2013, the city did not prepare closed meeting minutes. The Board generally uses the same statement in each meeting notice/agenda as the reason for a potential closed meeting, and topics discussed in closed meetings were not limited to the reasons cited and were not always allowable.
Budgets and Financial Statements	The city does not prepare a budget for each of the city's 4 funds, and the budgets prepared do not contain all required elements. The Board does not timely approve budgets and does not adequately monitor budget-to-actual receipts and disbursements. Actual expenditures exceeded budgeted amounts by $98,600 for 2013. The Board does not publish the city's financial statements semiannually, as required by state law, and financial statements do not include adequate detail of the activity for each fund.
Computer Controls	The city has not established adequate password controls to reduce the risk of unauthorized access to the city's computer and data. The city does not store backups of system data at a secure off-site location, so backup data may not be available for restoring systems following a disaster or computer failure.

In the areas audited, the overall performance of this entity was **Fair**.*

***The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

Organization and Statistical Information 22

THOMAS A. SCHWEICH
Missouri State Auditor

To the Honorable Mayor
and
Members of the Board of Aldermen
City of Kimmswick, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit the City of Kimmswick. We have audited certain operations of the city in fulfillment of our duties. The scope of our audit included, but was not necessarily limited to, the year ended December 31, 2013. The objectives of our audit were to:

1. Evaluate the city's internal controls over significant management and financial functions.

2. Evaluate the city's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations, including certain financial transactions.

Our methodology included reviewing minutes of meetings, written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the city, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, grant agreement, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the city's management and was not subjected to the procedures applied in our audit of the city.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Kimmswick.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Keriann Wright, MBA, CPA
In-Charge Auditor:	Steven Re', CPA
Audit Staff:	Tessa Rusatsi

1. City Festivals

Significant weaknesses were identified with controls and procedures over city festivals.

The city holds two festivals annually, the Strawberry Festival, held in June, and the Apple Butter Festival, held in October. Revenues for the festivals account for nearly half of the city's annual revenues and totaled approximately $105,000 for the 2013 Apple Butter Festival and approximately $42,000 for the 2013 Strawberry Festival. Festival revenues include fees charged for booth rentals, sponsors, parking, and sales during the festivals, including beer, jam, hay, and raffle tickets.

The city has a Festival Committee tasked with helping to organize and manage city festivals, including managing booth rentals, obtaining sponsors, soliciting bids, and negotiating contracts, when necessary. The committee is comprised of the Mayor, City Clerk, a member of the Board of Aldermen, and a community volunteer. In addition, the city enlists the help of various community members to operate each festival.

1.1 Receipting and depositing procedures

The city's controls and procedures over receipting and depositing festival monies need significant improvement.

Festival receipts

The city does not maintain adequate records of festival monies received, and as a result, the city cannot ensure all monies collected are accounted for and properly deposited.

The city does not issue pre-numbered receipt slips for booth rentals or sponsor fees received, and a record of vendors and fees paid is not maintained. When a vendor wants to rent a booth or sponsor a festival, a registration form is completed and a fee is paid dependent upon the type of rental or sponsorship agreement. The City Clerk records the composition of payment on the registration form and attaches a copy of the cash or check received. The City Clerk forwards a copy of the registration form and payment to the Festival Committee Chairperson to assign a booth space. Booth assignments are not made in any specific order and the only record of vendors is a site map of booth assignments. The site map shows all available/rented booth spaces based on their location in the city. The booth spaces are pre-numbered on the site map and are assigned to vendors based on location request. Additionally, the City Clerk does not reconcile registration forms to fees deposited. City officials deposited approximately $109,000 in rental and sponsor fees from 560 vendors for the 2013 festivals.

In addition, the city does not track city booth sales or reconcile products sold to monies collected. During each festival, the city operates various booths, generally selling beer, jam, hay, and raffle tickets. Each booth has a cash box used by volunteers for any monies collected. Throughout the day, the City Clerk picks up cash from the city booths and maintains the monies in bank bags by receipt type at city hall. The city does not keep a record of

sales made and does not try to reconcile products sold with monies received to ensure all monies collected are accounted for and deposited. During the 2013 festivals, the city deposited approximately $22,200 from city booth sales.

Deposits

The city does not deposit festival monies received intact or timely and the city does not restrictively endorse checks upon receipt. The city allows vendors to post-date checks for future festivals in order to secure their booth location. Approximately 35 percent of checks received for both booth rental and sponsor fees were post-dated and held up to 10 months before deposit. A cash count performed on May 21, 2014, identified 76 checks on hand, totaling $19,235. Most of these checks were post-dated August 1, 2014, for the Apple Butter Festival to be held in October 2014, and none of them were restrictively endorsed. Allowing and retaining post-dated checks for long time periods places monies on hand at risk and increases the possibility that checks may be insufficient by date of deposit.

Security of receipts

The city did not maintain festival monies received in a secure location until deposit. During the June 2014 Strawberry Festival, we observed an unattended bank bag sitting on a table in city hall containing several bundles of cash. We also noted the city left the file cabinet that holds post-dated checks and other receipts unlocked. During this time, city hall was unlocked and various people, including city staff, vendors, and others, had unrestricted access to these areas. The city does not ensure all monies collected from city booths during the festival are accounted for prior to deposit. The City Clerk placed monies collected from the city booths in bank bags, uncounted until deposit the following business day. Based on our questions and weaknesses noted, the city made some changes to better account for monies collected from booth sales during the 2014 Strawberry Festival, such as counting monies collected throughout the festival at the time of collection, and placing cash collected in the bank drop box at night; however, some monies remained uncounted before they were secured.

Conclusion

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of funds will go undetected. To adequately safeguard receipts, a receipt log and/or pre-numbered receipt slips should be prepared for festival monies received, checks and money orders should be restrictively endorsed upon receipt, city booth sales should be tracked and reconciled with monies collected, monies should be deposited intact and timely, and monies should be kept in a secure location until deposit.

1.2 Festival staff

The city does not designate which festival staff services will be compensated. Various members of the community work at city festivals; however, only some of the workers are paid for their services. For the year ended December 31, 2013, the city paid 21 festival workers approximately $8,900. Compensation paid to workers ranged from approximately $100 to

$400 for each festival. An additional 36 festival volunteers were not compensated. Duties performed by the paid workers during 2013 festivals included event security, clean up, parking, and bus coordination. Duties performed by volunteers included booth sales, setup and tear down, and other tasks as necessary.

In addition, the city did not maintain documentation to support compensation paid to festival workers and it was not clear whether the amounts compensated were approved by the Board of Aldermen (Board). Further, the city paid a security officer a $50 cash advance on the first day of the 2013 Apple Butter Festival, before services were provided.

To ensure compensation for festival services is clearly defined and documented, the city needs to develop a policy and make it available to the public. In addition, to ensure obligations were actually incurred and amounts paid were proper, all disbursements, including compensation to festival workers, should be paid by check, adequately supported, and properly approved and documented in the Board meeting minutes.

1.3 Festival disbursements

Controls and procedures over festival disbursements need improvement.

Bidding

The city did not always comply with its purchasing policy for festival disbursements, resulting in bids not being solicited for all services required. City policy requires solicitation of bids for goods or services costing more than $500 by placing bid requests in public view. For goods or services costing more than $5,000, policy requires the request for bids to be advertised in a newspaper. City officials did not solicit bids for trash services ($2,646), portable toilets ($5,605), or the band solicitor/promoter ($2,600) for the 2013 Apple Butter Festival.

The Festival Committee is responsible for obtaining bids for festival goods or services and making recommendations to the Board; however, the Board does not review bid documentation prior to approving the recommended vendors. Personnel indicated the Board discusses and approves festival bids during Board meetings; however, there is no documentation in the meeting minutes noting the approval. In addition, all bid documentation relating to festival activity is maintained offsite by the committee chairperson.

Competitive bidding not only ensures the Board is complying with city policy, but also helps ensure all parties are given an equal opportunity to participate in city business. Documentation of the selection process and criteria should be reviewed and maintained by the city to support purchasing decisions and Board approval should be clearly documented in meeting minutes.

Contracts

The city did not enter into a contract with the band solicitor/promoter or the beer vendor for the 2013 festivals. The city paid the band solicitor/promoter

approximately $4,800 to find and pay bands for both festivals. The city paid the beer vendor approximately $9,800.

Written agreements, signed by the parties involved, should specify the services to be rendered and the manner and amount of compensation to be paid. Written contracts are necessary to ensure all parties are aware of their duties and responsibilities and to prevent misunderstandings. Section 432.070, RSMo, requires contracts for political subdivisions to be in writing.

1.4 Board approval

The Board did not approve a large portion of the 2013 festival disbursements prior to payments being made, and Board meeting minutes did not document the Board's approval for festival disbursements. As a result, festival disbursements were not always approved prior to payment and it is unclear whether they were ever approved. The Board did not hold meetings during May through July 2013 for various reasons, including the lack of a quorum, flooding within the city, and the Strawberry Festival. During this period, the city disbursed $29,185 relating to the 2013 Strawberry Festival, which accounted for approximately 41 percent of total festival disbursements made in 2013.

According to the City Clerk, anticipated 2013 Strawberry Festival disbursements were presented to and pre-approved by the Board prior to the festival and then subsequently approved by the Board during the August 2013 Board meeting. There is no documentation to support the Board pre-approved or subsequently approved these payments, and Board meeting minutes do not indicate approval.

To safeguard against possible loss or misuse of funds, the Board should approve all festival disbursements prior to payment. Board approval should be documented in the meeting minutes, and by signature or initials on the approved disbursement reports.

1.5 Festival Committee

The Festival Committee does not comply with the Sunshine Law. The committee does not hold open meetings and meeting minutes are not prepared. Further, recommendations made by the committee to the Board are not approved. As a result, decisions and recommendations made by the Festival Committee were not open to the public. According to committee members, committee decisions are made by phone, text, or email between the members; open meetings are not held. Recommendations are made by the committee to the Board; however, committee decisions are not always brought before the Board for approval and recommendations made to the Board were not always voted on and approved. For example, the Festival Committee solicited bids and paid for bus services totaling $4,867 for the 2013 Strawberry Festival without approval by the Board. According to the City Clerk, the Board and the Mayor were informally contacted to obtain approval to pay for the service.

Minutes serve as the only official permanent record of decisions made by the Festival Committee. Section 610.020, RSMo, requires minutes be taken of meetings of all public governmental bodies. Section 610.010, RSMo, defines committees appointed by and reporting to public governmental bodies as subject to Sunshine Law requirements.

Recommendations

The Board of Aldermen:

1.1 Ensure proper receipt records are maintained and reconciled to the composition of the deposits. In addition, the Board should develop procedures to track and reconcile city booth sales to monies collected, ensure deposits are made timely and intact, checks/money orders are restrictively endorsed upon receipt, and monies are properly secured. Further, the Board should discontinue the practice of accepting post-dated checks. Any fees received in advance of upcoming festivals should be promptly deposited and vendor payments and booth assignments should be adequately tracked.

1.2 Establish a policy to address compensating festival workers and ensure disbursements are adequately supported, reviewed, and approved. Board approvals should be documented in meeting minutes.

1.3 Ensure the city solicits and approves bids in accordance with city policy, and maintains documentation at city hall. In addition, the Board should establish written contracts for festival services when needed to properly define services to be received and amounts to be compensated.

1.4 Review and approve all festival disbursements prior to payment and ensure approval of festival disbursements is properly documented in meeting minutes.

1.5 Ensure public meetings are held and meeting minutes prepared, approved, and maintained for the Festival Committee in accordance with the Sunshine Law. Meeting minutes should document all decisions made and be filed with the city.

Auditee's Response

The Board of Aldermen provided the following written responses:

1.1 The city has already implemented better procedures to improve accounting practices, including the use of pre-numbered receipts so that receipts can be reconciled. The city will implement better procedures to track booth sales during the festivals so that sales can be accurately reconciled with the monies collected. Any discrepancies will be promptly investigated and corrected. Deposits

will continue to be made in a timely fashion, and all monies will continue to be secured at all times during and after festivals. The city has created a database for tracking vendors to allow for better accounting practices. The practice of accepting post-dated checks from vendors as a means to secure a spot for the following year's festivals will be discontinued completely by 2016. The city is unable to discontinue this practice any sooner, as post-dated checks have already been received for the 2015 festival season. The city has already begun endorsing checks immediately upon receipt, pursuant to the Auditor's recommendation.

1.2 *The city no longer has paid volunteers working at festivals. Anyone who receives payment over $600 during a single year will be issued a 1099 form. The Board will make all necessary approvals with respect to the approval of any payments.*

1.3 *The city accepts the recommendation of the Auditor, and further will update its policies and procedures with respect to the soliciting and approving of bids. The city will ensure that documentation relative to the soliciting and approval of bids is maintained at City Hall. The city will ensure all written contracts are executed in accordance with Section 432.070, RSMo. To help with the updating of policies and to ensure compliance, the city has recently hired a City Attorney.*

1.4 *The city will continue to ensure that all disbursements are approved by the Board of Aldermen prior to the disbursements being paid, and that such approvals will be documented in meeting minutes. Reports will be given during public meetings with respect to the specific disbursements that are being approved by the Board of Aldermen. The city already provides, and will continue to do so, a financial report each month at its public Board meetings, and has all invoices and checks available for review by the Board members at each meeting. Further, a detailed financial report is, and will continue to be, completed and made public for each of the city's festivals.*

1.5 *The Board of Aldermen will appoint an individual to serve as festival director, and shall adopt a policy detailing the scope of the individual's powers with respect to the task of organizing the festivals. Each month, as applicable, the Festival Director shall report to the Board of Aldermen during the regularly scheduled Board meetings to provide an update and to seek any required approvals from the Board of Aldermen. All documents and communications generated by the Festival Director will be*

maintained and made available to the public in accordance with all applicable laws and regulations.

2. Accounting Controls and Procedures

We identified several weaknesses with the city's accounting controls and procedures. In addition to various festival fees and sales receipts (see MAR finding number 1), the city also receives monies for various taxes, merchant licenses, events, and other miscellaneous receipts and reimbursements. During the year ended December 31, 2013, the city collected approximately $166,000, excluding festival receipts.

2.1 Segregation of duties and supervisory reviews

The Board has not segregated duties or performed adequate reviews of the work performed by the City Clerk. The City Clerk is responsible for receipting and depositing monies, preparing checks, reconciling bank accounts, preparing monthly financial reports, and maintaining accounting records. In addition, the City Clerk manages events held at the Anheuser Estate (see MAR finding number 4) and prepares billings for merchant licenses. Many of these duties would normally be performed by a City Treasurer and City Collector; however, the city does not have individuals serving in these positions. The Board hired the former City Treasurer to prepare the city's annual financial statements. On a monthly basis, as part of this service, this individual performs an independent review of the monthly bank reconciliations, disbursements, and financial statements; however, the former City Treasurer's review is not documented and does not include reconciling receipts to deposits or reviewing detailed transactions. A detailed review of accounting records is also not performed by the Board.

Proper segregation of duties helps ensure all transactions are accounted for properly and assets are adequately safeguarded. Attorney General's Opinion No. 24, 1955 to Dodds, concluded that in a fourth-class city, the holding of the positions of City Clerk, City Treasurer, and City Collector, or any two of these offices, by the same person at the same time would be incompatible. If segregation of duties is not possible, a timely supervisory review by the Board should be performed and documented.

2.2 Receipting and depositing procedures

The city's controls and procedures over receipting and depositing monies need improvement. We noted the following issues:

- The city did not issue pre-numbered receipt slips nor maintain an immediate record of receipts. As a result, the city cannot demonstrate all monies received were deposited. For example, fees received for 2 Anheuser Estate events, totaling $675, could not be traced to deposit. The application forms indicated payment had been made; however, receipt documentation was not adequate to ensure deposit of these payments.

- The city does not deposit monies intact or timely, and checks and money orders were not restrictively endorsed upon receipt. For

example, during July 2013, 13 checks totaling $1,200 were deposited. The checks were dated between 4 and 44 days before deposit. Because the city does not maintain adequate receipt records, it is not clear when these checks were physically received by the city.

- The city does not deposit all monies received relating to events held at the Anheuser Estate. The city requires a refundable deposit when booking an event. The city allows individuals to submit a post-dated check as the deposit for renting the Anheuser Estate for events; however, the checks are held until after the event, at which time they are either remitted back to the payee or deposited. A cash count performed on June 17, 2014, identified 17 checks totaling $3,575 with dates ranging from April 30, 2014, to November 2, 2014.

- The City Clerk does not maintain receipts for estate events in a secure location. The City Clerk places checks for deposits and event payments in a binder left out in the open at city hall. The City Clerk said she takes the binder home in the evenings.

Failure to implement adequate receipting and depositing procedures increases the risk that loss, theft, or misuse of funds will go undetected. To adequately safeguard receipts, a receipt log and/or pre-numbered receipt slips should be prepared for all monies received, monies should be deposited intact and timely, and all monies should be kept in a secure location until deposit.

2.3 Voided checks

The City Clerk does not mutilate and retain voided checks. During the year ended December 31, 2013, the City Clerk voided 23 checks. The City Clerk stated she shreds voided checks each month after the bank statements are balanced.

To ensure accounting records are accurate and to reduce the risk of unauthorized transactions, the city should ensure all voided checks are properly mutilated and retained.

Recommendations

The Board of Aldermen:

2.1 Segregate the duties of the City Clerk. At a minimum, there should be a documented review of city records and reconciliations.

2.2 Ensure proper receipt records are maintained and reconciled to the composition of the deposits. In addition, the Board should ensure deposits are made timely and intact, and monies are properly secured. Further, the Board should discontinue the practice of accepting post-dated checks. Any fees received in advance of upcoming events should be promptly deposited.

2.3 Mutilate and retain all voided checks.

Auditee's Response

The Board of Aldermen provided the following written responses:

2.1 The City of Kimmswick currently employs no full-time employees. Current budget constrictions do not allow the city to employ a City Treasurer or other employee to allow the city to segregate the duties of the City Clerk. The city will continually review its staffing needs and budgeting restraints to determine if needs and circumstances change so as to allow for the hiring of additional employees. The city has, and will continue to have, the city's retired City Treasurer (or other qualified individual) review the monthly reports. Such reviews will be documented, and will be more comprehensive owing to the increased accounting procedures put in place as referenced in response to Point 1.1. Further, the Board of Aldermen will consider providing for additional periodic overview of the city's financial records by the Board or a Board subcommittee.

2.2 With the exception of the city's practices regarding post-dated checks, monies received are, and will continue to be, promptly deposited and receipts issued relative to receipt of monies. Again, the city will eliminate its post-dated check system for securing festival spots by 2016. The city will also not accept post-dated checks for other purposes, and will ensure that all monies received, regardless of form, are promptly deposited.

2.3 The city accepts and has already implemented this audit recommendation.

3. City Policies and Procedures

The city's policies and procedures are not adequate to address Board approvals, related parties, and Internal Revenue Service (IRS) reporting.

3.1 Board approval

The city made several disbursements prior to obtaining Board approval, and meeting minutes did not include documentation of disbursements approved by the Board. It is unclear if the Board approved all disbursements. As discussed in MAR finding number 1.4, the Board did not hold meetings during May through July 2013. During this period, the city disbursed approximately $23,000 from the General Revenue, Road, and Event Funds, which accounted for approximately 18 percent of disbursements from those funds during 2013. The City Clerk indicated she spoke with 2 Board members and the Mayor to obtain approval to pay the essential bills during the months the Board did not meet. Disbursements are generally approved during each monthly Board meeting; however, there is no documentation

maintained with the Board meeting minutes to identify which disbursements were approved.

To safeguard against possible loss, theft, or misuse of funds, the Board should approve all disbursements prior to payment. Board approval of disbursements should be documented in the meeting minutes, and by signature or initials on the approved disbursement reports.

3.2 Related parties

The city does not ensure payments made to relatives of city officials are free of conflicts of interest. As a result, $8,230 paid to relatives of city officials during the year ended December 31, 2013, represent a potential conflict of interest.

- The city paid 4 relatives of the Mayor a total of $2,468 during the year ended December 31, 2013, for work performed at the city festivals and events, and for miscellaneous repair work. Payments to these relatives ranged from $245 to $1,248.

- The city paid $5,762 to 2 city employees during the year ended December 31, 2013, who are related to Board members. The employees were hired prior to the Board members taking office; however, the city does not have policies or procedures in place to help prevent conflicts of interest from occurring regarding these positions. For example, the meeting minutes do not indicate if the related Board members abstained on any decisions involving these positions.

To reduce the risk and appearance of a conflict of interest, the city should develop policies and procedures concerning related parties. These policies and procedures should include, at a minimum, Board members abstaining from any decisions made concerning their relatives, and adequate documentation of decisions in Board meeting minutes.

3.3 IRS reporting

The city did not properly report payments to vendors or individuals to the IRS when required.

Expense payments

The city did not properly report the mayor's stipend as compensation for tax purposes. The city pays the Mayor a stipend of $200 per month to cover general expenses; however, there is no documentation supporting the use of these monies.

IRS publication 463 states any reimbursement or other expenses not qualifying under an accountable plan, represents income and should be reported on a W-2 form. The Mayor's stipend does not qualify under an accountable plan and should have been reported as income.

1099-MISC

The city did not always file 1099-MISC forms with the IRS when required.

We identified payments to 9 individuals and 2 vendors totaling $12,723 where city officials did not issue 1099-MISC forms. Payments ranged from $600 to $4,800 and related to festival work, accounting services, and Anheuser Estate event work.

Sections 6041 to 6050 of the Internal Revenue Code require non-wage payments of at least $600 in one year to an individual be reported to the federal government on a 1099-MISC form.

Recommendations

The Board of Aldermen:

3.1 Review and approve all disbursements prior to payment and ensure approval is properly documented.

3.2 Establish policies and procedures concerning related parties and ensure decisions concerning related parties are adequately documented in meeting minutes.

3.3 Ensure W-2 and 1099-MISC forms are issued when required.

Auditee's Response

The Board of Aldermen provided the following written responses:

3.1 The city will ensure that disbursements will be approved prior to payment by the Board of Aldermen, and the approval documented in meeting minutes. During scheduled meetings the Board of Aldermen reviews and approves the financial report and approves the payment of bills. The Board of Aldermen will adopt a procedure for allowing for the payment of essential bills, such as utilities, for months when the city is unable to hold its regularly scheduled meetings. The city will ensure compliance with all applicable laws and policies, and the procedures it prescribes.

3.2 The city will review potential conflicts that may exist, and take necessary remedial measures. Further, the city will adopt policies and procedures to address potential conflicts of interest. Again, the city has hired legal counsel to assist with this process.

3.3 The city will ensure W-2 forms are issued as required. The city will also issue 1099-MISC forms as required.

4. Anheuser Estate

City policies and procedures over disbursements, capital assets, and event profits involving the Anheuser Estate need improvement.

In 2001, the family estate of Fred and Mabel Anheuser was bequeathed to the city, along with a $1.5 million permanent trust fund (trust fund) for the purpose of maintaining the estate as a library and museum in honor of the

Anheuser family. The trust fund is supervised by a 5 person Board of trustees (Anheuser Trust Board) and consists of the Mayor, a city appointed representative, and 3 representatives of the Anheuser family. To ensure the trust fund is spent and the estate is used as intended, monies can only be spent after the approval of both the Anheuser Trust Board and the city's Board of Alderman. The city approves and signs all disbursements from the trust fund; however, the Anheuser Trust Board is the custodian of the trust fund and all of its related records and is a legally separate entity from the city. As a result, our review was limited to the city's involvement with the Anheuser estate and the related trust fund.

4.1 Disbursements

The city does not retain documentation to support its approval of disbursements made from the trust fund. Both the Mayor and the City Clerk are responsible for signing all checks for the trust fund. When disbursements need to be made, the Anheuser Trust Board provides the city with checks and supporting documentation for review and approval at the next city Board meeting. However, meeting minutes do not specify what disbursements were approved and documentation to support what was approved at each meeting is not maintained. The city receives some documentation of trust fund expenditures from the Anheuser Trust Board about every 6 months to keep as city records; however, the documentation does not provide assurance disbursements were properly approved by the city.

Without documentation supporting what expenditures were approved with Board meeting minutes, it is not clear the trust fund disbursements were approved by the city as required.

According to Section 6.6 of the Anheuser Permanent Fund Trust Agreement, dated July 24, 2010, because the City of Kimmswick is the owner of the Anheuser property and the beneficial owner of the Anheuser permanent trust fund, it is understood and agreed by all parties that all acts of the Anheuser Trust Board are contingent upon approval of the Board of Alderman of the City of Kimmswick. Without adequate documentation, the city cannot demonstrate disbursements and other actions of the Anheuser Trust Board were properly approved by the city.

4.2 Capital assets

The city has not conducted an inventory of the Anheuser Estate and has not updated the related capital asset records since 2010. As a result, the city has used an outdated listing to insure the property. Each year, the city insures the Anheuser Estate along with other city property and the Anheuser Trust Board reimburses the city for the estate's portion of the insurance premium. The Anheuser Estate property includes the museum and its contents, including various antiques and heirlooms, land, and other structures. In 2013, insurance records show Anheuser Estate capital assets had a value of approximately $1.3 million.

Adequate capital asset records and procedures are necessary to safeguard assets that are susceptible to loss, theft, or misuse; and to provide a basis for proper insurance coverage.

4.3 Event profits

The city does not have a formal agreement with the Anheuser Trust Board outlining how income derived from events held at the Anheuser Estate will be divided between the city and the Anheuser Trust Board. Beginning in 2013, the city began renting the estate to the public for special events. Any related costs for events at the estate are covered by the city. According to city personnel, an informal agreement was made between the city and the Anheuser Trust Board to equally divide the profits from these events. However, the city's meeting minutes do not document this agreement and a written agreement with the Anheuser Trust Board was not created. In July 2013 the city disbursed $221 to the Anheuser Trust Board as the estate's portion of profits earned from 3 events held between March and July 2013; however, the city did not retain documentation to support how the profits were calculated, and profits from events held after July 2013 have not been divided. Since July 2013, 44 events have been held at the Anheuser Estate and the city has collected $15,630 in rental fees.

According to Section 5.3 of the Anheuser Permanent Fund Trust Agreement, dated June 24, 2010, if in the future, additional sources of income are derived from the Anheuser Estate, including but not limited to, income derived from any improvements constructed after the date of this agreement, the disposition of the income will be determined by agreement between the City of Kimmswick and the Anheuser Trust Board.

Recommendations

The Board of Aldermen:

4.1 Ensure the city maintains documentation of trust fund disbursements approved by the Board. Additionally, meeting minutes should clearly document the Board's approval.

4.2 Ensure an annual inventory of the capital assets is performed and records updated as necessary for the Anheuser Estate.

4.3 Establish a formal agreement with the Anheuser Trust Board documenting the disposition of future income earned.

Auditee's Response

The Board of Aldermen provided the following written responses:

4.1 The city keeps, and will continue to keep, the documentation it has relative to the Anheuser Trust Fund. The city will maintain copies of the invoices and checks approved at each Board of Aldermen meeting, so as to maintain current records of approved disbursements. In accordance with the Auditor's recommendation,

the city has already begun approving disbursements for the Anheuser Trust Fund separate and apart from the approval of city disbursements during public meetings, and will continue to do so and make sure such authorizations are documented in the meeting minutes for the Board of Aldermen. The city will comply with the requirements for the disbursement of funds as required by the terms of the trust.

4.2 The city accepts the Auditor's recommendation and will schedule an inventory for early 2015. The city will thereafter perform annual inventories.

4.3 The city will attempt to negotiate a written formal agreement with the Anheuser Trust Board with respect to the disposition of future earned income.

5. Closed Meetings

The city was not always in compliance with the Sunshine Law for closed meetings held. The Board held 8 closed meetings from January 2013 to July 2014.

- Prior to November 2013, city officials did not prepare closed meeting minutes. While the city documented the results of votes taken during closed meetings in the open meeting minutes, closed meeting minutes documenting the date, time, and Board members in attendance, topics discussed, and decisions made were not prepared or retained.

- The Board generally uses the same statement in each meeting notice/agenda to indicate the potential for a closed meeting, instead of citing the specific exception as the reason for a closed meeting, when applicable. For 1 closed meeting held, the specific reason for closing the meeting was not cited in either the agenda or the open meeting minutes.

- Topics discussed in closed meetings were not limited to the reasons cited and were not always allowable. For example, during the May 13, 2014, closed meeting, the Board discussed personnel issues although the reason for closing the meeting was to discuss sealed bids. Further, sealed bids were opened, discussed, and a bid was accepted during this closed meeting, which is not allowable per the Sunshine Law.

Section 610.020, RSMo, requires minutes of closed meetings be taken and retained by all governmental bodies and to indicate the date, time, place, members present, members absent, and a record of votes taken. In addition, Section 610.022, RSMo, provides that a public governmental body planning to hold a closed meeting should follow the notice procedures for an open meeting and include there will be a closed meeting and cite the specific provision of the law that allows the meeting to be closed. A statement that includes general issues that may be discussed in a closed meeting appears to

circumvent the intent of state law. Further, Section 610.021, RSMo, limits the subjects Board's may discuss in closed meetings.

Recommendation

The Board of Aldermen ensure meeting minutes are prepared for all closed meetings. In addition, the Board should ensure specific reasons are cited for closing the meeting, and topics discussed are allowable and limited to only those specific reasons cited to justify the closed meeting.

Auditee's Response

The Board of Aldermen provided the following written response:

The city will comply with the Sunshine Law and has already revised its notices to better comply with the law. The meeting notices, and the motion to close the meeting, will state the statutory authority for the closing of the meeting. The city will ensure that roll call votes are taken and recorded in meeting minutes as required. The city will ensure closed meeting minutes are prepared as required. The city will not discuss sealed bids in closed meetings, and will ensure that it only discusses those matters in closed meetings which it is authorized to. Finally, the Board of Aldermen believes it restricts its discussions during closed sessions to the stated reasons for which the meeting was closed. Regardless, the city will ensure that it continues to limit discussions during closed meetings to the topics pursuant to which the Board of Aldermen voted to close the meeting. Furthermore, the Board of Aldermen will be provided training on the Sunshine Law in early December. Again, legal counsel has been hired to assist with compliance.

6. Budgets and Financial Statements

The city does not properly prepare, approve, or monitor budgets and has not complied with state law in publishing and reporting financial information.

6.1 Budgets

The city does not have adequate procedures to prepare, approve, or monitor budgets.

Preparation and approval

The Board does not prepare a budget for each of the city's 4 funds. Additionally, budgets do not include a budget message or summary, the actual beginning and estimated ending cash balances, budgeted amounts for the 2 preceding years, or city indebtedness information. Instead, the Board combines the city's 4 funds (General, Road, Enterprise, and Event Funds) into a consolidated budget and the budget only includes the actual receipts and disbursements for the prior 2 years. As a result, the Board is not using all available information to assist in effectively managing the city, and the public is not provided a complete overview of city finances.

In addition, the Board does not approve budgets timely. The annual budgets for the years ended December 31, 2013 and 2014, were not approved until the February 11, 2013, and March 31, 2014, Board meetings, respectively.

Section 67.010, RSMo, requires the budget present a complete financial plan for the ensuing budget year and sets specific guidelines for the format. A complete budget should include the beginning available resources and a reasonable estimate of the ending available resources. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific financial expectations for each area of city operations. It also assists in setting tax levies and informing the public about city operations and current finances. In addition, Section 67.030, RSMo, states the governing body shall approve and adopt the annual budget prior to the beginning of the fiscal year.

Monitoring

The Board does not adequately monitor budget-to-actual receipts and disbursements. As a result, actual expenditures exceeded budgeted amounts by $98,600 for the year ending December 31, 2013. The City Clerk provides the Board with monthly financial statements at each Board meeting; however, the reports do not include budget-to-actual information and the financial statements are not broken down by fund or budgetary line item. As a result, the Board is not reviewing information to ensure disbursements remain within budgeted appropriations.

Section 67.040, RSMo, requires political subdivisions to keep disbursements within amounts budgeted, but allows for budget increases if the governing body officially adopts a resolution setting forth the facts and reasons. In addition, Section 67.080, RSMo, provides that no disbursement of public monies should be made unless it is authorized in the budget. Proper monitoring and amending prior to disbursing funds is necessary for the budget to be an effective management tool and comply with state law.

6.2 Financial statements

The Board does not publish the city's financial statements semiannually as required by state law. Instead, the city's financial statements are published once per year, after the end of each calendar year. In addition, the annual financial statements combine all 4 funds (General, Road, Enterprise, and Event Funds) into a consolidated statement, which does not allow for a clear, detailed analysis of each fund's financial status.

Complete and accurate financial statements are necessary to keep citizens informed of the financial activity and condition of the city. Section 79.160, RSMo, requires the Board to prepare and publish a full and detailed account of the receipts, disbursements, and indebtedness of the city semiannually. In addition, Section 79.165, RSMo, states the city cannot legally disburse funds until the financial statements are published as required.

Recommendations

The Board of Aldermen:

6.1 Prepare annual budgets, which contain all information required by state law, and document its approval of budgets prior to the beginning of the fiscal year. In addition, the Board should ensure the budget and financial condition are adequately monitored and monthly financial statements have adequate detail.

6.2 Ensure semiannual financial statements are published in accordance with state law and contain adequate detail and documentation.

Auditee's Response

The Board of Aldermen provided the following written responses:

6.1 The city will ensure its annual budgets are adopted as required and that the monthly financial reports contain sufficient detail. The city will breakdown the budget by each of the four funds, and will include a budget message or summary, beginning and estimated ending balances, budgeted amounts for the preceding years and any city indebtedness information, in addition to any other information required by state law. The city will put in place necessary policies and procedures to ensure that the budget is prepared in a timely manner, and that the monthly financial statements contain sufficient information to allow the Board to effectively monitor actual performance compared to the budget. The Board of Aldermen will approve budgets in a timely manner, and ensure that such approvals are documented in meeting minutes.

6.2 The city accepts and will implement the Auditor's recommendation.

7. Computer Controls

Controls over the city's computer are not sufficient to prevent unauthorized access. In addition, backup data is not stored in a secure, off-site location. As a result, city records are unprotected and susceptible to damage or theft.

7.1 Passwords

The city has not established adequate password controls to reduce the risk of unauthorized access to the city's computer and data. Separate user identifications and passwords are not required to log onto the computer, and the City Clerk has shared her identification and password with other city officials. In addition, the password is not required to be changed periodically.

Passwords are required to authenticate access to computers. The security of a computer password is dependent upon keeping passwords confidential. However, since the City Clerk's password does not have to be periodically changed and has been shared among officials, there is less assurance it is effectively limiting access to the computer and data files to only those individuals who need access to perform their job responsibilities. Passwords

should be unique and confidential and changed periodically to reduce the risk of unauthorized access to and use of the city's computer and data.

7.2 Backup data

Backup data for the city's financial system may not be available for restoring information following a disaster or computer failure. Backups are performed daily; however, the backups are not stored at a secure off-site location but are stored at the same location as the original data and periodic testing of the data for adequacy is not performed. As a result there is an increased risk a disaster or other disruption impacting the city's computer and original data would also adversely impact the backups. The unavailability of both the original and backup data would be significant and detrimental to the city accomplishing its mission.

Failure to store computer backup data at a secure off-site location results in backup data being susceptible to the same damage as the data on the computer. Preparation of backup data, preferably on a daily or at least weekly basis, periodic testing to ensure the backup process is adequate, and off-site storage would provide increased assurance city data could be recovered if necessary.

Recommendations

The Board of Aldermen:

7.1 Require a unique password for each employee that is confidential and periodically changed to prevent unauthorized access to the city's computer and data.

7.2 Ensure backup data is stored in a secure off-site location and tested on a regular, predefined basis.

Auditee's Response

The Board of Aldermen provided the following written responses:

7.1 The city accepts and has already implemented the Auditor's recommendation. The City Clerk (who is the only employee with a password for the computer at City Hall) now changes her password on a monthly basis.

7.2 The city accepts the Auditor's recommendation, and has already implemented the process of off-site storage and monthly testing of the backup.

City of Kimmswick
Organization and Statistical Information

The City of Kimmswick is located in Jefferson County. The city was incorporated in 1871 and is currently a fourth-class city. The city employed 8 part-time employees on December 31, 2013.

City operations include street maintenance services and a post office.

Mayor and Board of Alderman

The city government consists of a mayor and four-member board of aldermen. The members are elected for 2-year terms. The mayor is elected for a 2-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor and Board of Aldermen at December 31, 2013, are identified below. The Mayor is paid a stipend of $200 per month.

Patricia Reno, Mayor
Shirley Ising, Alderwoman, Ward 1
Connie Schmitt, Alderwoman, Ward 1
Gary Paszkiewicz, Alderman, Ward 2
Phil Stang, Alderman, Ward 2

Financial Activity

A summary of the city's financial activity for the year ended December 31, 2013, follows:

City of Kimmswick
Schedule of Receipts, Disbursements, and Changes in Cash Balances
Year Ended December 31, 2013

	General Fund	Enterprise Fund	Road Fund	Event Fund	Total
RECEIPTS					
Property taxes	$ 2,109	0	0	0	2,109

SOCIAL SERVICES

MO HealthNet Division Payment and Cost Recovery

December 2014

Report No. 2014-140

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Department of Social Services (DSS), MO HealthNet Division, Payment and Cost Recovery

Contractor Oversight	The MO HealthNet Division (MHD) does not sufficiently monitor the collection activities of the Third Party Liability unit contractor used to identify claims paid by the MHD for which a third party may be partially or completely liable. The contractor provides MHD with a monthly report of activities; however, the report does not include sufficient information to allow the MHD to properly monitor the contractor's performance. Additionally, these reports were not accurate, and neither the contractor nor the MHD identified the errors. As a result of errors identified by our audit, the MHD asked the contractor to revise the reports prepared from April 2013 to April 2014 and the contractor identified additional errors. The MHD could use the contractor's case management system to monitor recoupments the contractor bills and collects; however, MHD staff indicated this system has not been utilized. MHD instead relies on monthly meetings with the contractor to identify and resolve any issues.
Timely Update of Medicare Eligibility	The MHD has not fully implemented measures to ensure it identifies and updates Medicare eligibility in the Medicaid Management Information System (MMIS) timely. The MHD has an informal agreement with a contractor to periodically generate a report of all MO HealthNet participants whose Medicare eligibility is not reflected in the MMIS. However, the MHD received this report only once during each of the years ended June 30, 2014, and June 30, 2013.
Deposit Procedures	The MHD did not deposit all funds timely. Our review of monies on hand July 8, 2014, noted the department had held 104 checks from 9 to 350 days since receipt. Additionally, the MHD has not posted some funds received to the associated account receivable timely. In instances where a single check pays multiple invoices or multiple monthly premiums, the checks are deposited into a holding account while division staff and the contractor determine to which accounts receivable the payment should be posted. As of October 3, 2014, the holding account held 6,080 outstanding items, with approximately 2,400 items older than January 1, 2014.

Provider Disclosure of Overpayment	The MHD and the Department of Social Services, Missouri Medicaid Audit and Compliance unit need to continue taking actions to ensure certain overpayments made to providers are identified and reported by the providers and recovered timely. The United States Department of Health and Human Services, Office of Inspector General, performed an audit in 2012 of the MHD's oversight of credit balances and identified $33,419 of overpayments for the quarter ended September 30, 2011. Additionally, state regulations do not require providers to reconcile their accounts, which means many payment errors may never be identified.

Because of the limited objectives of this review, no overall rating is provided.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Brian Kinkade, Director
Department of Social Services
and
Dr. Joseph Parks, Director
MO HealthNet Division
Jefferson City, Missouri

We have audited certain operations of the MO HealthNet Program (also known as the Medical Assistance Program, or Medicaid) and the Children's Health Insurance Program (CHIP), administered by the Department of Social Services, MO HealthNet Division, in fulfillment of our duties under Chapter 29, RSMo. The audit was conducted to review the payment and cost recovery measures performed by the division. These activities include the identification and recovery of costs paid by the division for which other responsible parties may be liable or for which the division could otherwise recover a payment. The objectives of our audit were to:

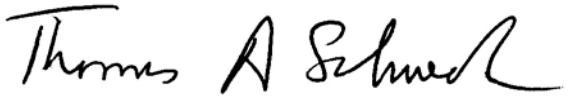
1. Evaluate the division's internal controls over significant management and financial functions related to the recovery of payments made by the division.

2. Evaluate the division's compliance with certain legal provisions related to the recovery of payments made by the division.

3. Evaluate the economy and efficiency of certain management practices and operations related to the recovery of payments made by the division, including certain financial transactions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

For the areas audited, we identified (1) deficiencies in internal controls, (2) no significant noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures. The accompanying Management Advisory Report presents our findings arising from our audit of the Department of Social Services, MO HealthNet Division, Payment and Cost Recovery.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Douglas J. Porting, CPA, CFE
Audit Manager:	Lori Melton, M.Acct., CPA
In-Charge Auditor:	Patrick M. Pullins, M.Acct., CISA
Audit Staff:	Jennifer Anderson
	Nancy McDowell

Background

The federal Medical Assistance Program (also known as Medicaid and operated in Missouri as MO HealthNet) was authorized by federal legislation in 1965. The program is administered by the state and is jointly financed by the federal and state governments. The Department of Social Services (DSS), MO HealthNet Division (MHD), is responsible for administration of the program. The program provides health care access to low-income persons age 65 or over, blind, disabled, or members of families with dependent children. Additionally, the MHD provides health coverage to children meeting eligibility requirements under the federal Children's Health Insurance Program (CHIP), known in Missouri as the MO HealthNet for Kids program. Legislative changes have expanded the categories of eligibility to include MO HealthNet coverage for children and pregnant women in poverty, refugees, and children in state care.

The MHD utilizes various payment and cost recovery measures to ensure the program is paying only valid claims for which it is responsible and to ensure any other responsible parties bear their share of program costs. Responsibility for implementing these measures falls to various units within the DSS and the contractors hired in support of those units.

The Third Party Liability (TPL) unit identifies other parties that may be responsible for the payment of claims billed to the MO HealthNet program. For example, when a MO HealthNet participant is injured in an automobile accident, the TPL unit will attempt to recoup the participant's medical expenses from the insurance company of the at-fault driver. The TPL unit is also responsible for the Health Insurance Premium Payment (HIPP) program, in which the state pays the premiums for certain individuals to enroll in other insurance plans (such as one sponsored by an employer) rather than insure the participant through the MO HealthNet program.

The Medicare Buy-In unit identifies MO HealthNet participants who are also eligible for the Federal Medicare program. By ensuring Medicare eligibility is identified and paying Medicare premiums on behalf of these participants, the state is able to shift costs away from the state and federally financed MO HealthNet program to the federally financed Medicare program, saving the state money.

The Missouri Medicaid Audit and Compliance (MMAC) unit performs post-payment reviews of MHD payments to medical providers and participants to ensure that claims billed to the MHD are reasonable, appropriate, and made in compliance with state and federal regulations. The MMAC is also responsible for investigating allegations of fraud or waste in the MO HealthNet program received by the agency.

The Medicaid Management Information System (MMIS) is the MO HealthNet benefit claims processing and information retrieval system used by the state to meet the requirements of the United States Department of

Health and Human Services. The system was established in the 1980s and replaced by an enhanced system in 2009. The MMIS has also been subject to regular updates to account for changes in program rules and regulations. Various MMIS reports are available to MHD staff to identify transactions in need of additional review or potential recoupment actions, such as reports identifying transactions for which the participant might have other insurance available to pay the claims and reports identifying participants who may be eligible for insurance under the Medicare program. The Medicare Statement Control Report (MSCR) identifies claims paid on behalf of MO HealthNet participants with recent changes to Medicare eligibility. Because the MO HealthNet program is the payer of last resort, these claims are reviewed to determine if the MO HealthNet payment should be recouped and the provider instructed to rebill the claim to the Medicare program. Claims identified remain on subsequent reports until processed in the MMIS.

Federal and state regulations limit the amount of time the state has to identify potential overpayments and begin recoupment efforts. Generally, the period of time is 1 to 3 years from the date services were provided; however, there is no limit in certain circumstances, such as fraud. In most instances, if the state has not notified a provider within the allowable time limits about an incorrect payment, the state loses the ability to recoup the funds.

Scope and Methodology

The scope of our audit included, but was not limited to, management controls and other related internal controls established and managed by the MHD; policies and procedures; and other management functions and compliance issues during the year ended June 30, 2014, related to payment and cost recovery measures implemented for Missouri's MO HealthNet program.

Our methodology included conducting interviews with appropriate officials and staff of the Department and contractors; obtaining and reviewing available policies and procedures, federal and state laws and regulations, and other applicable information; and performing testing.

We obtained various system-generated management reports from the MMIS, including reports of participants who had recently become Medicare eligible (the Medicare Statement Control Report) for the period May 2013 through May 2014. This report is prepared twice monthly. Due to MMIS system updates, four reports prepared during the period October through December 2013 were not reliable and contained numerous false positive results. Accordingly, these four reports were not included in our review and potential errors from these reports are not included in our report results.

1. Contractor Oversight

The MO HealthNet Division (MHD) does not thoroughly oversee the actions of a division contractor. Additionally, the MHD failed to detect errors in the monthly reports filed by this contractor. As a result, the MHD cannot ensure that the contractor is appropriately fulfilling required duties and performing to expectations.

1.1 Documentation

The MHD does not sufficiently monitor the collection activities of the Third Party Liability (TPL) unit contractor. While the contractor provides MHD with a monthly report of activities, including recovery transactions opened, processed, and recovered, the report is summary-level only and does not include sufficient information to allow the MHD to properly monitor the contractor's performance.

The MHD TPL unit uses a contractor to identify claims paid by the MHD for which a third party may be partially or completely liable. The potentially liable third parties are identified through data matches with other insurers and employers, referrals from providers or others, information from incident reports, and other methods. Once the potential third party is identified, the contractor determines the medical expenses paid by the MHD. The contractor creates and sends an invoice to the third party requesting reimbursement for expenses incurred in the treatment of the participant, and at that time records the correspondence in a case management system.

Because the invoices are created before liability is determined, a significant portion of the invoices are denied by the third party when the eligibility is found to be incorrect. For example, the contractor may identify a MO HealthNet participant also has insurance through an insurance company. The TPL contractor will attempt to recoup the participant's medical expenses from the insurance company. If the insurance policy was not in effect on the date of service, the company may not be liable for the charges and would deny the invoice. When the invoice is paid or denied, the contractor is responsible for updating the record in the case management system and, if the invoice is paid, creating and satisfying a receivable in the Medicaid Management Information System (MMIS). The contractor is paid on a commission basis, receiving a set percentage of the funds recouped for the state.

According to the contract, the contractor's case management system could be used by the MHD to monitor recoupments the contractor bills and collects. However, MHD staff indicated this system has not been utilized to review the contractor's actions. Additionally, MHD staff indicated no data is provided by the contractor to support the amounts that the contractor includes in its monthly reports to the division. No detailed information as to the value or status of claims being pursued by the contractor (including if the claim is still active or the decision has been made to suspend collection efforts) is provided to the MHD. Instead MHD relies on monthly meetings with the contractor to identify and resolve any issues.

Without reviewing the contractor's case management system or otherwise obtaining detailed case information, the MHD cannot ensure the contractor is making a good faith effort to collect recoupment on all claims, nor can the MHD ensure that all claims billed for which payment is received by the contractor are processed and reported correctly.

1.2 Reporting Errors

Reports prepared by the TPL contractor were not accurate, and the errors were not detected by the contractor or by the MHD.

The TPL contractor prepares monthly reports for the MHD to document activities, including the count and dollar amounts of recovery activities at the beginning of the month, summarized activity during the month, and the end-of-the-month balance.

We reviewed a selection of these monthly reports for the period February 2013 through June 2014. On the report showing April 2013 activity, the contractor incorrectly reported the March beginning recovery activity balance as the March ending balance. As a result, the balance of activity for April and all subsequent months was overstated by the net amount of activity in March, or $644,350.

After we notified the MHD of this error in April 2014, MHD staff requested the contractor revise the reports prepared from April 2013 to April 2014. During the contractor's review, contractor staff identified additional errors, including a $56.7 million error where the contractor used the February 2014 beginning balance as the March 2014 beginning balance. These revisions resulted in a total net decrease of $58.3 million in the reported balance of the potentially recoverable claims to correct this error and others that had not been detected by either the contractor or the MHD, despite MHD officials' claim staff reviewed these reports monthly. A contractor representative indicated the inaccurate reports resulted from a change in the subcontractor responsible for report preparation during the year.

Recommendations

The MHD:

1.1 Require the contractor for third party liability to provide detailed reports and information in order to ensure all potential recoupments are pursued to an ultimate disposition. The MHD should review this data for reasonableness and to ensure the contractor is appropriately fulfilling duties and complying with the expectations of the MHD.

1.2 Ensure MHD staff review submitted reports for accuracy and reasonableness and work with the contractor to resolve errors.

Auditee's Response

The Department of Social Services provided the following written responses:

1.1 The MHD does receive monthly and annual summary reports including a status of recovery projects report, a posting report based on recoveries, aging reports (pending open checks), an accounts receivable report, the yield management and claims recovery report, refund reports, and cost avoidance reports. The MHD will request the detailed supporting documentation for the current reports received from the contractor when the data in the summary reports needs more explanation or further review. Additionally, the MHD will continue to meet with the contractor to review all available reports and tools to determine if other additional reports will be useful to MHD. Different reports or additional resources will be requested, if needed. Utilizing the reports received, the MHD will review the data for reasonableness and to ensure the contractor is in compliance with contract requirements.

1.2 The error noted in the audit resulted in a reported $58.3 million decrease in the total accounts receivable (A/R) balance, but does not reflect any change in recoveries. The A/R balance at the time of the audit was the raw computer match list prior to any human review for actual recoverability; thus it was more of an accounting of the total billings. Because of this, MHD staff focused more on the actual recoveries. The MHD and the contractor have now changed the process of setting up an A/R. Now, an A/R is not set up until the check is received. This change will likely result in a lower risk of errors being made. The contractor will start performing a quality control review prior to submitting reports to MHD staff and will work with MHD staff to validate the reports for accuracy and reasonableness.

2. Timely Update of Medicare Eligibility

The MHD has not fully implemented measures to ensure Medicare eligibility is identified and updated in the MMIS timely. As a result, the MMIS is not timely identifying some MO HealthNet claims paid on behalf of participants who are eligible for Medicare, and the state has lost the opportunity to challenge payment of some claims for these participants and to potentially recoup erroneous payments.

The MHD reviews various reports to identify MO HealthNet participants with Medicare eligibility. One of these reports is the result of an informal agreement with a contractor to periodically perform an eligibility data match between state MO HealthNet participant records and federal Medicare eligibility records. The data match generates a report of all MO HealthNet participants whose Medicare eligibility is not reflected in the MMIS. The contractor prepared this report quarterly during the year ended June 30,

2012, but the MHD only received it once during each of the years ended June 30, 2014, and June 30, 2013, due to delays in production.

According to MHD personnel, regular preparation and review of this report would likely reduce the number of claims paid by MHD that should have been paid by Medicare, which would also reduce the number of claims on the Medicare Statement Control Report (MSCR). The MSCR identifies claims paid for MO HealthNet participants who have recently begun receiving Medicare. The reduction in claims would be the result of Medicare eligibility being updated before a claim is submitted, resulting in cost avoidance at the time of the claim submission instead of requiring cost recovery following a claim payment.

We reviewed claims on the MSCR where staff did not take steps to recoup the claim because the one-year timely filing deadline had passed. Out of 66,514 claims included on the MSCR during the 13-month period reviewed, the identification of the participant as being Medicare eligible was not completed until over one year after the date of service for 947 claims, totaling $798,303 related to 354 participants. As a result, the state never had a chance to recoup the claims because the timely filing requirement had passed before the claims were identified.

The identification in the MSCR of claims paid on behalf of Medicare eligible participants hinges on timely updating of a participant's Medicare eligibility in the MMIS. When eligibility updates are not completed timely, the inclusion of related claims in the MSCR is delayed and the state may lose the opportunity to recoup claims that should have been paid by Medicare.

Recommendation

The MHD should ensure the timely identification of MO HealthNet participants also receiving Medicare. Once identified, the MHD should ensure the Medicare eligibility is posted to the MMIS timely to maximize opportunities to recover program expenditures.

Auditee's Response

The Department of Social Services provided the following written response:

While the MHD agrees that $798,303 in claims that were identified on the MSCR were not reviewed timely to determine recoverability, it is not correct to assume that the same amount of $798,303 was available to be recovered. There are many reasons that prohibit the MHD from recovering Medicaid dollars including:

- *Claim was received outside timely filing;*
- *Provider already did an online adjustment in the system for the dates of service identified in case management;*
- *Provider submitted a fee-for-service claim for a service provided to a participant who has a Part C plan and is not a Qualified Medicare*

Beneficiary. In these instances, they must submit a regular fee-for-service claim instead of crossover claim, and account for the Part C payment (Medicare Advantage Plan) on the TPL attachment; and
- *Procedure is not covered by Medicare.*

While this particular data match report is not currently a required report to be submitted under the contract, the MHD agrees it does have value. Thus, the MHD will include this as a required report submission in the next contract renewal/rebid.

In addition to this data match, there are seven other reports that are used to update Medicare eligibility in the MMIS. These reports have been and continue to be worked timely. These reports are as follows:

- *Monthly Prospective Report*
- *Health Insurance Claim Numbers without Effective Dates*
- *Crossover Report*
- *Participants with Medicare Part C, without Parts A or B (on file)*
- *Medicare Participants Active on Managed Care*
- *MO Rx Report*
- *Pharmacy and Clinical Services Update Reports*

Auditor's Comment

While there may have been valid reasons some of the claims identified may not have been recoverable, the total amount is unknown. Without identifying Medicare eligibility timely and reviewing the claims above, the MHD lost the opportunity to recoup any portion of the claims that may have been determined recoverable if actions had been taken timely.

3. Deposit Procedures

The MHD has not ensured receipts are deposited and processed timely.

The MHD and a contractor receive monies from various sources, including program participants, providers, and insurance companies. These payments include various forms of premiums required from program participants, refunds due to the department from providers, and various reimbursements. Most of these payments are received through a lockbox in which the payee submits payment along with a payment coupon to a vendor. The vendor is responsible for processing the payment and depositing the payment into a designated account. If there are problems with the payment (such as the amount paid does not match the coupon), the payment is forwarded to the department for further processing.

3.1 Timely depositing

The MHD did not deposit all funds timely.

We performed a cash count of funds forwarded to the division and in the division's custody on July 8, 2014. We noted 104 checks totaling $110,000 had been held in a safe by the division from 9 to 350 days since receipt.

Three of these checks, totaling $1,122, were within 2 weeks of having been held long enough to become stale dated and no longer negotiable. The division considers a check to be stale dated either one year after the date of issuance or after the date of restriction on the check, if any (such as "void after 180 days"). None of the three checks were deposited before they became stale dated, and two of these checks totaling $55 were subsequently destroyed because they could no longer be negotiated. As of August 4, 2014, the third check for $1,067 was still being held by the division, even though it became stale dated on July 12, 2014. MHD officials could not explain why these checks were held rather than deposited to a holding account until the proper disposition could be identified.

3.2 Timely posting

The MHD has not posted some funds received to the associated account receivable timely.

Most checks received by the MHD (or its contractors) include information, such as remittance advices or correspondence from the payer, to allow the MHD to determine to which account receivable the payment should be posted. These checks are deposited into a state bank account and the funds are immediately available for use. In more complex cases, for example when an insurance company pays multiple invoices or a participant pays multiple monthly premiums with a single check, MHD or contractor staff deposit the checks into a holding account. The funds remain in the holding account while MHD staff and the contractor (depending on the specific type of payment received) investigate and determine how the payment should be posted. Because the checks have not been processed and posted to an account, the funds are not available to the MHD for use supporting the MO HealthNet program.

According to a MHD report, as of July 4, 2014, the holding account held 13,261 payments totaling $59.8 million dated from October 20, 2010, through July 3, 2014. These payments included over 7,500 items older than January 1, 2014. MHD staff indicated efforts to clear the backlog of deposited but unposted items are ongoing; however the process has been slower than desired, and goals for the time to complete the process have not been met. As of October 3, 2014, the report had been reduced to 6,080 items outstanding, with approximately 2,400 items older than January 1, 2014.

Failure to deposit checks timely increases the risk that the funds could be lost, misplaced, misappropriated or become stale dated. Failure to timely post deposited funds to the appropriate account(s) receivable delays the funds being available to the MHD for program uses.

Recommendations

The MHD:

3.1 Ensure that all receipts are deposited and processed timely to prevent the stale dating of checks and the loss or misappropriation of funds.

3.2 Ensure funds are posted to accounts receivable and made available for program uses as soon as possible.

Auditee's Response

The Department of Social Services provided the following written responses:

3.1 The MHD has now implemented depositing checks within 3 business days. With this new process MHD will be depositing checks more timely, but it will increase the number of checks that are not posted timely to the A/R. Since the checks were previously being held prior to depositing the check until the additional information needed was received, it will increase the number of checks that are not posted timely.

3.2 The majority of the checks (82%) are the responsibility of a contractor to post to the A/R. The MHD has been meeting with the contractor on a monthly basis to review existing policies and processes for opportunities for improvement. While there have been improvements, the MHD will continue to work with its contractor to bring postings to the accounts receivable up to date.

Since MHD is implementing a new process to deposit checks more timely, it will increase the number of checks that are not posted timely. In particular, deposited funds from partial payment of spend down checks will need to be held up to 13 months since providers have up to 12 months to bill service claims that could potentially complete the spend down obligation.

4. Provider Disclosure of Overpayment

The MHD and the Department of Social Services (DSS), Missouri Medicaid Audit and Compliance (MMAC) unit need to continue taking actions to ensure certain overpayments made to providers are identified and reported by the providers and recovered timely.

MHD providers maintain accounting records for each participant showing the services provided, costs billed, and payments received. Each participant's account at a provider may have multiple charges, payments, and adjustments made as claims work their way through the adjudication process. For instance, a claim may be sent to multiple insurers, have deductibles or copayments from the participant posted, and have deductions posted for items not billable under insurance agreements. As a result, it is not uncommon for an account to have a credit balance, meaning the amount

received by the provider exceeds the costs billed. Because the MO HealthNet program is the payer of last resort, all overpayments are to be refunded to the MHD first. State regulation 13 CSR 70-3.030 requires providers to refund an overpayment within 45 days of receiving notice that the state has identified an overpayment, or penalties may apply. Additionally, section 1320a-7k(d) of title 42 United States Code requires providers to report and return any overpayment they have received.

Health and Human Services audit

The United States Department of Health and Human Services (HHS), Office of Inspector General, performed an audit in 2012 of the MHD's oversight of credit balances[1] to determine whether nursing facilities reconciled invoice records with credit balances and reported the associated MO HealthNet overpayments to the MHD. While the audit specifically addressed nursing homes, the same type of issues could occur at any type of provider.

The federal audit identified $33,419 of overpayments for the quarter ended September 30, 2011, and estimated the state could potentially collect an additional $572,000 of overpayments for this period. The DSS collected approximately $286,000 from nursing home and hospital providers for credit balances in the year ended June 30, 2014. Additionally, the audit noted while the state requires providers to refund overpayments within 45 days of receiving notice of overpayment, there is no actual requirement for providers to reconcile their accounts, which means many payment errors may never be identified.

In the response to the audit, the DSS officials indicated the specific overpayments identified in the federal audit sample had already been collected or were in the process of being collected. These officials also stated they would assign responsibility for performing reviews of provider accounts to a contractor. According to DSS staff, the department is now considering changes to state regulations and in July 2014 began drafting a requirement for providers to reconcile accounts. However, a draft was not available for review.

Without requiring providers to reconcile accounts, the state cannot recoup from providers who have reported no overpayments because the providers indicated they were unaware of accounts with credit balances.

Recommendation

The MHD require providers to perform periodic reconciliations of participant accounts to identify overpayments that need to be refunded in accordance with state law.

[1] United States Department of Health and Human Services, Office of Inspector General, report number A-07-11-03169, *Nursing Facilities in Missouri Did Not Reconcile Invoice Records With Credit Balances and Report the Associated Medicaid Overpayments to the State Agency*, January 2013.

Auditee's Response

The Department of Social Services provided the following written response:

This HHS audit was conducted while the DSS utilized a different contractor than it is currently using. Currently, the state contracts with this new contractor to conduct credit balance transfer audits. In state fiscal year 2014, the state recovered $286,479 via the contractor's credit balance transfer audits.

The HHS audit report did not describe the methodology utilized to arrive at the extrapolated amount of $572,000. Additionally, the time period for which the amount applies is unclear, as both the quarter ended September 30, 2011, and the quarter ended March 31, 2011, were referred to as the applicable scope for the extrapolated amount.

MMAC staff has a draft of a self-disclosure regulation in the review and approval process. This process started at the beginning of state fiscal year 2015. Currently, providers may make adjustments when they are paid incorrectly for claims. This includes overpayment due to receipt of third party resources. If the time limits for adjusting the claims have been exceeded, providers may self-disclose overpayments to MMAC. In state fiscal year 2014, MMAC processed $1,044,449 in self-disclosures.

Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Prosecuting Attorneys' and Circuit Attorneys' Retirement System

Monitoring of Surcharge Contributions	The Prosecuting Attorneys' and Circuit Attorneys' Retirement System (PACARS) Board of Trustees (Board) lacks adequate controls and procedures to ensure all surcharge contributions are received from courts. The Board receives contributions consisting of 1) a monthly fixed dollar amount from individual counties and the City of St. Louis and 2) a $4 surcharge assessed on each criminal case filed in the state. The PACARS received surcharges of approximately $893,000 in 2014 and approximately $916,000 in 2013, representing approximately 60 percent of total contributions each year. The Office of the State Courts Administrator (OSCA) maintains statewide records of surcharges collected by most courts on the Judicial Information System; however the Executive Secretary has not requested this information from all courts or the OSCA.
Board of Trustees	The Board does not always follow Sunshine Law requirements relating to board meeting minutes and notices. The Board did not prepare meeting minutes for the second quarter meetings of 2012, 2013, and 2014; and did not prepare and/or post notices and related agendas for the second quarter meetings, or the first quarter meeting for 2014. In addition, meeting minutes are not prepared and approved timely. The Board did not meet quarterly as required by state law. The Board met 3 times per year during 2012, 2013, and 2014 (through August 2014). The Board lacks policies and procedures to ensure board members represents varied and balanced interests. Board members as of December 2014 included 3 prosecutors, 1 retired prosecutor, and 1 vested former prosecutor.
Executive Secretary	The Board lacks adequate oversight of the Executive Secretary, who administers the plan from her home. The Board does not have a formal written employment contract with the Executive Secretary and has not formally documented her job duties. In addition, the Board does not require that she complete and maintain records of time worked and leave taken. The Executive Secretary indicated she works from 20 to 50 hours a week and the Board Chair indicated that the Board expects the Executive Secretary to work as needed to conduct plan business, but has no other specific expectations regarding her work schedule.

Professional Services Contracts	The Board has not periodically solicited proposals for any professional service providers. The Board has contracted with the same actuarial consultant, attorney, bank, auditor, legislative consultant, and accountant for up to 20 years. Neither the Executive Secretary nor the Board adequately monitors payments to professional service providers. Invoices from the actuarial consultant and accountant lacked adequate detail and the Executive Secretary had not retained a schedule of the accountant's rates. Auditors determined the attorney slightly overbilled the system.

In the areas audited, the overall performance of this entity was **Good***

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Board of Trustees
and
Katrina Farrow, Executive Secretary
Prosecuting Attorneys' and Circuit Attorneys' Retirement System
Jefferson City, Missouri

We have audited certain operations of the Prosecuting Attorneys' and Circuit Attorneys' Retirement System as authorized under Chapter 29, RSMo. The system engaged Graves and Associates, Certified Public Accountants (CPAs), LLC, to audit the system's financial statements for the years ended June 30, 2014, 2013, and 2012. A financial statement audit for the year ended June 30, 2014 had not yet been performed at the time of our audit. To minimize duplication of effort, we reviewed the reports and substantiating working papers of the CPA firm. The scope of our audit included, but was not necessarily limited to, the years ended June 30, 2014 and 2013. The objectives of our audit were to:

1. Evaluate the system's internal controls over significant management and financial functions.

2. Evaluate the system's compliance with certain legal provisions.

3. Evaluate the economy and efficiency of certain management practices and operations.

Our methodology included reviewing minutes of meetings, financial records, contracts, and other pertinent documents; interviewing the Chairman of the PACARS Board of Trustees and the Executive Secretary, as well as certain external parties; testing selected transactions; and analysis of various data obtained from the system and external sources. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of contract, or other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the system's management and was not subjected to the procedures applied in our audit of the system.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, and (3) the need for improvement in management practices and procedures.

The accompanying Management Advisory Report presents our findings arising from our audit of the Prosecuting Attorneys' and Circuit Attorneys' Retirement System.

Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Douglas J. Porting, CPA, CFE
Audit Manager:	Kim Spraggs, CPA
In-Charge Auditor:	James M. Applegate, MBA
Audit Staff:	Alexander Druzenko, MBA, CPA

1. Monitoring of Surcharge Contributions

The Prosecuting Attorneys' and Circuit Attorneys' Retirement System (PACARS) Board of Trustees (Board) lacks adequate controls and procedures to ensure all surcharge contributions are received from courts.

As set forth in Section 56.807, RSMo, the Board receives contributions from two sources: 1) a monthly fixed dollar amount from individual counties and the City of St. Louis and 2) a $4 surcharge assessed on each criminal case filed in the state. The surcharge is collected and submitted by circuit courts located in each county of the state and the City of St. Louis, and by 7 county municipal divisions located in 5 of the larger counties. Prior to August 2014, the surcharge was not collected on cases when defendants paid fines and court costs through the Office of the State Courts Administrator (OSCA) Fine Collection Center; however, state law changed effective August 28, 2014, and the surcharge is now collected on these cases. During fiscal years 2014 and 2013, the PACARS received contributions totaling approximately $1.5 million annually. These amounts included surcharges of approximately $893,000 in 2014 and approximately $916,000 in 2013, representing approximately 60 percent of total contributions each year. A detailed schedule of PACARS' contributions received, by county and court, is located at Appendix C.

Staff from PACARS' accounting firm monitor monthly fixed contributions received from the counties and the City of St. Louis and maintain records of unpaid amounts. However, no similar procedures are performed to ensure surcharges are appropriately collected and received from the courts. Statewide records of surcharges collected by circuit courts and 1 county municipal division are maintained on the Judicial Information System (JIS) maintained by the OSCA. While the Executive Secretary indicated some courts submit copies of JIS reports with their surcharge contributions, she has not requested these reports from all courts or the OSCA. The JIS system is a good source of information that would help the PACARS monitor to ensure the courts are fully and timely remitting surcharge payments to the PACARS.

Because 6 of the 7 county municipal divisions collecting the surcharge do not utilize the JIS system, alternative procedures would be necessary to monitor contributions from these divisions. These municipal divisions are required to report certain distributions, including PACARS surcharges, monthly to the OSCA on a municipal division summary reporting form. However, our discussions with OSCA and court personnel and review of reporting forms determined none of these 6 county municipal divisions separately and accurately report the PACARS surcharges on the reporting form.

Without procedures to monitor the surcharges due and received, the Board has no assurance it received all surcharges, as provided by state law.

Recommendation

The Board of Trustees establish procedures to monitor surcharges to ensure all contributions are received.

Auditee's Response

The Board of Trustees provided the following written response:

The Board will increase its efforts to monitor surcharge payments by requesting OSCA to send quarterly reports, sorted by county, (not by circuit) of the surcharge payments. In addition, the Board will request the municipal divisions which handle violations subject to the PACARS surcharge to provide such reports as they are able within the framework of their systems.

2. Board of Trustees

The Board does not always follow Sunshine Law requirements relating to Board meeting minutes and notices, and does not meet quarterly as required by state law. In addition, the Board lacks diverse representation.

The Executive Secretary indicated Board meetings are generally held at a hotel in Jefferson City during the first quarter of each year, via email during the second quarter, and in conjunction with the annual Missouri Office of Prosecuting Attorneys conference during the third quarter. Our review of the minutes and meeting notices prepared for meetings held during the period January 2012 to August 2014 identified several concerns.

2.1 Meeting minutes

The Board did not prepare meeting minutes for the second quarter meetings of 2012, 2013, and 2014. The PACARS' Attorney indicated the Board meets via email during the second quarter each year for the sole purpose of reviewing and approving retiree cost of living increases. In addition, meeting minutes are not prepared and approved timely. The Executive Secretary indicated she prepares the meeting minutes as soon as she has time after each meeting. However, the meeting minutes from the February 2014 Board meeting were not prepared until July or August 2014 and not approved until August 2014.

The Sunshine Law, Chapter 610, RSMo, defines a public meeting as "any meeting of a public governmental body subject to Sections 610.010 to 610.030, RSMo, at which any public business is discussed, decided, or public policy formulated." The Sunshine Law requires minutes of open and closed meetings to be taken and retained by all governmental bodies including, but not limited to, the date, time, place, members present, members absent, and a record of votes taken. Minutes serve as the only official permanent public record of decisions made by the Board. Therefore, it is imperative that the minutes be prepared and retained to document all business conducted and to provide complete transparency and full disclosure to the public. Furthermore, timely preparation and approval not only adds assurance to the authenticity of official minutes, but allows a timely review of the contents to ensure the minutes include all important information regarding the meetings held.

2.2 Meeting notices

The Board did not prepare and/or post notices and related agendas for the second quarter meetings, or the first quarter meeting for 2014. According to the PACARS' Attorney, the Board did not post notices and agendas for the second quarter meetings because each of those meetings only addressed one issue. According to the Executive Secretary, because the first quarter meeting for 2014 was held via conference call, and the Board has no official office, she posted the notice at her home. The Sunshine Law requires posting of a tentative agenda and a meeting notice at least 24 hours prior to all meetings of a public governmental body. This section provides if the meeting will be conducted by telephone or other electronic means, the notice of the meeting shall identify the mode by which the meeting will be conducted and the designated location where the public may observe and attend the meeting. Because the Board does not have an official office or website, an alternative means of posting meeting notices and agendas is needed.

2.3 Meeting frequency

The Board did not meet quarterly as required by state law. The Board met 3 times per year during 2012, 2013, and 2014 (through August 2014). The Executive Secretary and the PACARS' Attorney could not explain why the Board meets less frequently than required.

Section 56.809.2, RSMo, requires that the PACARS Board of Trustees hold regular board meetings at least once each quarter The Board makes key decisions during board meetings, including approving retirement and other benefit applications, actuarial assumptions and methods, contracts, and salaries; and making investment decisions. Conducting meetings at least quarterly is necessary for the Board to carry out these fiduciary and oversight responsibilities, and strengthens internal fiscal controls and public accountability.

2.4 Board members

The Board lacks policies and procedures to ensure board members represent varied and balanced interests.

Section 56.809.1, RSMo, requires the Board of Trustees to be comprised of 5 persons, elected by the prosecuting attorneys and circuit attorneys of the state. However, neither the statute nor Board policy specify the entities or individuals that should be represented on the Board. Board members as of December 2014, include 3 prosecutors, 1 retired prosecutor, and 1 vested former prosecutor. Because the Board is selected by and comprised solely of individuals who are members and beneficiaries of the plan, the Board lacks adequate representation of varied and balanced interests, including the interests of sponsoring governments and taxpayers.

A Government Finance Officers Association best practice guide recommends that "defined benefit plan sponsors should pay particular attention to the composition of the Board of Trustees and make efforts to ensure that varied interests are represented and balanced among those of

employers, employees, retirees, taxpayers and unions, if applicable. Criteria for governing board selection are crucial to ensure a competent board oversees the policy development of all plan activities." Board policies and procedures providing for varied and balanced representation on the Board of Trustees help ensure Board decisions are unbiased and the interests of all parties are considered.

Recommendations

The Board of Trustees:

2.1 Ensure meeting minutes are prepared and approved timely and maintained for all meetings in accordance with the Sunshine Law.

2.2 Ensure appropriate meeting notices and agendas are posted and retained.

2.3 Meet at least quarterly as required by state law.

2.4 Establish policies and procedures that provide a varied and balanced representation on the Board of Trustees.

Auditee's Response

The Board of Trustees provided the following written responses:

2.1 The Board will require meeting minutes to be prepared in draft form within 14 days of the meeting and approved at the next regularly scheduled meeting of the Board.

2.2 &2.3 The Board will ensure that quarterly meeting notices and agenda are posted in an appropriate location. The Board will establish a default location for meetings and teleconferences.

2.4 The election of the Board is in compliance with the law establishing the Board. However, the Board has proactively sought representation across the spectrum members, including non-vested members and retired (vested) members on the Board. The Board will consider whether to recommend to the members of the system that a Board position should be designated for a non-member.

3. Executive Secretary

The Board lacks adequate oversight of its one employee, the Executive Secretary. The Board does not have a formal written employment contract with the Executive Secretary and has not formally documented her job duties. In addition, the Board does not require her to complete and maintain records of time worked and leave taken.

The Board does not have an official office and the Executive Secretary administers the plan from her home. While many plan administrative responsibilities have been contracted to various outside vendors, the Board

has not formally documented which responsibilities and duties should be performed by the Executive Secretary. The Executive Secretary indicated she does not have a set work schedule or specified vacation or sick leave, and she works from 20 to 50 hours per week. The Board Chair indicated the Board expects the Executive Secretary to work as needed to conduct plan business, but has no other specific expectations regarding her work schedule. However, none of these arrangements have been addressed in an employment contract or other Board action.

While the Board approves the Executive Secretary's employment and salary, formal written employment contracts, job descriptions, and/or other documentation of job duties are necessary to ensure all parties are aware of their duties, responsibilities, and benefits and to prevent misunderstandings. In addition, timesheets and leave records are necessary to document and monitor hours worked and leave taken and to substantiate payroll disbursements.

Recommendation

The Board of Trustees establish and maintain a current formal written employment contract with the Executive Secretary and/or formal documented job duties, and update these documents when changes are approved. In addition, the Board should establish a work schedule and leave requirements and require the Executive Secretary to submit timesheets and maintain records of leave taken.

Auditee's Response

The Board of Trustees provided the following written response:

The Board established the Executive Secretary position as an independent contractor position. It is not an employee position. Therefore, the Board feels that the agreement with the Executive Secretary must not be inconsistent with the independent contractor relationship. However, the Board will consider a contract which specifically sets out goals and objectives which are consistent with the Board's objectives, but not inconsistent with the independent contractor relationship.

4. Professional Services Contracts

The Board has not periodically solicited proposals for professional services and procedures to monitor payments to the service providers need improvement.

During the 2 years ended June 30, 2014, the Board contracted with six professional service providers for various services. Payments to these providers during this period totaled approximately $284,000.

4.1 Solicitation

The Board has not periodically solicited proposals for any professional service providers. The Board has contracted with the same actuarial consultant since 1994 (current contract is dated in 2004). Current contracts

with the attorney (general representation), bank (investment management services), and accountant are dated when the Board first contracted with these providers in 1998, 2003, and 2011, respectively. The Board has contracted with the same legislative consultant annually since 2008, and the same auditor every 3 years since 2006. In addition, the Board has separately contracted with the same attorney for specialized legal services and for legal services associated with legislative sessions since 2003.

Without periodically soliciting proposals for professional services, the Board may be missing the opportunity to obtain similar or improved services at a better price, either from existing or new firms.

4.2 Monitoring

Neither the Executive Secretary nor the Board adequately monitors payments to professional service providers.

The Board did not require the actuarial consultant and the accountant submit sufficiently detailed invoices to support amounts billed. While the actuarial consultant fee schedule indicated the Board would be charged at hourly rates ranging from $50 to $325 depending on the experience level of the employee who performed the work, the invoices submitted by the consultant did not detail the number of hours or the employees who performed the work. Invoices submitted by the accountant similarly lacked detail of the number of hours and employees. In addition, while the contract with the accountant stated the Board would be charged at standard rates based on time incurred; the Executive Secretary had not retained a schedule of these rates for comparison to the invoices. The Board paid the actuarial consultant approximately $40,200, and the accountant approximately $25,100, during the 2 years ended June 30, 2014.

In addition, our review of the invoice supporting the payment to the attorney's firm for general representation provided in October 2013, determined the PACARS overpaid the firm $54 because the firm billed the attorney's hours at $15 more than the agreed-upon hourly rate. Upon our inquiry, the attorney researched this discrepancy and informed us a coding error had occurred and the firm overbilled the PACARS $724 during 2013 and 2014. The attorney indicated the firm planned to provide a credit on subsequent invoices to resolve the overpayment. The Executive Secretary indicated she reviews each service provider invoice by comparing the invoice to previous invoices from the provider; however, she does not compare billed rates to related contracts or price agreements. As a result, these procedures did not detect the billing errors and overpayments identifed.

Without adequately monitoring invoices and bills received from professional services providers, including obtaining sufficiently detailed

invoices, the Board lacks assurance amounts paid to professional service providers are proper.

Recommendations

The Board of Trustees:

4.1 Periodically solicit proposals for all professional services; or review current market pricing levels to ensure fair pricing is obtained, and document these reviews.

4.2 Establish procedures to monitor invoices for compliance with contract rates; and require professional service contractors to submit sufficiently detailed invoices of services provided including the number of hours worked, the employees who performed the work, and the hourly rates charged.

Auditee's Response

The Board of Trustees provided the following written responses:

4.1 The Board will establish procedures to periodically review current market pricing levels of its professionals to ensure fair pricing is obtained and document such review at least biannually.

4.2 The Board will require the Executive Secretary, by contract, to monitor invoices from professionals to assure that the prices charged are as represented in the contract with such professionals.

Prosecuting Attorneys' and Circuit Attorneys' Retirement System Organization and Statistical Information

The Prosecuting Attorneys' and Circuit Attorneys' Retirement System (PACARS) was created under an act of the General Assembly, commenced actual operations on August 28, 1989, and is governed by Sections 56.800 to 56.840, RSMo.

The PACARS is a multiple-employer, defined benefit retirement system for prosecuting attorneys in all counties and each circuit attorney in a city not within a county. The system provides retirement and death benefits to its members and survivors. Membership is automatic for any elected or appointed prosecuting attorney or circuit attorney who is employed by a county or a city not within a county.

The PACARS receives contributions from two sources: 1) a monthly fixed dollar amount from individual counties and the City of St. Louis and 2) a $4 surcharge assessed to every criminal case filed in the state. First class counties; all other class counties that elected to make the position of prosecuting attorney full time after August 28, 2001; all other class counties that elected to make the position full time before August 28, 2001 and elected a full-time benefit; and the City of St. Louis; contribute $646 per month. Second class counties that did not make the above elections contribute $271 per month; and third and fourth class counties that did not make the above elections contribute $187 per month. House Bill No. 1231 (2014) provides for adjusted county contribution rates in accordance with a schedule based on the plan's funded ratio (standard rates when funded ratios range between 90 percent and 110 percent, increased rates when less than 90 percent, and reduced rates when more than 110 percent), effective August 2015; and collection of the surcharge on cases paid through the Office of the State Courts Administrator Fine Collection Center, effective August 2014. Plan members are not required to contribute to the plan.

Prosecutors are vested in the plan after serving 12 years in office. Any member who has attained the age of 62 and who has 12 or more years of creditable service may retire with full benefits. A member may elect to retire at age 55 with reduced benefits if the member has 12 or more years of creditable service.

A member who served as a part-time prosecuting attorney for 12 or more years receives a monthly benefit equal to $105 multiplied by the number of 2-year and partial 2-year periods served. A member who served 20 or more years receives a monthly benefit of $130 multiplied by the number of 2-year and partial 2-year periods served. A member who served as full-time prosecuting attorney or circuit attorney for 12 or more years receives a monthly benefit equal to 50 percent of the final average compensation, based on the highest 2 consecutive years of compensation.

Members who are also eligible to receive benefits under the Local Government Employees' Retirement System (LAGERS) shall receive benefits reduced by a percentage of the amount received from the LAGERS. Cost of living increases are received annually equal to the increase in the consumer price index, not to exceed 2 percent in any year. A member's total cost of living increases shall not exceed 50 percent of the initial benefit received upon retirement.

As of June 2014 there were 115 active participants, 52 retired participants and 40 terminated vested participants.

Board of Trustees and Executive Secretary

The responsibility for the operation and administration of the retirement system is vested in the 5-member Board of Trustees, elected by a vote of the prosecuting attorneys and circuit attorneys of the state to 4-year terms. The members of the Board as of June 30, 2014, were as follows:

Name and Title	County or City	Term Expires
Robert George, Board Chair	Former Lawrence County Prosecutor (Retired)	December 31, 2016
Bob McCulloch,[1] Vice Chair	St. Louis County Prosecutor	December 31, 2014
Kevin Barbour[1]	Butler County Prosecutor	December 31, 2014
Amanda Grellner	Osage County Prosecutor	December 31, 2016
Mike Wright[2]	Former Warren County Prosecutor (Terminated vested)	December 31, 2014

[1] Reelected to another term ending December 31, 2018.
[2] Jacob Shellabarger, Audrain County Prosecutor, was elected to a term beginning January 1, 2015, replacing Mike Wright.

The PACARS employs an Executive Secretary, who coordinates the daily operation of the system, executes contracts for some professional services with the approval of the Board, and advises the Board on all matters pertaining to the system. Katrina Farrow has served as Executive Secretary since 1999, and received an annual salary of $40,170, as of June 30, 2014.

The Board contracts with Central Bank, for investment management and deposit services; John Bardgett & Associates, Inc., for legislative consulting services; Milliman USA, Inc., for actuarial consulting services; Williams Keepers, LLC, for accounting services; Armstrong Teasdale, for attorney services; and Graves and Associates, CPAs, LLC, for auditing services.

Additional information regarding the system's plan provisions and benefits, investments, financial activities, consultants, and actuarial valuations can be obtained by contacting the system directly at (573) 556-7985.

[1]Data is presented because PACARS' Consolidated Annual Financial Reports are not readily available to the public. Some or all of this data may significantly change beginning the year ended June 30, 2014, due to Statement No. 67 of the Governmental Accounting Standards Board (GASB): Financial Reporting for Pension Plans - an amendment of GASB Statement No. 25, which amends accounting and reporting requirements for pension plans.

[2]PACARS officials provided the following reasons for the significant change in funded ratio in recent years: Following th passage of Senate Bill No. 5 (2003), which initiated the surcharge, an increasing number of counties changed procedures to adopt the Fine Collection Center as a first step in their collection of traffic violations. This precipitated a marked decline in surcharge contribution revenues and a resulting reduction in the funded ratio (2011-2012). In addition, the migration of third and fourth class counties to full-time prosecutors, in conjunction with the increase in prosecutor's salaries (both of which are entirely outside the Board's control) increased dramatically the expected payout in the form of retirement benefits. The Board sought legislative action which resulted in the enactment of House Bill No. 1231 (2014) which is intended to address these situations.

Infrastructure Development Tax Credit Program

December 2014

Report No. 2014-142

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Infrastructure Development Tax Credit Program

Background

The Infrastructure Development Tax Credit (IDTC) program was established in 1985 and has no expiration. The program was designed to assist in the funding of capital improvement costs for qualified public infrastructure and public facilities projects within the state, and is administered by the Missouri Development Finance Board (MDFB). With approximately $19.5 million in redemptions in fiscal year 2014, the IDTC was the state's 5th largest tax credit program. Effective July 1, 2010, the MDFB may authorize $10 million in tax credits in a calendar year, but an additional $15 million may be authorized with the approval of the Director of Department of Economic Development, the Director of Department of Revenue, and the Commissioner of Administration, and they have approved credits in excess of the $10 million cap in each of the 3 years ending June 30, 2014.

Program Efficiency and Effectiveness

The IDTC generally does not make up a significant portion of project costs and does not always appear to be necessary for project completion. The economic impact of the IDTC is overstated due to cost-benefit calculations attributing the full impact of each project to the program. For example, for fiscal year 2014, the MDFB reported the IDTC program would return $13.64 in state revenue for every dollar of tax credit authorized. The MDFB based this calculation on total project investments of $675 million and the creation of 8,300 new jobs, even though IDTC incentives only accounted for 5.7 percent of total project funding. State law does not include a sunset provision for many tax credits, including the IDTC program. By adopting a sunset provision, the General Assembly could better determine if the program is achieving its intended purpose and whether program funding should be increased, decreased, or eliminated.

In the areas audited, the overall performance of this program was **Good**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Honorable Jeremiah W. (Jay) Nixon, Governor
and
Members of the Board of Directors
and
Robert V. Miserez, Executive Director
Missouri Development Finance Board
Jefferson City, Missouri

We have audited certain operations of the Infrastructure Development Tax Credit Program in fulfillment of our duties under Chapter 29, RSMo and Section 620.1300, RSMo. The scope of our audit included, but was not limited to, the 2 years ended June 30, 2014. The objectives of our audit were to:

1. Analyze the costs and benefits of the program to determine if it is an effective and efficient use of state resources.

2. Evaluate the internal controls over significant management and financial functions related to the program.

3. Evaluate compliance with certain legal requirements related to the program.

4. Evaluate the economy and efficiency of certain management practices and operations.

For the areas audited, we (1) determined the current program structure is generally an efficient use of state resources, but due to weaknesses in program data, other aspects of program effectiveness and efficiency could not be adequately determined, (2) identified no significant deficiencies in internal controls, (3) identified no significant instances of noncompliance with legal provisions, and (4) identified the need for improvement in management practices and procedures.

Except for the matter discussed in the last paragraph of the Scope and Methodology Section, we conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Management Advisory Report presents our finding arising from our audit of the Infrastructure Development Tax Credit Program.

Thomas A. Schweich

Infrastructure Development Tax Credit Program
Introduction

Background

The Infrastructure Development Tax Credit (IDTC) program was established in 1985 under Section 100.286(6), RSMo, and has no expiration. The program was designed to assist in the funding of capital improvement costs for qualified public infrastructure and public facilities projects within the state. The Missouri Development Finance Board (MDFB) administers the program and is responsible for the issuance of all tax credits based upon verification of contribution to the Infrastructure Development Fund. With approximately $19.5 million in redemptions in fiscal year 2014, the IDTC was the state's 5th largest tax credit program. See Appendix B for redemption information on all state tax credits.

The IDTC is a tax credit for contribution program. The MDFB is authorized to grant tax credits in the amount of 50 percent of the value of any eligible contribution to the MDFB by any taxpayer. Section 100.270(24), RSMo states the Board is the sole state agency authorized to set guidelines and priorities for the IDTC program. Per MDFB policy, there are four eligibility requirements under this program:

1. Applicant Eligibility - An applicant must be a local political subdivision, a local government entity created on behalf of or for the benefit of a local political subdivision, or a state agency.

2. Project Eligibility - The project must qualify as a public infrastructure facility as determined under Sections 100.255(9) and (14), RSMo. "Infrastructure facility" is defined as highways, streets, bridges, water supply and distribution systems, mass transportation, facilities and equipment, telecommunication facilities, jails and prisons, sewers and sewage treatment facilities, wastewater treatment facilities, airports, railroads, reservoirs, dams and waterways in this state, acquisition of blighted real estate and the improvements thereon, demolition of existing structures and preparation of sites in anticipation of development, public facilities, and any other improvements provided by any form of government or development agency. A "public facility" is defined as any facility or improvements available for use by the general public including facilities for which user or other fees are charged on a nondiscriminatory basis.

   Our review showed the majority of projects authorized tax credits through the IDTC program were for the acquisition of blighted real estate and the improvements thereon, and for public facilities.

3. Contributor/donor Eligibility - Any taxpayer making a contribution to the MDFB, including any charitable organization that is exempt from federal income tax and whose Missouri unrelated business taxable income, if any, would be subject to the state income tax imposed under Chapter 143, RSMo, may, subject to certain limitations, be eligible to receive the credit.

4. Contribution/Donation Eligibility - Contributions may be in cash, marketable securities, or real property. Marketable securities shall be the proceeds received by MDFB from the liquidation of the securities, while real property must have a free and clear title.

The MDFB encourages contributors to reinvest the proceeds from selling tax credits to benefit the project. Though the MDFD does not require this provision for an application's approval, the tax credit agreement (TCA) for 3 of the 8 projects we reviewed included such a requirement. For example, the Kansas City Chiefs Football Club contributed $75 million to the MDFB for additions and improvements to Arrowhead Stadium. The TCA stipulated the Jackson County Sports Authority use the proceeds from the contributor's sale of $37.5 million in tax credits to cover project costs.

The IDTC can be freely transferred, sold, or assigned, but is not refundable. The credits cannot be carried back to offset prior tax liability, however, Section 100.286(7), RSMo, allows the credits to be carried forward for 5 years to offset future tax liabilities of any assignee, but requires all credits must be claimed within 10 years of the date the contribution was made. The tax credits can be applied against the taxes imposed pursuant to Chapters 143, 147, and 148, RSMo, except for Sections 143.191 to 143.261, RSMo; including the insurance premium tax, and the financial institution tax.

Legislative changes

In 2009, the General Assembly passed legislation imposing new annual limits on the amount of tax credits authorized by the MDFB. Effective July 1, 2010, the MDFB may authorize $10 million in infrastructure tax credits in a calendar year. The $10 million in tax credits available annually do not carry forward to the following year if not approved. An additional $15 million in infrastructure tax credits may be authorized with the approval of the Director of the Department of Economic Development, the Director of the Department of Revenue, and the Commissioner of Administration. The Board cannot approve more than $25 million in tax credits during any calendar year. Credits in excess of the $10 million cap have been authorized in each of the 3 years ending June 30, 2014. See Appendix A for credits authorized, issued, and redeemed.

Approval process

Applicants submit an application to the MDFB detailing the project and its expected costs. Once MDFB personnel determine that the application is complete and the project is eligible for tax credits, the application is reviewed for the following criteria:

- State economic impact
- Level of local government financial participation in the project
- Ratio of total private to public investment in the project
- The likelihood the project would be completed without the tax incentive
- Level of public purpose

Using project rankings and overall evaluations of the project, the MDFB personnel then make recommendations to the MDFB. In addition, applicants make a presentation to the MDFB describing the project and explaining why the project should be considered for tax credits. Project approval occurs at meetings of the MDFB.

After a project is approved, the MDFB notifies applicants of the authorization of a specific amount of tax credits. These authorizations of tax credits are the basis for calculating the annual dollar limit for the program. The MDFB and the applicant sign a TCA that defines the relationship between the two parties and governs the use of contributions made available to the applicant for the project.

The MDFB receives contributions and issues the donor a tax credit certificate for 50 percent of the contribution amount. The contribution is then held by the MDFB and disbursed, less a 4 percent contribution fee, to the applicant based upon approved disbursement requests for project costs.

Reporting

The MDFB provides the General Assembly and the public key program information for the IDTC program through tax credit activity reports.

Agencies administering tax credit programs are required under Section 33.282, RSMo, to submit the estimated amount of tax credit activity for the next fiscal year to the State Budget Director for submission to the Chairmen of the Senate Appropriations and House Budget Committees. In addition to the estimates of tax credit activity, the agencies must also include a cost-benefit analysis of the program for the preceding fiscal year. The annual estimates and cost benefit analyses are submitted on forms called tax credit activity reports. State law requires submission of the tax credit activity report to the State Budget Director by October of each year and to the Chairmen of the Senate Appropriation and House Budget Committees by January 1st of each year.

Scope and Methodology

To gain an understanding of the IDTC program, we interviewed MDFB officials involved in the application and approval process.

To determine whether required procedures were followed, we reviewed 8 tax credit project files, interviewed MDFB staff, and reviewed documentation submitted by the applicants. The projects included additions and improvements to Arrowhead and Kauffman Stadiums in Kansas City, the construction of the Kansas City Chiefs Football Club's training facility on the campus of Missouri Western State University, the construction of student housing and a parking garage at the University of Missouri-Kansas City, the acquisition of real estate and facilities to improve the former Bannister Mall area in Kansas City, the construction of new facilities at the Donald Danforth Plant Science Center in St. Louis, the construction of a hangar at the Wheeler Downtown Airport in Kansas City, and, the St. Louis

Arch grounds project. The MDFB issued approximately $113 million in credits related to these seven projects. An eighth project authorized $6 million in tax credits to fund a mix use development project around Brown Shoe Company in Clayton, Missouri; however, the project was not completed and no tax credits were issued.

To understand how the economic impact of the IDTC program is calculated, we met with representatives of the MDFB responsible for generating the economic impact estimates. We interviewed MDFB staff regarding assumptions provided by the entities to calculate the economic impact of the tax credit.

We obtained aggregate totals of annual tax credit redemptions from the DOR. In accordance with the Missouri Supreme Court decision in the case of *Director of Revenue v. State Auditor* 511 S.W.2d 779 (Mo. 1974), auditors are not provided individual tax returns. As a result, auditors were not able to verify the completeness and accuracy of redemption data provided.

Infrastructure Development Tax Credit Program
Management Advisory Report
State Auditor's Findings

1. Program Efficiency and Effectiveness

The Infrastructure Development Tax Credit (IDTC) is not always a significant factor in whether projects are completed, which reduces program efficiency. In addition, the economic impact of the program is overstated on tax credit activity reports provided to the General Assembly and the program does not include a sunset provision.

1.1 Level of funding

The IDTC generally does not make up a significant portion of project costs, and does not always appear to be necessary for project completion. According to Missouri Development Finance Board (MDFB) data for the 4 years ended June 30, 2014, the tax credit benefit was 5.7 percent of total project costs.

Tax credit agreements reviewed indicate that the Board's participation is either a material precondition or essential to the completion of the project, and the project would not proceed without the assistance provided by the Board. However, our review of projects identified several examples where it is likely the project would have proceeded without the IDTC:

- One project in St. Louis was awarded $4.5 million in IDTCs, but had an estimated total project cost of $45 million that was primarily privately funded.

- Another St. Louis project was authorized $15 million in IDTCs, but had an estimated total project cost of $380 million. This project was funded by a combination of private and public funds, including $10.8 million annually from sales tax proceeds.

- A project in Kansas City was authorized $10.9 million in IDTCs, but had an estimated total project cost of $197 million. This project was primarily funded by a combination of the project developer's equity and public funding in the form of tax increment financing.

An important factor in determining a tax credit program's efficiency and effectiveness is how much economic activity was caused by the incentive, versus how much activity would have occurred without the incentive. Accordingly, MDFB policy requires the evaluation of "the extent to which the project would not proceed but for the approval of the assistance requested from the Board," known as the "but for" test. While project evaluation documentation includes comments that indicate the incentive is a significant factor in the completion of the project, Board policy and project documentation does not include any criteria to assess the "but for" test. However, based on the low levels of tax credit incentive relative to the high level of project costs, it does not appear the IDTC is a significant cause of the economic activity associated with the program. Awarding IDTCs to projects that would proceed without tax credit incentives unnecessarily

increases the costs of the IDTC program, and reduces the efficiency of the program.

1.2 Economic impact

The economic impact of the IDTC is overstated due to cost-benefit calculations attributing the full impact of each project to the program. As previously discussed, IDTC funding is generally a small portion of project costs, so attributing the full economic impact of those projects to the IDTC program is not reasonable.

Projects authorized tax credits through the IDTC program can have several sources of funding, including both private and public. For example, for the fiscal year ended June 30, 2014, the MDFB reported the IDTC program would result in a significant economic impact for the state, returning $13.64 in state revenue for every dollar of tax credits authorized. The significant economic impact is a result of the MDFB reporting project investments totaling $675 million and the creation of 8,300 new jobs. However, IDTC incentives only accounted for 5.7 percent of total project funding, and Missouri Works tax credit incentives of approximately $312 million are proposed for the creation of 7,474 of the 8,300 jobs to be created.

In addition, the economic activity projections provided by the MDFB assume 100 percent of projects authorized tax credits will be completed. However, a review of IDTC historic data showed approximately 11 percent of authorized tax credits were never issued and utilized. It is unreasonable to assume all applicants will complete their projects because some applicants voluntarily withdraw or fail to proceed with construction for various reasons such as lack of financing, changes in economic conditions, or discovery of additional damages to the building.

1.3 Sunset provision

As noted in Report No. 2010-47, *Tax Credit Cost Controls*, issued in April 2010, state law does not include a sunset provision for many tax credits, including the IDTC program. The Sunset Act, passed in 2003, provides for new programs to sunset after a period of not more than 6 years unless reauthorized by the General Assembly or the program is exempted from the Sunset Act. The Act requires the Committee on Legislative Research to review applicable programs before the sunset dates and present a report to the General Assembly regarding the sunset, continuation, or reorganization of each affected program. However, the IDTC program was created prior to the Sunset Act and is exempted.

By adopting a sunset provision for the IDTC program, the General Assembly can better determine whether the program is achieving its intended purpose and whether program funding should be increased, decreased, or eliminated.

Recommendations

The MDFB:

1.1 Develop criteria to evaluate the extent to which the project would not proceed but for IDTC incentives, and emphasize the approval of projects that would not proceed without the assistance of the tax credit.

1.2 Report economic benefit projections to the General Assembly that more accurately reflect program performance.

The General Assembly:

1.3 Establish a sunset provision for the IDTC program.

Auditee's Response

1.1 The benefit conferred on and derived by the project is the amount of the contribution net of fees. The credits are 50 percent of the contribution so the actual participation benefit is approximately double the number cited by the SAO report.

The size of credits requested, and approved, vary considerably per project in proportion to total project costs. For smaller projects the proportion of credit to total costs is generally higher than for larger projects. The percentage of contributions, and therefore credits, per project is impacted by a number of factors. These factors include: the annual maximum amount of credits that can be approved—the Board credit cap is $10 million per calendar year however, the cap can go to a maximum of $25 million per calendar year with the consent of three cabinet officials; a reasoned determination by staff and the Board on whether a project can be completed with a reduced level of contribution thereby reducing the amount of credits approved; a desire to allocate the credits toward the most beneficial projects while maintaining as broad a distribution as possible in both the number of projects that can be done and in increased regional distribution. In the larger projects the cap plays a significant role in the amount of credits that can be authorized per project.

The Board will continue to apply its best reasoned judgment in the consideration and approval of credits to strive to participate only in projects that need its support.

1.2 The approval of the credit is predicated upon a legislative finding by the Board that the project would not be done without the tax credit. The finding is buttressed by representations by the public entity and the beneficiary that the project would not proceed without the Board's assistance. Therefore the full benefits projected to be derived from the project are considered in the impact analysis.

At the same time the economic benefit projections performed by MDFB through the Department of Economic Development for the IDTC program are performed in accordance with Section 33.282.2, RSMo. This reporting recognizes a cost benefit result both with and without other state incentive funding included.

The MFDB will continue to look at separating out immediate and long-term project benefits not directly caused by the use of the credit and discount these from the impact analysis.

Infrastructure Development Tax Credit Activity

The following table lists the Infrastructure Development tax credits authorized, issued, and redeemed for fiscal years 2004 through 2014. The figures presented reflect amounts provided as of our fieldwork completion and may not reflect amounts reported by the MDFB on past or future tax credit activity reports.

Fiscal Year		Amount Authorized	Amount Issued	Amount Redeemed
2004	$	74,454,462	73,145,278	10,020,578
2005		5,048,747	4,279,873	25,953,799
2006		70,680,399	70,338,009	21,858,725
2007		7,841,375	4,519,875	24,706,809
2008		22,645,080	13,397,933	19,877,329
2009		35,424,600	33,416,100	26,916,508
2010		6,500,000	6,497,827	13,970,215
2011		693,000	303,143	25,597,348
2012		13,313,670	12,818,688	33,444,754
2013		15,612,310	11,021,969	14,804,416
2014		16,434,161	11,021,710	19,474,878
Totals	$	268,647,804	240,760,405	236,625,359

Thomas A. Schweich

Missouri State Auditor

Thirty-Third Judicial Circuit

City of Miner
Municipal Division

December 2014

Report No. 2014-143

http://auditor.mo.gov

Thomas A. Schweich
Missouri State Auditor

CITIZENS SUMMARY

Findings in the audit of the Thirty-Third Judicial Circuit, City of Miner Municipal Division

Missing Monies

In July and August 2014, audit procedures identified discrepancies between accounting and deposit records, and we determined monies totaling at least $14,398 were missing. Receipts totaling $12,398 recorded on 108 receipt slips issued by the municipal division for fines and court costs and the Police Department for bonds, and transmitted to the city were not deposited. After the initial receipt discrepancy was discussed with municipal division and city personnel in July 2014, changes were made to the city's electronic receipt report to alter receipt amounts previously recorded. We determined amounts recorded for 19 receipt slips, totaling $2,000, were altered when compared to the city's original electronic receipt report. The City Prosecuting Attorney contacted the Missouri State Highway Patrol to investigate possible missing monies. The City Clerk was suspended with pay on September 19, 2014, terminated by the city on October 3, 2014, and charged with felony theft/stealing on December 22, 2014.

Accounting Controls and Procedures

Neither the municipal division nor city personnel perform adequate supervisory or independent reviews of accounting functions and records. Proper segregation of duties within the municipal division is not possible because the Municipal Court Clerk is the only municipal division employee. Neither the Municipal Judge nor city personnel provide adequate supervision or a review of the work performed by the Municipal Court Clerk. In addition, no one independent of the cash custody and record-keeping functions reconciles recorded receipts to deposits, or reviews disbursements. The Municipal Court Clerk also does not always transmit monies timely to the city and the city does not always deposit court monies timely. Several employees handle municipal division receipts before deposit, and there is not adequate documentation to support the transmittal of monies from one employee to another. The City Collector does not perform a reconciliation to ensure the composition of monies transmitted by the Municipal Court Clerk to the city agree to the composition of monies remitted to the City Collector for deposit. In addition, copies of the City Collector's deposit slips are not provided to the Municipal Court Clerk to support the amounts deposited.

Bond Liabilities and Disbursements

The Municipal Court Clerk does not prepare a list of open bonds for comparison to the reconciled bond bank account balance, and is unable to agree open bonds to the account balance. The municipal division has not adequately reviewed the status of old open bonds held in the municipal division bond bank account. The August 31, 2014, list of open bonds consists of 114 bonds totaling $33,831. Forty-eight of these bonds, totaling $17,375, are over 5 years old, with 4 of those bonds dating back to 2001. The City Clerk did not always accurately calculate monthly disbursements of fines, court costs, and bonds, and did not always prepare correct monthly court reports submitted to the state. For disbursements from the municipal

division bond bank account, the Mayor's signature stamp is not adequately controlled and the City Treasurer sometimes signs checks in advance.

Municipal Division Procedures	The Police Department and the municipal division do not work together to ensure the numerical sequence and ultimate disposition of all tickets issued are accounted for properly. Of 159 tickets reviewed, 4 tickets were missing, 10 tickets had the incorrect ticket number entered into the Police Department's computerized system, and 23 tickets were voided. The Police Department does not follow a consistent policy for the handling of voided tickets. The municipal division has not provided a report of traffic violation tickets and associated fines and court costs revenues to the city for inclusion in the calculation and reporting required in the city's annual financial report filed with the State Auditor's office. The city's accounting of the percent of annual general operating revenue from fines and court costs for traffic violations was not accurate. The municipal division has been inappropriately charging and collecting court costs of $7 for the statewide Court Automation Fund fee since at least June 2000. The total amount collected in error likely exceeds $50,000. Additionally, the Municpal Court Clerk does not file a monthly report of cases heard with the city.

In the areas audited, the overall performance of this entity was **Poor**.*

*****The rating(s) cover only audited areas and do not reflect an opinion on the overall operation of the entity. Within that context, the rating scale indicates the following:

Excellent: The audit results indicate this entity is very well managed. The report contains no findings. In addition, if applicable, prior recommendations have been implemented.

Good: The audit results indicate this entity is well managed. The report contains few findings, and the entity has indicated most or all recommendations have already been, or will be, implemented. In addition, if applicable, many of the prior recommendations have been implemented.

Fair: The audit results indicate this entity needs to improve operations in several areas. The report contains several findings, or one or more findings that require management's immediate attention, and/or the entity has indicated several recommendations will not be implemented. In addition, if applicable, several prior recommendations have not been implemented.

Poor: The audit results indicate this entity needs to significantly improve operations. The report contains numerous findings that require management's immediate attention, and/or the entity has indicated most recommendations will not be implemented. In addition, if applicable, most prior recommendations have not been implemented.

THOMAS A. SCHWEICH
Missouri State Auditor

Presiding Judge
Thirty-Third Judicial Circuit
and
Municipal Judge
and
Honorable Mayor
and
Members of the Board of Aldermen
Miner, Missouri

We have audited certain operations of the City of Miner Municipal Division of the Thirty-Third Judicial Circuit in fulfillment of our duties under Chapter 29, RSMo. The scope of our audit included, but was not necessarily limited to, the year ended August 31, 2014. The objectives of our audit were to:

1. Evaluate the municipal division's internal controls over significant financial functions.

2. Evaluate the municipal division's compliance with certain legal provisions.

3. Evaluate the municipal division's compliance with certain court rules.

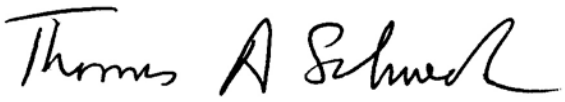
4. Evaluate the city's compliance with Section 302.341.2, RSMo, which restricts the amount of fines and court costs that may be retained from traffic violations.

Our methodology included reviewing written policies and procedures, financial records, and other pertinent documents; interviewing various personnel of the municipal division, as well as certain external parties; and testing selected transactions. We obtained an understanding of internal controls that are significant within the context of the audit objectives and assessed whether such controls have been properly designed and placed in operation. We also obtained an understanding of legal provisions that are significant within the context of the audit objectives, and we assessed the risk that illegal acts, including fraud, and violations of other legal provisions could occur. Based on that risk assessment, we designed and performed procedures to provide reasonable assurance of detecting instances of noncompliance significant to those provisions.

We conducted our audit in accordance with the standards applicable to performance audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform our audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides such a basis.

The accompanying Organization and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the procedures applied in our audit of the division.

For the areas audited, we identified (1) deficiencies in internal controls, (2) noncompliance with legal provisions, (3) noncompliance with court rules, and (4) noncompliance with Section 302.341.2, RSMo. The accompanying Management Advisory Report presents our findings arising from our audit of the City of Miner Municipal Division of the Thirty-Third Judicial Circuit.



Thomas A. Schweich
State Auditor

The following auditors participated in the preparation of this report:

Deputy State Auditor:	Harry J. Otto, CPA
Director of Audits:	Regina Pruitt, CPA
Audit Manager:	Robyn Vogt, M.Acct., CPA
In-Charge Auditor:	Gina Henley, MBA
Audit Staff:	Marlon McDaniels, M.Acct.

1. Missing Monies

From August 2012 through June 2014 municipal division receipts totaling at least $14,398 were recorded by the court and properly transmitted to the city; however, after released by the court, these monies were not deposited by the city. In addition, some essential records documenting amounts received by the city were altered. See Appendixes A and B for details regarding undeposited receipts and altered records.

In July and August 2014, audit procedures identified discrepancies between accounting and deposit records, and we determined monies were missing. We notified the Municipal Judge, Mayor, and City Prosecuting Attorney of our concerns on September 16, 2014. The City Prosecuting Attorney contacted the Missouri State Highway Patrol to investigate possible missing monies. Stephanie Turner, City Clerk, was suspended with pay on September 19, 2014, terminated by the city on October 3, 2014, and charged with felony theft/stealing by the Scott County Prosecuting Attorney on December 22, 2014. Ms. Turner had served as the city's Administrative Assistant from October 2011 until May 2014, when she was appointed interim City Clerk. She was appointed City Clerk in June 2014. The city did not hire a replacement Administrative Assistant until August 2014. The city hired a temporary City Clerk in September 2014 and a new City Clerk in October 2014.

As stated in the State Auditor's Report, the scope of our audit included, but was not necessarily limited to, the year ended August 31, 2014. After identification of missing monies and the method used to perpetrate and conceal the theft, we also applied limited procedures to municipal division receipts for the period September 2011 through August 2013 for the purpose of identifying and quantifying possible additional missing monies.

The Municipal Court Clerk is primarily responsible for receipting and recording all municipal division fines and court costs, and transmitting these monies to the city for deposit into the city's general bank account. In the Municipal Court Clerk's absence, the city's Administrative Assistant or City Clerk issues receipt slips for monies received. Bond monies are collected by police officers. The Municipal Court Clerk then collects the bond receipt slip book and the bond monies from the Police Department, records the bonds into the municipal division's bond ledger, and transmits the bonds to the city for deposit into the municipal division bond bank account. All disbursements from the bond account and the city's general account relating to municipal division monies are made by the City Clerk.

Undeposited receipts

Receipts totaling $12,398 recorded on 108 receipt slips issued by the municipal division for fines and court costs and the Police Department for bonds, and transmitted to the city were not deposited.

When the Municipal Court Clerk transmitted monies to the city for deposit, he provided the fines and court costs receipt slip book and the bond receipt slip book to the Administrative Assistant or City Clerk, along with calculator tapes documenting the amounts transmitted. The Administrative Assistant or City Clerk would initial and date the last issued receipt slip in the manual receipt slip books verifying the transmittal of monies through the last issued receipt slip. The Administrative Assistant or City Clerk recorded municipal division receipts (fines, court costs, and bonds) into an electronic receipt report and turned over these monies to the City Collector for deposit.

Our review of municipal division receipt records and city receipt and deposit records for the period September 1, 2011, to August 31, 2014, identified the following discrepancies.

- Our initial review of municipal division receipt slips issued for January 2014 identified discrepancies between the amounts recorded on the receipt slips and amounts recorded on the city's electronic receipt report. For example, $450 was recorded on receipt slip number 35289; however, $300 was recorded on the city's receipt report for receipt slip number 35289, indicating a shortage of $150. Only $300 from this receipt was recorded as being deposited, and the remaining $150 is unaccounted for. Receipt slip number 35289 was included with other fines and court costs transmitted to the city on January 28, 2014. The fines and court costs receipt slip book indicated the Administrative Assistant had initialed and dated the receipt slip book verifying transmittal of the monies from the Municipal Court Clerk. It is not clear if the Administrative Assistant or the City Clerk recorded the receipts on the city's receipt report.

- Due to the discrepancy noted in January 2014, we expanded our work to the period September 1, 2011, through August 31, 2014. This audit work identified numerous other undeposited receipts when comparing the municipal division receipt slips to the city's receipt report (see Appendix A). The Administrative Assistant, who became the City Clerk in May 2014, had initialed and dated the receipt slip books verifying transmittal of the monies from the Municipal Court Clerk, for all but 2 of the transmittals identified with discrepancies. For 1 of these 2 transmittals, someone recorded the date, but did not initial the receipt slip book and for the other transmittal no one recorded a date or initialed the receipt slip book. In addition, while the Administrative Assistant initialed and dated the receipt slip books for most transmittals made beginning in March 2012, it is not clear if she or the former City Clerk recorded the receipts on the city's receipt report.

Altered receipt report

After we discussed the initial receipt discrepancy with municipal division and city personnel in July 2014, someone made changes to the city's

electronic receipt report to alter receipt amounts previously recorded. We determined someone altered the amounts recorded for 19 receipt slips, totaling $2,000, when we compared the electronic receipt report provided to us with the original electronic receipt report (see Appendix B).

After identifying that changes had been made to the receipt report, we obtained a copy of an earlier version of the report (original) through the city's computer backup files. A comparison of the altered version of the receipt report with the original version, determined the amount listed for 19 receipt slips dated between September 2013 and June 2014 had been changed to agree to the amount recorded on the receipt slips. Although the receipt report was changed, the report totals for the 8 deposits involving these receipts now reflected more should have been deposited than was actually deposited (see Appendix B). Alteration of the receipt report occurred in July 2014. The Administrative Assistant was appointed City Clerk in May 2014 with the Administrative Assistant position remaining vacant until August. Thus, since May 2014, the Administrative Assistant/City Clerk was the only city employee responsible for receiving the monies transmitted from the Municipal Court Clerk and recording the receipts in the city's receipt report.

The lack of adequate oversight and reconciliations, and inadequate controls, as discussed in the remainder of this report, resulted in the failure to detect the undeposited receipts.

Recommendation

The City of Miner Municipal Division work with law enforcement officials regarding any possible criminal prosecution related to the missing funds, including restitution.

Auditee's Response

The Municipal Judge provided the following written response:

Although the audit found no monies or receipts were found missing while in the custody of the municipal division court, but occurred after the monies or receipts were transferred by the court to the custody of the city, the municipal division court is currently cooperating with, and will continue to cooperate with, law enforcement officials in the investigation of missing funds from the city accounts and any resulting criminal prosecution related thereto, including restitution of funds.

In addition, the court will continue to work with the City of Miner in the city's implementation of procedures to properly and safely account for and deposit receipts received from the court.

The new City Clerk provided the following written response:

The court has found it necessary to implement the Judicial Information System (JIS), the Missouri Courts automated case management system, which will greatly enhance our ability to prevent fraud. We are scheduled to go on-line on January 1, 2015. This system will allow us to completely eliminate handwritten receipts and force proper record keeping regarding bonds and fines. The police officers will still continue to collect bonds from arrested persons; however, there has been a policy formed that requires the officers to only accept money orders. With the new JIS system, the monies received will be recorded electronically then reconciled daily.

2. Accounting Controls and Procedures

We identified significant weaknesses with accounting controls and procedures of the municipal division and the depositing and reconciling of monies by the city. City records indicated the municipal division collected approximately $159,000 in fines, court costs, and bonds during the year ended August 31, 2014.

2.1 Oversight and reconciliations

Neither the municipal division nor city personnel perform adequate supervisory or independent reviews of accounting functions and records. Proper segregation of duties within the municipal division is not possible because the Municipal Court Clerk is the only municipal division employee. The duties of receiving, recording, and transmitting monies to the city for deposit are performed by the Municipal Court Clerk. Neither the Municipal Judge nor city personnel provide adequate supervision or a review of the work performed by the Municipal Court Clerk.

In addition, no one independent of the cash custody and record-keeping functions reconciles recorded receipts to deposits, or reviews disbursements. The receipt and deposit discrepancies (see MAR finding number 1) and disbursement errors (see MAR finding number 3.3) identified in our audit could have been detected through an independent review of receipt, deposit, and disbursement records.

To reduce the risk of loss, theft, or misuse of funds, internal controls should provide reasonable assurance all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by implementing documented supervisory or independent reviews of accounting records. Without a detailed reconciliation of receipt and deposit records, and a documented review of disbursements, there is no assurance all monies have been recorded, deposited, and properly disbursed.

2.2 Receipting, recording, transmitting, and depositing procedures

The municipal division and the city lack procedures to ensure all monies received are receipted, recorded, transmitted, and deposited properly.

Method of payment	The method of payment (cash, check, or money order) was not recorded on numerous receipt slips reviewed. As a result, the composition of receipt slips cannot be reconciled to the composition of monies transmitted to the city or to the composition of monies deposited by the city.
Transmitting/depositing timely	The Municipal Court Clerk does not always transmit monies timely to the city and the city does not always deposit court monies timely. For example, checks and money orders collected for bonds between November 27 and December 30, 2013, totaling $3,525, were not transmitted to the city until December 31, 2013, and $1,255 in cash and $4,127 in checks and money orders collected for fines and court costs between March 1 and March 25, 2014, totaling $5,382, were not transmitted to the city until March 28, 2014. In addition, checks and money orders for bonds transmitted to the city on October 4, 2013, totaling $900, were not deposited until October 10, 2013, and $1,246 in cash and $487 in checks and money orders for fines and court costs transmitted to the city on December 17, 2013, totaling $1,733, were not deposited until December 26, 2013. Timely transmitting and depositing of receipts reduces the risk of loss, theft, or misuse of funds.
City procedures	Municipal division receipts are handled by several employees before deposit, and there is not adequate documentation to support the transmittal of monies from one employee to another. For example, the city does not issue receipt slips for municipal division monies when receiving transmittals. The Municipal Court Clerk does not prepare a transmittal document to support the monies being transmitted to the city; instead, the Municipal Court Clerk provides the fines and court costs receipt slip book and the bond receipt slip book along with the monies at the time of transmittal. The City Clerk or Administrative Assistant will document receipt of the monies by initialing and dating the receipt slip books, and record the municipal division receipts into an electronic receipt report. Monies are then turned over to the City Collector for deposit. However, there is no documentation provided to the City Collector to support the amount transmitted by the City Clerk or Administrative Assistant. As a result, there is no assurance all municipal division monies are properly deposited. The City Collector does not perform a reconciliation to ensure the composition of monies transmitted by the Municipal Court Clerk to the city agree to the composition of monies remitted to the City Collector for deposit. In addition, no copies of the City Collector's deposit slips are provided to the Municipal Court Clerk to support the amounts deposited. As noted in MAR finding number 1, we identified numerous discrepancies between the municipal division receipts transmitted to the city and the amounts deposited.

Without reconciling the composition of receipts to the composition of monies transmitted and the composition of monies deposited, the city cannot ensure monies collected are ultimately deposited.

Conclusion

Failure to implement adequate receipting, recording, transmitting, and depositing procedures increases the risk that loss, theft, or misuse of monies will go undetected as noted in MAR finding number 1.

Recommendations

The City of Miner Municipal Division:

2.1 Ensure documented periodic independent or supervisory reviews of receipt, deposit, and disbursement records are performed.

2.2 Establish procedures to improve receipting, recording, and transmitting controls to ensure the method of payment is indicated for all receipts and monies are transmitted to the city timely. In addition, work with the city to ensure the composition of municipal division receipts is reconciled to the composition of deposits, and receipts are deposited timely.

Auditee's Response

The Municipal Judge provided the following written responses:

2.1 The court will begin a practice of preparing monthly reports of all receipts of the court, transmittals of monies to the city, and verified bank deposits. Such monthly reports shall be provided to the Municipal Judge and city administration prior to the following month's regular session of court.

2.2 Although the system the Municipal Court Clerk has used in documenting the transmittal of monies from the court to the city (providing fines and court costs receipt slip book and bond receipt slip book along with monies at the time of transmittal, and the City Clerk documenting receipt of the monies by initialing and dating the receipt slip books) was said to be a good system by state auditor staff in meetings with the court, and no changes being suggested at that time, the court will continue to enhance the receipting, recording, and transmitting controls to include method of payments, and establish procedures for regular, timely transmittal of monies to the city. In addition, the court will require reconciliation of the composition of court receipts with the composition of timely deposits, to include copies of verified bank deposit receipts for all court funds.

The court is currently implementing the JIS system. It is hoped the automated system will assist in the implementation of suggested controls and reports. When the court determines the capabilities of

the JIS system, the court will address any additional controls deemed necessary that are not provided by the JIS system.

The new City Clerk provided the following written responses:

2.1 The issue of segregation of duties will be taken care of when we implement the JIS system. We have 3 employees that will be involved in the daily JIS system process in court collections and disbursements. The JIS system allows the Municipal Court Clerk and Administrative Assistant to sign on individually to collect payments. Each day the monies and receipts will be reconciled by the City Clerk within the JIS system and proper disbursements will be made. The final step will be filing the deposit with the City Collector who double checks the deposit amounts.

2.2 Our new policy regarding the reconciliation and deposits will include language that will require the City Clerk to reconcile daily and the court deposit be made by the City Collector daily (no later than 24 hours). All JIS system reports that display the amount collected and to be deposited will also be provided to the City Collector for the second reconciliation of the deposit.

3. Bond Liabilities and Disbursements

The municipal division's procedures related to identifying, reconciling, and monitoring bond liabilities need improvement. In addition, the city made errors in the disbursement of court costs and bonds, and has inadequate disbursement controls.

3.1 Bond liabilities and reconciliations

The Municipal Court Clerk does not prepare a list of liabilities (open bonds) for comparison to the reconciled bond bank account balance, and is unable to agree open bonds to the account balance.

At our request, the Municipal Court Clerk prepared a list of open bonds at August 31, 2014, and the list totaling $33,831 exceeded the reconciled bank balance of $31,774 by $2,057, indicating a shortage in the account. In addition, bond disbursements from November 2012, totaling $2,150 (see section 3.3), were not properly disbursed from the bond account to the city's general account. Had these bonds been disbursed, an additional shortage of $2,150 would exist in the bond account. Considering these discrepancies, there is little assurance bond monies are accounted for properly.

Section V.B. of Municipal Court Operating Order Number 1 requires the Municipal Court Clerk to submit to the city a monthly open bond report. Monthly lists of open bonds are necessary to ensure all bond dispositions have been properly recorded. In addition, monthly reconciliations between the open bonds maintained by the court and the monies held in the bond bank account are necessary to ensure proper accountability over open cases

and to ensure monies held in trust by the city are sufficient to meet liabilities.

3.2 Review of open bonds

The municipal division has not adequately reviewed the status of old open bonds held in the municipal division bond bank account. The August 31, 2014, list of open bonds consists of 114 bonds totaling $33,831. Forty-eight of these bonds, totaling $17,375, are over 5 years old, with 4 of those bonds dating back to 2001. The municipal division had attempted to refund 8 of these bonds, totaling $1,365, but the disbursements were returned due to incorrect addresses. The Municipal Court Clerk indicated the municipal division did not previously forfeit bonds if defendants failed to appear in court; however, the current Municipal Judge is reviewing the old bonds and will work with the City Prosecuting Attorney to ensure the bonds are applied, forfeited, or refunded timely.

The failure to routinely review open bonds and apply, forfeit, or refund monies when appropriate increases the volume of cases requiring monitoring and deprives the state, city, or others the use of those monies. If refunding is appropriate, but proper payees cannot be located, the monies should be disposed of in accordance with state law.

3.3 Monthly disbursements and reports

The City Clerk did not always accurately calculate monthly disbursements of fines, court costs, and bonds, and did not always prepare correct monthly court reports submitted to the state.

- The City Clerk did not correctly calculate disbursements for October 2013 and June 2014. She did not include monies collected in October 2013 for 1 receipt totaling $83, and for 22 receipts collected in June 2014, totaling $1,108, on the monthly disbursement spreadsheet. As a result, she understated transfers to the city for Crime Victim's Compensation (CVC) and Law Enforcement Training (LET) fees and disbursements to the state for CVC, Court Automation Fund (CAF), Peace Officers Standards and Training (POST), and Sheriff's Retirement Fund (SRF) fees.

- The City Clerk did not correctly calculate disbursements for May 2014. She duplicated 10 receipts, totaling $1,181, on the monthly disbursement spreadsheet. As a result, she overstated transfers to the city for CVC and LET fees and disbursements to the state for CVC, CAF, POST, and SRF fees.

  The City Clerk did not properly disburse bond monies to be applied to fines and court costs for November 2012, totaling $2,150 (see section 3.1). The bond amount to be applied to fines and court costs is determined monthly by the Municipal Court Clerk. The City Clerk then prepares a disbursement check to transfer the monies from the

municipal division bond bank account to the city's general bank account. However, no record of this disbursement could be provided by the City Clerk.

- The City Clerk did not always properly prepare monthly Municipal Division Summary Reporting Forms submitted to the Office of State Courts Administrator (OSCA). She transposed the amounts reported for the January 2014 collection of the LET fee ($2 per case) and the POST fee ($1 per case) on the monthly report submitted to the OSCA. In addition, since the monthly report is prepared from the monthly disbursement spreadsheet, the disbursement calculation errors noted above for October 2013, May 2014, and June 2014, resulted in the reporting of incorrect disbursement totals to OSCA on the corresponding monthly reports.

To ensure amounts disbursed to the city and state are correct, and monthly reports are accurate, the municipal division should reconcile amounts included on the various reports with amounts posted to city records and subsequently disbursed. Monthly reconciliations are necessary to ensure all accounting records balance, transactions are properly recorded, and any errors or discrepancies are timely detected.

3.4 Disbursement controls

The Mayor's signature stamp is not adequately controlled and the City Treasurer signs checks in advance.

The City Collector has custody of a facsimile stamp of the Mayor's signature and uses the stamp to sign checks, with no subsequent review performed by the Mayor. In addition, the City Treasurer occasionally signs checks in advance. Disbursements are prepared by the City Clerk and signatures of the Mayor, City Treasurer, and City Clerk are required for all disbursements from the municipal division bond bank account. The practice of using a signature stamp and signing checks in advance does not allow for proper review of the documentation to support the disbursement and diminishes the control intended by multiple signatures.

To reduce the risk of misuse, access to signature stamps should be limited and checks should not be signed in advance. If the Mayor is unavailable to sign checks, he should subsequently document his review of disbursements on which his signature is applied.

Recommendations

The City of Miner Municipal Division:

3.1 Prepare monthly lists of open bonds and reconcile the lists to the reconciled bank balance. Unidentified differences should be promptly investigated and resolved.

3.2 Routinely review the list of open bonds and disburse or dispose of monies as appropriate.

3.3 Develop procedures to ensure the monthly distributions are properly calculated and disbursed, and amounts reported on monthly municipal division reports are accurate.

3.4 Work with the city to limit access to the Mayor's signature stamp to maintain the controls intended for multiple signatures on checks and discontinue allowing check signers to sign checks in advance.

Auditee's Response

The Municipal Judge provided the following written responses:

3.1 The court will begin a practice of preparing monthly lists of open bonds and reconciling the lists to the current verified bond bank balance. Such monthly reports shall be provided to the Municipal Judge and City Prosecuting Attorney prior to the following month's regular session of court.

3.2 Upon receipt of the monthly list of open bonds, monies shall be disbursed or other appropriate disposition, as part of the court's regular monthly procedures.

3.3 Proper accounting procedures will be used to accurately calculate and disburse fines, court costs, and bond receipts, with results included in monthly reports.

3.4 The court will work with the city to limit access to the Mayor's signature stamp used on court related checks, and to discontinue the practice of checks being signed in advance.

The new City Clerk provided the following written responses:

3.1 Since the state audit, the Municipal Court Clerk has created a report that reflects all open bonds and cases. The court is in the process of disposing of old bonds through forfeiture procedures.

3.2 The Municipal Judge, City Prosecuting Attorney, and Municipal Court Clerk are currently working together to determine the status of open cases so when the cases are entered into the JIS system we will start with a clean slate of good information.

3.3 The JIS system will cause the disbursements to become automated and reconciled by the City Clerk. The JIS system will have its own bank account that will be automatically coded properly and will be easily reconciled.

3.4 The City Treasurer no longer pre-signs any checks for the city. All checks issued are individually signed by 3 signors, City Clerk, City Treasurer, and Mayor after the draft is printed. The Mayor no longer provides a signature stamp to any employee.

4. Municipal Division Procedures

Procedures related to ticket accountability and monitoring excess revenues need improvement. Audit work did not identify significant noncompliance with Section 302.341.2, RSMo, but determined the need for better records and monitoring procedures by the municipal division and city to ensure full compliance with state law. In addition, the municipal division has been inappropriately charging and collecting court costs for the CAF and does not file a monthly report of cases heard with the city as required.

4.1 Ticket accountability

The Police Department and the municipal division do not work together to ensure the numerical sequence and ultimate disposition of all tickets issued are accounted for properly.

The Police Department tracks the ticket book numbers assigned to each police officer on a log. When tickets are issued, officers enter the ticket information into a computerized system. After tickets are reviewed by supervisory personnel within the Police Department, the tickets, with exception of those voided or filed in the Circuit Court, are forwarded to the municipal division to be entered onto the docket and processed. Neither the Police Department nor the municipal division performs procedures to review the numerical sequence of tickets issued or processed to identify missing tickets.

Missing tickets

Four tickets were missing out of 159 tickets reviewed. Upon inquiry, Police Department personnel could not locate any copies of these tickets, and believe these tickets may have been voided; however, the department did not retain these tickets.

Incorrect ticket numbers

Also, for 10 of 159 tickets reviewed, the Police Department incorrectly entered the ticket number into the Police Department's computerized system, making it difficult to ensure the ticket had been properly filed with the municipal division.

Voided tickets

In addition, 23 of 159 tickets reviewed were voided; however, the Police Department does not follow a consistent policy for the handling of voided tickets. For example, all copies of voided tickets are not always retained, voided tickets are not always entered into the Police Department's computerized system, and the purpose for voiding a ticket is not always documented.

Conclusion

Section VII.D. of Municipal Court Operating Order Number 1 requires the Municipal Court Clerk to work jointly with the Police Department to

account for all traffic tickets in numerical sequence and maintain a record of the disposition of all tickets assigned and issued by the Police Department. Without properly accounting for the numerical sequence and ultimate disposition of tickets issued, the department and municipal division cannot ensure all tickets are properly submitted for processing. A record should be maintained to account for the ultimate disposition of each ticket to decrease the risk of loss, theft, or misuse of funds. In addition, to ensure all voided tickets can be properly accounted for, written policies and procedures should be prepared for the handling of voided tickets.

4.2 Monitoring of excess revenues

The municipal division has not provided a report of traffic violation tickets and associated fines and court costs revenues to the city for inclusion in the calculation and reporting required in the city's annual financial report filed with the State Auditor's office (SAO).

The municipal division does not have procedures in place to identify traffic violation tickets and the associated fines and court costs collected and transmitted to the city. This information is needed by the city to calculate the percent of annual general operating revenue from fines and court costs related to traffic violations, determine whether excess revenues should be distributed to the state Department of Revenue, and provide an accounting of the percent in its annual financial report as required by state law.

The city's fiscal year end August 31, 2013, audited financial report was timely filed with the SAO, and included an accounting of the percent. However, our review determined the reported percent was not accurate. This accounting indicated, "Revenues from traffic fines are unknown but determinable." The 9.1 percent reported was calculated using total fines and court costs irrespective of the related violation (thus including non-traffic violations). The accounting also indicated that because the percent is well below the statutory maximum percentage allowed, it was not necessary to calculate the amount of fines and court costs and violations generated just from traffic violations. With the completion of its current fiscal year (September 1, 2013, through August 31, 2014), the city will again be required to report the percent of annual general operating revenue from fines and court costs related to traffic violations in its annual financial report. Thus, the municipal division needs to establish procedures and records to identify applicable traffic violations and the related fines and court costs revenues to assist the city in complying with state law.

Effective August 28, 2013, Section 302.341.2, RSMo, was amended, reducing the threshold for remitting excess revenues to the state, and requiring cities to provide an accounting of the percent of annual general operating revenue from fines and court costs for traffic violations in its annual financial report submitted to the State Auditor's office as required by Section 105.145, RSMo. Section 302.341.2, RSMo, further provides that a

city that is noncompliant with the law and fails to make an accurate or timely report ". . . shall suffer immediate loss of jurisdiction of the municipal court of said city . . . on all traffic-related charges until all requirements of this section are satisfied."

4.3 Court automation fee

The municipal division has been inappropriately charging and collecting court costs of $7 for the statewide CAF fee since at least June 2000. All monies collected for the CAF are remitted to the state on a monthly basis. The municipal division collected CAF fees totaling $5,159 for the year ended August 31, 2014. The total amount collected in error likely exceeds $50,000.

The municipal division has been assessing the CAF fee pursuant to Sections 488.012.3(5) and 488.027, RSMo, and Supreme Court Operating Rules 21.01(a)(4) and 21.03. However, according to OSCA personnel, only courts using or implementing the statewide court automation system, or municipal courts where the Associate Circuit Division Judge hears the case and the case is processed by the Circuit Court, should be assessing the $7 CAF fee. Since the municipal division cases are heard by a Municipal Judge and the municipal division has not implemented the statewide court automation system, the municipal division should not be assessing this fee. In addition, neither the municipal division nor the city could locate a municipal ordinance supporting the collection of the CAF fee.

The municipal division should review all court costs to ensure fees are assessed in accordance with state law and Supreme Court Operating Rules. In addition, although the municipal division is working with the OSCA to implement the statewide court automation system within the next few months, the municipal division should review the past handling of the CAF fees with the OSCA to determine if any action should be taken.

4.4 Report of cases heard

The Municipal Court Clerk does not file a monthly report of cases heard with the city. Without such a report, the city cannot effectively monitor municipal division activity and ensure monies are properly remitted.

Section 479.080.3, RSMo, and Supreme Court Operating Rule 4.29 require the Municipal Court Clerk to prepare a monthly report of all cases heard in the municipal division court, including the names of the defendants and fines and court costs imposed, to be verified by the Municipal Court Clerk or Municipal Judge and filed with the city.

Recommendations

The City of Miner Municipal Division:

4.1 Work with the Police Department to ensure the numerical sequence and ultimate disposition of all tickets are accounted for properly. In

addition, the Police Department should prepare written policies and procedures for the handling of voided tickets.

4.2 Develop procedures and records to identify applicable traffic violations and the associated fines and court costs revenues and provide this information to the city.

4.3 Review all court costs to ensure fees are assessed in accordance with state law and Supreme Court Operating Rules. In addition, review the past handling of the CAF fees with the OSCA to determine if any action should be taken.

4.4 Ensure a monthly report of cases heard in the municipal division is prepared and filed with the city in accordance with state law and the Supreme Court Operating Rule.

Auditee's Response

The Municipal Judge provided the following written responses:

4.1 The court will continue to work with the Miner Police Department on implementation of the department's new written policy and procedures to ensure numerical sequencing of tickets, and to properly account for the disposition of all tickets, and which will require a record of and written explanation of the issuing officer of all voided citations.

4.2 Procedures will be developed through court automation to identify applicable traffic violations and associated fines and court costs revenues to be provided to the city.

4.3 The City of Miner is currently in the process of reviewing the city's municipal code, including authorized court costs, to determine such costs are current, proper and authorized. The city is contracting with Municode service to update and organize the city's municipal code. The city has already made amendments to court costs authorized by ordinance to bring into compliance with current state statutes. We will discuss with OSCA the handling of CAF fees collected prior to automation.

4.4 Procedures will be developed through court automation to prepare monthly reports of cases heard in the municipal division court, which will be timely filed with the city.

The new City Clerk provided the following written responses:

4.1 We are moving forward in developing a procedure that will allow complete and accurate record keeping of citations issued out to

police officers. The Police Department has already changed the way the officers account for their ticket books. They now handwrite the citation numbers and person's name with charge on their ticket book sleeve, which is turned in after the book is empty. The Police Chief has started a spreadsheet to document ticket books issued. The ticket books are now kept in the Police Chief's office for him to track. A comprehensive policy on voided tickets is currently being developed. The Police Chief ensured that supervisors would provide more oversight as officers enter the tickets into the computerized system.

4.2 We are currently developing a policy to enable us to accurately identify traffic violation tickets, and associated fines and court cost collections that can be included in the annual financial report.

4.3 We have adopted an ordinance that allows the court to collect and disburse the CAF fees as well as a comprehensive ordinance that outlines all collections.

4.4 The Municipal Court Clerk will provide JIS system reports that will be accessible to the City Clerk for an oversight of proper disposal of cases and funds.

The Police Chief provided the following response:

4.1 We are working with the municipal division to ensure the numerical sequence and ultimate disposition of all tickets are accounted for properly. We have developed new policies and procedures for the handling of tickets, including voided tickets. Officers are required to enter all tickets, including voids, into the computerized system. If the ticket was voided, an explanation must be documented. This explanation is sent to the municipal division and also attached to the voided ticket. I am now handling the distribution of ticket books and I have developed a new spreadsheet to track ticket books assigned to each officer. A copy of this spreadsheet will also be sent to the municipal division to track which tickets are outstanding.

Thirty-Third Judicial Circuit
City of Miner Municipal Division
Organization and Statistical Information

The City of Miner Municipal Division is in the Thirty-Third Judicial Circuit, which consists of Mississippi and Scott Counties. The Honorable David Dolan serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo, and by Supreme Court Rule No. 37. Supreme Court Rule No. 37.49 provides that each municipal division may establish a violation bureau in which fines and court costs are collected at times other than during court and transmitted to the city treasury.

Personnel

At August 31, 2014, the municipal division employees were as follows:

Title	Name
Municipal Judge	Franklin Marshall
Municipal Court Clerk	Gary Smith

Financial and Caseload Information

	Year Ended August 31, 2014
Receipts	$159,003
Number of cases filed	992
